Reichert* Industrial Fluid Testing Refractometers

Designed specifically for checking ratio or concentration of water-soluble industrial fluids

Portable testers are ideal for applications including metalworking coolants and lubricants, heat-treating fluids, hydraulic fluids, firefighting foam and plating baths.

- Automatic temperature compensation provides accurate readings without correction tables or temperature measurement
- Temperature-compensation range, 15° to 38°C (59° to 100°F)
- Large, easy-to-read scales and depth of field
- Portable: no batteries or power cord required
- Rugged, chemical-resistant housing

IFT10HP Model

- High precision optical instrument with improved 0-10 scale
- 0.1 scale increments for testing low concentration synthetic cutting and grinding fluids and lubricants
- 10X focusable eyepiece
- Coated antireflection glass optical components improve illumination and shadowline contrast

IFT40 Rhino Model

- Sealed housing and eyepiece; IP67 rated water resistant and dustproof
- Black polycarbonate housing reduces stray light
- 0-30 arbitrary scale is divided into 0.5 increments; accuracy to ±0.25%
- Eyepiece with large depth of focus
- Built for production floor use; impact resistant to withstand repeated drops from three feet

INCLUDES:
Durable plastic carrying case, sample application pipets, calibration adjustment wrench

WARRANTY:
One year

Reichert* Clinical Handheld Refractometers

Portable, lightweight clinical refractometers provide rapid, reliable urine specific gravity and serum or plasma protein concentration readings

- RI scale can be used for dissolved-solids measurements in other aqueous solutions
- Completely sealed for indoor or outdoor use

TS Meter Refractometer

- High-end precision refractometer requires only 0.005mL of sample on prism for accurate analysis
- Automatically temperature compensated through a liquid-filled prism from 16° to 38°C (61° to 100°F)
- Result accuracy and reproducibility are comparable to those of more costly bench-type Abbe* refractometers

TS400 Total Solids Refractometer

- Economical refractometer designed specifically for clinical, chemistry, and classroom labs
- Temperature compensated by a patented, bearing-actuated, bimetallic element; compensates for variations in sample, air, and unit temperature—no temperature-correction charts or temperature measurements needed
- Provides readings from 16° to 32°C (61° to 90°F)

VET360 Veterinary Refractometer

- Determines urine specific gravity and protein concentration in plasma, serum, and peritoneal fluid
- Automatic temperature compensation provides accurate readings regardless of ambient temperature
- Corrects all readings back to standard reference temperature of 20°C (68°F)—provides much greater accuracy than urinometers or reagent strips

INCLUDES:
TS and TS400 Meter Manuals have full sets of conversion tables for protein, urine solids, and refractive index. VET360 Veterinary Refractometer has special scales for large and small animals.

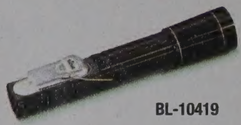
eichert* Goldberg Ultra-Precision Handheld Refractometers

ffer reading accuracy better than most benchtop laboratory refractometers

- Provide rapid, reliable measurements
- For measuring Brix and salinity
- ncorporate the Goldberg method, recognized as the most accurate and precise for handheld refractometers
- deal for use in quality control, research, and clinical laboratories
- Feature a hermetically sealed liquid-filled optical prism that changes ndex with temperature to compensate instantly and automatically for emperature changes
- ▸ Heavy-duty anodized aluminum body
- ▸ Magnified and focusable scales feature easy-to-read markings and divisions



BL-10419

eichert* HP Handheld Refractometers

rtable refractometers are ideal for measuring concentration of solutions, fruit juices, and other ater-soluble fluids

- Patented, bearing-activated, automatic temperature-compensation mechanism, accurate to 0.1° Brix
- Allows direct reading without using correction factor for temperature
- Temperature-compensation range, 15° to 38°C (59° to 100°F)
-)ptical design improves image resolution and provides high contrast for easy viewing of scales
- Coated antireflection glass optical components, including a 10X focusable eyepiece, improve illumination and shadowline contrast
- Rugged, chemical-resistant housing for field use
- Completely sealed—no condensation or dirt on lenses

nple to use

- Place a few drops of sample on exposed face of prism and lower cover plate; then take reading by viewing the large, easy-to-read scale through efractometer eyepiece
- No temperature charts required

13-975-113

CONSIDER THE APPLICATION

Do you need a model specifically designed for enzyme, chromatography, cryogenic, plasma or fla storage? Is an explosion-proof design required? Will a general-purpose unit meet your requirem

- Choose an ultralow-temperature freezer (-86° to -50° or -40°C) for sensitive biological produc vaccines or tissue samples
- Preserve cryogenic samples in a -140°C or -150°C freezer
- Select a general-purpose -30°C or -20°C freezer or 1° to 8°C refrigerator for blood, enzyme, re pharmaceutical storage
- Store chromatography supplies in a refrigerator providing access to instrumentation a temperatures from 1° to 8°C

CONSIDER PERFORMANCE

Do you need basic functionality or advanced performance, controls and mon

Basic Control—provides fundamental monitoring, alarm and communi functions such as adjustable temperature setpoint; key-operated ON/OF switch; overtemperature alarm; and remote alarm contacts.

Moderate Control—offers a mid-range level of monitoring, alarm communication functionality that includes programmable micropro control; alarm setpoints; on-board diagnostics; automatic buck/bo system; automatic incident monitor; and audible/visual alarms.

Advanced Control—delivers detailed monitoring, alarm and communication functions: setpoint security; on-board diagnosti automatic buck/boost system; surge protection; automatic inci monitor; audible/visual alarms; alarm test; battery backup; RS-232 data port; and remote alarm contacts.

Protect the materials and samples you need to do your work by choosing the right freezer, refrigerator or combination refrigerator/freezer.

CONSIDER CAPACITY AND STYLE

While available space is almost always a consideration, the quantity of work and required stora also be taken into account when choosing equipment.

Full-size Uprights—range from 11.5 to 78.8 cu. ft. Slimline* models are narrower than stan upright models and feature thinner walls that optimize capacity.

Chest Models—are available with capacities ranging from 3.1 to 20.5 cu. ft.

Undercounter/Benchtop Models—range from about 4 to 5 cu. ft. Some undercounter mod also be used as freestanding or benchtop units.

For a full selection of Thermo Scientific® Freezers and Refrigerators, see the following pages.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Fisher Scientific* Isotemp* Lab Freezers

Preserve temperature-sensitive reagents, samples and specimens

- Adjustable temperatures between -40° and -18°C (327L Series), -29° and -18°C (all others)
- Capacities from 23.1 to 74.0 cu. ft. (654 to 2096L)
- Average temperature stability: ±3°C
- Exterior-mounted digital display with 0.1°C resolution
- Automatic defrost

Construction

- Steel exteriors (epoxy-coated on 327L Series; white enamel-coated on others)
- Anodized aluminum interior
- CFC-free refrigerant and insulation
- White epoxy-coated steel-wire shelves, adjustable in ½" (1.2cm) increments
- Incandescent lighting with door-activated light switch (except 327L Series)
- Hinged doors with keylocks
- 327L Series models have two insulated inner doors in addition to outer door
- Keyed ON/OFF power switch

Alarms

- Panel-mounted, factory installed
- Digital display with minimum/maximum setpoints, audible alarm, and 24V, 0.5A SPST N.O. relay contacts
- Freestanding, Standard Remote and Deluxe Remote alarm systems available separately; see p. 1578

Seven-day Selectable Temperature Recorder

- Panel-mounted, factory installed
- 6" dia. (15.2cm) chart
- User-selectable temperature ranges
- Single-point calibration; individually calibrated against equipment with calibration certified traceable to NIST*
- Supplied with 60 charts and seven-day scale

† When using leveling legs supplied with unit, add ½" (1.3cm) to the total height.

Thermo Scientific* Revco* General-Purpose Lab Freezers

IntrLogic* microprocessor control simplifies operation, delivers greater accuracy

Ideal for storing reagents, pharmaceuticals, biologicals, enzymes, and other common laboratory materials.

- Temperature factory-preset at -20° or -30°C
- Capacities from 4.9 to 51.1 cu. ft. (139 to 1447L)
- Icon-based controls and displays
- Large, easy-to-read digital display shows temperature within 1°C
- Graphic thermometer is steady green when temperature is normal, flashes top bar for overtemperature, flashes bulb for undertemperature

Microprocessor Control

- Audible/visual warnings for overtemperature, undertemperature or power failure
- Key-operated OFF/ON/ALARM ON master switch for setpoint security
- Push-button alarm test
- Remote alarm contacts
- Alarm silence, ringback and auto reset
- Controller battery backup system

Construction

- Epoxy-coated, scratch-resistant cold-rolled steel interior and exterior finishes
- High-density, 2" thick (5.1cm) CFC-free urethane foam insulation protects against ambient temperature fluctuations
- CFC-free, HFC-blend refrigerant
- Single-door models are hinged on right
- Full-length door handle and keylock
- Doors self-close and lock open at 90°
- Adjustable zinc-plated wire shelves
- 1" (2.5cm) dia. access port with plug on undercounter model

-30°C Freezers

- Automatic defrost and condensate removal
- Sensor automatically initiates defrost cycle on demand, eliminating need for a defrost timer, minimizing frost buildup, and optimizing coil efficiency
- Forced-air circulation improves temperature uniformity, provides faster recovery after door is opened

Left to right: 22-285-655, 22-285-651, 13-991-127 with optional temperature chart recorder.

IntrLogic Microprocessor Control

-20°C Freezers

- Suitable for applications in which slight intermittent coil warming during an automatic defrost cycle is not desired (such as enzyme storage)
- Gravity convection air system for maximum stability without a blower or fan
- Manual defrost

ORDERING INFORMATION:

Alarm systems, temperature chart recorders and power monitors are available separately (see Accessories).

WARRANTY:

Two years, parts and labor

FREEZERS—SPECIAL PURPOSE

Fisher Scientific* Isotemp* Explosion-Proof Freezers

For storing volatile materials in areas with explosive atmospheres or in hazardous locations

- Temperature range: -20° to -12°C or -30° to -18°C, depending on model
- Average temperature stability: ±3°C
- Adjust setpoint while running
- Capacities: 20.6 and 30 cu. ft. (583 and 850L)
- Manual defrost

13-986-150

Safety Features

- Red warning label on front: "Explosion-Proof Freezer"
- Compressors have enclosed overloads, relays
- Top-mounted, explosion-proof thermostats
- Static hot-wall condensers and evaporators are free of electric fans

Construction

- White, baked-on polyester enamel exteriors
- Hinged solid door with keylock
- White epoxy-coated steel interiors with ABS plastic door liner
- CFC-free R404A refrigerant, polyurethane foam insulation

ORDERING INFORMATION:

For 115V 60Hz. Not equipped with line cord and plug; must be hardwired into an appropriately rated conduit box to comply with NEC code.

WARRANTY:

13 months, parts and labor; five years, compressor

COMPLIANCE:

30 cu. ft. model complies with OSHA 29CFR1910.307

CERTIFICATIONS:

UL listed, CSA approved

Capacity	20.6 cu. ft. (583L)	30 cu. ft. (850L)
Temperature Range	-20° to -12°C	-30° to -18°C
Interior D × W × H	22½ × 27 × 57" (57 × 69 × 145cm)	22½ × 32 × 65" (57 × 81 × 165cm)

Amps/Breaker	12/15	4/15
Cat. No.	**13-986-150**	**13-986-525F**
Each	3383.56	5244.32

† Allow 4" (10cm) clearance top, back and sides.

Fisher Scientific* Isotemp* Flammable-Materials Storage Freezers

For storing volatile materials, pharmaceuticals, clinical reagents and biological samples

13-986-428FR

20.6 cu. ft. (583L) Model

- Temperature range: -20° to -12°C with average stability ±3°C
- Manual defrost
- Four fixed shelves (13.5 sq. ft. capacity)

30 cu. ft. (850L) Models

- User-settable temperatures from -25° to -10°C (-13° to +14°F)
- Average ±4° temperature stability at 20°C
- Manual defrost
- Digital display in °C or °F
- Keyed power switch
- Nine shelves (3 fixed, 5 adjustable, 1 bottom; 38.75 sq. ft. capacity)
- With Alarm: Digital display with minimum/maximum setpoints; audible alarm, and 24V, 0.5A SPST N.O. relay contacts; factory-installed, panel-mounted
- With Seven-day Selectable Temperature Recorder: 6" dia. (15.2cm) chart; user-selectable temperature ranges; single-point calibration; individually calibrated against equipment with calibration certified traceable to NIST*; with 60 charts and 7-day scale; factory-installed, panel-mounted

Safety Features

- Sparkproof interiors separate contents from compressor and motor
- Top-mounted hydraulic thermostat and door stop
- Magnetic door gaskets provide airtight seals that insulate and prevent release of hazardous fumes
- Compressors have enclosed overloads, relays and thermostats to prevent sparks from escaping during opening and closing
- Static hot-wall condensers and evaporators are free of electric fans

Construction

- One hinged solid door with keylock
- White, baked-on polyester enamel exteriorwith orange warning label
- White epoxy-coated steel interior with ABS plastic door liner
- CFC-free R404A refrigerant, polyurethane foam insulation

ORDERING INFORMATION:

For 115V 60Hz. Supplied with NEMA 5-15P power cord; requires NEMA 5-15R wall receptacle. Freestanding, Standard Remote and Deluxe Remote alarm systems available separately; see Accessories.

WARRANTY:

13 months parts, and labor; five years, compressor

COMPLIANCE:

30 cu. ft. models comply with NFPA Code 99

Fisher Scientific* Special-Purpose Undercounter Freezers

Compact flammable-materials storage and explosion-proof models

- Adjustable temperatures from -20° to -15°C (-4° to +5°F)
- Capacity, 5.6 cu. ft. (159L)
- Manual defrost
- R-134a CFC-free refrigerant
- 360w compressors
- Baked-on, acrylic enamel exterior
- Easy-to-clean formed interior
- Solid door mounted to open from left

Flammable-Materials Storage Model

- Accidental ignition of refrigerator contents is prevented by specially designed compressor with enclosed overload, relay and hydraulic thermostat
- Static condenser free of electric fan
- Aluminum evaporator coil
- Two fixed shelves, three door shelves
- Requires extra clearance when recessed†

Explosion-Proof Model

- Mechanical assembly design prevents accidental explosion of environmental vapors
- Wiring totally enclosed in sealed pipes
- Hydraulic thermostat enclosed by precision-machined housing
- Two fixed shelves, three door shelves
- Must be hardwired to an appropriately rated conduit box

ORDERING INFORMATION:

Interior dimensions: 15D × 18W × 27½"H (38 × 46 × 70cm). Exterior: 25¼L × 21¼W × 33½"H (64 × 54 × 85cm)†. Net weight: 90 lb. (40.8kg); shipping weight 120 lb. (54.5kg). 120V 60Hz, 3/15 amps/breaker.

WARRANTY:

Two years parts, one year labor

COMPLIANCE:

Flammable-Materials Storage Model complies with NFPA Standard Numbers 45 and 99 and OSHA 29CFR1910.308. Explosion-Proof Model wiring complies with NEC Articles 500-501 for use in Class 1, Groups C and D hazardous locations.

CERTIFICATIONS:

UL listed

Model	Cat. No.	Each
Explosion-Proof	**97-928-1**	2511.04
Flammable-Materials Storage	**97-925-1**	2453.28

† When using leveling legs supplied with unit, add ½" (1.3cm) to the total height. Both models require an additional 1" (2.5cm) clearance from top and sides and 1½" (3.8cm) from back for proper condenser ventilation when recessed.

Thermo Scientific* Revco* Plasma Freezers

Microprocessor control, industrial-quality cabinet construction, and extra-strength refrigeration compressors for demanding blood bank applications

- Preset temperature at -30°C
- Capacities from 4.9 to 51.1 cu. ft. (133 to 1447L)
- Automatic condensate removal and defrost, with sensor that automatically initiates defrost cycle on demand, eliminating need for a defrost timer, minimizing frost buildup, and optimizing coil efficiency
- Positive airflow systems

IntrLogic* Microprocessor Control

- Simplifies operation, delivers greater accuracy
- Icon-based controls and displays
- Preset temperature setpoint
- Graphic thermometer is steady green when temperature is normal; flashes top bar for overtemperature, bulb for undertemperature
- Large, easy-to-read digital display shows temperature within 1°C
- Audible/visual warnings for overtemperature, undertemperature or power failure
- Key-operated OFF/ON/ALARM ON master switch for setpoint security
- Push-button alarm test
- Remote alarm contacts
- Alarm silence, ringback and auto reset
- Controller battery backup system

Construction

- Cold-rolled steel cabinet surfaces finished with high-impact powder paint coating
- One solid door, hinged on right (except 51.1 cu. ft. model: two solid doors with keyed lock, self-close against closed-cell peripheral gasket)
- Full-length door handles
- Adjustable leveling feet
- High-density CFC-free urethane foam insulation protects cabinet interior from ambient temperature fluctuations, minimizes operating costs
- Positive, forced-air circulation maintains uniformity at all shelf levels
- Directional airflow assures quick recovery after door openings
- Heavy-duty, hermetically sealed compressors
- CFC-free refrigerant
- 1" (2.5cm) access port with plug on undercounter model only

Left to right: 22-285-706, 22-285-707, 13-990-83 with optional temperature chart recorder.

her Scientific* Isotemp* Ultrafreezers: Upright Models

secure storage of biological products, viruses, vaccines, and tissue samples

1hp industrial-strength compressors and advanced microprocessor rolled systems ensure precise temperature control. Ideal for both low ient temperature and flexibility testing.

- mperature range: -86° to -50°C
- pacity: 13.4 cu. ft. (379L)†
- anual defrost

roprocessor Control

- e-level controls in door
- mperature setpoints, overtemperature, and undertemperature alarm nits adjust in 1°C increments
- mper-resistant touchpad data entry maintains reliable storage temperature, aranteed in ambient temperatures to 32°C
- -board AC power monitoring with digital readout of actual line voltage vises of unsafe source voltage
- w-voltage safeguard
- lean filter" indicator advises when to clean condenser intake filter
- y-operated switch for power and alarm provides extra security
- itomatic continuous-charge battery backup for full function in case of wer failure

rm Monitoring System

- mperature deviation or power failure triggers audible and visual warning
- gital display of actual alarm battery standby capacity advises when to place battery
- uchpad alarm test function warms internal probe to simulate arm condition
- ilt-in remote alarm contacts allow easy connection to remote systems

struction

- scade refrigeration system uses CFC-free refrigerant‡; CFC-free sulation and packaging
- oor has minimum of 3½" (8.9cm) thick, high-density, CFC-free insulation
- onvenient, one-handed, positive-open door latch for easier opening
- ilt-in keyed door lock for security
- vo independent gaskets form a tight seal to help eliminate frost buildup
- ur stainless-steel interior shelves (three adjustable)
- e ABS plastic inner doors reduce exposure when open
- dia. (2.5cm) access port for adding instrumentation to interior
- avy-duty casters for mobility
- usable air filters

Fisher Scientific* Isotemp* Ultrafreezers: Chest Models

For secure storage of biological products, viruses, vaccines, and tissue samples

Two 1hp industrial-strength compressors and advanced microprocessor-controlled systems ensure precise temperature control. Ideal for both low ambient temperature and flexibility testing.

- Temperature range: -86° to -40°C
- Capacities from 6.8 to 20.5 cu. ft. (193 to 580L)[†]
- Manual defrost

Microprocessor Control

- Temperature setpoints, overtemperature, and undertemperature alarm limits adjust in 1°C increments
- Tamper-resistant touchpad data entry maintains reliable storage temperature, guaranteed in ambient temperatures to 32°C
- On-board AC power monitoring with digital readout of actual line voltage advises of unsafe source voltage
- Low-voltage safeguard
- "Clean filter" indicator advises when to clean condenser intake filter
- Key-operated switch for power and alarm provides extra security
- Automatic continuous-charge battery backup for full function in case of power failure

Alarm Monitoring System

- Temperature deviation or power failure triggers audible and visual warning
- Digital display of actual alarm battery standby capacity advises when to replace battery
- Touchpad alarm test function warms internal probe to simulate alarm condition
- Built-in remote alarm contacts allow easy connection to remote systems

Construction

- Cascade refrigeration system uses CFC-free refrigerant[‡]; CFC-free insulation and packaging
- 1" dia. (2.5cm) access port for adding instrumentation to interior
- Heavy-duty casters for mobility
- Reusable air filters
- Heavy-duty counter-balanced lid has keyed lock
- Double-seal lid gaskets and sublids eliminate frost buildup

Thermo Scientific* Revco* Ultima* PLUS -86°C Upright Freezers

Advanced control platform for labs requiring sophisticated monitoring, alarm and communication functions

Programmable microprocessor control, patented refrigeration system, and state-of-the-art electronics ensure the highest level of sample protection. Plus, these units offer 20% more heat removal capacity, 15% less power consumption, 15% less heat emission, and 40% less noise than other ultralow-temperature freezers.

- Precise temperature control from -86° to -50°C, adjustable in 1°C increments
- Capacities from 17.2 to 24.4 cu. ft. (487 to 691L)
- Easy-to-read LED door-mounted at eye level, with touchpad data entry

Monitoring and Alarm Systems

- On-Board Diagnostics continuously monitor sensors to ensure proper performance
- Life-Guard Alert monitors compressor performance, automatically adjusts to internal and external conditions
- Clean Filter, Alarm Battery Low and Voltage indicators
- Key-operated main power and alarm switch lock temperature and alarm setpoints
- Control Setpoint sets cabinet temperature, Cabinet Temperature displays the temperature
- Audible/visual power and temperature failure alarms automatically activate during a temperature deviation
- Automatic Incident Monitor (AIM) identifies temperature deviation due to power or temperature failure
- Time Delay feature delays restart after power failure
- Extreme Ambient Alert warns if room temperature may affect performance
- Alarm Test simulates temperature alarm condition
- Alarm Reset mutes audible alarm and resets AIM
- Battery backup supplies control panel in case of power failure

Patented Refrigeration System

- CFC-free DuPont* low-stage refrigerants
- 1hp industrial-grade compressors
- Downfeed evaporator
- Washable condenser filter

Construction

- Voltage Buck/Boost corrects line voltage into the unit
- Low Voltage Surge Protection minimizes voltage spikes
- Remote alarm contacts for external alarm/monitoring system
- Two 1" (2.5cm) dia. access ports
- RS-232 data port

13-989-719 with optional built-in temperature chart recorder.

Ultima PLUS Control Panel

- High-strength steel cabinet with corrosion-resistant coating
- Minimum 5" (127mm) CFC-free, foamed-in-place urethane insulation (outer door: minimum 3½" [89mm])
- Integrated Cryolatch* door handle for one-handed operation
- Built-in key lock (padlock compatible)
- Outer door gasket seals with five points of sealing contact
- Inner doors are high-impact ABS plastic with recessed handles
- Stainless-steel interior shelves
- Heavy-duty 2" (5cm) locking, tandem wheel casters

ORDERING INFORMATION:

Optional built-in Temperature Chart Recorder (7-day, 6" dia.) and/or LN_2/CO Backup System must be specified at time of order. Freestanding LN_2/CO_2 Backup System also available. Contact your Fisher Scientific Customer Service Representative for more information.

Thermo Scientific* Revco* Value* PLUS -86°C Upright Freezers

Basic performance and controls for labs requiring fundamental monitoring and alarm electronics

Programmable microprocessor control, patented refrigeration system, and state-of-the-art electronics ensure the highest level of sample protection. All PLUS freezers feature 20% more heat removal capacity, 15% less power consumption, 15% less heat emission, and 40% less noise than other ultralow-temperature freezers.

- Precise temperature control from -86° to -50°C, adjustable in 1°C increments
- Capacities: 17.2, 20.2, 24.4 cu. ft. (487, 572, 691L)
- Easy-to-read LED mounted at knee level, with touchpad data entry

Monitoring and Alarm Systems

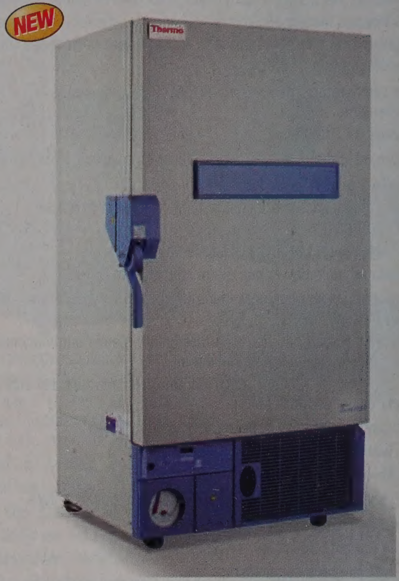
- On-board diagnostics continuously monitor sensors to ensure proper performance
- Key-operated main power and alarm switch
- Control Setpoint sets cabinet temperature, Cabinet Temperature displays the temperature
- Alarm setpoints in 5°C increments
- Audible/visual temperature and power failure alarms automatically activate during a temperature deviation
- Alarm Battery Low indicator
- Time Delay feature delays restart after power failure
- Battery backup supplies control panel in case of power failure

Patented Refrigeration System

- CFC-free DuPont* Suva* low-stage refrigerants
- 1hp industrial-grade compressors
- Downfeed evaporator
- Washable condenser filter

Construction

- Voltage Buck/Boost corrects incoming line voltage into the unit
- Low Voltage Surge Protection minimizes voltage spikes
- Two 1" (2.5cm) dia. access ports
- High-strength steel cabinet with corrosion-resistant coating
- Minimum 5" (127mm) CFC-free, foamed-in-place urethane insulation (outer door: minimum 3½" [89mm])
- Integrated Cryolatch* door handle for one-handed operation
- Built-in key lock (padlock compatible)
- Outer door gasket seals with five points of sealing contact
- Inner doors are high-impact ABS plastic with recessed handles
- Stainless-steel interior shelves
- Heavy-duty 2" (5cm) locking, tandem wheel casters



13-989-723 with optional built-in temperature chart recorder.

Value PLUS Control Panel

ORDERING INFORMATION:

Optional built-in Temperature Chart Recorder (seven-day, 6" dia.) and/or LN_2/CO_2 Backup System must be specified at time of order. Freestanding LN_2/CO_2 Backup System also available. Contact your Fisher Scientific Customer Service Representative for more information.

REVCO

13-990-194 with optional factory-installed temperature chart recorder.

Construction

- Cold-rolled steel with high-impact powder paint exterior finish
- Washable condenser intake filter can be removed easily without tools
- CFC-free refrigerant
- Double-gasket lid ensures tight four-point seal
- 1" (2.5cm) port for access to interior cabinet
- Hermetically sealed industrial compressors are designed to operate safely in ambient temperatures up to 32°C (90°F)
- 5" (12.7cm) thick CFC-free urethane insulation in cabinet, 3½" (8.9cm) in lid
- Recessed heavy-duty swivel casters

ORDERING INFORMATION:

blished interior volumes are nominal; usable capacities may be offset by shelves, drawers, blower coils or cabinet protrusions. For specific cabinet dimensions and allowances, or for rification of clearance tolerances, contact your Fisher Scientific Customer Service Representative.

Thermo Scientific* Revco* Ultima II* SI Ultralow-Temperature Freezers

Super-insulated thin-wall construction, IntrLogic* microprocessor control and Legaci* refrigeration system

Super-insulated, composite wall design maintains insulation R value while reducing wall thickness from typical 5" (12.7cm) to 2" (5.1cm)—increasing interior storage capacity without increasing required space.

- Temperature range: -86° to -50°C
- Capacity: 24.4 cu. ft. (691L)
- Manual defrost

IntrLogic Microprocessor Control

- Independent operating temperature and high/low alarm setpoints
- Key-operated OFF/ON/ALARM ON master switch for setpoint security
- Audible/visual warnings for overtemperature, undertemperature or power failure
- Voltage Boost automatically compensates for low voltage
- Lifeguard Compressor Protection monitors performance and automatically adjusts to conditions
- Automatic Incident Monitor identifies temperature deviation beyond alarm setpoint
- Extreme Ambient Alert warns if room temperature may affect performance
- Display parameters include incoming line voltage, Surge Suppressor Indicator, Voltage Boost Indicator, Digital Battery Indicator, and Clean Filter Light
- RS-232-C data port
- Software package for datalogging and management
- Push-button alarm test
- Controller battery backup system

Legaci Cascade Refrigeration System

- Assures unprecedented temperature reliability for the most critical storage applications
- Designed specifically for use in ultralow-temperature freezers
- Fully integrated technology uses environmentally safe DuPont* Suva* refrigerants that cool the load as well as system components
- Two custom-designed 1hp Copeland* compressors provide the displacement required for optimum efficiency
- Lubricating oils maintain proper viscosity
- Balanced condensers and fans complement the cooling capacity of refrigerants

Construction

- Cold-rolled steel walls
- Super-insulated: panels constructed of a vacuum insulation core, encapsulated by a sealed and evacuated film laminate, and wrapped in DuPont Mylar*
- CFC-free refrigerant

IntrLogic Microprocessor Control (shown with optional backup syst

- Five inner doors—independently mounted with adjustable hinges—for five different storage compartments
- Four shelves (one fixed and three adjustable in 1" [2.5cm] increments) allow varying inventory configurations
- Integrated door handle and latch for easy, one-handed operation
- Key lock with padlock accommodation for extra security
- Manually activated door de-icer/heater minimizes ice buildup around doors
- Pressure equalization port and full-time vacuum relief inside freezer allow rapid re-entry after door closings
- Dual-wheel swivel casters provide easy mobility

hermo Scientific* Revco* Elite* Ultralow-Temperature Chest Freezers

eal for long-term storage of biological materials

- Temperatures range: -86° to -40°C or -40° to -10C°, depending on model
- Capacities: 3.1 to 20.5 cu. ft. (88 to 580L)

icroprocessor Controls

- Extra-large, liquid-crystal digital temperature display
- Tamper-resistant electronic temperature controller
- Low-voltage safeguard
- Clean Filter indicator
- Three-position key switch for main power and alarm system

gaci* Cascade Refrigeration System

- Designed specifically for use in ultralow-temperature freezers
- Assures unprecedented temperature reliability for the most critical storage applications
- Uses environmentally safe DuPont* Suva* refrigerants that cool the load as well as system components
- Two custom-designed 1hp Copeland* compressors provide optimum efficiency
- Lubricating oils maintain proper viscosity
- Balanced condensers and fans complement refrigerant cooling capacity

uilt-in Alarm System

- Continuously charging battery backup support system in case of power failure
- Independent tamper-resistant high/low alarm setpoints in 1°C increments
- Touchpad alarm test to verify alarm readiness
- Audible and visual warnings of power failure and temperature deviation
- Automatic Incident Monitor warns when an alarm has occurred and has been self-corrected, then remembers warmest chamber temperature achieved
- Exterior alarm contacts for remote monitoring included

Construction

- Heavy-gauge, cold-rolled steel with powder paint finish
- Insulating sublids eliminate cold air loss during cabinet openings
- Minimum of 5" (12.7cm) foamed-in, CFC-free urethane insulation in cabinets
- CFC-free refrigerant
- Independent double-gasket lid forms a four-point seal to minimize frost buildup
- Built-in key lock and full-length lid handle for easy access, except 3.1 cu. ft. model, which has a locking provision only
- 1" dia. (2.5cm) port for access to the cabinet interior
- Mounted on dual-wheel casters for easy mobility

ORDERING INFORMATION:

Thermo Scientific* Revco* Value* Series Ultralow-Temperature Chest Freezers

Economical freezers for a variety of industrial process and noncritical storage uses

- Temperatures range from -40° to -10°C or -86° to -40°C, depending on model
- Capacities from 3.1 to 20.5 cu. ft. (88 to 580L)
- Manual defrost

Solid-state Control System

- Adjustable temperature setpoint
- LED temperature and push-button setpoint displays
- Key-operated ON/OFF power switch
- Low-voltage safeguard
- Nonadjustable overtemperature alarm with battery backup and remote alarm contacts

Legaci* Cascade Refrigeration System

- Assures unprecedented temperature reliability for the most critical storage applications
- Designed specifically for use in ultralow-temperature freezers
- Fully integrated technology uses environmentally safe DuPont* Suva* refrigerants that cool the load as well as system components
- Two custom-designed, hermetically sealed, energy-efficient 1hp Copeland* compressors provide the displacement required for optimum efficiency
- Lubricating oils maintain proper viscosity
- Balanced condensers and fans complement the cooling capacity of refrigerants

Construction

- High-quality, cold-rolled steel with powder paint finish
- Minimum of 5" thick (12.7cm) foamed-in CFC-free urethane insulation
- Lids have 2½" (6.4cm) of insulation
- CFC-free refrigerant
- Independent double-gasket, four-point lid seal ensures positive seal
- Insulating sublids eliminate cold air loss during openings
- Built-in key lock (except 3.1 cu. ft. [88L] models)
- Full-length lid handle for easy access
- Dual-wheel casters for easy mobility
- 1" dia. (2.5cm) port for access to cabinet interior

ORDERING INFORMATION:

Alarm systems, temperature chart recorders, and power monitors are available separately (see Accessories). Additional models (including international models) are available; contact your Fisher Scientific Customer Service Representative for details.

Thermo SCIENTIFIC
REVCO

ermo Scientific* Revco* Value* SI Series Ultralow-Temperature Freezers

per-insulated, with Legaci* refrigeration system

- emperature range: -86° to -50°C
- apacity: 24.4 cu. ft. (691L)
- Aanual defrost

gaci Cascade Refrigeration System

- ssures unprecedented temperature reliability for the most critical torage applications
- esigned specifically for use in ultralow-temperature freezers
- ully integrated technology uses environmentally safe DuPont* Suva* efrigerants that cool the load as well as system components
- wo custom-designed 1hp Copeland* compressors provide the isplacement required for optimum efficiency
- ubricating oils maintain proper viscosity
- alanced condensers and fans complement the cooling capacity of efrigerants

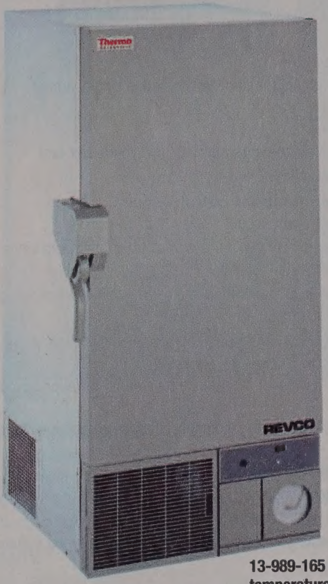
lid-state Electronic Control

- Aodular electronic circuit with overtemperature safety alarm system nd battery backup—warns of elevated storage temperatures
- xterior alarm contacts permit connection to remote monitoring system available separately)
- asy-to-read digital temperature display shows setpoint and emperature at the push of a button
- utomatic voltage boost system compensates for low source power

nstruction

- uper-insulated cold-rolled steel cabinets: panels constructed of a acuum insulation core, evacuated and encapsulated by a sealed uPont Mylar* film laminate
- omposite wall design maintains insulation R value while decreasing vall thickness from typical 5" (12.7cm) to just 2" (5.1cm)
- hin-wall design increases interior storage capacity without increasing equired floor space
- eyed ON/OFF power switch
- ey lock and padlock accommodation padlock for extra security
- ntegrated door handle and latch for easy, one-handed operation
- ive inner doors—independently mounted with adjustable hinges—reate five different storage compartments for optimal organization
- ressure equalization port and full-time vacuum relief inside freezer llow rapid re-entry after door closings
- Aanually activated door heater/de-icer minimizes ice buildup round door
- olds up to 30 stainless-steel inventory racks (available separately)
- our shelves (one fixed and three adjustable in 1" [2.5cm] increments) llow for varying inventory configurations
- FC-free refrigerant
- ual-wheel casters

Value Series Freezer Controller



13-989-165 with optional temperature chart recorder.

ORDERING INFORMATION:

Exterior dimensions: 37¼L × 44W × 77½"H (94 × 112 × 197cm)†. Interior dimensions: 24D × 34½W × 50½"H (62 × 88 × 128cm)†. Shipping weight: 790 lb. (358kg). Alarm systems, temperature chart recorders, and power monitors are available separately (see Accessories).

WARRANTY:

Two years, parts and labor

COMPLIANCE:

Meet TUV criteria for safety and performance. UL, cUL listed. CE marked.

ectrical Requirements	Amps/Breaker	NEMA Plug	Mfr. No.	Cat. No.	Each

Thermo Scientific* Revco* Ultima II* Series Cryogenic Storage Freezer

Designed for long-term storage of biologicals in cryogenic temperatures—without liquid nitrogen

Safer, more convenient than LN_2—lower operating costs, too. Plus, top-to-bottom temperature uniformity is dramatically improved when compared to LN_2 vapor. Cell viability is improved because biologically relevant, thermally driven reactions are not known to occur.

- Uniform temperature of -140°C, safely below the -130°C glass transition temperature
- 10.3 cu. ft. (292L) capacity stores up to 21,600 samples
- Manual defrost

Refrigeration System

- Exclusive mixed refrigerant autocascade with a single, orbital air-cooled compressor
- Downfeed evaporator
- High-capacity air-cooled condenser with dual condenser fans
- Washable condenser filter

IntrLogic* Microprocessor Control System

- Touchpad data entry with digital display of all functions
- Key-operated main power and alarm switch for setpoint security
- Setpoints adjustable in 1°C increments
- Independent operating temperature and high/low limit alarm functions

Alarm System

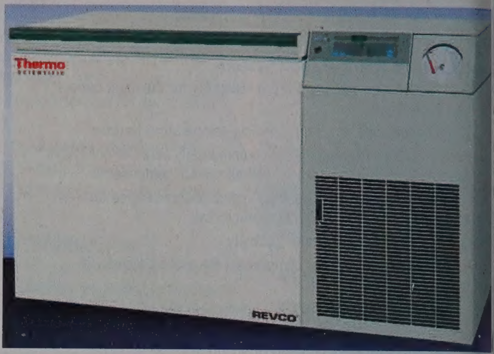
- Power failure or temperature deviation triggers audible and visual warning
- Automatic Incident Monitor identifies temperature deviation beyond alarm setpoints
- Adjustable safety alarm with automatic, continuous charge battery backup
- Digital battery indicator
- Touchpad alarm test function
- RS-232 data port with system software
- Exterior alarm contacts for connection to remote monitoring system

Monitoring System

- Lifeguard compressor protection monitors performance and automatically adjusts to internal and external conditions
- Extreme Ambient Alert warns if room temperature can affect performance
- Voltage Boost Indicator advises of low source voltage below safe parameters and indicates voltage boost system is activated
- On-board power monitoring with digital readout of incoming line voltage
- Built-in surge suppressor
- "Clean Filter" indicator

Mfr. No.	Cat. No.	Each
ULT101409D	**13-990-21**	29,796.00

† *All dimensions and specifications subject to change without notice. External dimensions include allowances for cabinet door, hinges, latches, handles and control panel protrusions.*



13-990-21

Construction

- Low-profile design for easy access to inventory
- Heavy-gauge steel cabinet with high-impact powder paint finish
- Heavy-duty counterbalanced lid with integrated keyed lock and indepen sublids
- Double-seal lid gaskets minimize frost buildup
- Minimum 5" (12.7cm) foamed-in-place closed-cell, CFC-free urethane insulation
- Access port, 1" (2.54cm) diameter, with cap
- Recessed heavy-duty swivel casters

ORDERING INFORMATION:

Interior D × W × H: 19 × 35¼ × 26½" (48 × 89 × 67cm).† Exterior L × W × 29 × 69 × 42¾" (74 × 176 × 109cm).† Shipping weight: 1065 lb. (483kg). F 208/230V 60Hz, 20/30 amps/breaker, NEMA 6-30P plug; requires 6-30R receptacle. Uses standard Revco inventory racks and fiberboard boxes; see Accessories.

WARRANTY:

Two years, parts and labor

COMPLIANCE:

ermo Scientific* Revco* Cryovault* Ultralow-Temperature Freezer

oer-insulated, space-saving design

- usive thin-wall super insulation and composite wall construction ntain insulation R value while decreasing wall thickness from 5" 7cm) to just 2" (5cm) for maximum interior capacity.
- ependable temperatures from -86° to -50°C
- 2 cu. ft. (906L) freezer with 37¼ × 48" (95 × 122cm) footprint
- tores up to 70,000 vials using standard 2" (5cm) fiberboard boxes with) × 10 grid cell dividers (available separately; see Accessories)
- lanual defrost

rLogic* Microprocessor Control

- oor-mounted digital temperature display within 0.1°C
- eyed power and alarm switch
- ouchpad data entry
- lonitors and automatically adjusts compressor performance conditions
- oltage Boost automatically compensates to required voltage
- udible and visual alarms broadcast parameter deviations
- utomatic Incident Monitor and Extreme Ambient Alarm warn of onditions affecting freezer performance
- ow-battery alarm indicator, "clean filter" light, push-button alarm test

nstruction

- owered by two custom-designed, semi-hermetic 1hp Copeland* ompressors that use propane-free refrigerants
- old-rolled steel walls are insulated with high-density, foamed-in-place rethane insulation
- acuum insulation core is encapsulated by a sealed, evacuated film aminate and wrapped in DuPont* Mylar*
- en inner doors—independently mounted with adjustable hinges— reate five independent storage compartments with uniform chamber nsulation
- our shelves (one fixed and three adjustable in 1" [2.54cm] increments) llow varying configurations
- even standard racks per shelf and five shelf positions
- ryoLatch* heavy-duty latch with handle is integrated into outer door for asy, one-handed operation
- ey lock and padlock accommodation for extra security
- ressure equalization port minimizes door open/close pressurization ifferential, allowing rapid re-entry

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* Revco* Slimline* Ultralow-Temperature Freezer

Super-insulated, super-narrow freezer fits smaller spaces

Exclusive thin-wall super insulation and composite wall design maintain insulation R value while decreasing wall thickness from 5" (12.7cm) to just 2" (5cm) for maximum interior storage space. Slim 26½" (94cm) wide freezer moves easily on heavy-duty swivel casters.

- Temperature range: -86° to -50°C
- Capacity: 11 cu. ft. (311L)
- Stores up to 180 standard 2" (5cm) fiberboard boxes with 10 × 10 grid cell dividers (available separately; see Accessories)
- Manual defrost

Solid-state Electronic Controller

- Door-mounted with easy-to-read LED digital temperature display at eye level
- Keyed ON/OFF power switch
- Preset overtemperature alarm and automatic voltage boost to compensate for low voltage and brownout conditions

Legaci* Cascade Refrigeration System

- Assures unprecedented temperature reliability for the most critical storage applications
- Designed specifically for use in ultralow-temperature freezers
- Fully integrated technology uses environmentally safe DuPont* Suva* refrigerants
- Two custom-designed 1hp Copeland* compressors provide optimum efficiency
- Lubricating oils maintain proper viscosity
- Balanced condensers and fans complement the cooling capacity of refrigerants

Construction

- Super-insulated cold-rolled steel walls: vacuum insulation core encapsulated by sealed and evacuated film laminate, wrapped in DuPont Mylar*
- Door handle and latch are integrated into outer door
- Key lock with accommodation for padlock
- Pressure equalization port minimizes door open/close pressurization differential, allowing rapid re-entry
- Five inner doors—independently mounted with adjustable hinges—create five uniformly insulated storage compartments for optimal organization
- Four shelves (adjustable in 1" [2.54cm] increments) allow varying configurations

sher Scientific* Isotemp* Plus Lab Refrigerators

croprocessor-controlled temperatures in a choice of capacities and styles

- emperature range from 1° to 12°C (33.8° to 53.6°F) with ±3° average tability; adjustable in °C or °F using interior control
- xterior-mounted ½" LED display with 0.1° temperature resolution
- apacities from 23.1 to 74 cu. ft. (654 to 2100L)
- utomatic defrost

nstruction

- Vhite enamel-coated steel cabinets, stainless-steel interiors
- eylocked solid or glass doors
- olid doors are hinged, white enamel-coated steel
- hermopane* glass doors (hinged or sliding) provide easy access and isual inventory control
- liding doors require no swing-out space—a valuable benefit in high raffic or narrow areas
- Vhite epoxy-coated steel-wire shelves (14.8 to 44.4 sq. ft.), adjustable n 1" (2.5cm) centers
- FC-free R134A refrigerant and polyurethane insulation
- nterior fluorescent lighting with exterior light switch
- eyed ON/OFF power switch
- our adjustable legs ensure cabinets are level on irregular floors asters provided)

arms

- anel-mounted, factory installed
- igital display with minimum/maximum setpoints, audible alarm, and 4V, 0.5A SPST N.O. relay contacts
- reestanding, Standard Remote and Deluxe Remote alarm systems vailable separately; see p. 1578

Seven-day Selectable Temperature Recorder

- ▶ Panel-mounted, factory installed
- ▶ 6" dia. (15.2cm) chart
- ▶ User-selectable temperature ranges
- ▶ Single-point calibration; individually calibrated against equipment with calibration certified traceable to NIST*
- ▶ Supplied with 60 charts and seven-day scale

ORDERING INFORMATION:

With or without recorder or alarm. For 115V 60Hz. Equipped with NEMA 5-15P line-cord plug, require NEMA 5-15R receptacle.

WARRANTY:

13 months, parts and labor; five years, compressor

Fisher Scientific* Isotemp* General-Purpose Refrigerator

For safe, reliable storage

- Thermostat control of temperatures ranging from 1° to 8°C with ±3° stability
- Capacity, 17 cu. ft. (481L)
- Automatic defrost
- CFC-free (R404A) refrigerant, polyurethane insulation
- White enamel-coated steel cabinet, white epoxy powder-coated steel interior
- Solid door has hinge mechanism that holds door open at 95° angle, closes with a gentle push
- Four adjustable legs ensure cabinet is level on irregular floors
- Five fixed white epoxy-coated steel-wire shelves resist most acids, solvents and chemicals

Fisher Scientific* Special-Purpose Undercounter Refrigerator/Freezers

Flammable-materials storage and explosion-proof models

- Refrigerator temperature range: 2° to 7°C (36° to 45°F)
- Freezer temperature range: -6° to +1°C (21° to 34°F)
- Adjustable temperature control
- Capacity: 5.6 cu. ft. (159L)
- Full-width freezer compartment
- Doors with shelves open from left
- Seamless, easy-to-clean interior is vacuum-formed from refrigeration-grade plastic
- Baked-on acrylic enamel exterior
- Two adjustable wire shelves (interior), three fixed shelves (door)
- CFC-free (R134A) refrigerant
- Manual defrost
- Static condenser free of electric fans

Flammable-Materials Storage Model

- 120w compressor has enclosed overloads, relays, thermostat
- Comes with power cord with plug

Explosion-Proof Model

- 120w compressor has totally enclosed overloads, relays, wiring
- Enclosed hydraulic thermostat
- Unit must be hardwired to an appropriately rated conduit box

ORDERING INFORMATION:
Interior freezer L × W × H: 11 × 15¼ × 5¼" (28 × 39 × 13cm). Interior refrigerator D × W × H: 15¼ × 18 × 21" (39 × 46 × 53cm). Overall L × W × H: 25¼ × 21¼ × 33½" (64 × 54 × 85cm).† Net weight, 90 lb. (40.8kg); shipping weight, 120 lb. (54.5kg). For 120V 60Hz, 2/15 amps/breaker.

97-935-1

WARRANTY:
Two years, parts; one year, labor

COMPLIANCE:
Flammable-Materials Storage Model complies with NFPA Standard Number 99 and OSHA 29CFR1910.308. **Explosion-Proof Model wiring** complies with NEC Articles 500-501 for Class 1, Groups C and D environments.

CERTIFICATIONS:
UL listed

Description	Cat. No.	Each
Flammable-Materials Storage	**97-935-1**	2240.96
Explosion-Proof	**97-952-1**	2333.91

† *Requires an additional 1" (2.5cm) clearance from top and sides and 1½" (3.8cm) from back for proper condenser ventilation when recessed. Add ½" (1.3cm) to the total height when using the leveling legs supplied with unit.*

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

ACCESSORIES

Fisher Scientific* Isotemp* Refrigerator and Freezer Alarm Systems

For Fisher Scientific Isotemp and Isotemp Plus refrigerators and freezers

Freestanding Alarm System

- Use with basic freezers, refrigerators, and one section on refrigerator/freezer combinations
- With key switch in ALARM position, system provides audio and visual alarms if chamber temperature reaches high or low alarm limit (adjustable, set by user) or if power is lost for more than 30 seconds
- Housed in a painted metal cabinet with digital temperature display
- Alarm silencing and test features
- Can be used to trigger Standard or Deluxe Remote Alarm systems

Standard Remote System†

- Use with refrigerators and freezers equipped with panel-mounted or freestanding alarm (Alarm or Recorder/Alarm models)
- Can be located up to one-third mile from unit
- Emits audible and visual signals in the event of power failure, temperature deviation, or if door is open for more than three minutes
- Alarm sounds if line between unit and alarm is cut

Deluxe Remote System†

- Use with refrigerators and freezers equipped with panel-mounted or freestanding alarm (Alarm or Recorder/Alarm models)
- Can monitor up to four individual or four groups of refrigerators or freezers
- User-programmable to call up to eight telephone or pager numbers when activated by power failure, temperature deviation, or if door is open for more than three minutes
- Alarm sounds if line between unit and alarm is cut
- Stores four outgoing messages
- Automatic redial for busy or unanswered numbers
- Works with any standard telephone system
- Battery backup allows alarm to sound in the event of a power failure

ORDERING INFORMATION:
Freestanding and remote systems must be ordered when the refrigerator or freezer is ordered. Installation by owner.

REQUIRED ACCESSORIES:
Remote systems require an existing alarm system, with dry alarm contacts, to be installed on the refrigerator or freezer in order to be compatible.

Alarm System	Cat. No.	Each
Freestanding for Basic Models	**13-986-160**	1105.78

Deluxe Remote for Alarm and Recorder/Alarm Models†	**13-986-100**	1314.58

† *Requires an existing alarm system, with dry alarm contacts, to be installed on the refrigerator or freezer in order to be compatible.*

ermo Scientific* Revco* Alarms and Alarm Systems

rm Delay Module

minates false alarms due to intermittent voltage flux from lightning or ief power outages

ljustable delay releases signal to alarm/monitoring system only when arm condition continues for specified time period

gital timer can be set from 30 seconds to 32 minutes

d alarm light flashes to indicate transient event; must be manually set

odule installs easily in any alarm/monitoring system: simply remove ver and connect relay and terminal strips to open or closed contacts alarm system

wered by 9V battery (not included)

erall dimensions, 1⅝L × 2½W × 4¾"H (1.6 × 6.4 ×12.1cm)

uxe Electronic Remote Alarm System

e with Thermo Scientific Revco General-Purpose Refrigerators and eezers; Chromatography Refrigerators equipped with accessory cal Alarm System; and Ultima*, Elite*, and Value* PLUS tralow-Temperature Freezers

er-programmed to sound alarm in the event of power failure or mperature deviation

n call up to four telephone numbers to advise of emergency conditions ing any pulse dialing system

e unit can monitor up to four individual freezers or refrigerators, or ee groups of freezers or refrigerators

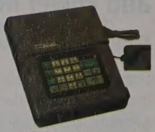
ust be customer installed

quires dedicated telephone line

tronic Local Alarm Systems

e with Thermo Scientific Revco Refrigerators and Enzyme, General-rpose, and Plasma Freezers

- Freestanding system includes keyed ON/OFF alarm switch, audible and visual alarms for power failure and temperature deviation, audio silence button, and alarm test button
- Painted metal cabinet with digital temperature display and keyed alarm switch
- Must be customer installed



13-991-111

Standard Remote Alarm System

- Use with Thermo Scientific Revco General-Purpose Freezers and Refrigerators; Chromatography Refrigerators equipped with accessory Electronic Local Alarm System; and with Ultima, Elite, and Value PLUS Ultralow-Temperature Freezers
- Can be located up to one-third mile from unit and used with either normally open or normally closed contacts
- Emits both audible and visual signal in the event of power failure or temperature deviation
- Wire not included
- For 115V
- Requires factory-installed alarm system

Thermo Scientific* Revco* Temperature and Power Monitors

Easily installed on or near any refrigerator or freezer

13-992-88

Display temperature and activate audible and visual alarms to warn of overtemperature and power failure. Available in single-probe digital models and two- probe microprocessor-based model for monitoring multiple freezers or multiple sites in one freezer.

- Temperature range: -100° to +25°C
- Probe size: 1¼L × ¼" dia. (3.2 × 0.6cm)
- Solid-state probes
- High-temperature alarm with adjustable setpoint
- Alarm mute and chirp
- Audio delay timer
- Battery backup
- Remote alarm contacts

Single-probe Monitors

- High-contrast numeric LED display
- Red visual alarm
- Include Velcro* fasteners

Multiple-probe Monitor

- Alphanumeric LED display with adjustable backlight
- Two-color visual alarm
- Low-temperature alarm with adjustable setpoint
- Color-coded lead wire on probe
- Programmable relay delay with range of 0 to 30 minutes
- Alarm/battery test function
- Brackets included

Thermo Scientific* Revco* CO_2 and LN_2 Backup Systems

For ultralow-temperature freezers

22-266-267

Systems inject liquid CO_2 or LN_2 into cabinet when cabinet temperature warms to preset level.

- Adjustable in 1°C increments to -75°C (CO_2), -150°C (LN_2)
- Digital display constantly indicates actual cabinet temperature
- Indicator lights when system is activated
- Additional indicator lights when cylinder is empty
- Liquid flow is shut off automatically when freezer door or lid is opene
- Powered by continually rechargeable battery
- Low-battery light indicates when battery requires charging

ORDERING INFORMATION:

Thermo Scientific Revco Ultima* II and Elite* 3.1 cu. ft. (88L) models an Value* series models require freestanding system; only Ultima II and Eli series models larger than 3.1 cu. ft. (88L) accept built-in systems. Speci freezer model and voltage when ordering.

INCLUDES:

All required hardware except CO_2 or LN_2 cylinder

enceware* FreezGuard* Freezer and Refrigerator Alarm

tects against valuable sample loss due to temperature change

ble for use in freezers and refrigerators containing blood samples, bio-al products, pharmaceuticals, and other temperature-sensitive items.

- onitors temperatures from -5° to +55°F (-20° to +13°C)
- ud, continuous alarm (up to three days) when interior or sample temperature drifts above adjustable activation point
- n be set to register upward or downward temperature drift with accu-y of ±1%
-) variance indicator remains lit after temperature correction, indicating ere had been a problem
- v-battery indicator
- ounts with self-adhesive tape or screw mounting

ORDERING INFORMATION:
Dimensions, 1½L × 3$\frac{5}{16}$W × 5$\frac{1}{16}$"H (3.8 × 8.4 × 12.9cm). Weight (without batteries), 5.1 oz. (144.3kg). Uses 9V battery (not supplied).

INCLUDES:
10' (3m) probe for use with remote freezer; additional battery connector

RNA INTERFERENCE

TRANSFECTION

Thermo Scientific* Dharmacon* DharmaFECT* siRNA Transfection Reagents

Provide high efficiency of siRNA delivery with minimal impact on cell viability across a broad range of cell types

Key Features

- Optimized for siRNA delivery
- Superior transfection efficiency
- Extremely low cellular toxicity
- Simplified transfection optimization
- Improved experimental reproducibility

Four Choices and their Top Ten Cell Lines

- DharmaFECT1 exhibits the highest transfection efficiency across the broadest range of cell types: A549, BX-PC3, CHO K1, COS 7, HEK293, HeLa, HeLa S3, HepG2, HT29, SKBR3
- DharmaFECT2: BX-PC3, COS 7, HEK293, HeLa, HeLa S3, HT29, MCF7, MDA-MB453, PC-3, SKBR3
- DharmaFECT3: BX-PC3, COS 7, DU145, LNCaP, HeLa, HeLa S3, HT29, NIH3T3L1, PC-3, SKBR3
- DharmaFECT4: BX-PC3, CHO K1, DU145, HEK293, HeLa, HeLa S3, HT29, HepG2, MCF7, SKBR3

STORAGE CONDITIONS:

Store at 4°C (do not freeze).

Mirus Bio TransIT-TKO* siRNA Transfection Reagent

A high efficiency, low toxicity, siRNA transfection reagent for mammalian cells

MIR 215 series

- Broad Spectrum siRNA Delivery: Utilize one transfection reagent and protocol for a wide variety of cells
- Low Cellular Toxicity: Maintain cell density and reduce experimental biases
- Reproducible Results: Obtain consistent, targeted gene knockdowns from day to day
- High Knockdown Efficiency: Achieve optimal gene silencing in a large percentage of cells to ensure experimental success

STORAGE CONDITIONS:

Store for twelve months at 4°C (do not freeze).

Quantity	Cat. No.	E
0.4mL	**MIR 2154**	212
1mL	**MIR 2150**	342
5 × 1mL	**MIR 2155**	1527
10 × 1mL	**MIR 2156**	2884

Mirus Bio *Trans*IT-si*QUEST** siRNA Transfection Reagent

Ideal for siRNA-mediated gene-silencing studies

- Unique lipopolyplex formulation provides effective knock-down of targ gene expression across a wide range of cell types; offers advantages select cell types
- Enables efficient siRNA transfection with reduced levels of cell damag as compared to cationic-liposome–based transfection reagents
- Produces higher transfection efficiencies when transfection is perform in the presence of serum and media changes are eliminated

STORAGE CONDITIONS:

Store at 4°C (do not freeze).

Quantity	Cat. No.	E
0.4mL	**MIR 2114**	220
1mL	**MIR 2110**	355
5 × 1mL	**MIR 2115**	1527
10 × 1mL	**MIR 2116**	2884

TRANSFECTION — CONTROLS

ermo Scientific* Dharmacon* si*CONTROL* Basic Kits

tain panels of controls to facilitate interpretation of siRNA-mediated silencing assays

with a wide variety of controls enable optimization of siRNA delivery and :ion as well as the validation of siRNA-induced gene suppression in any ine. Aid in the distinction between target-specific and off-target effects.

.UDES:

c Kits Include

:ONTROL Targeting siRNAs (Lamin A/C siRNA, Human/Mouse; :lophilin B siRNA, Human/Mouse) provide positive silencing for idation of experimental design and detection methodologies

:ONTROL Non-Targeting siRNAs, Pool #1 and #2, and RISC-free :NA #1, to distinguish general cellular responses to delivery methods and :ential off-target effects from siRNA-mediated sequence-specific silencing

;TABLE Non-Targeting siRNA pool (Stable siRNA) that is ideal for use th si*STABLE* modified target gene siRNA; bioformatically designed with least four mismatches to any known human or mouse genes

plete Kits Include all of the above, plus

OX Transfection Control, which causes cell death upon successful nsfection; simple, cost-effective method for transfection optimization l measurement of transfection efficiency

K-002800-C3-01, -C1-01

- siGLO Transfection Efficiency and Positive Silencing Controls (Cyclophilin B siRNA, Human/Mouse; Lamin A/C siRNA, Human/Mouse) that provide reliable visualization of transfection efficiency; stable, fluorescent
- siGLO RISC-free siRNA that can be transfected with the experimental target gene siRNA without interfering with target gene silencing; stable, fluorescent

STORAGE CONDITIONS:

Store at -20° to -80°C.

Description	Control Qty.	Cat. No.	Each

TRANSFECTION—LOCALIZATION

rus Bio *Label* IT* miRNA Labeling Kits

urate and sensitive covalent labeling of microRNA RNA) for expression profiling

:urate—labels all miRNAs present in the sample

iversal—labels miRNAs from all organisms including plants

quence Independent Labeling—labels all nucleotides with equal efficiency

nsitive—detects subfemtamole amounts of miRNA species

/e time—Simple, one-step, one hour labeling protocol

.UDES:

/ IT* miRNA Cy*3/Cy*5 or Biotin labeling reagents, reconstitution on, 10X Labeling Buffer M, 10X Stop Solution, Precipitation Enhancer ion, and 1X Hybridization Solution

NEW

STORAGE CONDITIONS:

Label IT* reagent as a dry pellet or as a reconstituted solution store at -20°C. All other components should be stored at 4°C.

Description	Quantity	Cat. No.	Each
Cy3/Cy5 Labeling Kit	2 × 5 Reactions	**MIR 8305**	272.82
	2 × 25 Reactions	**MIR 8325**	988.00
Cy3 Labeling Kit	10 Reactions	**MIR 8510**	260.00

Cy5 Labeling Kit	10 Reactions	**MIR 8610**	260.00
	50 Reactions	**MIR 8650**	988.00
Biotin Labeling Kit	10 Reactions	**MIR 8410**	208.00
	50 Reactions	**MIR 8450**	728.00

'us Bio *Label* IT* siRNA Tracker* racellular Localization Kits

el, transfect, and track any siRNA containing guanine dues in an efficient and nondestructive manner

nitor both subcellular localization and functional inhibition of target ie expression simultaneously following introduction of the labeled NA into mammalian cells

ilable with a variety of labels for multicolor tracking

h kit contains sufficient reagents to label 50µg of siRNA

e Kit Choices

NA produced using kits without TransIT transfection reagent can be vered to cells in vitro or in vivo using the transfection reagent of r choice

: with TransIT-TKO* Transfection Reagent are compatible with a wide ge of cell types; they contain sufficient quantities to perform up to 500 isfections in 24-well plates

nsIT-siQUEST* Transfection Reagent, available with some kits, :ures a unique lipopolyplex formulation offering advantages for select types

INCLUDES:

Label IT siRNA Tracker Reagent, Label IT Reconstitution Solution, 10X Labeling Buffer A. Certain kits also contain TransIT Transfection Reagent, providing high efficiency siRNA delivery.

STORAGE CONDITIONS:

Store Label IT siRNA Tracker Reagent at -20°C, other reagents at 4°C.

TRANSFECTION—CLONING SYSTEMS

Promega* GeneClip* U1 Hairpin Cloning Systems

Designed for fast and easy cloning of human hairpin target sequences to allow expression of siRNA target sequences in human cells

Use pGeneClip* vectors containing the human U1 promotor, which allows transcription of the hairpin target sequences and generation of hairpin siRNA in vivo.

- Utilize predigested vectors to eliminate time-consuming vector preparation
- Allow easier identification of desired clones using a *Pst* I digestion
- Available with a choice of vectors
    - The Basic System is intended for transient suppression of the gene of interest
    - The hMGFP System enables easy determination of transfection efficiency
    - The other systems offer antibiotic marker options for selecting stably transfected eukaryotic cells so that experimental results do not depend on transfection efficiency

Patent pending.
For nonprofit and noncommercial research use only. With respect to commercial research use or use by for-profit organizations, or any diagnostic or therapeutic uses, please contact Promega Corporation for supply and licensing information.
Licensed under U.S. Patent 6,573,099 and its foreign equivalents from Benitec Australia Ltd and CSIRO.
This product is covered under license from Carnegie Institution of Washington under U.S. Patent 6,506,559; Australian Patent 743798 and other patents pending. Commercial use of this product may require a separate license from Carnegie.
Certain applications of this product may require licenses from others.
The CMV promoter and its use are covered under U.S. Patents 5,168,062 and 5,385,839 owned by the University of Iowa Research Foundation, Iowa City, Iowa, and licensed for research use only. Research use includes contract research for which monetary or other consideration may be received. Other commercial users must obtain a license to these patents directly from the University of Iowa Research Foundation.

Promega* siLentGene*-2 U6 Hairpin Cloning Systems (Human)

Can be directly transfected into human cells for rapid screening of optimal target sequences of generated shRNAs

- May also be subcloned into the psiLentGene*-Basic Vector for transient suppression of the gene of interest
- Ideal for DNA-directed RNA interference in human cells
- Provide vectors containing a variety of eukaryotic antibiotic-selectable markers
- Predigested to eliminate time-consuming vector preparation; one-step PCR for generation of shRNA-expressing constructs
- Easy identification of desired clones using blue/white screening in conjunction with *Eco*R V digestion

INCLUDES:

High Fidelity PCR Master Mix, 2 × 800μL; U6 Cassette DNA, 60μL; Upstream Primer, 60μL; T4 DNA Ligase, 2 × 100U; 2X Rapid Ligation Buffe 200μL; psiLentGene Vector1.2μg; and nuclease-free water, 2 × 1.25mL

Description	Quantity	Cat. No.	Eac
Basic System	20 tests	**PR-C7860**	268.3

Neomycin System	20 tests	**PR-C8080**	268.3

This product is sold solely for use for research purposes in fields other than plants.
This product is not transferable. If the purchaser is not willing to accept the conditions of thi label license, Promega is willing to accept the return of the product and provide the purchas with a full refund. However if the product is used, then the purchaser agrees to be bound by the conditions of this limited use statement. This product is sold by Promega Corporation under license from Benitec Australia Ltd and CSIRO as co-owners of U.S. Patent 6,573,099 and foreign counterparts. For information regarding licenses to these patents for use of ddRNAi as a therapeutic agent or as a method to treat/prevent human disease, please contact Benitec at: licensing@benitec.com. For the use of ddRNAi in other fields, please contact CSIRO at: www.pi.csiro.au/RNAi.
This product is covered under license from Carnegie Institution of Washington under U.S. Patent 6,506,559; Australian Patent 743798 and other patents pending. Commercial use o this product may require a separate license from Carnegie.

LOOKING FOR CUSTOM siRNA VECTORS?

Fisher Scientific offers custom siRNA vector construction services for gene silencing of any construct. Please refer to Custom Services section.

LOOKING FOR ADDITIONAL siRNA CLONING VECTORS?

For more siRNA cloning vectors, see the Cloning and Expression section.

omega* psiCHECK* Vectors

vide a quantitative and rapid approach for initial imization of RNA interference (RNAi)

Renilla luciferase as the primary reporter gene. Enable monitoring of ges in expression of a target gene fused to the reporter gene based on eases in *Renilla* activity.

otocols allow measurement in live cells or crude cell lysates

antitation can be performed with any luminometer; requires no pensive equipment

ovide higher sensitivity than GFP or flag-tag assays

- No need to wait for phenotypic changes
- No requirement for transfection normalization when using the psiCHECK-2 Vector

Description	Quantity	Cat. No.	Each
psiCHECK-1	20µg	**PR-C8011**	268.34
psiCHECK-2	20µg	**PR-C8021**	289.36

CABINETS

trite* Flammables Cabinets

ires of All Justrite Flammables Cabinets

ble-wall construction provides 1½" (3.8cm) of insulating air space to prevent the spread of flames

-visibility Haz-Alert* reflective warning labels offer added safety ng power outages or fires

vents with flame arresters at top and opposite bottom allow rdous vapors to be piped away

-closing, self-latching doors facilitate fire protection of the cabinet

latch engages critical three-point latching system for protection er fire conditions

-door models hinged left and right have self-closing mechanism ensures proper closing sequence regardless of which door is ased first

ble links hold self-closing doors wide open, flush with front of net for easy access and resupply; automatically release and doors shut at 74°C (165°F)

cealed self-close mechanism provides optimum storage space and ruction-free access to contents

- SpillSlope* safety shelves direct incidental spills to the back and bottom of leakproof sump
- Adjustable leveling feet ensure solid positioning and alignment for tight door closure
- Exterior side panel has built-in grounding connector for easy grounding
- Finished inside and out with durable lead-free powder paint

SciMatCo* Nonmetallic Flammables Cabinets

Protect contents as well as metal cabinets

17-988-472

Wooden flammables cabinets constructed from 1" thick (2.5cm) 9-ply plywood, using specifications developed by both OSHA and NFPA.

- Unlike metal, wood provides good thermal insulation and won't bend or distort when exposed to heat
- All sizes have continuous piano-style hinges on doors and liquid-tight trough floors
- All joints are rabbeted for strength, and cabinets are finished with yellow epoxy paint inside and out
- Cabinets have 10 × 10" (25 × 25cm) "FLAMMABLE" hazard label on door(s), and a "KEEP FIRE AWAY" warning
- Adjustable shelves feature metal shelf standards and supports
- All hardware is corrosion resistant

ORDERING INFORMATION:
Four- and 18-gallon cabinets have one door and one adjustable shelf; 45-gallon cabinet has two doors and two adjustable shelves.

INCLUDES:
Lock and two keys

COMPLIANCE:
Meet all applicable OSHA 1910 and NFPA 30 standards.

SciMatCo* Wooden Acid Cabinets

No interior metal parts to corrode

Because acids attack even coated or painted metal once it's scratched, these cabinets offer an economical alternative—no interior metal components to rust or corrode.

17-988-468 with optional nitric acid compartment, 17-988-484

- Constructed of 1" thick (2.5cm) plywood and available fully or partially lined with ⅛" thick (3mm) polypropylene
- Doors have integral wooden hinges; nylon screws and other plastic fittings ensure corrosion-free service
- All joints specially milled for strength
- Units have one fixed-position shelf, two interlocking doors, recessed top with liquid-tight polypropylene tray (for use as dispensing area), and four leveling feet
- Recessed floor contains spills
- Finished with blue epoxy paint, with "ACID" printed on cabinet in 6" (15cm) red letters

ORDERING INFORMATION:

Fully lined cabinets have lining on the floor, interior walls, shelf, interior top, and top tray. **Partially lined units** are covered on the floor, shelf, and top tray only. Bottle capacity: 30 × 2.5L (approx. 75L) or 90 × 500mL (approx. 45mL). Exterior dimensions: 20L × 31W × 36"H (51 × 79 × 91cm).

INCLUDES:

Polypropylene lock assembly, with padlock and two keys; accept optional nitric acid compartment (sold separately).

Description	Mfr. No.	Cat. No.	Each
Fully lined	SC8051	**17-988-468**	1290.38
Partially lined	SC8041	**17-988-469**	1071.35

ACCESSORIES

Nitric Acid Storage Compartment

Helps avoid reaction between nitric and acetic acid

- Polypropylene compartment slides into top half of floor model cabinet to provide semi-isolation for nitric acid
- Has its own polypropylene door
- Holds 5 × 2.5L bottles
- Fits all SciMatCo* acid cabinet floor models (compartment will not fit mini Stak-a-Cab stackable or bench cabinets)

L × W × H	Mfr. No.	Cat. No.	Each
15 × 12½ × 13$\frac{9}{16}$" (38 × 32 × 34cm)	SC8071	**17-988-484**	131.15

SciMatCo* Acid Bench Cabinet

For safe storage of small quantities of acid on your benchtop

- Same all-wood construction as floor models—no interior metal parts to corrode
- Cabinet has liquid-tight trough floor, polypropylene padlock assembly, wooden-hinged door with 10" (25cm) "CORROSIVE" label and chemical-resistant blue epoxy paint finish

ORDERING INFORMATION:

Capacity: 5 × 2.5L or 16 × 500mL bottles (approximately 2 to 3 gal./ 8 to 12.5L).

Justrite* Nonmetallic Oval Type I Safety Cans

Oval shape provides 30% more storage capacity than round model

Constructed of high-density polyethylene, these cans are dent and puncture-resistant and practically chemically inert. Less expensive than stainless-steel cans, they can be used to store liquids that will corrode stainless steel or coated steel safety cans.

17-177B

- Equipped with flame arresters to protect contents from sparks
- Stainless-steel hardware for acids, corrosives, or high-purity liquids
- Red color is molded in polyethylene body
- Pressure-relief mechanism prevents buildup of vapors
- Convenient trigger-spout mechanism and built-in handle for ease in dispensing and carrying

CERTIFICATIONS:

FM approved.

Eagle* Nonmetallic Safety Cans

High-density polyethylene safety cans help reduce danger of explosion from ignition of flammable liquid vapors

17-987-405B, 17-987-404E, 17-987-404D, 17-988-395

Cans are rust-, corrosion-, and impact-resistant. All metal fittings and flame arresters are stainless steel. Use red cans for flammables; white cans for acids and corrosives.

Type I Safety Cans

- Feature a single spout with self-closing cap, pressure-relief vent, and flame arrester
- 2 qt. (2L) and 1 gal. (3.8L) sizes are oval in shape; larger sizes are round
- Available in red or white

Disposal Safety Cans

- For temporary storage of liquid waste
- Spout cap covers 4" wide (10.2cm) mouth; opens to 80° angle and can be locked open for easy filling
- Cap assembly opens automatically to vent internal vapor pressure
- Available in red or white

Safety Plunger Cans

- For dispensing cleaning and flammable fluids
- Press lightly on spring-mounted plunger to dispense measured amount of liquid for dampening swab, sponge, or cloth
- Red only

COMPLIANCE:
Meet OSHA requirements.

Eagle* Spill Containment Drums

Approved for use with Packing Groups I, II and III

Lightweight drums for safe storage, transportation, cleanup, and containment of containers from 5 to 55 gallons (19 to 208L). Made of chemical- and weather-resistant HDPE with UV inhibitors that incinerates completely. Nestable for ideal storage.

18-999-4471

Lab Packs

- For use with bottles, cans, carboys and 5-gallon pails
- Yellow or blue

Salvage Drums

- Meet 3psi pressure test for Salvage Drum Compliance
- Require "Salvage Drum" labeling (included)
- Yellow

Overpacks

- For use with larger containers up to 55 gal.
- Pass 3psi pressure test
- Yellow

ORDERING INFORMATION:

Lab Packs and Overpacks cannot contain free liquids. Sufficient sorbents must be used with any leaking containers to absorb all liquids.

COMPLIANCE:

All drums meet FDA 21CFR177.1520. Lab packs meet DOT 49CFR173.12. Overpacks meet DOT 49CFR173.25. Salvage drums meet DOT 49CFR173.3.

CERTIFICATIONS:

UN certified to HM-181. UL 94HB Flammability Rating.

Eagle* Drum Trays

Inexpensive and practical way to prevent spills

- Ideal for placing under drums during dispensing or filling
- Reservoir has raised supports to keep container away from spills
- Use optional drum tray dolly to easily move drum trays

18-999-4467 on 19-002-860

ORDERING INFORMATION:

18-999-4467 fits 55 gal. (209L) drums; 18-999-4468 has grating for 5-gal. containers or batteries.

Description	Mfr. No.	Cat. No.	Eac
Drum Tray	1614	**18-999-4467**	82.
Drum Tray with Grating	1615	**18-999-4468**	106.
Drum Tray Dolly	1618	**19-002-860**	156.

Justrite* Drum Funnels

Prevent dangerous spills when transferring flammable liquids

- Large funnels have a 10¾" diameter (27cm) mouth and 2.6 gal. (9.8L) capacity
- Fit 2" bung on 30- and 55-gal. drums
- Available with brass flame arrester which absorbs and dissipates heat and prevents any external ignition sources from reaching drum contents
- Galvanized steel with durable epoxy powder-coat finish
- Hinged, stay-open lid includes fusible link that melts at 71°C (160°F) and shuts cover to extinguish fire
- Funnels accommodate padlock (not included)

17-986-56

COMPLIANCE:

Meet EPA and OSHA requirements. FM approved.

NOTE:

Drummed wastes should always be properly labeled and stored. Always segregate incompatible wastes to avoid chemical reactions or explosions.

Description	Mfr. No.	Cat. No.	Eac
For use with flammable liquids			
With 6" flame arrester	08207	**17-986-56**	240.

*Fisherbrand** Chemical Splash and Impact Goggles

Lens coated to minimize scratching and fogging

19-181-504

- Built for comfortable protection with a soft, flexible PVC body that conforms to facial contours
- Large frames fit over most prescription eyewear
- Coated, clear polycarbonate lens resists impact, scratching, and fogging
- Headstrap easily adjusts for a custom fit
- **Impact goggles** protect eyes from dust, mist and other airborne particles; perforations on goggle top and sides provide direct ventilation
- **Chemical-splash goggles** resist a wide range of chemicals and feature indirect ventilation to direct airflow over the lens

COMPLIANCE:

Meet ANSI* Z87.1 and CSA standards.

Description	Cat. No.	Each	Pack of 12
Impact Goggles	**19-181-503**	5.50	108.61
Chemical Splash Goggles	**19-181-504**	6.05	108.61

*Fisherbrand** Disposable Faceshields

Fit well over glasses and protective spectacles

19-181-505

- Constructed from high-quality, optically clear, distortion-free 7mil film
- Polyester lens is treated with antifog and antistatic coating
- Headpiece is held in place by a stretch strap and includes a latex-free, hypoallergenic foam band for comfortable extended wear

COMPLIANCE:

Conform to OSHA 29CFR Part 1910.1030 for bloodborne pathogens and CDC recommendations for protective eyewear.

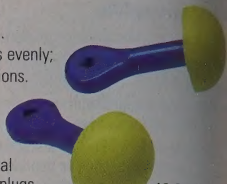
E•A•R* Express* Pod Plugs

NRR: 25dB

Ideal for noisy, dirty work environments where clear communication is essential. Reduce high- and low-frequency sounds evenly; need not be removed to hear conversations.



18-587

- Slow-recovery foam compresses easily without wrinkles
- Grips suit workers who experience discomfort when inserting conventional plugs or who have difficulty rolling—plugs require no sizing or rolldown
- Unique design creates secure, gentle seal
- Slides gently into ear canal, expanding slowly to seal completely without excess pressure
- Patented insertion grip eliminates need to touch pod surface
- Easy to clean and store
- Reusable

ORDERING INFORMATION:

Packaged one pair per PillowPac*, 100 PillowPacs per dispenser pack. Corded plugs come with grips of assorted colors; uncorded plugs are available with either blue grips or grips of assorted colors.

MATTING

Wearwell* Electrically Conductive Antifatigue Mat

Protects facilities and electronic equipment from high levels of electrostatic discharge

18-999-821

- Quickly drains static electricity from workers before it can be passed onto sensitive equipment
- Volume resistivity and resistance to ground of 106ohms; can drain up to 200,000V in less than one second
- Grounding snap attached to lower left corner of each mat to attach ground cord (sold separately)
- ½" (1.3cm) thick with diamond-plate vinyl surface for traction and beveled edges for safety
- Nitricell* sponge base offers immediate rebound and exceptional support to reduce standing worker fatigue
- For maximum effectiveness, keep clean and ground the mat

ORDERING INFORMATION:

Call your Fisher Scientific Customer Service Representative for ordering information on custom mat sizes and heel grounders.

WARNING
Mat must be grounded. Employees must wear heel grounders or shoes with conductive soles.

Wearwell* Lab Mats

Provide durability and excellent cushioning support

19-003-153B

No-wax vinyl surface for use in dry work areas. Made of 3⁄32"-thick (0.2cm) virgin vinyl permanently bonded to a ⅜" thick (1.0cm) moisture-resistant, closed-cell sponge base.

- Tough, nonporous surface resists abuse even in the most heavily used work areas
- Supercompression sponge base relieves overall body fatigue
- Surface resists breakdown when exposed to most laboratory and industrial chemicals
- Edges are safety beveled to prevent tripping and falling

Wearwell* Tuf Sponge Mat

For use in all dry work areas

- Blown-vinyl sponge ergonomically designed to reduce floor hardness up to 50%
- Mats can be easily cut to fit work areas
- All edges are rounded for safety

ORDERING INFORMATION:
Call your Fisher Scientific Customer Service Representative for cut lengths to 60' (18.3m).

Wearwell* WorkRite Mats

Lightweight for easy handling and cleaning

17-986-121

- All-purpose natural rubber black mats designed for use in dry areas and around water
- Built-in beveled edges on all sides for safety and cart access
- Spills pass directly through holes, keeping feet dry
- ½" thick to provide cushioned support, reduce stress on feet, legs, and back

Size	Mfr. No.	Cat. No.	Each
3 × 5' (91 × 152cm)	474 12X3X5BK	**17-986-121**	100.34
3 × 10' (91cm × 3m)	474 12X3X10BK	**18-999-892**	189.90
3 × 20' (91cm × 6.1m)	474 12X3X20BK	**18-999-893**	379.69

LOOKING FOR MORE MATTING?

Fisher Scientific offers a complete selection antifatique, nonslip, cleanroom, and non-conductive matting.

Visit www.fishersci.com and search for Matting

MONITORS

3M* Ethylene Oxide Monitor

No batteries, hoses, pumps, or equipment to calibrate

Ideal for chemical, medical, and pharmaceutical labs.

- Sensitivity of 0.24ppm-hours
- Upper exposure limit of 600ppm-hours
- Available as a monitor only or with prepaid analysis

COMPLIANCE:
Meets OSHA accuracy requirements.

NOTE:
These safety products must be used in accordance with OSHA regulations and the user instructions, warnings, and limitations accompanying each product.

17-985-363B

Description	Mfr. No.	Cat. No.	Case of 5
Monitor only	3551	**17-985-363B**	129.97
Monitor with prepaid analysis	3550	**10-030-85**	357.69

3M* Formaldehyde Monitor

Complies with OSHA formaldehyde standard

Valuable for use in chemical, textile, and pulp and paper industries; histology; and healthcare.

- Sensitivity of 0.8ppm-hours (0.1ppm over an eight-hour period)
- Upper exposure limit of 40ppm-hours (5ppm over an eight-hour period)
- Available as a monitor only or with prepaid analysis

COMPLIANCE:
Exceeds OSHA accuracy requirements for eight-hour sampling.

NOTE:
Not for 15-minute STEL (short-term exposure limit) sampling. These safety products must be used in accordance with OSHA regulations and the user instructions, warnings, and limitations accompanying each product.

17-985-363C

Description	Mfr. No.	Cat. No.	Case of 5
Monitor only	3721	**17-985-363C**	160.11
Monitor with prepaid analysis	3720	**10-030-84**	398.45

* Organic Vapor Monitors

tweight, self-contained monitors record time-ghted average (TWA) vapor concentrations in factories industrial, histology, cytology, and clinical labs

10-030-80

antages

- v per-test cost
- ort-term and workshift sampling can be conducted sily so you can quantify vapor exposure by employee, category, or area

lications

- iodic sampling and screening of zardous areas and jobs
- icating trouble spots
- ecking ventilation
- eping accurate employee health records

ge

- use, simply remove a monitor from its package d clip it to clothing near the breathing zone
- monitoring a specific work area, place the monitor in a location where flow is unrestricted
- er monitoring, seal the badge with the supplied cap; replace it in the ckage; record the time, date, and vapors to be analyzed; and send it to lab for analysis†
- frigerate and/or expedite for analysis to help ensure accurate results

itor Types

- **onitors 3500 and 3510** are designed to provide precise TWA ncentration measurements for an eight-hour period
- **onitors 3500 and 3520** allow you to collect data for analysis by an lependent laboratory
- **onitors 3510 and 3530** include prepaid analysis for up to three mpounds per badge
- **onitors 3520 and 3530** are designed with a special backup section for mpling environments that include compounds like acetone, methylene loride, and isopropyl alcohol

ERING INFORMATION:

is available from 3M on sampling rate and measuring range for more 135 vapors that these monitors can sample. Contact your Fisher ntific Customer Service Representative for a complete list of organic pounds sampled.

MPLIANCE:

t or exceed OSHA accuracy requirements of ±25% for many workplace aminants.

TE:

one, methyl ethyl ketone, and vinyl acetate may show a decreased very when sampled in high relative humidity. These safety products t be used in accordance with OSHA regulations and the user instruc-s, warnings, and limitations accompanying each product.

cription	Mfr. No.	Cat. No.	Price
itor only	3500	**10-030-80**	Ea./19.66
itor with analysis†	3510	**10-030-91**	Cs. of 5/604.12
itor with backup	3520	**17-985-363A**	Cs. of 5/111.18
itor with backup and analysis	3530	**17-988-407**	Cs. of 5/815.32

analysis service will analyze only the compounds shown in the 3M Compounds Analysis rt. Up to three of the listed compounds can be analyzed per monitor with prepaid lysis. For analysis of unlisted compounds, contact your Fisher Scientific Customer Service resentative at 1-800-772 6733.

Dräger* accuro* Bellows Pump

Ergonomic design allows easy measurement of more than 350 gases—including formaldehyde

17-986-70A

Provides a means of direct, onsite measuring of more than 350 gases, vapors, and aerosols. Internal scissors mechanism provides stability so that a uniform, even pump stroke of 100cm³ can be completed.

- ▸ Convenient, built-in stroke counter records strokes performed
- ▸ Recessed counter reset button prevents accidental resetting; a white dot in clear optical window of pump rises to indicate completion of each stroke cycle, preventing incomplete measurements
- ▸ Ergonomic design fits comfortably in one hand
- ▸ Soft rubber grips on pump body make it easier to hold and squeeze
- ▸ Built-in ceramic tube opener adds safety and convenience
- ▸ Corrosion-resistant construction provides years of reliable service
- ▸ Components are easily replaceable and snap together for quick reassembly
- ▸ Designed and manufactured using ISO 9001: 2000-certified processes
- ▸ **Hardside Kit** has a durable, hard plastic carrying case
- ▸ **Softside Kit** includes a nylon transport case with shoulder strap

ORDERING INFORMATION:

Pump dimensions 6¾L × 1¾W × 3⅜"H (17.1 × 4.5 × 8.5cm). Net weight: ½ lb. (225g). Stroke volume: 100cm³ ±5%.

INCLUDES:

Available alone or as part of a pump kit that contains the accuro pump, deluxe tube opener, a pack of rubber caps for tubes, a screwdriver, an Allen wrench, and spare parts for the pump.

REQUIRED ACCESSORIES:

Drager Short-Term Detector Tubes (see separate entries, pp. 1621-1623)

Description	Mfr. No.	Cat. No.	Each
accuro pump (alone)	6400000	**17-986-70A**	390.37
accuro softside kit	4053473	**17-988-408**	506.76
accuro hardside kit	4056443	**19-046-750**	543.00
accuro hard case	4056442	**19-046-749**	83.00

Dräger* Haz Mat Simultaneous Test Kit

Simultaneously detects multiple contaminants

Provides Haz Mat teams with onsite information about levels of inorganic/organic gases and vapors encountered during fires and afterward during salvage and overhaul operations.

- Easy to use—just score and remove tube tips, insert special five-tube holder into manifold, and connect manifold to pump
- After 10 complete pump strokes, tubes are ready for evaluation

ORDERING INFORMATION:

Individual test sets and adapter also sold separately.

INCLUDES:

Accuro* pump; pump spare parts kit; air currents kit; 39" (1m) extension hose with adapter (includes scoring tool and manifold); simultaneous test set opener; deluxe tube opener; laminated instruction cards.

Three each of Simultaneous Test Set† I (tests for hydrogen chloride, hydrogen cyanide, carbon monoxide, ammonia, and nitrous fumes).Three each of Simultaneous Test Set† II (tests for sulfur dioxide, chlorine, hydrogen sulfide, carbon dioxide, and phosgene).

Four each of Simultaneous Test† Set III (tests for alcohols, aliphatic hydrocarbons, aromatics, chlorinated hydrocarbons, and ketones).

Hard-plastic carrying case.

19-046-643

Description	Mfr. No.	Cat. No.	Each
Haz Mat Simultest Kit	4056098	**19-046-643**	1675.00
Haz Mat Simultest Kit without accuro pump	4056447	**19-500-221**	1265.00
Adapter	6400090	**17-985-354Z**	53.56

†Each Simultaneous Test Set consists of five detector tubes in a rubber holder—ready for use. Each test set can be completed in one minute or less.

ACCESSORIES

Individual Haz Mat Simultest Test Sets

Test for five different gases simultaneously in less than one minute

Test Set I. Includes detector tubes for hydrogen chloride, hydrogen cyanide, carbon monoxide, ammonia, and nitrous fumes.

Test Set II. Includes detector tubes for sulfur dioxide, chlorine, hydrogen sulfide, carbon dioxide, and phosgene.

Test Set III. Includes detector tubes for alcohols, aliphatic hydrocarbons, aromatics, chlorinated hydrocarbons, and ketones.

ORDERING INFORMATION:

Packs of 10 test sets.

REQUIRED ACCESSORIES:

Require adapter and a Dräger* pump (sold separately) for the semi-quantitative determination of inorganic gases and organic vapors.

Description	Mfr. No.	Cat. No.	Pack of 10
Test Kit Set I	8101735	**18-556R**	70.56
Test Kit Set II	8101736	**18-556S**	70.56
Test Kit Set III	8101770	**18-556T**	70.56

WARNING

No other type of tube should be substituted for use with these kits.

*Trademark. See Trademark Reference.

ger* Short-Term Detector Tubes

measuring concentration of specific contaminants instantaneously

ss detector tubes are filled with an inert reagent carrier material (silica gel, aluminum oxide, or aluminum silicate) impregnated with an indicating reagent

gent produces a colorimetric indication in the presence of a particular gas, vapor, or aerosol

centrations can be read directly from the color change on the tube's printed scale

es are hermetically sealed; most have a two-year shelf life (when stored at room temperature)

E:

tests require a pretube or comparison tube in addition to the detector tube. These tubes are included in the box of 10, thus reducing the number of tor tubes. The actual number of detector tubes is cited in the ordering charts.

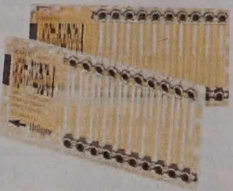
Dräger CMS* Chip Measurement System

Uses an analyzer and substance-specific chips to obtain accurate, reliable measurements of gas and vapor concentrations



Chips for use with CMS Analyzer

Bar code on each chip contains specific information such as gas type, measurement range, and other necessary parameters for measurement evaluation; when a chip is inserted into the analyzer, the bar code is read and interpreted. Choose from more than 50 interchangeable chips (sold separately, at right).

- Mass-flow-regulated pump system draws a constant flow of sample through the chip, compensating for any pressure fluctuation
- Easy to use, with simple menu commands and one-switch operation
- Chip contains 10 measurement channels filled with a substance-specific reagent that provides a quick reaction with the contaminant
- Intelligent interaction ensures high level of accuracy
- Data recorder gives contaminant, concentration, date, time, and location; stores up to 50 measurements

18-999-1916

ORDERING INFORMATION:

Compact, rugged housing measures approximately 1½L × 3½W × 8"H (3.8 × 8.9 × 20.3cm). Net weight: 1⅝ lb. (730g). Uses four "AA" alkaline batteries (included).

INCLUDES:

Comes with carrying case and batteries. Optional remote system (sold separately) includes an additional pump, a screwdriver, and a 9' (3m) extension hose to sample contaminants in inaccessible areas.

REQUIRED ACCESSORIES:

CMS chips (sold separately)

CERTIFICATIONS:

Intrinsically safe and certified according to UL, MSHA and CENELEC standards.

*Trademark. See Trademark Reference.

A* Altair Pro Single-Gas Detector

gle-button access to any function

ires superior dust and water protection, excellent impact resistance, RFI performance, and an extremely effective alarm system.

ghly accurate electrochemical sensors measure concentrations of toxic s or percent oxygen

ormation displays on large, clear backlit LCD

stem automatically records the last 50 alarm or test events; active ta-logging records peak value every 3 minutes

ble alarm system consists of two bright flashing LEDs, a piercing audi- alarm, and internal vibrating alarm

justable alarm set points are offered for LOW and HIGH levels on all ts; toxic gas versions also have TWA and STEL alarm points

bberized armor housing resists dust, water and impact

ilt-in IR communication port connects detector to MSA infrared adapter read data or change alarm set points

ilt-in gas delivery adapter for gas response tests

From left : 19-165-562, 19-165-558, 19-165-559

ORDERING INFORMATION:

Dimensions: 3.4 × 2 × 1" (8.6 × 5 × 2.5cm). Weight (including clip): 4 oz. (113g).

COMPLIANCE:

Complies with Class 1, Div 1, Groups A, B, C, D and G requirements in the U.S. and Canada. IP67 rated for ingress protection. Meets ATEX and Australian standards. UL, cUL listed.

Sensor	Measuring Range	Mfr. No.	Cat. No.	Each
O_2	0-25%	10074137	**19-165-558**	325.00
CO	0-1500ppm	10074135	**19-165-559**	325.00
H_2S	0-200ppm	10074136	**19-165-562**	325.00

A* Passport* FiveStar* Gas Detectors

ultaneously detect and display concentrations of combustible gases, oxygen, and toxic gases

or bay accommodates up to five sensors and is designed for easy or upgrade or replacement. "Smart sensors" automatically configure itor for detection of selected gases; sensors also automatically pensate for changes in temperature and pressure to provide dependable ection in a range of ambient conditions and in both high-altitude and rground applications.

tures

gged, molded plastic case with silver-plated body resists water and st and features static spark resistance/RFI protection

rge backlit display is designed to face user when monitor is clipped to lt for hands-free operation

ree pushbuttons control all functions; allow access to peak readings, ne-weighted average (TWA), short-term exposure level (STEL), and ttery status

nique "gas gauge" indicates amount of time remaining on battery charge

ternal datalogger stores up to 15 hours of continuous operational data; nerates periodic and session reports for downloading to PC

gh-decibel audible tone and flashing display alert user of presence of zardous gases, concentrations that exceed STEL and TWA, and low ttery voltage

clusive Lockalarm* circuit provides added level of protection in monitoring mbustible gases; if atmosphere reaches 100% LEL, alarm is reset only by oving to fresh-air environment then turning the unit off and back on again

TIFICATIONS

approved for use in Class I, Division 1, Groups A, B, C, and D; Class II, sion 1, Groups A, B, C, and D; Class II, Division 1, Groups E, F, and G; ss III hazardous locations.

ERING INFORMATION

ensions: 6½L × 3⅜W × 2⁵⁄₁₆"H (16.5 × 8.6 × 5.8cm). Weight: 17.3 oz. (491g).

TE: Silver nickel-plated alarm is not appropriate for chlorine. The choice harsh chemical environments where corrosion is a concern, the ABS stic version of the FiveStar is available as a special order. For ordering rmation, contact your Fisher Scientific Customer Service Representative.

INCLUDES:

Alarm and listed sensors; rechargeable NiCd battery pack; fast charger; pump module; 10' (3m) sampling line; 12" (30.5cm) probe; leather instrument jacket; heavy-duty carrying case with video and space for cylinder

MSA* Model RP Calibration Check Kits

Quick and convenient method for checking the response of gas detection instruments

ORDERING INFORMATION:

Kits available with 0.25L/min. or 1.5L/min. regulators. Cylinders are sold separately. (Measure approximately 14¼L × 3½" diameter.)

INCLUDES:

- Female/male connection
- Regulating valve with gauge to measure cylinder pressure
- Sampling line
- Calibration test tubing
- Sensor adapter (where applicable)
- Hard carrying case with foam inserts for accommodating two calibratio gas cylinders

Representative kit shown with various regulators. Each kit comes with one regulator as described.

CERTIFICATIONS:

All calibration accessories are certified and tested for accuracy.

Regulator	Mfr. No.	Cat. No.	Ea
RP Calibration Kits			
0.25 L/min.	477149	**18-999-3236**	219.
1.5 L/min.	477150	**18-999-3238**	230.
Replacement Regulators			
0.25 L/min.	467895	**18-999-3342**	160.
1.5 L/min.	467896	**18-999-3344**	160.

MSA* Orion* Multigas Detector Kits

Simultaneous multigas measurement and display

Economical, portable gas monitor detects and measures the presence of O_2, H_2S, CO, and combustibles.

- Runs up to 20 hours in nonpump mode and 16 hours in pump mode
- Rechargeable NiMH battery pack recharges in under four hours using MSA's Fast Charger; unit will also run for at least eight hours on standard alkaline batteries

All Models Feature:

- Large easy-to-read display
- Simple two-button operation with one-button calibration
- Gases displayed simultaneously along with measured reading
- Rugged case designed to resist dust and water and survive a 6' (1.8m) drop
- Alarm lights visible from all angles
- Protective boot

INCLUDES:

Deluxe Kit Includes:

- NiMH battery and charger
- Internal pump
- 10' (3m) sample line with 1' (30cm) probe
- Orange cordura case
- Calibration kit in a black economy case
- Available with optional datalogging capability; ask your Fisher Scientific Customer Service Representative for pricing and ordering information (Mfr. Part No. 10030399)

Industrial Kit Includes:

- NiMH battery and charger
- Internal pump
- 10' (3m) sample line with 1' (30cm) probe
- Orange cordura case

Economy Kit Includes:

- Alkaline battery
- Calibration cap

Orion Multigas Detector from 19-042 Series Kits

CERTIFICATIONS:

Orion is approved by UL and CUL as intrinsically safe for Class I, Division 1, Groups A, B, C, and D hazardous locations. Environmental protection rating: IP54.

NEW

l for detecting and monitoring radiation exposure

19-166-365

held detector produces a linear nse over a wide energy range s suitable for use as a stand-alone neter or as part of a comprehensive netry management system.

vanced radiological performance a small, lightweight, handheld unit

gonomic rugged design with an gator clip for convenience

cellent response to gamma, beta, d X-radiation with immunity to ctromagnetic interference

splay and function control via a gle button on the front of the unit

dible and visual alarms for dose, dose rate, count-down ne, read time and failure mode

pid infrared communications to reader/PC or stand-alone operation

sy-to-read display with optional backlighting

it retains data up to 10 years without a battery

ngle 3.6V lithium battery provides up to 30 weeks of continuous eration; also operates on "AA" alkaline battery

ailable with coin battery cap that opens with twist of a coin, or curity battery cap that requires a special tool to open (sold separately)

MPLIANCE:
plies with U.S. FCC rules (Part 15).

TIFICATIONS:
ertified.

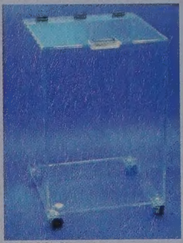
RADIATION PROTECTION

*Fisherbrand** Mobile Beta Storage Container

Suitable for beta protection and industrial mobile storage

- Made of ⅜" thick (0.95cm) acrylic
- Hinged lid stays open in two positions for safe, easy access
- Four easy-glide casters



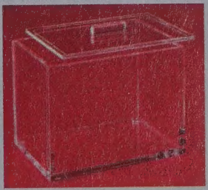
12-009-45

L × W × H	Cat. No.	Each
20 × 20 × 28" (50.8 × 50.8 × 71.1cm)	**12-009-45**	677.75

*Fisherbrand** Beta Storage Box

Holds two tube holders side-by-side

- Safely stores reagent bottles containing beta-emitting isotopes
- Made of ⅜" thick (0.95cm) clear acrylic with nonskid feet
- Cover has handle and removes easily



12-009-13

L × W × H	Cat. No.	Each
9 × 6 × 7" (23 × 15 × 18cm)	**12-009-13**	113.72

*Fisherbrand** Beta Waste Boxes

Extra-large capacity storage bin holds carboys, linens, bench liners and more

- Made of ⅜" thick (0.95cm) acrylic for beta protection
- Removable lid allows for use with liner bags
- **Mobile Big Beta Box** has four heavy-duty casters for easy movement

ORDERING INFORMATION:
Both boxes measure 12L × 12W × 24"H (30.5 × 30.5 × 61cm).

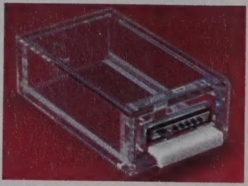
Big Beta Box	**12-009-44B**	388.87
Mobile Big Beta Box	**12-009-44C**	460.96

Nalgene* Stackable Beta Acrylic Lock Box with Drawer

Stackable lock box with front pull-out drawer for easy access

- Made from ½" thick (12mm) acrylic
- No metal parts to produce secondary X-rays
- Maximum protection against beta emitters such as ^{32}P, ^{35}S, and ^{14}C
- Holds standard-size lead pigs and radioactive vials
- With hinged lid
- L × W × H: 14¾ × 8¾ × 5" (37.5 × 22.2 × 12.7cm)



14-293-65

INCLUDES:

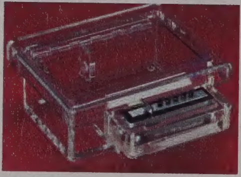
Built-in antitheft security connector, push-button combination lock, and two radiation symbol stickers

Mfr. No.	Cat. No.	Each
6851-0001	**14-293-65**	469.59

Nalgene* Benchtop Beta Acrylic Lock Box

Small unit useful for secured storage in refrigerator or freezer

- Made from ½" thick (12mm) acrylic
- No metal parts to produce secondary X-rays
- Maximum protection against beta emitters such as ^{32}P, ^{35}S, and ^{14}C
- Holds lead pigs or radioisotope vials up to 3½" (8.9cm) tall
- With hinged lid
- L × W × H: 6 × 9 × 3¾" (15.2 × 22.9 × 9.5cm)



14-293-64

INCLUDES:

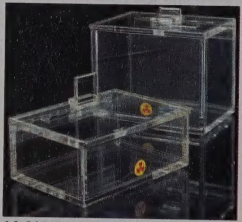
Built-in antitheft security connector, push-button combination lock, and two radiation symbol stickers

Mfr. No.	Cat. No.	Each
6850-0001	**14-293-64**	337.42

Nalgene* Hinged-Lid Beta Disposal and Storage Containers

For temporary storage and disposal of microcentrifuge tubes and pipet tips exposed to beta emitting isotopes

- Built-in Quick-Tip* mini lid minimizes exposure to radioisotopes
- Transparent, ⅜" thick (0.95cm) acrylic
- Large hinged lid has a built-in stop to prevent lid from folding back on container
- Mini lid flips up for easy disposal of pipet tips



14-293-62A, 14-293-62B

L × W × H	Mfr. No.	Cat. No.	Each
6 × 9 × 3" (15 × 23 × 8cm)	6812-0001	**14-293-62A**	146.30
6 × 9 × 7" (15 × 23 × 18cm)	6812-0002	**14-293-62B**	205.27

Nalgene* Beta Storage Box

Save space in your refrigerator and freezer

- Transparent ⅜" (0.95cm) thick acrylic container provides shielded storage for stock isotope solutions and radiolabeled samples
- Rectangular design saves space in refrigerator or freezer and withstands prolonged use at temperatures to -70°C (-94°F)
- Hinged, transparent top allows easy identification of samples without opening the lid
- Accommodates Nalgene Beta Centrifuge Tube Racks

03-484-1

INCLUDES:

Two disposable foam inserts for secure positioning of lead pigs or isotope bottles

L × W × H	Mfr. No.	Cat. No.	Each
11 × 8 × 4" (27.9 × 20.3 × 10.1cm)	6740-1108	**03-484-1**	259.26

Nalgene* Benchtop Beta Waste Container

Protection against beta-emitting isotopes

Cylindrical shield protects personnel from waste material containing beta-emitting isotopes.

- Constructed of ⅜" thick (0.95cm) acrylic
- Shield cap fits securely over waste bottle–machined lip on cap prevents slipping and provides extra impact protection
- Shield encases either 1 or 2L (32 or 64 oz.) waste bottles while providing safe access to, or easy manipulation of, bottle closure

02-963-11A, 02-963-11C

INCLUDES:

1L or 2L polyethylene bottle

Size	Diameter	Mfr. No.	Cat. No.	Each
32 oz. (1L)	4½" (11cm)	6710-1000	**02-963-11A**	136.01
64 oz. (2L)	5½" (14cm)	6710-2000	**02-963-11C**	185.19

Radiation Warning Labels

Can be used on any surface where visual warning is required

11-873-11

- Ideal for labeling tubes, flasks, pipetters and tips
- ¼" wide (0.6cm) label printed with vivid magenta ink on bright yellow background
- Roll fits standard label dispensers

Cat. No.	Roll of 1000
11-873-11	30.33

WARNING

Radioactive waste should never be stored on the benchtop for long periods of time and should be disposed of properly. Proper handling and storage of isotopes will minimize exposure to radiation. For standards related to exposure, refer to United States Nuclear Regulatory Commission Rules and Regulations, Title 10, Chapter 1, Part 20.

RESPIRATORS

3M* Filtering Facepiece Respirators

3M Particulate Filtering Facepiece Respirators (FFRs) offer an effective way of meeting NIOSH 42 CFR 84 standards. Recommended for use up to 10X the PEL or the appropriate OSHA standard. All utilize the 3M Advanced Electret Media, an electrostatically charged microfiber that makes breathing easier and coole Respirators incorporate combinations of the following features: nose clips to reduce pressure points on face, one-way exhalation valves for easy exhalatio a faceseal that contours to the face to form a secure seal, and adjustable straps for a quick and easy fit.

N95 and P95 Filtering Facepiece Respirators

Provide excellent, lightweight worker protection

- For use in bagging, drilling, grinding, machining, sanding, sawing, processing of minerals, and grain handling
- Recommended for use up to 10X the OSHA PEL or applicable occupational exposure limits, whichever is lower
- Feature Advanced Electret Media for easier and cooler breathing and adjustable nose clip and straps for comfortable fit
- Available with optional exhalation valve and faceseal; 19-033-524 is a smaller size of 18-999-473
- The protective layers of respirator 19-038-989 are flame resistant as demonstrated per ASTM* D2859-96; not a substitute for a faceshield

[2] *NIOSH P95 approved: At least 95% filtration efficiency against solid and liquid aerosols including oil. If used in environments containing only oil aerosols, dispose of respirator after 40 hours use or 30 days, whichever is less.*

Odor-Removing Respirators

Allow user to work in odorous environments

- AG Nuisance Odor Relief Respirators are used in primary aluminum reductions, chemical processing, glass etching, paper mills and petrochemical industries when particles are present with concentrations of chlorine, hydrogen fluoride or sulfur dioxide below the OSHA PEL
- OV Nuisance Odor Relief Respirators are used for applications such as foundries, undercoating, petroleum operations and agricultural situations when particles are present with concentrations of organic vapors below the OSHA PEL

3M* 6000 Series Reusable Half Facepiece

Combines features of both reusable and disposable respirators to provide effective protection

- Lightweight half facepiece features adjustable headstraps and cradle suspension
- Low-profile facepiece offers excellent visibility and allows comfortable wearing of safety spectacles
- Backswept cartridges balance better on the face while their large surface area ensures low breathing resistance
- Probed models for fit test only—not for use as a respirator

17-986-9B

ORDERING INFORMATION:
Cartridge/filter combinations sold separately.

INCLUDES:
Reclosable storage bag

REQUIRED ACCESSORIES:
Facepiece requires compatible cartridges and/or filters. (See separate listings.)

COMPLIANCE:

3M* 6000 Series Drop-Down Half Facepiece

Designed for workers who need to communicate frequently

- Head cradle adjusts to head size
- Head harness system allows facepiece to drop to the chest without having to remove hard hat
- Durable straps hold their elasticity for long wear
- Upper strap adjustment is on head cradle so strap ends do not interfere with vision
- Exhalation valve cover directs air downward to help prevent fogging of the faceshield

19-041-418

ORDERING INFORMATION:
Can be used with Series 2000 or 7093 filters or Series 6000 cartridges. Contact your Fisher Scientific Sales Representative for compatibility information related to various applications.

REQUIRED ACCESSORIES:
Facepiece requires compatible cartridges and/or filters. (See separate listings.

LOOKING FOR MORE RESPIRATORS?

Fisher Scientific also provides a half-facepiece respirator from North*—the North 7700 Series. For specifications and ordering information,

Visit www.fishersci.com and search for North 7700

North* Low-Profile Cartridges and Cartridge/P100 Filter Combinations

Satisfy numerous industrial applications

- All North air-purifying cartridges are approved for use with all North air-purifying half masks and full facepiece respirators
- Air-purifying respirators with cartridges provide respiratory protection against gases and vapors by using sorbents to purify the inhaled air
- Cartridges without filters do not remove dust, fibers and other particles

CERTIFICATIONS:

All North cartridges, filters, and cartridge/filter combinations are NIOSH certified to 42CFR84 standards when used with North respirator facepieces.

3M* Breathe Easy* Belt-Mounted Turbo PAPR Systems

Lightweight, adaptable systems use interchangeable filters, cartridges, and canisters to comfortably protect against gases, vapors and/or particulates. Turbo PAPR Assembly draws ambient air through filter media, supplying filtered air through the breathing tube to the headpiece. Minimum airflow is 4 or 6cfm depending on headgear.

Systems are sold on a component-by-component basis, allowing you to mix and match pieces to fit your application. To assemble a complete PAPR system, you will need to purchase the following separately sold components:

- Headgear, facepiece, head cover or hood
- Compatible breathing tube
- Breathe Easy belt-mounted Turbo PAPR assembly
- Appropriate cartridge/filter pack for your application
- Battery pack and charger

To view a decision tree showing how all of these pieces can be selected, see previous page.

Headgear and Facepieces

Choice of headgear, facepiece, head cover, or hood should be made by considering the following: concentration of the contaminant, work application/environment, and OSHA requirements. Facepiece requires fit testing; headgear does not.

General-Purpose Headgear Assembly

- Includes an ABS helmet; a clear, fog-free pivoting polycarbonate faceshield; and a disposable Tyvek* full faceseal
- Adjusts to fit most head sizes and accommodates spectacles
- Weighs 34 oz. (0.8kg)
- Optional visor overlay that protects faceshield is available separately

19-039-696 (BE 1)

Welding Headgear Assembly

- Includes impact-resistant black ABS welding helmet with a welding shield and fog-free inner faceshield
- Shields pivot independently and lock in raised or lowered positions; inner shield accommodates facial hair and spectacles
- Weighs 2.5 lb. (1.1kg)

19-039-716 (BE 17)

Full Facepiece 6000DIN

- Soft, lightweight, and well-balanced design
- Adjustable head straps for long-wearing comfort
- Large polycarbonate lens with scratch-resistant coating

19-055-521 with built-in DIN port assembly

COMPLIANCE:

BE 1 and BE 17 meet ANSI Z87.1-2003 Eye and Face Protection requirements and ANSI Z89.1-2003 Head Protection requirements for Type I, Class G helmets

NOTE:

These safety products must be used in accordance with OSHA regulations and the user instructions, warnings and limitations accompanying each product.

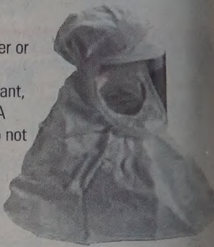
Head Cover or Hood

Choice of headgear, facepiece, head cover or hood should be made by considering the following: concentration of the contaminant, work application/environment, and OSHA requirements. Hoods and head covers do not require fit testing.



19-039-711 (BE 10)

Tychem* QC Hood (BE 10)

- Includes disposable polycoated Tychem hood that covers the shoulders and chest, with a clear, wide-view acetate visor
- Air enters from the breathing tube (sold separately), passes over the user's head and out at the base of the cape
- Accommodates most facial hair and spectacles
- Weighs 3.2 oz. (0.1kg)
- Supplied in packs of three hoods

18-778A (BE 12)

Tychem QC Head Cover (BE 12)

- Includes a liquid-repellent, polycoated Tychem head cover with a clear, wide-view acetate visor
- Comes with three regular or large-sized head covers in choice of white or blue

NOTE:

These safety products must be used in accordance with OSHA regulations and the user instructions, warnings and limitations accompanying each product.

Lightweight, comfortable, and efficient PAPR systems incorporate blower, filter, and battery in a single belt-mounted unit. Protect against airborne particulates that have a concentration of up to 25 × PEL using the Tychem* QC Head Cover, or 1000 × PEL using the Tychem QC Hood. Rechargeable NiCd battery provides up to eight hours of continuous use.

NOTE:
These safety products must be used in accordance with OSHA regulations and the user instructions, warnings, and limitations accompanying each produc

To assemble a complete PAPR system, select from the following pieces sold separately:

- Head cover or hood
- Breathing tube
- Air-Mate Belt-Mounted PAPR Assembly
- Battery charger

R-Series Head Covers and Hoods

Tychem QC Head Covers (BE 12)

- Include a liquid-repellent Tychem headcover with a clear, wide-view acetate visor
- Protect against particulates that have a concentration up to 25 × PEL
- Choice of regular or large sizes in white or blue

Tychem QC Hood (BE 10)

- Includes a disposable, white Tychem hood that covers the shoulders and chest, with a clear wide-view acetate visor
- Air enters from the breathing tube (sold separately), passes over the user's head and out the base of the cape
- Accommodates facial hair and spectacles
- Protects against particulates that have a concentration up to 1000 × PEL
- Supplied in packs of three hoods with choice of regular or large sizes

North* Emergency Escape Breathing Apparatus (EEBA)

Helps workers escape safely in an emergency

- Low-maintenance design ensures EEBAs are ready when needed
- Durable polyurethane hood with elastic neckband simply slips over wearer's head
- High-visibility carrying bags are easy to locate, even in smoky conditions; illustrated instructions are clearly printed on each case
- 360° transparent air hood has a deflector to blow incoming air onto the lens to minimize fogging
- ON/OFF valve is easy to locate and operate
- Pressure gauge is easy to read

Scott* ELSA* Emergency Escape Breathing Devices

Constant-flow, positive-pressure respirators provide a limited supply of Grade D breathing air

For situations where air quality has been compromised and rapid evacuation is critical. Hood is easy to don, requires no fit testing, and can be worn by persons of all sizes with glasses and/or facial hair. Its clear polyurethane construction permits an unobstructed field of vision.

19-120-2480

- Clear, polyurethane hood
- Supplied air hose
- Secure elastomeric neck seal
- Rechargeable aluminum air cylinder with pressure gauge and reducer assembly
- Sturdy nylon strap allows cylinder to be carried or worn on the neck or shoulder
- Safety orange, PVC-coated polyester carrying bags for rapid deployment

ORDERING INFORMATION:
Standard 5- or 10-minute apparatus deliver emergency air at a rate of 1.4 cfm (40L/min.). A "high flow" version of the 5-minute respirator is also available. Used in escapes requiring great exertion (climbing stairs, ladders, etc.), this unit provides air at a rate of approximately 2.6 cfm (75L/min.) for easier breathing at higher rates.

COMPLIANCE:
Ten-minute breathing apparatus meets maritime Safety of Life at Sea (SOLAS) requirements under Regulation 13, Chapter 11-2.

CERTIFICATIONS:
All devices are NIOSH certified: 5-minute standard flow (2216 psi), TC-13F-486; 10-minute standard flow (3000 psi), TC-13F-487; 5-minute high-flow (3000 psi), TC-13F-488.

SHOWERS & EYEWASHES

*Fisherbrand** Combination Eye/Facewash and Shower Safety Stations

Space-saving unit

Include overhead drench shower and independently operated eye/facewash. Can also be ordered with drench hose or without eye/facewash bowl.

19-120-2316

Stay-open Ball Valve
- Shower has 1" (2.5cm) IPS chrome-plated brass ball valve with stainless-steel actuating arm and easy-grab triangular handle
- Eye/facewash has ½" (1.3cm) chrome-plated brass ball valve activated by highly visible yellow PVC push handle
- Valves stay open until manually closed

Shower Head
- 10" dia. (25.4cm) shower head is yellow impact-resistant plastic
- Flowrate exceeds 20 gpm at 30psi

Eye/facewash Heads
- Twin perforated ABS disc heads with protective pop-off sprayhead covers
- Gentle spray bathes eyes and face
- Exceeds flowrate of 3gpm at 30psi
- Integral flow control in sprayhead assembly assures safe, steady water flow between 30 to 90psi

Eye/facewash Bowl
- 10" dia. (25.4cm)
- Available in yellow ABS plastic or stainless steel

Pipe and Fittings
- 1¼" (3.2cm) galvanized steel protected by Bradtect* safety yellow coating
- Main pipe is 1¼" (3.2cm); shower pipe is 1" (2.5cm); eyewash piping is ½" (1.3cm)
- Includes 9" dia. (22.9cm) floor flange
- Aluminum base
- 1¼" (3.2cm) IPS female supply

INCLUDES:
Universal identification sign and inspection tag

WARRANTY:
One year

COMPLIANCE:
All models comply with ANSI* Z358.1-2004.

- Self-contained, no plumbing required
- Highly visible green color provides easy identification in an emergency situation
- Sure-grip handle provides instant, simple activation
- Activation straps display expiration date
- Integral drain valve allows easy draining of reservoir after use
- Integral fluid reservoir captures waste fluid, eliminating potential safet hazards and simplifying fluid disposal
- Cover keeps dirt and trash from collecting in the basin and nozzle
- Unit can be serviced in five minutes or less

INCLUDES:

8 × 10" (20.3 × 25.4cm) vinyl eyewash sign

REQUIRED ACCESSORIES:

Requires two solution cartridges (sold separately). Case of two cartridges comes complete with solution, delivery tube and nozzle assemblies.

CERTIFICATIONS:

SEI certified to meet ANSI* Z358.1.

nd•all* Porta Stream* Portable Eyewash Stations

ally self-contained stations for areas without access to plumbed water

ity-fed systems provide employees with
hing relief in emergency situations.
a Stream models come with Eyesaline*
entrate that, when mixed with tap water,
uces an isotonic solution physiologically
lar to human tears.

17-292-1A

a Stream I Station (6 minutes)

ight green color is highly visible, even to
ose with impaired vision

nstructed of high-impact polyethylene
th a 6 gal. (22.8L) tank

o full-flow nozzles cover a wide facial
ea for immediate relief

mple to use—just remove the patented nozzle strap and hands-free
shing is activated

n be mounted on a table

mes with 70 oz. (2.0L) of Eyesaline concentrate

easures 16L × 13½W × 24"H (41 × 34 × 61cm)

e: This device is classed as a secondary (personal) device and is
nded to supplement and not replace a 15-minute flush capability
ary device.

Porta Stream II Station (15 minutes)

- Same standard features as the Porta Stream I eyewash, but with 16 gal. (61L) tank and lockable fill cap to reduce the risk of tampering
- Comes with 180 oz. (5.3L) of Eyesaline concentrate, a green and white vinyl eyewash sign, and cast-iron hanging bracket for installation on any flat or vertical surface
- Measures 19½L × 19½W × 26"H (50 × 50 × 66cm)

17-292-1B

CERTIFICATIONS:

Porta Stream II station is SEI-certified to meet ANSI* Z358.1-2004 requirements as 15-min. flush capability primary device.

Description	Volume Dispensed/Time	Mfr. No.	Cat. No.	Each
Porta-Stream I	6 gal./6 min.	32-000100-0000	**17-292-1A**	252.27
Porta-Stream II	16 gal./15 min.	32-000200-0000	**17-292-1B**	364.46

WARNING

Since the first few seconds of an eye injury are critical, a portable eyewash station will provide immediate relief until the worker has access to either a plumbed station or a shower. Portable stations support a plumbed or self-contained drenching facility. They do not take the place of a 15-minute flushing facility.

ACCESSORIES

yesaline* Solution

vailable in concentrate or ready-to-use form to refill bottles in Porta Stream* wall-mounted
tations or to replace untreated water in other portable eyewash equipment.

- Concentrate 70 oz. (2L) bottle makes about 6 gal. (22.8L)
- Concentrate 180 oz. (5.3L) bottle makes about 16 gal. (60.6L)
- Premix bottles contain 8 oz. (0.24L) or 1 gal. (3.8L) ready-to-use Eyesaline solution

North* Emergency Eye and Skin Flush Stations

Provide immediate access to eyewash solutions for accidents involving acids, caustics, or other water-soluble irritants

Ideal for use in areas where accidents often occur—plating areas, laboratories, battery storage facilities, and chemical processing operations.

- Highly visible yellow color facilitates easy identification in an emergency
- Buffered Eye-Lert* eyewash is soothing, normal saline solution with pH close to that of human tears; free of bacteria and contaminants
- Quickly neutralizes varying quantities of acids and caustics
- Low-profile stations are equipped with positive shock-cord retention system for quick release
- Bottles are date-coded and have nonreplaceable snap-off caps to ensure sterility
- Universal station backplate with screw holes permits easy mounting

ORDERING INFORMATION:
Available in single or double stations with 16 or 32 oz. bottles of eyewash.

SPILL CONTROL

isherbrand* Universal Sorbents

iversal, nonselective sorbents can fully saturate in little as 20 seconds

ds and Rolls

19-034 and 17-206 Series

- uited for leaks, spills, or lrips and for routine mainenance–can be used on nild acids and caustics
- \bsorb up to 20 times their veight
- /lade of polypropylene hat has been shredded, ulped, and air-blown hrough two strong layers of spunbonded film, then heat-sealed and limpled for extra strength
- ough, lint-free, soft, pliable, and highly absorbent
- old easily upon themselves to form multi-layer barrier
- aturated pads resist tearing and sticking to surfaces, and can e wrung out and then reused or incinerated with less than .1% ash residue

lows and Socks

- deal for spill containment and control
- \bsorb up to 14 times their weight
- asings made of chemical-resistant, nonwoven polyester blend vith polyester thread) that enhances absorbency

rticulate

- deal for use on oils, acids, caustics, toxic liquids, and other chemicals
- olypropylene sorbent soaks up to 140% times its weight in liquids
- ertified free of respirable silica
- ffectively cleans up liquids with no film residue; provides traction on vet, oily, or icy surfaces
- nvironmentally safe particulate sorbent exceeds EPA landfill isposal requirements

MPLIANCE:

nbiodegradable; eliminate "free" liquids, meeting U.S. EPA uirements for landfill disposal of nonregulated wastes and sludges. ticulate passes Paint Filter and TCLP tests. Handle disposal ording to federal, state, and local laws.

WARNING

not use particulate, socks, or pillows on hydrofluoric acid. Do not e pads, rolls, rugs, or mats on concentrated sulfuric acid and strong ustics, as fabric casings may degrade if contact is lengthy. Refer Material Safety Data Sheet for details.

Fisherbrand* Oil-Selective Sorbents

Selectively remove hydrocarbons from water

- ▸ For sorbing oil and a wide variety of acids and other hazardous chemicals
- ▸ Water-repellent, nonwoven polypropylene sorbents sorb up to 25 times their weight in petrochemical-based liquids
- ▸ Unaffected by temperature, humidity, and pest infestation; easy to store
- ▸ Can be cleaned and reused repeatedly

Oil Spill Control Sorbents

- ▸ Polypropylene sorbents absorb oil and solvent spills on water
- ▸ Booms float on the surface to selectively remove hydrocarbons and contain the spill
- ▸ Hardware is included to link booms
- ▸ Compact pillow, socks, and pads can be placed directly on spills
- ▸ Particulate can be scattered on petroleum spills

Oil Pads and Rolls

- ▸ For cleaning spills of flammable material
- ▸ Sorbent pads and rolls come in a range of sizes and can be trimmed to fit

*Fisherbrand** Spill Response Drum Kits

All the supplies necessary to safely clean up oils, acids, caustics, solvents, and toxic spills

17-206A

High-density polyethylene drums hold a supply of Fisherbrand sorbent socks, pillows, and sorbent powder—and provide safe containment for used sorbents after spill cleanup. Pull-tab opening makes access quick and easy. Drums are highly resistant to impact and environmental stress cracks, and have safety locks and PVC O-rings to assure tight seal.

- **6 gal. (22.7L) drum** contains five socks, two absorbent wipes, two disposal bags with ties, and two shaker cartons of sorbent, for a total sorbing capacity of approximately 7 gal. (26.5L).
- **20 gal. (75.7L) drum** contains six socks, six pillows, four absorbent wipes, three disposal bags with ties, and two shaker cartons, for a total sorbing capacity of approximately 18 gal. (68.1L).
- **55 gal. (208L) drum** contains 25 socks, 12 pillows, 10 absorbent wipes, four disposal bags with ties, and a 25 lb. (11.3kg) bag of sorbent, for a total sorbing capacity of approximately 53 gal. (200.6L).
- **95 gal. (359.5L) drum** contains 11 socks, 20 pillows, 50 absorbent wipes, 10 disposal bags with ties, and a 25 lb. (11.3kg) bag of sorbent, for a total sorbing capacity of approximately 73 gal. (276.3L).

CERTIFICATIONS:

6- and 20-gal. drums carry DOT approval for transportation of hazardous materials.

Description	Sorbing Capacity Range†	Cat. No.	Each
6 gal. (22.7L)	4 to 7 gal. (15.1 to 26.5L)	**17-985-128**	67.00
20 gal. (75.7L)	10 to 18 gal. (37.8 to 68.1L)	**17-206A**	142.24
55 gal. (208L)	32 to 53 gal. (121.1 to 200.6L)	**17-206B**	376.47
95 gal. (359.5L)	43 to 73 gal. (162.7 to 276.3L)	**19-034-969**	648.15

† Range of sorbency based on minimum and maximum values.

WARNING

Do not use particulate, socks, or pillows on hydrofluoric acid. Do not use pads or rolls on concentrated sulfuric acid and strong caustics, as fabric casings may degrade if contact is lengthy. Refer to Material Safety Data Sheet for details.

*Fisherbrand** Chemical Spill Cabinet

Packed as a portable kit or can be mounted to a wall

19-034-968

ORDERING INFORMATION:

Cabinet measures 5½L × 13¾W × 16¼"H (14 × 34.9 × 41.3cm).

INCLUDES:

Five universal pillows, six lab pillows, two disposable bags with twist ties, one pair of chemical-resistant gloves, one Whisk-on-pan*, one poly apron, one pair of splash goggles, one carton of sorbent powder

Sorbing Capacity (per cabinet)	Cat. No.	Each
2.5 to 3 gal. (9.5 to 11.3L)	**19-034-968**	173.04

*Fisherbrand** Neutral-Sol* Chemical Burn First Aid Station

Instant acid and caustic neutralization

10-030-10

Provides emergency treatment for acid and alkaline chemical burns. Neutralizes chemicals accidentally splashed on skin, eyes, or clothing in seconds. Also provides flushing action for dust.

- For labs, chemical storage areas, plants, and any areas where chemicals are used
- Easy-grab, wide-mouth bottle contains Neutral-Sol solution, a sterile pH 6.9 phosphate buffer similar to that present in human tissue
- Bottle securely housed in brilliant green ABS plastic station for fast recognition

ORDERING INFORMATION:

Station measures 17 × 15" (43 × 38cm). Replacement Neutral-Sol solution available separately.

INCLUDES:

One 32oz. (946mL) bottle of Neutral-Sol and wall mounting screws

COMPLIANCE:

Complies with OSHA regulations for quick drenching and flushing action.

Description	Cat. No.	Price
Chemical Burn Station	**10-030-10**	Ea./57.00
Replacement Neutral-Sol	**10-030-15**	Pk. of 2/52.13

ANSUL* SPILL-X* Agents

17-200 Series

Spill-X Agents in Shaker Bottles

Free-flowing, dry agent to treat acid, caustic, solvent, and formaldehyde spills

- Solidify and reduce vapor release from solvent or formaldehyde spills
- Neutralize and solidify acid or caustic spills
- Properly neutralized corrosive spills (pH over 2 and less than 12.5) are no longer characterized as "hazardous materials" by the U.S. EPA
- Properly treated solvent spills have greatly reduced vaporization loss
- Four agents available: SPILL-X-A* for acids; SPILL-X-C* for caustics; SPILL-X-S* for solvents; and SPILL-X-FP* for formaldehyde
- Color-coded label for easy identification

ORDERING INFORMATION:

Six shaker bottles per pack. Multi-agent kit includes two bottles each of SPILL-X-A, SPILL-X-C, and SPILL-X-S agents. A single-agent pack for formaldehyde is also available.

ilfyter* Mercury Spill Kit

igned to handle all stages of mercury spill cleanup

ontains everything needed to quickly and safely clean up mercury spills ¾ oz. (25mL) and prevent toxic vapor contamination.

ercury indicator powder identifies mercury in area of suspected ntamination

ter an undisturbed period, powder changes color to indicate contact th mercury metal or vapor

ercsorb* powder converts mercury into an amalgam for safe, convenient eanup of mercury on work surfaces, floors and hard-to-reach areas

LUDES:

oz. (270g) Mercsorb amalgamation powder, 8¾ oz. (250g) mercury ator powder, vapor suppressor shaker bottle, aspirator bottle, waste ction bottle, mixing tub with spatula, chemical sponge, one pair nitrile es, one pair splash goggles, Whisk-on-pan* with brush, red plastic ing case

8¾ oz. Mercury Indicator Powder	523250	**18-999-949**	50.88

WARNING
Kit does not contain any chemicals designed to alter the mercury's toxicity or its danger. Recommended for use by trained personnel only.

nuteman* Mercury Recovery Vacuum Systems

ely recover mercury, mercury vapors, and mercury-contaminated particulates

ially adapted critical filter vacuum system recovers liquid mercury and s mercury-contaminated dry and liquid soil and air. Feature AC/DC air-d motor which is also usable as a high-performance, standard vacuum er when special filter modules are removed.

lel MRS-3

use with larger-sized spills

gal. (57L) stainless-steel tank

uipped with exclusive ULPA filter; impact filter; charcoal filter; mercury p; mercury separator; Dacron* bag; and 12 impact filters, 12 filter protors, 10 disposable bags and 10 plastic bags

nensions: 46H × 21"W (117 × 53cm)

lel MRS

signed to quickly clean up small volumes of mercury

htweight, 6 gal. (23L) stainless-steel tank

uipped with charcoal filter, quick-change filter cartridge, paper lection bag, and 10 disposable paper bags and 10 plastic bags

nensions: 25H × 14"W (64 × 36cm)

LUDES:

el MRS-3 includes a tool kit with smooth bore hose, plastic wand, tatic spray, plastic plug set, 10 paper-bag seals, hose swivel, plastic adapter, tool basket and upholstery and crevice tools.

el MRS-6 includes a tool kit with smooth bore hose, plastic wand, dusting brush and upholstery and crevice tools.

Minuteman* CRV* Cleanroom Vacuums

Ideal for use in ISO Class 3 (Class 1) cleanrooms, gowning areas, and air showers

- Three-stage filtration system includes a dual-layer disposable paper bag, a nonwoven cloth filter, and an ultralow particulate air (ULPA) filter
- ULPA filter is 99.999% efficient at 0.12μm, exceeding the efficiency of normal high-efficiency particulate air (HEPA) filters
- Powerful 1.2hp motor supplies ample suction of debris such as dust, filings, and paper, yet operates quietly with a sound rating of 65dB(A)
- Wheel carriage has two large 6" (15cm) rigid rear wheels and 3" (8cm) front swivel casters to allow easy tracking behind operator
- 4 gal. (15L) tank is available in heavy-duty stainless steel or painted, with a dry capacity of 0.21 cu. ft. (0.006m³)
- **RFI/EMI Digital Switching Station Vacuum** with added electromagnetic/radio frequency interference filtration system prevents potential damage from feedback; designed for use in the telephone industry's digital switching stations

18-999-281A

ORDERING INFORMATION:

Tool kit, optional filter protectors, replacement cloth filters, paper bags, and ULPA filters available separately on our Web site.

INCLUDES:

Lid assembly, tank assembly, cloth filter, ULPA filter, and 10 paper bags

Minuteman* X829 Series HEPA Vacuum

Safe, easy-to-use vacuum for difficult dry and wet cleaning jobs

- Removes hazardous dusts such as lead, arsenic, and asbestos, and nonhazardous wastes such as flour, wood, and foundry dusts
- Durable tank has a quick-release, self-sealing intake that ensures a positive vacuum seal
- ULPA filter is 99.999% efficient at 0.12μm; resists punctures, tears, leaks, abrasions, and moisture damage
- Patented safety interlock system prevents operation if ULPA filter is not properly in place
- One-piece, polyethylene Uni-Adapter* attaches easily to form a leakproof seal with the vacuum tank, enabling safe wet direct load recovery

Scienceware* Sterileware* Samplers

For convenient, sterile sampling of dry, powdered, caked, or slurried materials

Specifically designed to save time in quality-assurance and microbiology labs that require repetitive contamination-free samples of food, cosmetics, pharmaceuticals, and environmental materials.

- Tough, high-impact styrene
- Samplers have extra-long handles to keep hands at a safe distance from bowl
- Guaranteed sterile
- Disposable
- Each sampler is sealed inside its own plastic bag
- Back lip of is slightly raised above handle to prevent thumbs from accidentally slipping into sample

Sampling System

- For one-step sterile sampling of dry or slurried material
- Extra-long handles keep hands safe
- Scoop with a lid, inside a plastic bag
- Lock-tab seals sample inside
- Sample data can be written on lid for easy identification

SEATING

Fisher Scientific* Computer Task Chairs

For CRT operators and other workers who must be seated for long periods of time

Construction

- Feature 18L × 19"W (45.7 × 48.2cm) ergonomically designed, molded polyurethane foam seats upholstered with 100% Marquesa Lana fabric
- Frame, backrest shell, and 24" diameter (60.9cm) five-leg base are constructed of sturdy, easy-to-clean, nylon-reinforced fiberglass
- Backrest support bar enclosed in attractive plastic bellows
- Internal bumper guard protects against tearing
- Base rolls smoothly on self-braking, dual-wheel casters suitable for hard floors and carpet; 14-359-513 and -514 have bell-shaped glides instead

Adjustment

- Control seat height, tilt, and backrest angle from a seated position
- Fingertip control of a pneumatic cylinder apparatus automatically adjusts sitting height to any position within range of individual chair
- Comfortable 17W × 12"H (43.1 × 30.5cm) backrest with adjustable tension locks at any angle in a 30° range
- Backrest pivots automatically, enabling operator to lean forward or relax back with ease; can even be adjusted 4" (10.2cm) forward or 4" (10.2cm) back from seat center
- Seat pitch is further adjustable 8° forward or 3° backward if required

ORDERING INFORMATION:

Available with or without injection-molded, steel-reinforced, polyurethane loop armrests recessed to allow complete lateral leg movement. Also available in black, navy, or burgundy and/or with flame-retardant, antimicrobial/antibacterial vinyl upholstery. (Alternate colors and fabrics are all in-stock options; call for details.) Six-way adjustable armrests are available separately (Cat. No. 14-359-837, next page).

Fisher Scientific* Managed Services Portfolio

Freeing You to Achieve Success

The Managed Services Group brings together a century of experience providing unparalleled support to our customers, and ultimately "Freeing Them to Achieve Success". Our customer-driven portfolio of service solutions is designed to increase productivity by eliminating unnecessary downtime waiting for supplies, save money through product standardization and inventory reduction, and simplify processes through optimized lab supply chain management. Our team of over 275 specialists and 20 implementation project managers currently provide managed services to over 150 customers.

The portfolio includes:

- **Professional Services** - The Services staff analyzes the current situation, determines the customer's objectives, evaluates their requirements and recommends solutions. Once a business plan has been approved, an implementation plan is developed, executed and monitored to assure success.
- **Lab Supply Management Services** - Comprehensive management of lab research supplies across the entire supply cycle from researcher need, procurement, receiving, stock areas, points of use and ultimately reorder. The goals of these services are to provide a coordinated solution to optimiz the supply chain to reduce costs associated with inventory and improve researcher productivity.
- **Chemical Management Services** - A unique team of industry-leading chemical management service providers capable of developing a customizab modular approach to supporting your chemical management needs across the entire lifecycle.
- **Support Services** - A suite of services managed and executed by Site Specialists using the customer's standards and practices. These include Glassware Washing, Mail Management, Safety Services, and many other support services.

PROFESSIONAL
SERVICES

Professional Services set the bar for understanding a customer's needs, developing a recommendation and implementing a solution. These services fall into two categories:

- **Needs Assessment** - A comprehensive, financially driven, end-to-end review of a process for the purpose of solving a customer problem where a solution is not readily apparent. Fisher Scientific Professional Services Consultants conduct the assessment that includes data gathering and analysis, interviews, process mapping and surveys. They are recommended for procurement, inventory management, chemical management and custom services to assure that the scope and requirements of the project are fully understood.
- **Implementation Services** - Ensuring that each service is implemented quickly and effectively by trained project managers.

Lab Supply Management Services provides comprehensive management of lab research supplies across the entire supply cycle from researcher need, procurement, receiving, stock areas, points of use and ultimately reorder. These services include:

Order Management – Proven processes for order management efficiency

- Purchasing Support – Order entry, expediting, return goods management and invoicing
- Requisition Review – Order analysis and consolidation
- Integrated Procurement – Locating and delivering the right product
- Specialized Reporting – Summary invoicing, MSDS and Certificate of Analysis

Material Handling – The right specialists, technologies and processes for your business

- Dock Management – Management of receiving dock(s), site wide delivery and shipping
- Desktop Delivery – Safely handle and move supplies to point of use
- De-trashed delivery – Remove packaging and other delivey materials for a cleaner work area
- Material Movement – Deliver items across facility

Inventory Management – Reducing your business costs

- Inventory Planning – Reduce inventory carrying costs, loss reduction and improved space utilization
- Stockroom Management – Inventory and supply management services, continuous on-site coverage, efficient inventory management practices
- Remote Inventory – Extends stockroom management techniques across the facility to further coordinate inventory levels
- Point-of-Use Program – Critical items are actively managed for the e user drastically reducing their time managing supplies
- Requisition and Inventory Management System (RIMS) – Real-time inventory information exchange between customer system and Fishe Scientific mainframe

emical Management Services

imizing the costs, risks and environmental impact of chemical operations

nical Management Services (CMS) provide a modular solution to age, track, minimize and dispose of chemicals, solvents and reagents. also provides services for Environmental Health and Safety (EH&S) os to improve regulatory compliance and reporting.

her Scientific has assembled a unique team of industry-leading emical management service providers to develop a customizable, dular approach to supporting your chemical management needs across entire life cycle. The services allow for cost effective control of:

- emical life cycle process from beginning to end
- emical supplies from identification through disposal
- emical management data collection from initial request to waste removal, luding chemical tracking activities

IMPORTANT TERMS TO KNOW

New Brunswick Scientific's biological shakers are used in more laboratories than a brand. With more than 20 models listed in this catalog, there is sure to be one to application and budget requirements.

Capacity—No application is too small or too large. Select from shakers with a platform ar one square foot, to a multi-tier shaker with a 36 sq. ft. platform area, and many sizes in betw

Type—Benchtop, floor console and stackable shakers are available. Stackable shakers can shaking capacity in the floor space taken up by a single nonstackable model.

Platforms—Interchangeable platforms accommodate various-sized flasks, test tu microplates. Dedicated platforms with clamps included provide maximum capac and Sticky Tape are alternatives to flask clamps for use at lower speeds.

Temperature Range—For applications requiring temperature control ne lower, we recommend selecting a shaker with optional refrigeration to sm variations caused by seasonal room temperature fluctuation or change adjacent heat-generating equipment, such as freezers or centrifuges

Easy to Use—Large, easy-to-see digital displays and smooth, qui drive mechanisms are easy on both the eyes and ears. Setup is eas microprocessor control of all operating parameters.

ORBITAL

ew Brunswick Scientific Innova* Shakers

vanced shakers from the company that set the lab shaker standard

Innova Family of Shakers

Innova shakers share these advanced features:

- ctile-sensitive membrane keypad and digital display
- oportional/Integral microprocessor locks onto setpoints
- ned operation from 0.1 to 99.9 hours
- panded speed range allows gentle shaking or vigorous agitation
- celeration circuit prevents sudden starts and minimizes splashing
- liable Gyrotory* drive—platform rotates on a housing that's aligned th three eccentric, counterbalanced shafts
- mote monitoring of speed/temperature on a chart recorder or ta-logging computer via a 0 to 5V output (optional on some models)
- de selection of accessory platforms and racks for flasks, test tubes and ner sample vessels
- Shaking capacities up to 188 Erlenmeyer flasks (10mL size), 432 test tubes (13mm) or flasks up to 6000mL (based on model)
- Two-year or 10,000-hour use warranty—whichever comes later, including parts and labor

NEW BRUNSWICK I-SERIES* SHAKERS

ncubating, refrigerated and programmable model Series Shakers feature large capacities (up to 6L) nd advanced features for high throughput and eproducible results. Stackable units also available. ee pp. 1672-1673.

NEW BRUNSWICK EXCELLA* SHAKERS

Dependable, affordable Excella Shakers are ideal for cell culturing appliications. Open-air and temperature-controlled models available. See pp. 1674-1675.

New Brunswick Scientific Innova* Models 2000 and 2050 Portable Platform Shakers

Top-of-the-line benchtop platform shakers for flasks up to 500mL

14-278-104

Choice of two models in different platform sizes. Both offer advanced operating and safety features for reliable, continuous-duty shaking of tubes and flasks. Proven Gyrotory* drive mechanism delivers years of dependable service.

Operating Features

- Maximum flask size: 500mL
- Shaking speed: 25 to 500rpm
- Shaking orbit: Circular, ¾" dia. (19mm)
- Tactile keypad with digital LED display for speed, time remaining, and elapsed time
- 0.1 to 99.9-hour timer
- Speed and timer alarms

Design Features

- Triple-action Gyrotory drive delivers smooth, uniform shaking
- Microprocessor stabilizes rate to 1rpm of setpoint
- Feedback loop compensates for fluctuations in voltage, load imbalance or workload
- Low-profile design; can be stacked inside environmental chamber
- Retains setpoints in memory; automatic restart if power is interrupted
- Acceleration circuit prevents sudden starts and minimizes splashing

Model 2000

- Platform dimensions: 13L × 11"W (33 × 28cm)
- Overall dimensions: 14L × 14½W × 5⅜"H (36 × 37 × 13.7cm)
- Net weight: 33 lb. (15kg)

Model 2050

- Handles larger numbers of flasks
- Platform dimensions: 12L × 16"W (30.5 × 41cm)
- Overall dimensions: 14½L × 17"W × 5⅜"H (37 × 43cm 13.7cm)
- Net weight: 35 lb. (16kg)

ORDERING INFORMATION:

For 120V 50/60Hz, 0.25A

Special order options: Temperature/Speed Monitoring Kit (14-278-117) with RTD sensor displays and records process values (can be used with both models). Capacity Upgrade Kit (14-278-143) retrofits Model 2000 to accept larger platforms designed for Model 2050. To purchase these items, contact your Fisher Scientific Customer Service Representative, or order online.

REQUIRED ACCESSORIES:

Platform or tray (sold separately)

WARRANTY:

Three years on parts, two years on labor

Model No.	Platform L × W	Mfr. No.	Cat. No.	Each

LOOKING FOR PLATFORMS?

We offer a complete selection of platforms, carriers, trays and clamps designed specifically for your New Brunswick Scientific shaker. You'll find them on pp. 1676-1677.

New Brunswick Scientific Innova* Model 2100 and 2150 Benchtop Platform Shake

Benchtop platform shakers with advanced features, for flasks up to 6L

14-278-108

Choice of two models (square or larger rectangular platform). Both offer advanced operating and safety features for reliable, continuous-duty shaking of lab glassware. Proven Gyrotory* drive mechanism delivers years of dependable service.

Operating Features

- Maximum flask size: 2000mL
- Shaking speed: 25 to 500rpm
- Shaking orbit: Circular, ¾" dia. (19mm)
- Tactile keypad with digital LED display for speed, time remaining, and elapsed time
- 0.1 to 99.9-hour timer
- Speed and timer alarms

Design Features

- Triple-action Gyrotory drive delivers smooth, uniform shaking
- Microprocessor stabilizes rate to 1rpm of setpoint
- Feedback loop compensates for fluctuations in voltage, load imbalanc or workload
- Low-profile design; can be stacked inside environmental chamber
- Retains setpoints in memory; automatic restart if power is interrupted
- Acceleration circuit prevents sudden starts and minimizes splashing

Model 2100

- Platform dimensions: 18L × 18"W (46 × 46cm)
- Overall dimensions: 21⅞L × 19W × 6⅜"H (54 × 48 × 17cm)
- Net weight: 76 lb. (35kg)

Model 2150

- Handles larger numbers of flasks
- Plaform dimensions: 18L × 24"W (46 × 61cm)
- Overall dimensions: 21⅞L × 24"W × 6⅜"H (54 × 61 × 17cm)
- Net weight: 80 lb. (36kg)

ORDERING INFORMATION:

For 120V 50/60Hz, 0.15A. Accessory platforms and trays sold separately, see pp. 1676-1677.

Special order options: Temperature/Speed Monitoring Kit (14-278-117 with RTD sensor displays and records process values (can be used with models). Capacity Upgrade Kit (14-278-143) retrofits Model 2100 to acce larger platforms designed for Model 2150. To purchase these items, cont your Fisher Scientific Customer Service Representative, or order online.

LOOKING FOR PLATFORMS?
e offer a complete selection of platforms, carriers, trays and clamps esigned specifically for your New Brunswick Scientific shaker. You'll d them on pp. 1676-1678.

New Brunswick Scientific Shakers

Frequently Asked Questions

How do shaker agitation rate and orbit affect culture growth? Generally, agitation speed and orbit affect both the aeration and the mixing of the culture. Greater aeration increases oxygen transfer rate (OTR), boosting cell growth. The size of the orbit affects OTR linearly and the speed has a square-law relationship. Therefore, if the size of the orbit doubles, say from 1/2" to 1" the amount of OTR should double. If the speed doubles, the OTR should quadruple. Of course, these are general rules and caution should be taken with shear sensitive cells. However, this information can be used to estimate the conditions needed to obtain the same results on different model shakers. For example, to get the same oxygen transfer in a shaker with a 1" orbit running at 300rpm, a shaker with 3/4" orbit must be run at 350rpm.

I want to grow my cultures at 27°C. Do I need an incubated shaker with refrigeration? Our non-refrigerated Innova Shakers are designed to maintain temperatures of ambient plus 5° to its maximum operating temperature. Excella shakers will operate from ambient plus 7° to maximum temperature. It is critical to understand that "ambient" temperature is not the temperature on the wall thermometer (room temperature), but the temperature measured one meter from the front of the machine. Many labs are packed with heat generating equipment such as freezers, lyophilizers, other shakers or ovens, and these generate heat that is localized near adjacent equipment. This heat will significantly affect the performance of non-refrigerated units. Some labs may turn off or reduce air conditioning during summer evenings, causing a rise in room temperature when you aren't there. In other labs, the shaker may be in direct sunlight during certain times of the day. It's for these reasons that we recommend a refrigerated incubator shaker when you want to maintain the chamber at 30°C or below. Not having refrigeration while trying to maintain temperatures at or below 30°C is analogous to trying to drive a car on a hilly road at a constant speed without using brakes.

Do New Brunswick Scientific shakers come with platforms? No. Platforms are sold separately. Each NBS shaker is available with eight or more platform options, which are ordered separately to give you the flexibility to specify the one that best suits your needs. Most platforms include installed clamps of a single size (ie. 250mL clamps), except for our Universal Platforms which are designed for use with a combination of various-sized clamps and test tube racks. When ordering a Universal Platform, clamps and test tube racks must also be ordered separately. For applications running below 250rpm Sticky Mat tape is also available in lieu of clamps.

How does NBS define Temperature Control? This is the difference between the Setpoint value and average Actual (Display) value. Please note that all terms above assume that temperatures both inside and outside the chamber are in a steady state of equilibrium.

LOOKING FOR FLASKS?
You'll find glass and plastic Erlenmeyer Flasks, as well as a wide selection of other vessels for boiling, culturing and other processes, in the Flasks Section.

New Brunswick I-Series* Incubating Shakers

Choice of benchtop or floor models, all with advanced features for consistent, reproducible results

Refrigeration available on select models.

Operating Features

- Tactile keypad for setting speed, temperature, or time
- High-visibility ⅜" digital LED display with panel lights indicating active mode and function
- Microprocessor with self-correcting Proportional/Integral feedback precisely regulates speed, temperature and run time
- Feedback control maintains desired operating settings if conditions deviate from setpoints
- Timer: 0.1 to 99.9 hours or continuous operation
- Auto Restart retains current setting in memory

Design Features

- Triple-eccentric Gyrotory* drive delivers years of dependable service
- Heavy-duty DC solid-state brushless motor with nine precision-fitted ball bearings
- Counterbalanced mechanism delivers smooth, uniform motion
- Soft start-up prevents spillage from flasks and tubes
- Cast-iron base

Safety Features

- Acceleration/deceleration circuit prevents sudden starts and stops
- Speed-limiting sensor slows agitation to safe speed when overload or imbalance is detected
- Cutout switch stops agitation when lid is opened
- Thermostat fail-safe shuts off heater if high temperature limit is exceeded
- Audible/visual alarms alert operator to expired time and to deviations from temperature (±0.1°C) and speed (±5rpm) setpoints

Benchtop Model I-24

- Accommodates flasks up to 2800mL
- Shaking speed range: 25 to 500rpm with ±1rpm control
- Circular shaking motion of ¾" dia. (19mm) or 1¾" (2.54cm)
- Incubating or Incubating/Refrigerated models
- Programmable timer: 0.1 to 99.9 hours
- Large-capacity blower ensures uniform temperature throughout the chamber
- Requires 18 × 18" platform (order separately)

Model I-2500

- Accepts flasks up to 6L
- Circular shaking orbit of 1" (25.4mm) powered by ⅛hp motor
- Lid with 11 × 17" (28 × 43cm) window
- Foot pedal opens lid

14-728-1

14-7

Model I-2500KC

- Identical to Model I2500, but with refrigeration
- Temperature range: 15° below ambient (with a minimum setpoint of 4°C) to 60°C

Model I-2500KC with programmable timer

- Identical to Model I2500KC, but adds deluxe timer
- Timer controls agitation (ON/OFF) and has 7-day, 24-hour clock that can be set to switch between two different temperatures at user-defined intervals
- Stores up to 24 programming steps

ORDERING INFORMATION: All accessories (platforms, rac trays, and clamps) sold separa see pp. 1676-1678.

REQUIRED ACCESSORIES: Platform or tray (sold separate

WARRANTY: Two years on parts and labor

CERTIFICATIONS: UL, cETLus, listed. CSA Appro CE marked.

›w Brunswick I-Series* Stackable Shakers

ximize shaker capacity for space-limited labs

idually controlled workhorses can be stacked up to three units high in the e typically occupied by a single incubating shaker. With advanced features onsistent, reproducible cell culturing.

erating Features

- icroprocessor control with self-correcting Proportional/Integral feedback ecisely regulates speed, temperature and run time
- er-friendly keypad with large display for setting speed, temperature, time
- nooth, quiet running
- tually maintenance-free
- × 30" (46 × 76cm) accessory platforms slide out for easy access cultures
- commodates flasks up to 2.8L
- aking speed range: 25 to 400rpm
- gh-visibility ⅜" digital LED display with panel lights indicating active mode d function
- edback control maintains desired operating settings if conditions deviate m setpoints
- ner: 0.1 to 99.9 hours or continuous operation
- to Restart retains current setting in memory

ign Features

- ble-eccentric Gyrotory* drive delivers years of dependable service
- avy-duty DC solid-state brushless motor with nine precision-fitted l bearings
- unterbalanced mechanism delivers smooth, uniform motion
- ft start-up prevents spillage from flasks and tubes
- -232 data port
- st-iron base

ty Features

- celeration/deceleration circuit prevents sudden starts and stops
- eed-limiting sensor slows agitation to safe speed when overload or palance is detected
- cout switch stops agitation when lid is opened
- ermostat fail-safe shuts off heater if high temperature limit is exceeded
- dible/visual alarms alert operator to expired time and to deviations from nperature (±0.1°C) and speed (±5rpm) setpoints

14-285-737

Model I-26

- Incubator model
- Temperature range: 5°C above ambient to 60°C (140°F)

Model I-26R

- Refrigerated model
- Temperature range: 15°C below ambient to 60°C (140°F)

ORDERING INFORMATION:

Overall dimensions: 30L × 50W × 25"H (76 × 127 × 64cm); Net weight: Model I-26, 440 lb. (200kg); Model I-26R, 490 lb. (222kg); for 100/120V, 50/60Hz. All I-26 Series accessories (platforms, stacking kits and bases) are designed specifically for these shakers; order separately, below.

REQUIRED ACCESSORIES:

Platforms (not included); if multiple units will be stacked, stacking kit is required (2 kits needed to stack 3 shakers); all accessories sold separately (below)

WARRANTY:

Three years on parts and two years on labor

Model	Mfr. No.	Cat. No.	Each
I-26	M1324-0000	**14-285-737**	11,195.00

New Brunswick Scientific Excella* Shakers

Dependable and affordable shakers for reproducible cell growth

Available in open-air and incubating/refrigerated models—all featuring a heavy-duty drive and cool-running motor for long life and quiet operation under heavier loads and higher speeds.

- Intuitive, spill-proof keypad allows easy input of parameters
- 9/16" (1.4cm) LED display shows running conditions and diagnostics (all models except E1)
- UniCentric* drive and brushless DC motor ensure quiet, vibration-free operation
- Versatile—use same accessories as other New Brunswick shakers
- Two-year warranty on parts and labor

New Brunswick Scientific Excella* E1/E2 Benchtop Open-Air Shakers

Compact analog or digital shakers for flasks up to 500mL

14-285-730

- Flask Capacity: 10 to 500mL
- Shaking speed range: 50 to 400rpm
- Circular orbit ¾" dia. (19mm)
- Also shake vials, tubes and other labware on accessory platforms (sold separately)
- Powerful UniCentric* drive delivers consistent performance for reproducible results

Model E1

- Analog-controlled; without digital display
- Graduated markings on control knob for manual speed setting

Model E2

- Microprocessor-controlled digital shaker
- Keypad control and LED alphanumeric display
- Self-correcting controller stabilizes rate to ±2rpm of setpoint, compensates instantly for normal voltage fluctuations, unbalanced loading and changes in workload
- Retains setpoints in nonvolatile memory, so shaker will automatically restart when power is restored after interruption
- Acceleration control prevents sudden starts with minimal splashing

ORDERING INFORMATION:

Dimensions (both models), Overall: 15¾L × 18W × 8½"H (40 × 45.5 × 21.6cm); Platform: 13 × 11" (33 × 28cm); Net weight: 35 lb. (16kg); For 100/120V 50/60Hz. Accessory platforms (sold separately) are interchangeable with those for other similar-sized New Brunswick Scientific shakers.

REQUIRED ACCESSORIES:

Platform or tray (sold separately), see pp. 1676-1678.

WARRANTY:

Two years on parts and labor

CERTIFICATIONS:

UL, cETLus listed. CSA approved. CE marked.

Model No.	Mfr. No.	Cat. No.	Each

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

New Brunswick Scientific Excella* E5 an E10 Large-Capacity Open-Air Shakers

Handle flasks up to 6L on bench, in hood, or in coldro

14-285-731

Operating Features

- Flask capacity: 50mL to 6L
- Shaking Range/Control: 50 to 400rpm, ±2rpm
- Rugged UniCentric* drive delivers consistent motion for reproducible results
- Digital LED display for speed, run time, alarms and temperature
- Timer: 0.1 to 99.9 hours
- Setpoint retention in nonvolatile memory with auto restart
- Audible speed and timer alarms alert at end of cycle, or if speed deviate more than 5pm from setpoint
- Acceleration circuit prevents sudden starts/stops to minimize splashin protecting sample and internal components
- Ambient operating conditions: 5° to 45°C (90% RH)

Model E5

- Shaking Motion: Circular orbit, ¾" dia. (1.9cm)
- Platform dimensions: 18 × 18" (46 × 46cm)
- Overall dimensions: 20½L × 17⅞W × 8½"H (52 × 45.5 × 21.6cm)
- Net weight: 70 lb. (31.8kg)

Model E10

- Shaking Motion: Circular orbit, 1" dia. (2.54cm)
- Platform dimensions: 30W × 18"L (76 × 46cm)
- Overall dimensions: 27L × 30W × 7"H (68 × 76 × 17cm)
- Net weight: 100 lb. (45.3kg)

ORDERING INFORMATION:

For 100/120V 50/60Hz. Accessory platforms and trays (sold separately) a interchangeable with those of other similar-sized New Brunswick Scient shakers.

REQUIRED ACCESSORIES:

Platform or tray (sold separately), see pp. 1676-1678.

New Brunswick Scientific Excella* E25/E25R Temperature-Controlled Console Shakers

Incubating or refrigerated shakers handle flasks up to 6L

Features

14-285-734

- For flasks from 50mL to 6L
- Shaking Range/Control: 50 to 400rpm, ±2rpm
- Shaking Motion: Circular orbit, 1" dia. (2.54cm)
- UniCentric* drive delivers consistent performance for reproducible results
- Display: LED for temperature, speed, alarm conditions and running time
- Timer: 0.1 to 99.9 hours
- Speed, timer and temperature alarms
- High-velocity air circulation system accurately maintains temperature within ±0.25°C
- Adjustable feet absorb vibrations to stabilize workload and prevent creeping
- Shake test tubes from 8 to 30mm diameter in adjustable-angle platform (14-285-698, sold separately)
- Accommodate flasks on dedicated flask or universal platforms (sold separately)

Incubator Shaker Model E25

- Temperature Range: 7° above ambient to 60°C (140°F)
- Net weight: 420 lb. (190kg)

Refrigerated Shaker Model E25R

- Temperature Range: 15°C below ambient to 60°C (140°F)
- CFC-free refrigeration
- Net weight: 450 lb. (204kg)

ORDERING INFORMATION:

Dimensions, platform: 30W × 18"H (76 × 46cm); Chamber: 33½D × 23W × 19"H (85 × 58 × 48cm); Overall: 50 × 30½ × 41¾"H (127 × 77 × 85cm); For 120V 60Hz; Accessory platforms, trays and racks sold separately.

LOOKING FOR PLATFORMS?

We offer a complete selection of platforms, carriers, trays and clamps designed specifically for your New Brunswick shaker. You'll find them on pp. 1676-1678.

ACCESSORIES

Designed specifically for use with New Brunswick Scientific Innova*, I-Series* and Excella* Shakers

Wide selection of interchangeable platforms accommodates varying flask sizes. Model compatability and capacities are listedin the ordering charts. Note: Capacities listed are the most vessels of each size that will fit in a balanced pattern.

AVAILABLE ACCESSORIES INCLUDE:

- Universal Platforms—Versatile, hold combinations of racks and test tubes
- Flask Platforms—Dedicated for specific-sized Erlenmeyer or Fernbach flasks
- Utility Carriers and Trays—For shaking vessels without fasteners
- Test Tube Platforms and Racks—Mount on universal platforms
- Flask Clamps—Secure specific-sized flasks to platforms

Universal Platforms

For use with New Brunswick Innova*, I-Series* and Excella* Shakers

- Accept a variety of accessory clamps, test tube racks and gel trays for greater flexibility
- Hold combinations of flasks or test tube racks
- With pre-drilled holes

REQUIRED ACCESSORIES:

Clamps (sold separately)

NOTE:

Capacities listed are the most vessels of each size that will fit in a balanced pattern.

ACCESSORIES

lask Platforms

or use with New Brunswick Scientific Innova*, I-Series* and Excella* Shakers

- Dedicated platforms for specific-sized Erlenmeyer or Fernbach flasks
- Supplied with clamps

Capacities listed are the most vessels of each size that will fit in a balanced pattern.

OTE:

RECIPROCATING

Thermo Scientific* Reciprocating Shakers

Analog units offer flexibility and economy

11-675-152

Ideal for extractions, mixing blood samples, and silver staining of polyacrylamide gels. Variable speed control provides gentle to vigorous agitation. Built-in timer allows repeatable results.

- Shaking speed range: 10 to 250rpm
- Shaking motion: back-and-forth, with adjustable stroke angle from ½ to 1½" (1.2 to 3.8cm)
- Load capacity: 15 lb. (6.8kg)
- Operating modes: timed or continuous run
- Timer: 1 to 60 min.
- Operate in temperature ranges from 4° to 40°C (39° to 104°F), allowin them to be used in incubators, warm rooms, environmental chambers and refrigerators
- Accept three different platforms: 11 × 13" (38 × 28cm), 18 × 18" (46 × 46cm), or 18 × 24" (46 × 61cm); all sold separately
- Metal locking tab on control knob prevents accidental change in settin

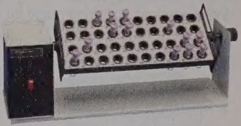
ROCKING

Fisher Scientific* Hematology/ Chemistry Mixer

Fixed rotation mixer doubles as a transport tray



14-059-346Q

Perfect for most clinical laboratory procedures—blood specimen mixing, radioimmunoassay and general wet chemistry analyses for glucose, cholesterol, urea, enzymes, etc.

- Holds up to 40 tubes, gently and securely, in convenient coded slots
- Accommodates tubes or vials up to 7" long (178mm)—36 positions hold 12 to 13mm diameter blood sampling tubes, and four positions hold 15 to 17mm diameter vials for control blood preparations
- Fixed rotation speed of 12rpm, ±0.5rpm
- Flexible plastic bushings allow for simple insertion and removal of tubes
- Integral nylon handle-support brackets allow rack to double as transport tray
- Entire rack can be immersed in hot soapy water for thorough cleaning
- Low profile and beam base prevent tipping
- Made of heavy-gauge sheet metal finished in tough baked-on acrylic enamel

ORDERING INFORMATION:
Dimensions: 6L × 20W × 6¾"H (15.3 × 50.8 × 17.1cm)

WARRANTY:
12 months

Electrical Requirements	Cat. No.	Each
120V 60Hz, 0.024A	**14-059-346Q**	966.64

Thermo Scientific* Lab-line* Thermal Rocker

Excellent alternative to higher-priced hybridization incubators for agitation of blotting membranes under controlled temperatures

14-512-30Q

Provides smooth, gentle rocking to meet a variety of mixing needs. Excellent alternative to higher-priced hybridization incubators for agitation of blotting membranes under controlled temperatures.

- Front-mounted switch allows user to operate the unit with or without heat
- Temperature is monitored via the large LED display
- An electronic proportional temperature controller maintains temperatures from slightly above ambient ±5°C to 70°C (158°F) with ±0.5°C; self-resetting thermal cutoff shuts down power to the heaters in the event of an overtemperature condition
- Rocking speed can be adjusted from 0 to 100 cycles per minute
- Platform features a nonskid rubber pad to keep samples in place
- Angle of motion can be adjusted from 10° to 15° off the horizontal plane

ORDERING INFORMATION:
Dimensions, overall: 16L × 16½W × 8½"H (41 × 42 × 22cm. Platform: $14\frac{3}{16}$ × $14\frac{3}{16}$" (36 × 36cm).

INCLUDES:
3-wire line cord and plug

Electrical Requirements	Mfr. No.	Cat. No.	Each
120V 50/60Hz	4637Q	**14-512-30Q**	2223.00

Thermo Scientific* Thermolyne* Platform Vari-Mix* Mixer

Provides smooth wave motion for solutions in lab dishes, plates and cell culture flasks

Wide ambient operating range for use in many lab applications.

- Large white nonskid rubber mixing platform can be adjusted to any angle of motion through a range of 48°
- Variable speed control from 5 to 30rpm
- Mixing surface, 12⅝L × 10⅝"W (32 × 26.9cm)
- Capacity, 15 lb. (6.8kg)
- Two-hour timer with continuous-run mode
- Platform removes easily for autoclaving
- All finishes are chemical resistant and easy to clean

ORDERING INFORMATION:
Dimensions: 12L × 15⅝W × 7¼"H (30.4 × 39.6 × 18.4cm). Available in single-phase 120V and 240V models.

INCLUDES:
3-wire cord and plug; 240V model also includes European cord set

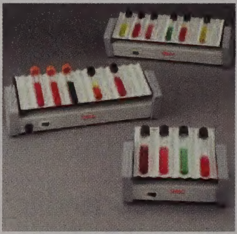
09-047-113Q

Electrical Requirements	Mfr. No.	Cat. No.	
120V 50/60Hz, 0.10A	M79735Q	**09-047-113Q**	106
240V 50/60Hz, 0.05A	M79730-26Q	**09-047-112Q**	106

Thermo Scientific* Thermolyne* Test Tube Rockers

Compact, precision-controlled platform mixers provide smooth rocking action for uniform specimen suspension

- Reversible pad provides one side (with lip to prevent sliding) for capped tubes 110mm long; other side for longer tubes
- Autoclavable white silicone rubber pad enhances viewing
- Can be used in a noncondensing incubator or coldroom
- Clean easily



Top, left to right: 12-814-2Q, 12-815-3Q. Bottom: 12-815-6Q.

Vari-Mix* Mixer
- Adjustable motor speed of 1 to 20rpm
- Adjustable rocking from 1° to 48° angle
- Capacity, 16 tubes (10 to 20mm) or 7 tubes (22 to 30mm)
- Overall dimensions: 5½L × 15W × 4¼"H (14 × 38.1 × 10.8cm)

Speci-Mix* Mixer
- Preset 18rpm motor speed
- Preset 48° tilt of the rocker platform
- Capacity: 16 tubes
- Overall dimensions: 5½L × 13¾W × 4¼"H (14 × 35 × 10.8cm)

Half-Size Speci-Mix*
- Preset 18rpm motor speed
- Preset 48° tilt of the rocker platform
- Capacity: 8 tubes (10 to 20mm) or 3 tubes (22 to 30mm)
- Overall dimensions: 5½L × 7½W × 4¼"H (13.9 × 19.1 × 10.7cm)

INCLUDES:
3-wire grounded cord

vall Belly Button* Shaker

npact liquid agitation shaker can be used in ubators, refrigerators, and on a crowded benchtop

15-453-260

des a wide range of agitation itions from extremely gentle to ous. Uses an orbiting platform, flexibly ored at four corners to create a motion s an extremely effective combination cking platform mixer and orbital shaker.

: 7" (18 × 18cm) acrylic, en-sided platform
(2.5cm) orbital throw
justable speed controls from 0 to 100rpm
riable pitch control from flat to 8°
b. (2.25kg) load capacity
ishless, long-lived, 12V motor runs quietly
emical-resistant stainless-steel and anodized aluminum housing with wder-coated finish
movable, nonskid mat stabilizes loads while processing
erates in ambient temperatures of 0° to 60°C
n be used in CO_2, high humidity, or dry incubators

LICATIONS:

ing and destaining gels, Northern and Southern hybridizations, ern blotting, rinsing membranes, cell culture incubation, retroviral tion, phage elution, amplification of cDNA libraries, mixing of small and blood samples, and immunocytochemistry

ERING INFORMATION:

ll dimensions: 8L × 8W × 4¾"H (20 × 20 × 12cm); for 100/240V 50/60Hz

Stovall Belly Dancer* Shakers

Versatile shakers provide optimal movement for multiple staining and washing involved in gel and blotting techniques

15-453-211

Effective agitation from smooth vertical and horizontal orbital motions allows for rapid exchange of solvents in applications like staining and destaining gels and assures lower background in blotting applications.

- Anchored at four corners, this system undulates the platform, providing an orbital throw of 1" (2.5cm)
- Variable shaking speed control from 0 to 100rpm
- Adjustable platform pitch from flat to 8°
- Acrylic 12 × 12" (31 × 31cm) open-sided platform (with removable, nonskid mat) accepts oversized containers
- Maximum load capacity to 20 lb. (9kg)
- Ambient operation range from 0° to 42°C (32° to 108°F)
- Lightweight construction (16 lb. [7.3kg]) provides easy mobility, optimal for benchtop, incubator, and coldroom usage
- Simple design has no belts or pulleys and delivers trouble-free performance
- Quiet, permanent magnet DC motor requires minimal maintenance
- Chemically resistant stainless-steel and anodized aluminum construction

ORDERING INFORMATION:

Overall dimensions: 15L × 15W × 8¾"H (38 × 38 × 22cm)

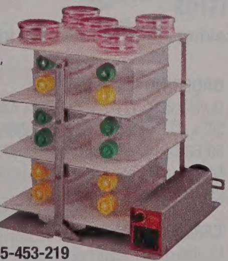
vall Hi/Lo Profile Rocker*

est profile rocker available, with a height of only ', is ideal for confined spaces and sterile environments



15-453-219

n staining and destaining gels, nern and Southern hybridizations, ern blotting and rinsing membranes, labelling cells in incubators, ambda Phage elution/amplification NA libraries.

que patented form design

th motor beside rather than under platform, rocker easily fits on ubator or refrigerator shelves
udes 12 × 12" (31 × 31cm) h-quality stainless-steel platform, h capacity to add up to three additional platforms (4½" between tforms) for increased capacity
nskid, removable mat stabilizes load while processing
d capacity: 20 lb. (9kg)

mum rocking performance

ustable platform pitch (from 2° to 11°) and speed (0 to 30rpm) in onds without tools
nerates a wide range of agitation conditions from extremely gentle to orous; same degree of agitation is maintained on all stacked platforms

Sturdy construction

- Stainless-steel unit resists rust, even in 95% humidity
- 24V permanent magnet DC motor
- Can be used in both incubators and refrigerators
- Easily disassembled, unit (all but motor and control) can be sterilized by autoclaving
- Ambient temperature operation from 0° to 60°C (32° to 140°F)

ORDERING INFORMATION:

Overall dimensions: 15¾L × 13¾W × 1¾"H (40 × 35 × 5cm). Additional platforms sold separately.

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz	ROCAA115S	**15-453-219**	945.00

ACCESSORIES

Additional Platforms

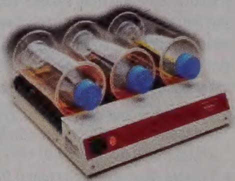
Add up to three additional platforms to the Stovall Hi/Lo Profile Rocker* for increased capacity. Distance between platforms: 4½"H (11cm). Constructed of high-quality stainless steel.

Description	Mfr. No.	Cat. No.	Each
One (1) additional platform	ACCRC00P1	**15-453-222**	226.99
Two (2) additional platforms	ACCRC00P2	**15-453-223**	343.38
Three (3) additional platforms	ACCRC00P3	**15-453-224**	467.90

ROLLERS

Stovall Low Profile Roller

Portable, compact, low-profile roller offers versatility in the biological research laboratory



15-453-225

Fits on benchtops, in high humidity and CO_2 incubators, high-temperature ovens (to 65°C) and in refrigerated units (to 0°C) without need to rearrange shelves or disturb other materials.

- Variable speed control from 1 to 30rpm
- Supplied with six rollers
- Each roller is electronically gear-driven, without belts or pulleys
- Rollers are removable for cleaning and to accommodate various-sized tubes or bottles
- Thin, flat power cord reaches external outlets without damaging incubator gaskets
- Cool-running 24V DC motor
- All finishes are chemically resistant, easy to clean and sterilize
- Aluminum case parts coated in durable, high-bake ester finish

APPLICATIONS:

Cell culture; Western, Northern and Southern Filter Blots

ORDERING INFORMATION:

Overall dimensions: 15L × 14¼W × 2⅜"H (38 × 36 × 6cm); Roller dimensions: 1⅛" dia. × 10"L (2.9 × 25.4cm). Net weight: 10.5 lb. (4.8kg). For 115V 50/60Hz, 2 A. Additional roller bottles can be purchased separately

INCLUDES:

Unit and six rollers

Electrical Reqts.	Mfr. No.	Cat. No.	Each
115V 50/60Hz	ROLAA115S	**15-453-225**	1540.00

Wheaton Compact Roller System for Small Bottles

Extremely compact unit with adjustable rollers need little benchtop space

22-288-525

- Well suited for research work; may be used in a CO_2 incubator.
- Handles two vessels 108-121mm in diameter and up to 290mm long
- Outside rollers can be moved inward to roll vessels as small as 75mm in diameter
- Bottle speed: 0.1 to 3.8rpm (based on a 110mm bottle)
- Maximum temperature for use: 40°C (104°F)

ORDERING INFORMATION:

Dimensions: L × W × H: 12¼ × 12¾ × 7⅛" (32 × 32.5 × 18cm). Electrical requirements: 120VAC 50/60Hz, 14w. Net Weight: 18 lb. (8kg

CERTIFICATIONS:

UL listed; CSA approved

NOTE:

Use in a CO_2 environment may necessitate more frequent replacement motor brushes.

Mfr. No.	Cat. No.	
W348923	**22-288-525**	90

Wheaton Compact Roller System for Mini Bottles

Designed for small-scale mixing and agitation, this space-saving roller is ideal for use in standard incubators and in coldrooms

Transistorized solid-state circuitry allows exact speed control of bottles and compensates against sudden or prolonged line-voltage changes. Roller shafts are mounted in self-lubricating nylon bearings for extended life.

Features

- Single-deck unit accommodates up to four 38 to 60mm dia. × 240mm long bottles
- Accommodates 38 × 200mm culture tubes for the growth and observation of single chicken or rat embryos
- Variable speed control from 3 to 45rpm (for 38mm dia. bottle), and 2 to 30rpm (for 60mm dia. bottle)
- Maximum temperature for use: 40°C (104°F)

ORDERING INFORMATION:

Dimensions: 12¼L × 12¾W × 7⅛"H (32 × 32.5 × 18cm). For 100/120V 50/60Hz, 14w. Accepts up to two Mini Bottle Deck Kits (06-440-27, sold separately).

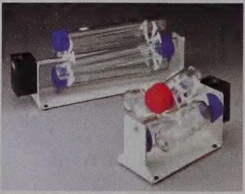
Thermo Scientific* Thermolyne* Labquake* Rotisserie Hybridization Rotators

Compact, portable rotisserie with tridirectional action works at room temperature or in an incubator and ensures optimal distribution with minimal probe solution

Ideal for labs that do infrequent blots and do not require a hybridization oven or for labs that need an additional vehicle for washes.

- Small rotisserie rotators hold four sets of bottles or tubes; large holds four bottles or eight tubes (see table for sizes)
- Withstand temperatures from 4° to 65°C
- Rotating speed: 8rpm
- Bottles and tubes can be removed while unit is operating
- Compact, lightweight and portable



13-687-64Q, 13-687-69Q

APPLICATIONS:

Western, Southern and Northern blots and incubating cells adhered to bea

ORDERING INFORMATION:

Dimensions, small rotisserie rotators (13-687-69, -68): 4½L × 10½W × 6½"H (11.4 × 26.7 × 16.5cm); large rotisserie rotator (13-687-64): 4½L × 18½W × 6⅝"H (11.4 × 47 × 16.8cm)

SIEVE

Tyler Ro-Tap* Sieve Shaker

Recommended for testing applications requiring analysis of particles from 5" (12.7cm) to 20 microns wide (635 mesh)

04-909

Uniform mechanical action—both horizontal circular motion and vertical tapping motion—allows particles to stratify and "seek" critical openings, ensuring accurate, repeatable results.

- Maximum of six 2" high (5.1cm) or thirteen 1" high (2.5cm) sieves can be used for testing at one time
- Vertically mounted ¼hp motor
- Built-in 99-minute digital timer/clock accurate to 0.1 second
- Integral sieve cover

ORDERING INFORMATION:

Available in 8 or 12" (20 or 30cm) diameters. Unit dimensions: 21L × 28W 25"H (53 × 71 × 64cm); for 110V 60Hz, 5.4A; wired for single-phase current only.

REQUIRED ACCESSORIES:

LOOKING FOR SIEVES?

Fisherbrand* U.S. Standard Test Sieves meet ASTM EII specifications. Available in brass or stainless-steel in a wide range of sizes. You'll find them in the Sieves section.

tsch* AS 200 Series Analytical eve Shakers

al for research and development applications, lity control of raw materials and intermediate/end ducts, and production control

uce exact, reproducible results in accordance with DIN 66165 in dry wet operations. Maintenance-free electromagnetic drive with tilted-g arrangement provides uniform three-dimensional oscillation and tion of sieve column to move material evenly over entire surface. result is high-load endurance, extremely quiet operation, and short ng times with clean separation.

- act operation at 60Hz line frequency and control of vibration height ovide accurate, reproducible results
- justable vibration height from 0.2 to 3mm to measure particles from µm to 25mm
- ailable with three clamping systems that can hold 8 full-height or half-height sieves (plus pan) with diameters of 100–203mm
- aximum charge quantity of 6⅝ lb. (3kg) for all models

c Model

- onomical, designed for occasional sieving tasks of "easy" materials that not require digital technology
- t time and vibration height by potentiometer
- tical control of vibration height

tal Model

- itable for routine applications where digital time display, fixed erval operation, analog setting, and optical monitoring of vibration ight are needed

trol Model

- itable for monitoring inspection, measuring, and testing equipment
- anufactured using ISO 9000:2001-certified processes
- gitally displays and monitors vibration, height or "g" acceleration, ne, and interval

08-417-64, -65, -66

- Can be calibrated for ISO and GLP/GMP guidelines
- RS-232 interface with EasySieve software (sold separately) and a PC

ORDERING INFORMATION:

Dimensions: 13¾D × 15¾W × 33"H (35 × 40 × 84cm). Net Weight: 66 lb. (30kg). For 120V 60Hz; EasySieve software (for use with 08-417-66 only) must be ordered separately. Contact your Fisher Scientific Customer Service Representative for ordering information.

REQUIRED ACCESSORIES:

Sieves and clamping devices (order separately)

WARRANTY:

Two years

COMPLIANCE:

Built to CE standards (not certified)

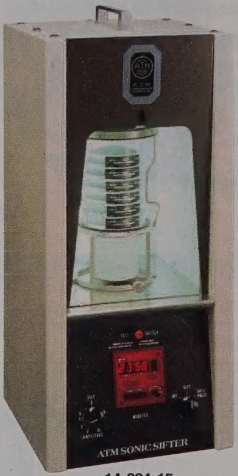
SONIC

Advantech Model L3P Sonic Sifter Separators

Ideal for quality control and R&D laboratories due to low noise, easy operation, and small footprint

High-speed sifting method combines two motions for maximum separation effectiveness and minimum particle attrition. Vertical, oscillating column of air moves powdered, granular or pelletized material through sieves, while mechanical pulsing action breaks down particle clusters.



14-294-15

Features

- Convenient front-mounted controls
- Automatically replicates cycle time and sifting method
- Adjustable cycle time input power
- Easy to load and unload
- Uses 3" diameter (75mm) sieves with clear acrylic frames
- Accept six standard or three double-height sieves
- Surdy steel housing
- Transparent door for observing sifting process
- Three nonskid rubber feet

ORDERING INFORMATION:
Dimensions: 12L × 10W × 23"H (31 × 25 × 59cm)

INCLUDES:
Stack assembly (14-294-22), electrical connection cord and instruction manual

REQUIRED ACCESSORIES:
Sieves (order separately)

ACCESSORIES

Replacement Parts for Advantech Model L3P

Five components, sold separately or as complete assembly.

- **Column Lock** holds column taut
- **Dust Stop/Diaphragm** transmits oscillary motion to air column and keeps particles within column
- **Top Cone** sits atop spacers
- **Fines Collector** stops dust at bottom of air column in sifter and transmits oscillary motion to air column
- **Fines Collector Holder** supports column
- **Complete Stack Assembly** includes all components described above, plus six standard spacers (14-294-19).

Eppendorf* MixMate

Efficiently mixs 384-well samples to down to 5µL

21-379-00 with supplied tube holders

Easy to use, with an integrated vortexing function that provides precise control for thorough mixing. Unique 3-in-1 mixing process optimizes speed, mixing movement and mixing radius for efficient, consistent results down to 5µL. Perfect for mixing low-volume samples in 384-well plates. MixMate accepts microtubes, PCR plates, deepwell plates and microtiter plates.

Key features

- Mixing frequency: 300 to 3000rpm (in 50rpm increments)
- Touch vortexing frequency: 3500rpm
- Mixing and vortexing radius: 1.5mm (3mm mixing stroke)
- Timed (15 sec. to 99.5 hrs.) or continuous-run modes
- Small footprint: 17 × 23cm
- Extremely quiet running (<50dBA) even at maximum load
- Digital display and softkey controls for setting/viewing mixing duration and speed
- Preprogrammed keys for each tube or microplate type automatically run ideal mixing parameters when selected
- Vortexing feature includes two-second stop time delay for efficient and continuous vortexing without having to continuously restart the vortexer

Other features

- Stable design ensures sturdiness, even at maximum mixing frequency
- Reliable universal holder ensures safety and stability of all tube/plate platforms
- Automatic load imbalance detection prevents sample loss
- IVD conformity

APPLICATIONS:

PCR prep, resuspending pellets, incubation, protein quantifications, reporter gene assays, restriction prep

ORDERING INFORMATION:

Dimensions: 9L × 6⅝W × 5"H (23 × 17 × 13cm). For 120V 60Hz, 40w.

INCLUDES:

Three tube holders: 96 × 0.2mL PCR, 24 × 0.5mL and 24 × 1.5/2.0mL

WARRANTY:

Two years

TITER PLATE

Thermo Scientific* Lab-Line* Titer Plate Shakers

Provide shaking motion from gentle rotation to vigorous agitation for virological, immunological, serological, and hematological applications

Vortexing motion thoroughly mixes each well.

14-271-9

- Solid-state, variable speed control from 40 to 1100rpm with a ⅛" circular orbit
- Electronic timer can be set for continuous operation or timed shaking up to 5 minutes
- Independent start switch activates shaker for preset speed and time for repeatability in tests
- Automatic shutoff
- Platform has ⅜" sides and holds from one to four 96-well titer plates
- Two retaining springs and nonslip rubber mat hold plate securely
- Four platform finger slots for easy plate removal
- Rugged, enameled steel shaker body with four nonskid rubber feet

ORDERING INFORMATION:

Dimensions: 11L × 11W × 7"H (28 × 28 × 18cm)

Electrical Requirements	Mfr. No.	Cat. No.	Each
120V 60Hz	4625	14-271-9	921.00

IKA* MTS 2/4 Digital Microtiter Plate Shaker

For shaking up to four microtiter plates

- Shaking capacity: two or four microplates
- Shaking motion: Orbital, 3mm dia.
- Shaking speed range: 0 to 1100rpm
- Operating modes: timed or continuous run
- Digital LED timer from 0 to 99 min. (7 segments)
- Permissible ambient temperature: 5° to 40°C (41° to 104°F)
- 35w motor

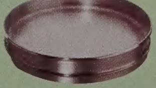
Separator Pan



For use with Fisherbrand* Sieves

- Brass
- Half-height receiver with extended rim
- Place between stacked 8" diameter (20.3cm) sieves to test two or more samples simultaneously

Dimensions	Cat. No.	Each
8 dia. × 1⅞" deep (20.3 × 4.8cm)	**04-887-10**	30.80

Sieve Certification Services

Certification services offered for new or used sieves

Certification Service

- Order when purchasing new sieves
- Uses a computerized video imaging system to verify that each sieve opening meets ASTM* and ISO specifications within a tolerance of ±0.1 microns
- Sieves are then serialized and supplied with documentation, tracable to NIST*, detailing the openings and the wire diameters of the mesh

Recertification Services

- Offer the same examination and documentation processes for in-use sieves as for new sieves
- Contact your Fisher Scientific Customer Service Representative for the recommended sieve aperture/recertification schedule

Description	Cat. No.	Each
Sieve Certification Service	**04-909-16**	80.45
Sieve Recertification Service	**04-909-17**	78.10

"Mesh" Series Sieves

5" diameter (12.7cm) sieves

- 10- to 80-mesh sieves made of brass; 100- to 200-mesh sieves of phosphor bronze
- Gauze is spun into brass frames for tight, nonsagging sieve surfaces
- Frames withstand rough use and fit together for stacking
- 5 I.D. × 1½"H (12.7 × 3.8cm)

14-295F

Mesh	Cat. No.	Each

SOLVENT RECOVERY

Kontes* Solvent Recovery Systems

Protect environment, employees, and data quality

07-770-1

- Eliminate up to 98% of toxic organic solvent vapor emissions such as methylene chloride, hexane, acetone, ether, and more†
- Recover solvent for recycling
- Comply with emission laws and waste reduction requirements
- Three-position linear systems use condenser, chambers, and gravity drains to return solvent vapors back to liquid state for recycling
- Systems feature heavy-duty glassware with precision-ground ball-and-socket joints for easy assembly and disconnect
- All glassware is compatible with existing lab glassware and equipment
- Two systems available: Linear Solvent Recovery System, and Linear Gravimetric Solvent Recovery System for Oil and Grease (Method 413.1)
- **Linear Solvent Recovery System** with Kuderna-Danish glassware includes all standard components listed above, plus three column tops. K-D Evaporator Concentrator glassware includes a 10mL concentrator tube, a 500mL evaporator flask, and a size 121 distilling column.
- **Linear Gravimetric Solvent Recovery System** includes all standard components listed above, plus a lightweight flask, a flask top adapter, and an injection port tube. (These components are available in a gravimetric flask assembly package; contact your Fisher Scientific Customer Service Representative for details.)

ORDERING INFORMATION:

Components and accessories for these systems are available online

INCLUDES:

Standard components for all Kontes Solvent Recovery Systems include three-position main recovery manifold, three 150mm primary condensers, PTFE extender tubing (7/16" I.D. × 3/8" O.D. × 6½'L [1 × 1 × 198.1cm]), water transfer tubing (7/16" I.D. × 3/8" O.D. × 7'L [1 × 1 × 213.4cm]), three 500mL water bath flasks, and six size 18A pinch clamps. Also come with three-plac 115V heating mantle and support, 115V mantle power controller, and splash guard.

NOTE:

Proper ventilation under a hood is strongly recommended.

Description	Mfr. No.	Cat. No.	Eac
Linear Solvent Recovery System with Kuderna-Danish Glassware	545000 0120	**07-770-10**	3863.2
Linear Gravimetric Solvent Recovery System	545200 0120	**K545200-0120**	3529.6

† *When used with a refrigerant to cool system water to 4°C (39.2°F).*

WARNING

The products indicated contain mercury. Don't put products containing mercury in the trash. Products containing mercury are to be recycled or disposed of as hazardous waste. Products containing mercury may be regulated by Local, State, or Federal Laws. Some products containing mercury are not available for sale in some states.

SPECTROMETERS

Thermo Scientific* Spectronic* IR100 FT-IR Spectrometer

Compact, reliable, easy to use

Ideal for sample testing, quality assurance and control, and teaching applications. Built-in software, with intuitive user interface, speeds analysis and minimizes training.

14-200-12

Optical Design

- Quadrascan* interferometer provides exceptional stability
- Cornercube* optics operate reliably without complicated electronics

Software and Display

- Built-in Encompass* software and integrated color LCD screen eliminate the need for a separate computer
- Small footprint saves valuable lab space
- Comes with software and slide-card mount for standard transmission accessories

Security and Diagnostics

- User log-in feature protects data and methods, and controls access to the system
- Self-test diagnostics and variable experimental set-up options ensure proper parameters and system conditions are available

Analysis and Reporting Functions

- Results are easily analyzed with processing functions such as peak picking, peak integration, and baseline correction
- Creation of user libraries allows matching of unknown spectra to reference spectra
- Standardized templates make report creation and generation fast and easy
- Standardized formats are available for saving and sharing data

Parts and Accessories

- Purge fittings are standard; use is optional
- Foundation Series* sample compartment accepts a variety of Swap-Top* modules for expanding sampling capabilities
- Laser, source, detector, desiccant, and power supply are user replaceable

ORDERING INFORMATION:

Additional accessories for IR100 FT-IR can be found on our Web site.

WARRANTY:

One year

Starter Kits for IR100 FT-IR Spectrometer

Economy Starter Kit includes:

- Econo-Press* with wrench
- 100g potassium-bromide powder, 4 oz. (118mL) Nujol, and 1 oz. (29.5mL) Fluorolube*
- Mortar and pestle
- Magnetic film holder
- 8" (20.3cm) spatula
- Presslok* holder for 24mm windows, four 25mm potassium-bromide windows, and one each drilled and undrilled 32mm potassium-bromide windows
- Demountable liquid cell holder
- 10mm IR quartz cuvet and holder

Advanced Starter Kit includes:

- Quik Handi-Press* with die set
- Pellet holder
- 100g potassium-bromide powde 4 oz. (118mL) Nujol, and 1 oz. (29.5mL) Fluorolube
- Mortar and pestle
- Magnetic film holder
- Presslok holder for 24mm windows, four 25mm potassium-bromide windows, two 25mm barium-fluoride windows, and two each drilled and undrilled 32mm potassium-bromide windows
- Demountable liquid cell holder

Description	Mfr. No.	Cat. No.	Each
Economy Starter Kit	869 0022 501	**14-200-22**	1225.00
Advanced Starter Kit	869 0022 500	**14-200-23**	2134.66

Swap-Top Modules for IR100 FT-IR Spectrometer

Three styles available for expanded sampling capabilities.

Multi-Bounce HATR* Swap-Top Module

- For liquid or solid samples
- Zinc-selenide crystal plate, easily removable for cleaning
- Flat plate and trough

SpeculATR* Swap-Top Module

- Combines single-reflection ATR and specular reflection sampling techniques
- Zinc-selenide crystal for powder, liquid, solids, paste, and gel samples

Thunderdome* Swap-Top Module

- Tiltable pressure tower for single-reflection ATR
- Germanium crystal for enhanced chemical resistivity of liquids, solids, powders, pastes, and gels

Swap-Top Module	Mfr. No.	Cat. No.	Each
Multi-Bounce HATR	869 0072 200	**14-200-15**	2600.00
SpeculATR	869 0071 200	**14-200-16**	1395.00
Thunderdome	869 0074 100	**14-200-17**	3654.56

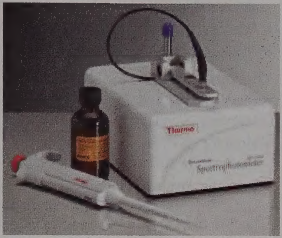
SPECTROPHOTOMETERS

BIOSPECTROPHOTOMETERS

ermo Scientific* NanoDrop* ND-00 UV-Vis Spectrophotometer

NEW

signed to analyze 1μL samples with high accuracy d reproducibility



ND-1000 (pipetter sold separately)

- rovides large dynamic range: to 3700ng/μL (dsDNA) on a ngle sample
- atented sample retention ystem eliminates the need r cuvets and capillaries
- btain measurements within seconds
- ample is recoverable—pipet rectly onto measurement urface
- igh absorbance capability eliminates the need for NA/RNA or protein dilutions
- mall footprint (20 ×14cm) with easy setup
- oftware designed for life science applications

PLICATIONS:
leic Acid Concentration; roarray; Protein Concentration; ctrophotometry; Cell Density

REQUIRED ACCESSORIES:
Computer Requirements: Windows* 2000, XP, Vista; 233MHz processor with free USB port, CD ROM Drive, 32MB RAM, 40MB of free hard drive

DERING INFORMATION:
110 or 230V.

WARRANTY:
One year

ECIFICATIONS

hlengths	1 and 0.2mm
velength Range	220-750nm
velength Accuracy	1nm
orbance Range	0.02-75 (10mm equivalent abs)
ht Source	Xenon flash
ector Type	2048-element linear silicon CCD
ight	3.5 lb. (1.6kg)

cription	Cat. No.	Each
oDrop ND-1000	**ND-1000**	call for pricing

Thermo Scientific* NanoDrop* ND-8000 UV-Vis Spectrophotometer

NEW

Measures eight 1μL samples simultaneously

ND-8000 (pipetter sold separately)

- Flexibility to measure a single sample or up to eight samples at a time
- Provides large dynamic range: 2 to 3700ng/μL (dsDNA) on a single sample
- Patented sample retention system eliminates the need for cuvets and capillaries
- Obtain measurements within 20 seconds
- Pipet directly onto measurement surface
- High absorbance capability eliminates the need for DNA/RNA or protein dilutions
- Small footprint (32 ×24cm) with easy setup
- Software designed for life science applications

APPLICATIONS:
Nucleic Acid Concentration; Microarray; Protein Concentration; Spectrophotometry; Cell Density

REQUIRED ACCESSORIES:
Computer Requirements: Windows* 2000, XP, Vista; 800MHz processor with free USB port, CD ROM Drive, 128MB RAM, 100MB of free hard drive

ORDERING INFORMATION:
For 110 or 230V.

WARRANTY:
One year

SPECIFICATIONS

Pathlengths	1mm and 0.2mm
Wavelength Range	220-750nm
Wavelength Accuracy	1nm
Absorbance Range	0.02-75 (10mm equivalent abs)
Light Source	Xenon flash
Detector Type	2048-element linear silicon CCD
Weight	7.5 lb. (3.4kg)

NanoDrop 8000	**ND-8000**	call for pricing

LOOKING FOR FLUOROSPECTROMETERS?

Thermo Scientific* NanoDrop* ND-3300 Fluorospectrometer is a space-saving fluorometer requiring only a 1μL sample.

Visit www.fishersci.com and search for NanoDrop ND-3300

ACCESSORIES

alibration Fluid

otassium dichromate ($K_2Cr_2O_7$) calibration solution or use with NanoDrop* Spectrophotometers

- Aqueous solution confirms spectrophotometer calibration
- Ten times more concentrated compared to other $K_2Cr_2O_7$ calibration solutions

escription	Quantity	Cat. No.	Each
alibration Fluid	0.5mL ampule	**CF-1**	call for pricing

Conditioning Kit

For use with Thermo Scientific* NanoDrop* Spectrophotometers

The kit is useful for re-conditioning sample measurement pedestals to a hydrophopic state.

INCLUDES:
Polishing compound and applicators

Description	Cat. No.	Each
Conditioning Kit	**PR-1**	call for pricing

Thermo Scientific* BioMate* Spectrophotometers

Provide fast and accurate purity and concentration measurements

Dedicated tests set up for: DNA ratio and concentration with or without scanning; protein standard curves for Bradford, Lowry, BCA, and Biuret methods; direct UV concentrations of dsDNA, ssDNA, ssRNA, and oligonucleotides; protein concentrations using Warburg-Christian method;and cell growth.

14-298-2077, 14-298-2074 (Front, Back)

- Up to 40 test methods can be stored
- Customizable bootup screen shows preselected protocols
- Built-in performance validation program measures wavelength and photometric accuracy, noise, and stray radiant energy
- An oligo calculator performs absorptivity, factor, and theoretical Tm estimations from base sequences
- The included software also allows use of the units as conventional spectrophotometers

Thermo Scientific BioMate 3

- Ideal for DNA/RNA and protein analysis
- Optional built-in 3" (7.6cm) graphical printer shows test parameters, graph, and data
- Optional automatic six-position cell holder speeds up cell growth measurements or standard curve preparations
- Unique cell-correction software eliminates the need for matched cuvets

Thermo Scientific BioMate 3 with nanoCell

- Measure samples from submicroliters to milliliters using the same instrument
- NanoCell accessory requires no alignment; easy to insert and remove
- Measures DNA concentrations from 4.0 to 4000ng/μL

Thermo Scientific BioMate 5

- Gives added flexibility with double-beam optics and advanced scanning capability
- Ideal for handling applications such as calculation of enzyme-rate reactions or substrate concentrations
- Features advanced calibration curve generation, multiwavelength capability, and unlimited user method and data storage—either on built-in disk drive or by export to PC or Macintosh*
- Available with thermostatted seven-cell programmer which permits rate measurements in parallel
- Operates with 10mm cells down to 5μL volume

Model	**BioMate 3**	**BioMate 5**
Optical System	Split-beam, quartz-coated optics	Double-beam, quartz-coated optics
Lamp Type	Long-life xenon	Deuterium and tungsten
Wavelength Range	190–1100nm	190–1100nm
Wavelength Accuracy	±1.0nm	±1.0nm
Wavelength Repeatability	±0.5nm	±0.2nm
Spectral Bandwidth	5nm	2nm
Scanning	Survey scan (100nm increments)	Variable speed (200–1000nm/min.)
Stray Light	<0.1%T at 220 and 340nm	<0.05%T at 220 and 340nm
Absorbance Accuracy	0.5% or 0.005A, whichever is greater, up to 2A	±0.005A at 1A
Display	320 × 240 pixel LCD; 90 × 60mm	VGA-quality graphics LCD; 115 × 85mm
Computer Interface	Bidirectional RS-232-C	Bidirectional serial RS-232-C; parallel port
Printer Interface	Standard bidirectional RS-232-C or built-in 76mm wide graphical printer option	Standard Centronics parallel or built-in 110mm wide graphical printer option
L × W × H	16 × 13 × 9" (41.0 × 33.0 × 23.0cm)	15½ × 18 × 8½" (39.5 × 45.5 × 21.5cm)
Weight	19 lb. (8.6kg)	22 lb. (10kg)
Electrical Requirements	100–240V 50/60Hz	100–240V 50/60Hz

ACCESSORIES

Thermo Scientific* BioMate* nanoCell Accessory

Makes sub-microliter solution measurements possible

Use the nanoCell accessory in your spectrophotometer for the ultimate sampling flexibility.

- No alignment required, just insert the nanoCell, load your sample and obtain accurate results
- Removable accessory makes switching between large and small volume measurements fast and easy
- Quartz sample loading area allows you to load samples quickly using a pipet
- Interchangeable 0.2 and 1.0mm pathlengths
- Requires as little as 0.700µL of sample and can measure DNA concentrations from 4.0 to 4000ng/µL
- Quick cleaning with a laboratory tissue allows high sample throughput and excellent sample carryover performance
- Measure sample volumes from sub-microliters to milliliters using the same spectrometer

143-80-500

Description	Pathlength	Cat. No.	Each
nanoCell Accessory	0.2mm	**143-80-500**	3100.00
nanoCell Accessory	1.0mm	**143-80-501**	3100.00
nanoCell Adapter	0.2mm	**143-80-502**	390.00
nanoCell Adapter	1.0mm	**143-80-503**	390.00
nanoCell Accessory with 0.2mm and 1.0mm Pathlength Adapters	0.2mm and 1.0mm	**143-80-504**	3500.00

imadzu* Bio-Mini Spectrophotometer

nplete, compact spectrophotometer suitable for ly use

nology-packed unit provides a broad range of fuctionality, yet is easy ugh for a novice to use. Supports four types of quantitative methods measure protein concentration using coloring reagents and UV rption at 280nm.

- ickly measures the spectrum and displays quantitative results with the uch of a button
- easures absorbance at 600nm to calculate cell count using an entered efficient and dilution ratio
- egral comprehensive nucleic acid and protein analysis modules and andard data acquisition modes
- ilt-in DNA companion program determines molecular weight, molar tinction coefficient, and theoretical melting temperature
- ing the base composition or the base sequence, automatically lculates molecular weight, molar absorption coefficient, and ncentration based on absorbance at 260nm
- eaures the spectrum from 190 to 330nm before calculations to check protein contamination
- ing nearest-neighbor base-pair model is fast and easy
- enu-driven system guides user through the inputs, including chain ngth, salt concentration, and other parameters
- ith optional Kinetics Program Pack (Cat. No. 206-89756-92), Bio-Mini easily customized for a variety of bioscience applications and mpling requirements

LICATIONS:

gned for life science applications. Performs double- and single-stranded and RNA quantification using a variety of editable, preset factors as as oligo-length and sequence-base quantification.

ERING INFORMATION:

sures 15L × 16½W × 10¾"H (38 × 42 × 27cm). For 120V 50/60Hz.

220-92926-00

SPECIFICATIONS

Optical System	Single-beam
Spectral Bandwidth	5nm
Wavelength	
Range	190 to 1100nm
Accuracy	±1.0nm
Repeatability	±0.3nm
Photometric	
Readout	Absorbance, %Transmittance
Range	-0.3 to +3.0A; 0.0 to +200%T

ACCESSORIES

Multicell Holder

- Holds up to six 10mm square cells at ambient temperature
- Cells not included
- For use with Shimadzu* Bio-Mini and UV-Mini 1240

Cat. No.	Each
206-60605-01	1184.85

LOOKING FOR MORE ACCESSORIES?

Optional attachments and accessories, including an alternate sample compartment, temperature-controlled cell positioners, cell holders, and sippers available separately.

Visit www.fishersci.com and search for Shimadzu* Spectrophotometers

LOOKING FOR EPPENDORF* CUVETES?

See the Cuvets subsection, pg. 1726.

LOOKING FOR MORE ACCESSORIES?

Additional accessories for the Shimadzu* Bio-Mini can be found on pp. 1716-1717.

Eppendorf* BioPhotometer

Combines rapid and reliable analysis with simple opera

Key Features

E6131 000

- Compact unit analyzes DNA, RNA, oligonucleotides, proteins, and bacterial cell density
- Programmed methods include ssDNA,dsDNA, RNA, Oligo, Protein, OD 600,Lowry, Bradford, and BCA (also possible as micromethods)
- Each method has its own key on the easy-to-follow keypad—simply press the key and measurement begins
- Unit automatically stores last 100 results and corresponding data, as well as all calibrations

Additional Features:

- Optional background correction at 320nm for UV methods
- Automatic calculation of sample dilution
- Simple conversion using "conversion" key
- Up to 10 standards for colorimetric processes

ORDERING INFORMATION:

Thermal printer DPU-414, 115V and 230V power supplies for printer, and printer cable sold separately

SPECIFICATIONS

Light Source	Xenon flash lamp
Spectral Range	220–750nm
Wavelengths	230, 260, 280, 320, 562, 595nm
Spectral Bandwidth	5nm: 230 to 320nm; 7nm: 562 to 595nm
Photometric Measuring Range	0.000 to 3.000A
Photometric Accuracy	±1%
Photometric Precision	≤0.5%
Method-dependent Evaluation	Absorbance/concentration using factor; concentration using calibration with 1 to 10 standards; endpoint calibration (1 standard); linear regression (2 to 10 standards); nonlinear regression (3rd degree polynomi 4 or 5 standards), single, double or triple determination Ratio 260/280, ratio 260/230, molar concentration, tot yield; Warburg formula for protein direct A_{280}.
Calibration Memory	For protein methods
Results Memory	For 100 results; absorption and ratio values, sample number, dilution, date, and time.
Printer Interface	RS-232-C, serial

Thermo Scientific* Evolution* 60 UV-Vis Spectrophotometers

Flexible, cost-efficient system designed for a wide range of laboratory applications — from routine to research

Highly accurate instrument with fixed 1.0nm bandpass assures full compliance with regulatory requirements. Automatic cell changer interacts with built-in Local Control and PC Control software.

- Cell changer easily removed to accommodate optional accessories
- Compact design saves valuable space for additional laboratory equipment
- Maintenance-free operation including xenon lamp with three-year guarantee

Versatile system choices

- Easy-to-use Local Control embedded software or Thermo Scientific VISION*lite** PC software offers intuitive method setup, analysis, reporting, and calculation capabilities
- Biochemical tests for DNA, RNA and protein are included in the local control embedded software
- PC Control analyzer packages are available for enzymatic food analysis, color, and materials calculations
- Optional Software and Accessories sold separately

ACCESSORIES

Raised Sample Compartment Cover

Accessory Cover for Thermo Scientific* Evolution* 100 Spectrophotometer

- Required for use of test tubes >60mm in height

Description	Mfr. No.	Cat. No.	Each
Raised Sample Cover	9423UV99220E	**14-386-459**	198.00

Thermo Scientific* VISION*pro** Software

Designed for general research and QC laboratories

- For use with Thermo Scientific Evolution* 100, 300 and 600 UV-Vis Spectrophotometers
- Performs Scan, Fixed Wavelength Analysis, Quantification and Multi-Component Analysis
- Produces spreadsheet results table
- Arranges data easily with report composer

INCLUDES:

User Manual and RS-232-C cable (14-386-435)

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 2000 or XP Professional, plus PC with CD-ROM drive

Description	Mfr. No.	Cat. No.	Each
Single License	10040101	**14-386-430**	804.00
5 User License	10040121	**14-386-431**	3750.00

Thermo Scientific* VISION*life** Software

Designed for life science and general research laboratories that perform kinetics experiments and DNA melting assays

- For use with Thermo Scientific Evolution* 100, 300 and 600 UV-Vis Spectrophotometers
- Use with Thermo Scientific VISION*pro** or Thermo Scientific VISION*security** software to monitor and calculate reaction kinetics and perform DNA melting experiments

INCLUDES:

User Manual

REQUIRED ACCESSORIES:

Thermo Scientific VISION*pro* (14-386-430, 14-386-431) or Thermo Scientific VISION*security* (14-386-428, 14-386-429) PC software

Description	Mfr. No.	Cat. No.	Each
PC Software	10040201	**14-386-432**	643.00

ACCESSORIES

Thermo Scientific* VISION*security** Software

Designed for general research and QC laboratories requiring 21 CFR Part 11 compliance

- For use with Thermo Scientific Evolution* 100, 300 and 600 UV-Vis Spectrophotometers
- Multiple security features include: same log-in and password used to log into Windows*, customizing each user profile, electronic signatures with full audit trails and traceability
- Performs Scan, Fixed Wavelength Analysis, Quantification and Multi-Component Analysis
- Produces spreadsheet like results table
- Arranges data easily with report composer

INCLUDES:

Thermo Scientific VISION*security* and Thermo Security Software Administration software with Admin/Client User Manual and RS-232C cable (14-386-435)

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 2000 or XP Professional, plus PC with CD-ROM drive

Description	Mfr. No.	Cat. No.	Each
Single license	10040301	**14-386-428**	1607.00
5 user license	10040341	**14-386-429**	7499.00

Thermo Scientific* VISION*lite** Software

Basic PC Software for UV-Visible Spectrophotometers

- For use with Thermo Scientific Evolution* 60, 100, 300 and 600 series
- Provides wide range of data handling, recording and processing capabilities for wavelength scanning, fixed wavelength analysis, quantitative analysis and kinetics
- Offers extended security functions according to 21 CFR Part 11 including user authentication, audit trails, electronic records and signatures

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 95/98/2000/NT/XP, plus PC with CD-ROM drive; RS-232-C Cable

Description	Mfr. No.	Cat. No.	Each
PC Software	869127300	**14-386-455**	3300.00

Thermo Scientific* ENZLAB Enzymatic Food Analysis Software

Designed for enzymatic food analysis

- For use with Thermo Scientific Evolution* 60, 100, 300 and 600 series spectrophotometers
- Automates and simplifies enzymatic determinations
- Stand-alone software package

Thermo Scientific ENZLAB SE

- Offers extended security functions according to 21 CFR Part 11 including user authentication, audit trails, electronic records and signatures

INCLUDES:

Predefined all Boehringer kit methods; 2 and 3 component methods

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 95/98/2000/NT/XP, plus PC with CD-ROM drive; RS-232-C Cable; Food test kit from Boehringer

Description	Mfr. No.	Cat. No.	Each
Basic Software	10041001	**14-386-433**	1991.00
SE (21CFR Part 11) Software	869127100	**14-386-454**	3100.00

Wine Analysis Software

Designed for the wine-making industry

- For use with Thermo Scientific* Evolution* 100, 300 and 600 UV-V Spectrophotometers
- Analyze Anthocyanin Color, Chemical Age Color, Net Red (Glories Red) Color, Total Polyphenol Index and CIELAB Color
- Stand-alone software package

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 95/98/2000/NT/XP, plus PC with CD-ROM drive; RS-232-C Cable

Description	Mfr. No.	Cat. No.	E
Wine Analysis PC Software	9423UV85050E	**14-386-434**	608

Grams/AI 8.0 Software

Designed for processing, visualization and reporti UV-Vis data

- For use with Thermo Scientific* Evolution* 100, 300 and 600 UV-V Spectrophotometers
- Comprehensive analysis of data

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 95/98/2000/NT/XP, plus PC with CD-ROM drive; RS-232-C Interface Cable; Thermo Scientific VISION software

Description	Mfr. No.	Cat. No.	E
Grams/AI8.0 PC Software	869126900	**14-386-452**	2095

Origin 7.5 Graphing Software

Designed for processing, visualization and reporti UV-Vis data

- For use with Thermo Scientific* Evolution* 100, 300 and 600 UV-V Spectrophotometers
- Comprehensive analysis of data

REQUIRED ACCESSORIES:

Computer Requirements: Microsoft Windows* 95/98/2000/NT/XP, p PC with CD-ROM drive; RS-232-C Interface Cable; Thermo Scientific VISION software

Description	Mfr. No.	Cat. No.	
Origin 7.5 Graphing PC Software	869127000	**14-386-453**	85

Interface Cable

Connects Thermo Scientific* Evolution* Series spectrophotometers to laboratory PC

Description	Mfr. No.	Cat. No.	
Interface Cable (RS-232C)	401317263061	**14-386-435**	12

ACCESSORIES

ingle-cell Sample Holders

or use with Thermo Scientific* Evolution* 300 and 00 spectrophotometers

djustable Microcell Holder

- Holds one ultra-microcell, microcell or standard rectangular cell with 10mm maximum pathlength

ectangular Cell Holder

- Holds one rectangular or test tube cuvet with 10mm maximum pathlength

ylindrical Cell Holder

- Holds one cylindrical cuvet with 100mm maximum pathlength

ong Pathlength Rectangular Cell Holder

- Holds one rectangular cuvet with 5 to 100mm pathlength

est Tube and Vial Holder

- Holds one test tube or vial cuvet with diameter from 10 to 16mm and height from 75 to 100mm

NCLUDES:

ne cuvet holder on base plate

escription	Mfr. No.	Cat. No.	Each
djustable Microcell Holder	10011501	**14-386-413**	257.00
ectangular Cell Holder	10011601	**14-386-409**	259.00
ylindrical Cell Holder	10011201	**14-386-410**	257.00
ong Pathlength Rectangular ell Holder	10011101	**14-386-411**	536.00
est Tube and Vial Holder; 10-16mm iameter and 75-100mm high	10011301	**14-386-412**	257.00

hermostatted 7-Cell Rotary Changer

easures up to seven sample cells and control emperature with circulating water bath

- Easy-to-use sample positioning accessory for use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Recognized by built-in Local Control or VISION PC software, smart alignment and serial number reporting
- Accommodates seven rectangular cuvets with maximum pathlength of 10mm

NCLUDES:

-cell carousel on Smart base

EQUIRED ACCESSORIES:

emperature Probe Accessory (14-386-420)

escription	Mfr. No.	Cat. No.	Each
-Cell Rotary Changer	10010101	**14-386-416**	1049.00
pare 7-Cell Carousel	10010110	**14-386-440**	256.00

Thermostatted 8-Cell Linear Changer

Measures up to eight sample cells under constant temperature-controllled conditions

- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Fast movement between eight samples
- Recognized by built-in Local Control or PC software, smart alignment and serial number reporting
- Accommodates eight rectangular cuvets with maximum pathlength of 50mm
- Use standard cells, black-walled microcells or dissolution flow cells

16-Cell Holder

- Compatible with linear 8-cell changer (14-386-417)
- Allows analysis of 4, 8, 12 or 16 samples
- Requires Smart Base

REQUIRED ACCESSORIES:

Temperature Probe Accessory (14-386-420)

Description	Mfr. No.	Cat. No.	Each
8-Cell Thermostatted Cell Changer	10010801	**14-386-417**	2842.00
16-Cell Holder	10010821	**14-386-418**	415.00

Smart 16-Cell Linear Changer

Measures 4, 8, 12 or 16 samples at ambient temperature

- Fast movement between 4, 8, 12 or 16 samples
- Accommodates standard cuvets, black walled microcuvets and dissolution flowcell cuvets
- Interacts with built-in Local Control or PC software applications
- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers

Description	Mfr. No.	Cat. No.	Each
16-Cell Changer	10012401	**14-386-419**	2842.00

8-Position Peltier Cell Holder

Temperature control from 0° to 100°C

- Holds up to eight cuvets of 10mm pathlength maximum
- No temperature ramping
- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Stirring for all 8 cells

REQUIRED ACCESSORIES:

Water pump for eight-Cell Peltier accessory

Description	Mfr. No.	Cat. No.	Each
8-Cell Peltier	222-239100	**14-386-451**	4800.00

Water Thermostatted Single-cell Holder

Holds single rectangular or test tube cuvet

- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Accommodates one rectangular cell with 10mm maximum pathlength
- Water thermostatted single cell block

Description	Mfr. No.	Cat. No.	Each
Single Cell Holder, Thermostatted	10011001	**14-386-415**	741.00

ACCESSORIES

Smart Peltier Thermostatted Single Cell Holder

Controls temperature from 5° to 110°C

- Recognized by built-in Local Control or Thermo Scientific* VISION PC software, smart alignment and serial number reporting
- Temperature ramping from 0.1 to 6°C/min.
- Air-cooled system with sample stirring
- Accommodates one rectangular cuvet with 10mm maximum pathlength

INCLUDES:
One 1-cuvet holder on Smart base, temperature controller, Packet of 10 stirring bars (14-386-439)

REQUIRED ACCESSORIES:
Temperature Probe (14-386-420) for temperature monitoring

For use with	Mfr. No.	Cat. No.	Each
Thermo Scientific Evolution* 300 and 600 Spectrophotometers	10010301	**14-386-414**	2357.00

Peltier Thermostatted Single-Cell Holders

Controls temperature from 20° to 60°C

- Air-cooled system, no external connections
- Sample stirring, requires stirring bars available separately (14-386-439)
- Stirring speed: 250-2000rpm
- Accommodates one rectangular cuvet with 10mm maximum pathlength
- Modified sample compartment lid comes with accessory and replaces standard lid

For Use with	Mfr. No.	Cat. No.	Each
Thermo Scientific* Evolution* 60, GENESYS* 10	222-238100	**14-386-461**	2100.00
Thermo Scientific Evolution 100, Helios	222-238200	**14-386-460**	2100.00

Micro Stirring Bars

For use with stirring accessories

- Use in combination with Single Cell Water Thermostatted Smart Peltier (14-386-414) or Thermo Scientific* Evolution* 60 Singe-Cell Peltier (14-386-461) Accessories

INCLUDES:
10 stirring bars

Description	Mfr. No.	Cat. No.	Pack of 10
Micro Stirring Bars	9423UV97030E	**14-386-439**	51.43

Temperature Probe

For cell temperature studies

- Monitors sample temperature in a cuvet
- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers

Description	Mfr. No.	Cat. No.	Each
Temperature Probe	10011401	**14-386-420**	569.00

Temperature Control Tubing Kit

For use with thermostatted spectrophotometer accessories

INCLUDES:
1m tubing

Description	Mfr. No.	Cat. No.	Each
Temperature Control Tubing Kit (1m)	10011801	**14-386-427**	229.00

Solid Sample Holders

Designed to hold solid samples for transmittance measurements

Solid Sample Holder

- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Provides easy mounting of solid samples like filters, plastic, glass and optics
- Accommodates standard 2 x 3" sample holders

Universal Sample Holder

- Holds round or square optical samples; glass or plastic samples; lenses from sunglasses or goggles
- Requires one Solid Sample Holder (14-387-503)

Description	Mfr. No.	Cat. No.	Each
Solid Sample Holder	222-217200	**14-387-503**	700.00
Universal Sample Holder	222-217400	**14-387-504**	450.00

Smart Sipper Accessory

Easy-to-use sampling accessory featuring a reliable multi-roller peristaltic pump

- For use with Thermo Scientific* Evolution* 300 and 600 Spectrophotometers
- Complete and automated integration into Thermo Scientific VISION and Local Control software methods
- Automatic recognition by software, smart alignment and serial number reporting
- Handles sample volumes from 200µL to 9.999mL with customizable sip volume and air gap
- Methods can be automated for sample measurement after they are sipped

REQUIRED ACCESSORIES:
Silicone pump tubing (14-386-424) or Acid pump tubing (14-386-425) and flow cell

Description	Mfr. No.	Cat. No.	Each
Smart Sipper Accessory	10010401	**14-386-421**	1339.00
Silicone pump tubing (1m)	401322844561	**14-386-424**	26.00
Acid pump tubing (1m)	401322844571	**14-386-425**	119.00

ACCESSORIES

Smart Calibration Validation Carousel (CVC)

Designed for QC laboratories to save time, reduce errors and meet compliance regulations

- Traceable to either NIST* or NPL primary standards
- Testing is automated and includes electronic storage of results
- Eliminates human error during the testing process
- Calibration data is stored on one certificate, reducing the amount of paperwork

ORDERING INFORMATION:

Performance Verification Standards: Wavelength Accuracy (14-386-449), Stray Light (KCl) (14-386-447) or (NaI) (14-386-446) available separately

REQUIRED ACCESSORIES:

CVC can be used with Thermo Scientific*VISION*pro** or VISION*security** or Thermo Scientific Evolution* 300/600 Local Control software

Description	Mfr. No.	Cat. No.	Each
Calibration Validation Carousel (CVC), NPL	10010621	**14-386-442**	1656.00
Calibration Validation Carousel (CVC), NIST	10010721	**14-386-443**	1656.00

Instrument Performance Verification Standards

Performance verification standards for use with Thermo Scientific* Evolution* Series Spectrophotometers

UV Resolution Standard: Toluene in Hexane

- Contains one hexane only and one 0.02% v/v solution of toluene in hexane
- Usable range: 265 to 270nm
- Use for BP & EP Wavelength Resolution test
- Calibrated for use with instruments with a SBW of <3nm

UV-Vis Wavelength Standard: Holmium Oxide in Perchloric Acid

- Contains empty cell holder
- One sealed cell with 4% v/v solution of holmium oxide in 10% perchloric acid calibrated at nominal wavelengths of 640, 536, 485, 467, 452, 416, 385, 361, 345, 333, 287, 278, 249, 240nm and at SBW of 0.1, 0.25, 0.5, 1, 1.5, 2, 3nm
- Calibrated for use with instruments with a SBW of <3nm

Stray Light Standard: Potassium Chloride (KCl) — 198-201nm test

- Supplied in permanently sealed quartz cells
- Fits in any cell holder that accommodates 10mm pathlength rectangular cuvet
- Prepared in accordance with ASTM* E-387
- No recertification offered
- One water only and one 12g/L aqueous solution of KCl

Stray Light Standard: Sodium Iodide solution—220nm test

- Supplied in permanently sealed quartz cells
- Fits in any cell holder that accommodates 10mm pathlength rectangular cuvet
- Prepared in accordance with ASTM E-387
- No recertification offered
- One water only and one 10g/L aqueous solution of NaI

Stray Light Standard: Sodium Nitrite

- Designed to determine stray light performance at 330nm

REQUIRED ACCESSORIES:

Requires cell holder that can accommodate 12.5mm square cuvet

Description	Mfr. No.	Cat. No.	Each
Resolution Standard	222-226600	**14-386-450**	875.00
Wavelength Standard	222-226400	**14-386-449**	595.00
Stray Light Standard, KCl	9423UV95520E	**14-386-447**	808.00
Stray Light Standard, NaI	9423UV95500E	**14-386-446**	808.00
Stray Light Standard, $NaNO_2$	222-226500	**14-386-448**	760.00

UV Validator Log Book

Record all of your analytical procedures, maintenance and instrument validation

- For use with IQ/OQ/PQ procedures for Thermo Scientific* Evolution* 300 and 600 spectrophotometers and accessories
- Contains IQ/OQ/PQ analytical procedures, training log, maintenance log, CVC calibration results log, incident report sheets and reporting templates

INCLUDES:

Validation Alignment Block

REQUIRED ACCESSORIES:

CVC (14-386-442 or 14-386-443) or appropriate Performance Verification standards kit; Wavelength standard available separately (14-386-449)

Description	Mfr. No.	Cat. No.	Each
UV Log Validator Book	10030901	**14-386-441**	773.00

Thermo Scientific* GENESYS* 6 UV-Vis Scanning Spectrophotometer

Features unique 3-D optical design that maximizes throughput and minimizes stray light—producing an instrument with outstanding accuracy and precision

- Xenon lamp provides high UV energy and years of life; includes emission lines to check wavelength accuracy
- Tests are fully integrated with six-position cell changer or single-position cell holder
- Cell correction program automatically corrects up to six unmatched cuvets
- SmartStart* feature allows user to preselect test methods that appear on the bootup screen
- Accommodates a wide variety of accessories, including test tube holders, 50 and 100mm cylindrical and rectangular longpath cell holders, filter holders, sipper systems for UV-Visible and Visible applications and a funnel flowcell
- Large backlit LCD shows current sample position, date and time, all measured data, test setup and graphs
- Keypad includes cell-changer buttons, numerical keys, and "SoftKeys*" that give specific instructions for using the operating software
- Cleanable, chemical-resistant cover stands up to toughest laboratory conditions

Built-in Software

- Nine dedicated software programs let operator select setup parameters, save them with customized names, run tests automatically, display results with statistics and automatically print all results on a built-in or external printer
- Software includes: Advanced Absorbance/Transmittance/Concentration; Standard Curve; Absorbance Ratio; Absorbance Difference; Kinetics; Full-Spectrum Scanning; 3-Point Net; Multiwavelength; and Performance Validation

SPECIFICATIONS

Optical System	Split-beam, grating-based, dual detectors
Spectral Bandwidth	1.8nm
Wavelength	
Range	190 to 1100nm
Accuracy	±1.0nm
Repeatability	±0.5nm
Photometric	
Readout	Absorbance, %Transmittance, Concentration
Range	-0.1 to +3.0A; 0.3 to 125%T; 0 to ±9999C
Accuracy	±0.5% or 0.005A, whichever is greater, up to 2A
Scanning	
Speed	10 to 2000nm/min.
Slew rate	11,000nm/min.
Sampling Interval	0.1, 0.2, 0.5, 1.0, 2.0, 5.0nm
Drift	≤1mA/hr.
Noise	≤1mA; ≤2mA; peak-to-peak at 340nm
Stray light	≤0.1%T at 220, 340, and 400nm
Lamp	Xenon (5 yr. typical service)
Display	320 x 240 pixel LCD, 3⅞W x 2⅞"H (96.5 x 71mm)

Data Handling and Reporting

14-385-161

- Output data via a parallel port to a variety of printers using HP PCL format or choose model with built-in 3" 40-column graphics thermal printer
- Saves tests and data to built-in 3.5" diskette drive for archiving or data manipulation, or to computer via bidirectional RS-232C serial interface
- Complies with GLP requirements; saves extra paperwork with useful documentation features
- Printout shows date and time, all measurement parameters and data valu
- Up to 80 tests can be saved in nonvolatile memory, and password locke to prevent unauthorized alterations
- The software, printouts and operating manual include English, French, German, Spanish and Italian versions

ORDERING INFORMATION:

Small footprint conserves bench space: just 16⅛L × 13W × 9¼"H (41 × 33 × 23.5cm). Operates on 100 to 240V (selected automatically), 50/60Hz.

INCLUDES:

Six-position automatic cell holder (for standard 10mm cuvets) that is fully integrated with instrument software for fast and accurate data collection

WARRANTY:

One year

Description	Mfr. No.	Cat. No.	Eac
Instrument only	335908	**14-385-160**	6072.0
Instrument with printer	335908P	**14-385-161**	6479.0

ACCESSORIES

VERSA* Fiber Optic Probe

For use with Thermo Scientific* UV-Visible spectrophotometers with cuvet coupling optics

- Integrated coupling optics
- Uses disposable quartz tips

ORDERING INFORMATION:

Available quartz tips: 5mm (14-380-601), 10mm (two included; 14-380-602), and 20mm (14-380-603); sold separately

INCLUDES:

Two 10mm probe tips

Description	Cat. No.	Pric
VERSA Fiber Optic Probe	**14-380-600**	Ea./5835.9
5mm Quartz Tip	**14-380-601**	Pk. of 10/420.0
10mm Quartz Tip	**14-380-602**	Pk. of 10/420.0
20mm Quartz Tip	**14-380-603**	Pk. of 10/420.0

ration

y to operate: Select a preprogrammed method, then press RUN
n water analysis methods from diskette or load into memory
nerate calibration curves using up to 20 standards with choice of ve-fit options
mory stores up to 30 methods and calibrations
gram, run, and display in English, French, German, Spanish, or Italian
sword-controlled access to methods and calibrations

-in Software

k search, Absorbance/% Transmittance/Concentration, ltiwavelength (up to 20 wavelengths)
ial wavelength (up to nine wavelengths)
ndard curve (1–20 standards, 1–3 replicates, 4 curve fits)
character alphanumeric sample identification
r user-selectable procedural timers (permit event control, such as e required for sample color to develop)
osave results
culator with equation generator

ing and Data Export

t results using the built-in or remote printer, depending on model
dels with built-in, 110mm (4⅜") graphics printer are ideal where ce is limited or portability is required
ults can also be exported in ASCII format to PC applications via 232C interface

Handling and Reporting

nown analyte wavelengths are automatically retrieved and reported, h peak profile and peak wavelength, on the graphical display
dify procedures to suit individual requirements
ily and quickly update methods and calibrations as required
neasure or delete standards
er quality-control limits to generate on-screen and hard-copy s/Fail reports
ly calculations to raw data to change reported units or correct for erent sample weights, volumes or dilutions
d-copy reports include date and time of analysis, date and time of d copy, method, operator and sample identification, calibration curve, rument parameters, software version, serial number, and results

ssories (available separately)

iSipper Sample System—processes up to 300 samples per hour
litional sample cells

INCLUDES:

Combination test tube/cuvet holder that accommodates tubes up to 125H × 18mm dia. and 10mm pathlength glass or quartz cuvets; Variable pathlength cell holder (holds glass or quartz cuvets with 1–50mm pathlength); Cell holders for Hach 1" square cells and AccuVac* ampules; US, UK, and Europlug power line cords

WARRANTY:

One year

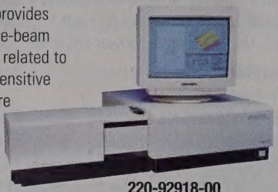
Shimadzu* UV-3101PC Spectrophotometer

Research-grade spectrophotometer helps simplify applications normally requiring an integrating sphere



220-92918-00

The sophisticated PC-based unit provides high-energy output, and the double-beam monochromator eliminates issues related to decreased light intensity. Highly sensitive measurement throughout the entire UV-Vis-NIR (near infrared) wavelength range allows photometric analysis for a wide variety of applications and samples.

- High-efficiency double monochromator with ultralow stray light
- Software provides versatile operation and data analyses
- Two sets of high-performance blazed holographic gratings deliver high energy throughout the ultraviolet to near-infrared wavelength range
- Concave diffraction premonochromator and Littrow monochromator with paraboic mirror each automatically switch to one of three gratings for optimum performance throughout wavelength measurement region
- Microsoft* Windows*-compatible software provides fast data processing, plus links to spreadsheet and word processing applications
- System allows for convenient, user-defined data output format and scale adjustment, automatic filing of data, and repeat scanning
- One-touch commands and concise menus help guide user through processes, eliminating potential human error
- Six-grating system offers a resolution to 0.1nm and low noise optics

UVProbe software adds control

- Flexible, easy-to-use software controls the unit using a PC
- All-in-one software package includes spectrum, photometric (quantification), kinetics (time course), and sophisticated report functions
- Photometrics module allows single-wavelength or multiwavelength quantification
- Create custom functions for automatic pass/fail of measurement results
- Customize appearance of graphs and data for easy-to-read reports, and store layouts as templates
- For increased security and monitoring, system administrator may assign user groups and permissions
- Features many calculation functions, including peak detection, area calculation, and Point Pick
- Performs arithmetic operations between data, and provides interpolation conversions
- Calculates area for spectral and time-course data, as well as differentiation, log and Kubelka-Munk conversions
- Software includes online help for quick reference
- For expanded operations, optional attachments are available, including a multicell positioner and a variety of sample compartments (see our Web site for details)

APPLICATIONS:

Ideal for use in chemistry, pharmacology, and clinical biochemistry environments. For analysis of semiconductors, thin films, powders, glass, solar-heat materials, solids and bulky objects.

ORDERING INFORMATION:

Unit (optical bench only, does not include PC or monitor) measures 27L × 40W × 10½"H (68.5 × 102 × 26.5cm). Optical bench for 100–120V 50/60Hz. Computer requirements may differ according to manufacturer's recommendations.

INCLUDES:

An RS-232-C cable to connect to a PC

Visit www.fishersci.com and search for Shimadzu Spectrophotometers

Shimadzu* UV-1650PC Spectrophotometer

Rugged design features high performance, sealed optics and impact-resistant case

Sophisticated, sturdy, flexible spectrophotometer with highly responsive software is ideal for all levels of user experience, and features online help and one-button functionality. Designed for a wide range of applications, industries, sample sizes, and types.

- Designed for a long life with sealed optics and durable, impact-resistance casing
- Monochromator is mounted on a stable optical bench, ensuring data integrity and trouble-free operation
- Automatically monitors and adjusts for fluctuations in lamp output and system electronics providing additional long-term stability
- Blazed holographic grating features self-aligning, energy-optimizing deuterium and tungsten-halogen light sources
- Ultranarrow beam of 1mm supports examination and analysis of the smallest samples

UVProbe Software

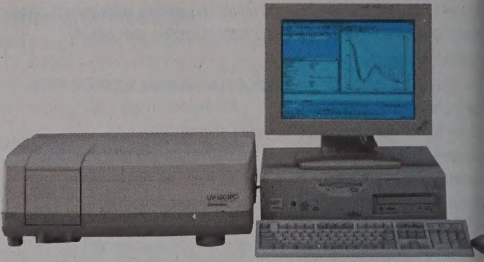
- Powerful, easy-to-use software controls the unit through a PC with Microsoft* Windows* platform
- All-in-one software package includes spectrum, photometric (quantification), kinetics (time course), and sophisticated report functions
- Photometrics module allows single-wavelength or multiwavelength quantification, plus quantification based on peaks and area values
- Create custom functions for automatic pass/fail of measurement results
- Customize appearance of graphs and data for easy-to-read reports, and store layouts as templates
- For increased security and monitoring, administrator can assign user groups and permissions
- System also creates an activity log for monitoring events
- Unit provides several automatic calculations, including peak detection, area calculation, and Point Pick
- Performs arithmetic operations between data, and provides interpolation conversions
- Complies with GLP/GMP requirements by storing both original and resultant data, and tracking instrument history

Variety of accessories provide increased functionality

- Expand the range of applications even further
- Multicell positioners and a wide variety of sample compartments
- Change easily from a standard cuvet to a capillary cell, or to a powder or film holder

ORDERING INFORMATION:

Unit (bench only) measures 18½L × 21¾W × 7¾"H (47 × 55 × 20cm). For 100–120V 50/60Hz. For additional software specifications, contact your Fisher Scientific Customer Service Representative.



220-92911-00 (PC not included)

INCLUDES:

RS-232-C cable is required to connect PC to UV-1650PC.

REQUIRED ACCESSORIES:

Computer requirements may differ according to manufacturer's recommendations. Requires Microsoft Windows 95, 98, 2000 or Windows NT* 4.0, plus PC with Pentium* (200MHz) or better processor, 64MB RAM, 128MB hard drive, SVGA monitor, graphic printer, mouse, and CD-ROM drive.

imadzu* UV-1700 PharmaSpec Spectrophotometer

l for pharmaceutical applications

206-24201-92

Features

ndalone optical bench spectrophotometer with high-performance
led optical system provides comprehensive functions for both
litative and quantitative analysis

-in-one tool offers photometric and multicomponent quantification
demanding applications

ltiwavelength photometric measure mode is standard, including
orbance and transmittance at up to eight wavelengths

ble monochromator mounting ensures integrity of results

gsten-halogen and energy-optimizing deuterium lamps enhance
cision across the UV-Vis spectrum and into the near-infrared (NIR)
ge, from 190 to 1100nm

tional Features

n resolution ideal for samples with benzene ring or sharp peaks

ingle-position cell holder comes standard; accessory items allow
rument to be easily changed from standard cuvet to capillary cell or
holder

ional UVProbe Software for PC-control (220-92900-00) supports
titasking for even greater control of the instrument

velength repeatability provides GLP and ISO-9000 compliance

ERING INFORMATION:

ssory printers, application software, optional multicell sample
artment and other cell holders, and temperature-controlled cell
oners are also available.

PLIANCE:

upports IQ/OQ in compliance with FDA guidelines; Specifications and
ons conform to European and U.S. Pharmacopoeias.

Shimadzu* UV-Mini 1240 Spectrophotometer

Features of a full–scale spectrophotometer in a benchtop unit

206-24000-92

Simple enough for the general lab user to use with only minimal training. Functions range from simple concentration measurements to complex calibration curves.

- Large LCD displays prompts, keypad–function descriptions, and graphics
- Multipoint calibration curve for applications that require various standards
- K-factor, as well as first-, second-, or third-order polynomial fits
- Two- or three-wavelength quantitative analysis for measuring turbid samples or the effects of a distinguishable component
- Peak-pick function detects even the most sensitive wavelengths
- Repeat scan automatically reveals spectral change over the entire range
- Photometric mode can be used to measure absorbance or transmittance at fixed wavelengths
- Quantification mode can be used to determine concentrations of unknown samples in single-component analyses
- Methods, results, and even raw data can be saved on the unit or to a PC with optional software
- Print results with ease, choosing optional color inkjet printer and software
- Optional multicell sample compartment and other cell holders available separately
- Optional attachments, including pop-in program packs, temperature-controlled cell positioners, and sippers available separately

ORDERING INFORMATION:
Dimensions: 15L × 16½W × 10¾"H (38 × 42 × 27cm). For 100–120V, 50/60Hz.

INCLUDE:
Single cell holder

NOTE: One-hour warmup of unit is recommended before use.

UVProbe Software

Offers powerful quantification functions, customize reports, and standards compliance

Shimadzu* has taken spectroscopy to the next level with the powerfu flexible, and easy-to-use UVProbe software. Its standard data acquisition modes, vast data processing capabilities, and robust repor generator provide the ultimate tool for your UV-Vis solutions. For use with the UV-1650PC, UV-2450/2550, and PharmaSpec UV-1700 UV-Vi spectrophotometers.

- Specifically engineered for Windows* 2000/XP
- Includes enhanced security capabilities and instrument history log f GLP compliance
- Unlimited spectral overlay
- Unlimited peak and valley selection
- Supports automated accessories, transforms, Michaelis Menten, Hi and Inhibitor plots, multiple factors, custom equations, tolerances and standard error of prediction

INCLUDES:
RS-232-C cable

REQUIRED ACCESSORIES:
Computer Requirements: Microsoft* Windows 95, 98, NT 4.0, 2000, or XP, plus PC with Pentium* (200MHz) or better processor, 64MB RAM, 128MB hard drive, SVGA monitor, graphic printer, mouse, and CD-ROM drive

Description	Cat. No.	Eac
UVProbe Software	**220-92900-00**	2087.8

CPS-240A Thermoelectrically Temperature Controlle Cell Positioner

Measures up to six sample cells and one reference cell under constar thermoelectric-controlled temperature conditions.

- For use with the Shimadzu* BioSpec-1601, UV Mini-1240, Bio-Mini, UV-1650PC, PharmaSpec UV 1700 and UV-2450/2550 spectrophotometers
- Uses Peltier effect to control temperature from 16 to 60°C
- Display accuracy: ±0.5°C
- Sample stability: ±0.1°C
- Supports temperature-sensitive enzyme kinetic assay when used with spectrophotometers equipped with Time-Course/Kinetics Program Pack or software
- Cells and software not included

Description	Cat. No.	Ea
CPS-240A Thermoelectrically Temperature Controlled Cell Positioner	**204-05837-92**	4838.

Universal Multicell Sample Holder

- Holds up to six 10mm square cells (not included) on the sample side, and one reference cell
- For use with the Shimadzu* UV-1600, UV-2450/2550, and UV-3600 spectrophotometers

NOTE:
Multicell sample holder is not temperature controlled.

Description	Cat. No.	Ea
Multicell Sample Compartment	**206-69160-00**	1184.

ACCESSORIES

Semi-Micro Sipper

Lightweight and free-standing sipper features small footprint

- Typical sample volume is 1.5mL
- Minimum sample volume required is 0.8mL

INCLUDES:

Syringe sipper pump, tubing, semimicro L-type flow cell with 390µL cell capacity, and front plate

ell Capacity	Cat. No.	Each
90µL	**220-92488-01**	2902.10

LOOKING FOR MORE ACCESSORIES?

Optional attachments and accessories, including an alternate sample compartment, temperature-controlled cell positioners, cell holders, and sippers available separately.

Visit www.fishersci.com and search for Shimadzu Spectrphotometers

ermo Scientific* SP-890 UV-Visible Spectrophotometer

ers research quality features such as split beam optics for added stability and accuracy with a r-friendly interface

splay prompts to minimize learning time
tomatic filter selection allows user override
e modes for flexibility
otometric mode reads sample at one to five wavelengths with a ngle setting
sults are graphically displayed on LCD panel or output to printer or with optional software
cords time dependent changes in absorbance or concentration for zyme kinetics studies in Timescan and Kinetic modes
rces first-, second- and third-order curves on data in an expanded antitative mode
tional Windows* 98 compatible software (available separately) pands reporting capabilities consistent with GLP
nts out time/date stamps and documents setting parameters

Thermo Scientific* GENESYS* 10 UV Spectrophotometers

Distinct and uniform emission lines allow wavelength accuracy and resolution to be verified across the wavelength range with ±1.0nm accuracy and ±0.5nm repeatability

- Lamp flashes only when needed during measurements, resulting in extended lamp life and lower operating costs
- Cleanable, chemical-resistant surfaces and rugged design withstand harsh laboratory environments
- Models with six-position cell holder† hold a blank and up to five samples in 10mm square cuvets or 10mm and ½" test tubes
- The standard turret will measure all six positions automatically or can be rotated to specific positions
- Printer is built in on some models (available separately for other models)
- Bidirectional RS-232-C interface
- User-selectable choice of five languages (English, French, German, Spanish, Italian)

14-385-470, 14-385-472, 14-385-474 (left to right)

ORDERING INFORMATION:
Units measure 16L × 13W × 9"H (41 × 33 × 23cm); Electrical requirements: 100–240VAC (selected automatically), 50/60Hz.

10 UV Scanning Spectrophotometers

Description	Mfr. No.	Cat. No.	Each
With single-cell cuvet holder	335906	**14-385-370**	4424.00
With single-cell cuvet holder and built-in printer	335906P	**14-385-371**	4856.00
With six-position cell holder†	335907	**14-385-372**	4856.00
With six-position cell holder and built-in printer†	335907P	**14-385-373**	5289.00

† Models with six-position cell holders can accommodate single-cell holders using accessory single cell holder platform, available separately. Contact Fisher Scientific Customer Service to order.

Specifications

Spectral Bandwidth	5nm
Optical System	Single-beam, grating-based, single detector
Lamp Source	Xenon
Wavelength	
Range	190 to 1100nm
Accuracy	±1.0nm
Repeatability	±0.5nm
Photometric	
Readout	Absorbance, % Transmittance, Concentration
Range	0.3 to 125%T; - 0.1 to + 3A; 0 to 9999C
Accuracy	0.5% or 0.005A, whichever is greater, up to 2A
Noise	±1mA at 0A; ±2mA at 2A, peak-to-peak at 340nm
Drift After Warmup	±1mA/hr.
Stray Light	±0.1%T at 220, 340, 400nm

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

ACCESSORIES

ingle Cell Holder

Accommodates single-cell cuvet or 10mm dia. test tubes

r. No.	Cat. No.	Each
6028	**14-385-406**	65.42

ingle Cell Platform and Holder

fr. No.	Cat. No.	Each
35916	**14-385-476**	68.34

ylindrical Longpath Cell Holder

or Thermo Scientific* GENESYS* 10 pectrophotometers with single-cell cuvet holder

Accommodates a cylindrical cell with a 10 to 100mm pathlength, 22 to 25mm dia. and Z dimension of 11mm

Models with six-position cell holders can accommodate single-cell holders using accessory Single-cell Platform and Holder (14-385-476), available separately

fr. No.	Cat. No.	Each
36012	**14-385-400**	110.14

nterface Cable

Connects Thermo Scientific* GENESYS* 10 spectrophotometer to laboratory computer

fr. No.	Cat. No.	Each
5942	**14-385-147**	48.20

nternal Printer

raphic printer provides hard-copy results and raphic plots/scans

Lists date, time, sample identifier, test type and name

Can be installed by user

Includes one roll of paper

r. No.	Cat. No.	Each
5988	**14-385-486**	559.00

arrow Rectangular Longpath Cell Holder

ccommodates narrow rectangular longpath cells up 100mm in pathlength

For Thermo Scientific*GENESYS* 10 spectrophotometers with single-cell cuvet holder (14-385-460 and 14-385-468)

Models with six-position cell holders can accommodate single-cell holders using accessory Single-cell Platform and Holder (14-385-476), available separately

r. No.	Cat. No.	Each
5112	**14-385-273**	122.77

est Tube Holder

Accommodates one 25 dia. × 102mmH test tube or COD reagent vial

For Thermo Scientific* GENESYS* 10 spectrophotometers with six-position cell holder (holds three) or single-cell holder platform (holds one)

r. No.	Cat. No.	Each
6014	**14-385-401**	129.93

VISIBLE

Thermo Scientific* GENESYS* 10 Visible Spectrophotometers

High-quality optics for high-performance results

14-385-466

- Cleanable, chemical-resistant surfaces and rugged design withstands harsh laboratory environments
- Models with six-position cell holder† hold a blank and up to five samples in 10mm square cuvets or 10mm and ½" test tubes
- The standard turret will measure all six positions automatically or can be rotated to specific positions by pressing the cell-changer button
- Built-in printer (14-385-462, -466) (available separately for other models)
- Bidirectional RS-232-C interface
- User-selectable choice of five languages (English, French, German, Spanish, Italian)

ORDERING INFORMATION:

Units measure 16L × 13W × 9"H (41 × 33 × 23cm). Electrical requirements: 100–240VAC (selected automatically), 50/60Hz.

WARRANTY:

One year

SPECIFICATIONS

Thermo Scientific* GENESYS* 20 Spectrophotometers

Ideal for teaching labs, industrial QC or environmental testing

14-385-445

- Two-line, 20-character LCD displays data in absorbance (-0.1 to +2.5), % transmittance (0 to 125%) or concentration (0 to 1999)
- Provides information concerning instrument status, prompts for setup or change of parameters, and instrument diagnostic information
- LCD can display information in English, French, German, Portuguese or Spanish
- Operates continuously over a wavelength range of 325 to 1100nm without filter or detector changes
- Accommodates standard 10mm square cuvets and 10mm or ½" diameter test tubes
- Wide variety of sample cells—such as cylindrical and rectangular long-path, 1" test tubes or COD tubes—can be accommodated with optional "snap-in" holders
- 10-key, spillproof, double-laminated keypad with audible response to confirm entries
- Document results by installing optional built-in printer (see Accessories) or by connecting a printer via the Centronics-compatible parallel port
- Model with built-in 20-column printer is also available
- Bidirectional RS-232-C interface allows remote operation

ORDERING INFORMATION:

Dimensions: 13L × 12W × 7"H (33 × 30 × 19cm). For 100/240V 50/60Hz.

INCLUDES:

Units include single-position cell holder, five disposable cuvets, RS-232-C interface, Centronics-compatible printer port, dust cover, operating manual, and U.S. power cord.

Description	Mfr. No.	Cat. No.	Each
Without Built-in Printer	4001	**14-385-445**	1790.00
With Built-in Printer	4004	**14-385-459**	2120.00

SPECIFICATIONS

Optical System	Grating based, 1200 lines/mm
Spectral Slitwidth	8nm
Wavelength	
Range	325 to 1100nm
Accuracy	±2.0nm
Readout	20-character, 2-line LCD
Photometric	
Readout	Absorbance, %Transmittance, Concentration
Range	-0.1 to +2.5A 0 to 125%T 0 to 1999
Accuracy†	±0.003A from 0 to 0.3A ±1% from 0.3 to 2.5A
Noise (at 500nm)	≤0.001A at 0A; ±0.004A at 2A
Drift	0.003A/hour
Stray Radiant Energy	≤0.1%T at 340 and 400nm
Communication Ports	RS-232-C (serial) Centronics-compatible (parallel)

† Measured using 930D filters supplied by NIST.*

Prices subject to change.

ermo Scientific* Spectronic* 20+/20D+ Spectrophotometers

ged enough for classroom use and reliable enough for industrial or research applications

e-beam units are suitable for general colorimetric and rophotometric applications.

mit testing of sample volumes as low as 0.75mL with optional cuvet der (14-385-125A) for semi-micro cuvets

ose from 20+ Model with analog meter or the 20D+ Model with ital display

id-state silicon detector eliminates traditional phototubes and covers entire 340 to 950nm wavelength range, extending measurements into near infrared and ultraviolet ranges

nple filter selection lever makes changing filters easy

gsten lamp

venient sample compartment holds variety of adapters, cuvets and t tubes used in a range of applications

NT button on front panel sends data to printer (14-385-168H, available arately)

- Model. Features 5½" (14cm) analog meter with linear percent nsmittance and non-linear absorbance scales.

)+ Model. Includes easy-to-read digital display with direct readout ercent transmittance, units of absorbance or concentration. centration measurements automatically calculated based on known ndard measurement or calculated factor input by user. Simplified -DOS* computer and printer RS-232-C interface.

ERING INFORMATION:
nsions: 13L × 16¼W × 8¼"H (33.0 × 41.3 × 21.0cm).

UDES:
models come with a box of twelve ½" (13mm) test tube cells, 3mm) sample compartment adapter, operator's manual, dust cover S power cord.

WARRANTY:
Three years

CERTIFICATIONS:
UL listed. CSA approved.

Thermo Scientific* SP-800 Series Spectrophotometers

Ideal for analyzing phosphorus, iron, and chlorophyll; testing color and clarity; and measuring turbidity

Large sample compartment holds a round (12 to 13mm dia. × 100mmH) or standard square cuvet (12.5 × 12.5 × 45mm).

- Feature easy operation and basic user-friendly software
- Error message alerts operator to operational problems and indicates probable cause
- Units come with analog output to interface with chart recorders or other external analog data systems, and a serial RS-232-C port
- SP-850 and -870 models also come with a parallel Centronics* printer port to interface with a computer or external printer
- Fan cooling ensures temperature stability

Model SP-830

- Simple interface is ideal for student use in a classroom setting
- Single touch autozero function makes setting of 100% transmittance and 0.000 absorbance easy
- Five switchable built-in, second-order stray-light filters eliminate filter changes
- Results are displayed on an easy-to-read 3.5-digit LED screen

Model SP-850

Has the same features as the SP-830 model plus:

- Mode for reading concentration directly from the unit to eliminate operator error
- Conforms to GLP for reliable use in a quality control laboratory
- Factor mode permits tracing of day-to-day variations in quantitative applications
- Expanded 4.5-digit LED shows high concentration and factor values
- Large keypad has a key for choosing decimal placement

Model SP-870

Has the same features as the SP-850 plus:

- 5nm spectral bandwidth for higher resolution and accuracy
- 20-digit, two-line LCD display shows wavelength readout, automatic stray-light filter selection, and digital wavelength selection

ORDERING INFORMATION:

Dimensions: 11¾L × 15¾W × 5¾"H (30 × 40 × 14.5cm). Electrical Requirements: 120V 50/60Hz.

CELLS AND CUVETS

*Fisherbrand** by Hellma

Quartz, Silica and Glass Cells

1, 5, or 10mm pathlength rectangular cells fit standard spectrophotometer cell holders.

- All cells are 12.5mm wide
- 1mm pathlength cells are 3.5mm long; 5mm pathlength cells are 7.5mm long; 10mm pathlength cells are 12.5mm long
- Reduce reagent use with Semimicro (1mL capacity), Micro (0.5mL capacity) or Ultramicro (0.1 or 0.05mL capacity) cells
- All have thickened side walls to reduce sample volume and funnel-shaped tops to facilitate easy filling

Available with a variety of window materials for wide range of assays

- Choose cells with Suprasil* 300 quartz windows for uninterrupted transmission from the far ultraviolet through the infrared (entire 190 to 3600nm) wavelength range
- Choose cells with Suprasil quartz windows for use from 190 to 2600nm and 2850 to 3600nm
- For routine work in the ultraviolet region, select cells with windows of standard silica for 230 to 2500mm
- For visible work, choose near-UV glass for 320 to 2500nm, and optical glass for 360 to 2000nm
- Standard cells are available with all transmission window materials
- Fluorescence, Semimicro and Micro cells available with Suprasil quartz windows
- Micro and Ultramicro cells also come in black quartz with Suprasil quartz windows
- Micro cells also available with near-UV glass windows
- Fluorescence cells with optically polished sides and bottom are an ideal choice for fluorimetry and fit all fluorimeters

Manufactured to close tolerances and transmission matched

- Cells with windows of quartz, standard silica, or near-UV glass have pathlength tolerance of ±0.01mm
- Optical glass cells have tolerance of ±0.1mm
- Cells in each pack of Suprasil quartz, Suprasil 300 quartz and near-UV glass cells are transmission matched to enhance assay reproducibility
- Standard silica and optical glass cells are not transmission matched
- For all cells, cell bottom and windows are fused to form a seal to prevent acid or solvent leaks

INCLUDES

Fitted PTFE covers or tapered PTFE stoppers, except 14-385-906A and -902A, which come with glass cover plates

Quartz Fluorescence Cells

With optically polished sides and bottom.

isherbrand* by Hellma Black Self-asking Quartz Micro Flow Cells

oose from two styles

ll cells are 12.5mm square

ell chamber is completely surrounded by paque black quartz, eliminating the need to ask the instrument light beam

avelength range for all cells is 190 to 2600nm nd 2850 to 3600nm

mpact Cells

5mm high

wo screw connectors (M 6 × 1)

langed FEP tubing (O.D. 1.9mm, D. 1.1mm × 500mm long)

ndard Cells

ed-on inlet and outlet tubes

14-385-926A

DERING INFORMATION:

ect cells with center height appropriate to tch the cell aperture center with the center ition of the light beam in your spectrophotome- Example: center height is 8.5mm for Beckman* hermo Scientific* instruments; center height is m for Hewlett-Packard*, Perkin-Elmer*, and Shimadzu* instruments.

Fisherbrand* Disposable Cuvets

Choice of polystyrene or methacrylate

Select polystyrene cuvets for assays in visible spectral range (340 to 750nm). For accuracy throughout UV/Vis range (285 to 750nm), choose cuvets made from a superior grade of methacrylate.

- Disposable 10mm pathlength cuvets designed for visible and UV/Vis assays
- Choice of 4.5 and 1.5mL sample capacity
- Clear four-sided cuvets are ideal for fluorimetry and nephelometry, as well as spectrophotometry
- Scale down assay volumes and save on reagents by using semimicro cuvets with capacity to 1.5mL
- Molded-in arrow indicates direction of transmission on standard and semimicro cuvets—helping assure uniformity
- Each case contains cuvets with same mold impression number—assuring precision between samples—standard deviation is <±0.005 extinction units between cuvets

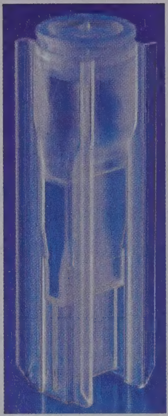
BRAND* UV-Cuvette Disposable Cuvets from BrandTech*

An excellent alternative to quartz cells for molecular biology applications, these UV-transparent plastic cuvets provide transparency from 220 to 900nm

Advanced cuvet design includes recessed windows to protect against scratching in the optical pathway.

- Disposable; cleaning and cross-contamination risk are eliminated
- Ideal for DNA, RNA, and protein analysis
- Chemical resistant; can be used with most polar organic solvents, acids, and bases
- Also compatible with acetone, butanone, DMF, and concentrated hydrochloric acid
- Grouped by manufacturing mold cavity to ensure lowest variation in extinction coefficient
- Fits most spectrophotometers without adapters



13-878-121

Ultramicro size

- Available with 8.5 and 15mm window heights (Z-dimension)
- May be used with sample volumes as small as 70µL
- Can be fitted with plug seal caps (sold separately) for sample storage
- Available individually wrapped, DNA-, RNase-free

Semimicro size

- For sample volumes between 1.5 and 3.0mL
- Available individually wrapped, DNA-, RNase-free

Macro size

- Holds 2.5 to 4.5mL

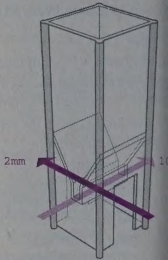
† *Bulk packaged*
‡ *Individually wrapped*

Eppendorf* UVette* Cuvets

An alternative to the expensive, breakable quartz cells traditionally required for use at UV wavelengths

- UV- and VIS-transparent between 220 and 1600nm
- Suitable for measuring small volumes (≥ 50µL)
- DNA-, RNase-, and protein-free
- Volume markings for 500 and 1000µL
- Disposable
- Measure samples with a normal concentration using the 10mm optical pathlength; for samples with a higher concentration, rotate the UVette cuvets by 90° and use the shorter 2mm optical pathlength—no need to dilute sample



E0030 106

ORDERING INFORMATION:

Optimal for use with Eppendorf BioPhotometer* (E6131000012) or with commonly available spectrophotometers (adapter required). Individually wrapped.

INCLUDES:

80 UVette cuvets and universal adapter for GeneQuant* I and II and 8.5 15mm light height photometers and spectrophotometers.

SPECIFICATIONS

Material	UV-transparent plastic, free of fluoropolymers and other halogenated hydrocarbons
Wavelength Range	220–1600nm
Volume	50–2000µL
Optical Pathlengths	10mm and 2mm
L × W × H	12.5 × 12.5 × 36mm
Light Center Height	8.5mm
No. of Windows	4
Basic Absorbance	≤0.5A at 260nm

STATIONERY

Nalgene* Laboratory Notebook

Bound and sewn pages for secure recordkeeping

Designed for process recordkeeping. Ideal for securing patent protection in research laboratories.

01-814-19

- Features polyethylene cover and 184 high-quality, acid-free, paper pages with ¼" (6.4mm) grid lines
- Letter-sized 8½ × 11" (22 × 28cm) pages are permanently bound and sewn
- Pages include place for preparer and witness signatures to aid in securing patent protection
- Burgundy cover
- Overall dimensions: 8⅞L × 11¼W × ⅝"H (22.5 × 28.6 × 1.6cm)

Mfr. No.	Cat. No.	Case of 6
6501 1000	**01-814-19**	168.00

Nalgene* Deluxe Lab Notebooks

With 100 Uncoated PolyPaper Pages

Excellent for documentation of valuable laboratory research

11-900

- Features case-bound hardcover with permanently bound pages that are waterproof and chemical resistant
- Pages are numbered and printed with spaces for dates, signature of worker and witness for patent protection
- Choose black cover with fine green ¼" (6mm) grid or blue cover with horizontal lines
- Accept ballpoint pen and permanent marking pen
- Page size: 9¼ × 11¼" (23 × 29cm)

INCLUDES:

Instructions for keeping records, page for issuing book and table of contents.

Cover Color	Mfr. No.	Cat. No.	Each	Case of 6
Black	6300 1000	**11-900**	76.82	307.25
Blue	6300 2000	**11-900-1**	79.82	319.25

With 96 Regular Paper Pages

Polyethylene covered laboratory notebook with sewn-in paper pages

- Spaces for dates, signature of worker and witness for patent protection
- Choose forest green cover with ¼" (6mm) green grid or burgundy cover with horizontal lines
- Page size: 8½ × 11" (22 × 28cm)

INCLUDES:

Instructions for keeping records, page for issuing book and table of contents

NOTE:

Pages are not waterproof.

Cover Color	Mfr. No.	Cat. No.	Each	Case of 6
Forest Green	6301 1000	**11-903**	31.13	124.50
Burgundy	6301 2000	**11-903-1**	33.31	133.25

With Duplicate Page Capability

Laboratory notebooks with sewn-in paper pages and a brown polyethylene cover

- Contain 50 numbered sets (total of 100 sheets)
- Pages are printed on one side only
- Each page is followed by an identically numbered, perforated page for easy removal
- Page size: 8½ × 11" (22 × 28cm)

NOTE:

Carbon paper is not supplied with notebooks

Mfr. No.	Cat. No.	Each	Case of 6
6302 1000	**11-904**	53.26	213.00

Nalgene* PolyPaper* Spiral Field Notebo

Will withstand the requirements of field work

11-9

Accepts almost all writing devices including ballpoint pen, felt-tip marker, indelible and grease pencils.

- Blue polyethylene cover with treated PolyPaper 9 × 11¼" (23 × 29cm) pages and plastic spiral binding
- Pages numbered 1 through 96 and printed with fine green ¼" (6mm) grid
- Pages are washable and they dry flat
- Endure salt water, mud, chemicals, all kinds of dirt
- Can be written on wet and even under water with ordinary No. 2 penc
- Spiral notebook lies flat for easy use in the field

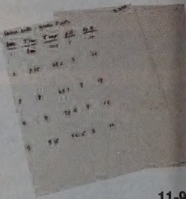
INCLUDES:

Instructions for accepted notebook procedures, table of contents, page f issuing notebook

Mfr. No.	Cat. No.	Each	Case o
6303 1000	**11-902**	84.67	338.

Nalgene* PolyPaper* Plastic Sheets

Endure salt water, mud, and chemicals



11-9

Specially coated, blank sheets accept No. 2 pencil anywhere—even under water. You can also type, print by offset or letter press (see package label), or use a variety of hand markers on these durable, spunbonded polyethylene sheets.

- Resist UV light, tearing, fraying, curling, aging, discoloration, rot and mildew
- Roll or fold without cracking
- Remain flexible at cold temperatures
- May be punched for use in three-ring binders
- Cut into labels for enclosing with wet or dry chemicals and biological samples stored in formalin
- Size: 8½ × 11" (22 × 28cm)

NOTE:

Not intended for use in photocopiers.

Mfr. No.	Cat. No.	Pack of 100 sheets	Case of 5 Pk.

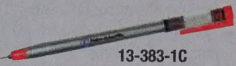
*isherbrand** Scientific Technical Pens

ist-drying ink in three colors



13-383-1C

disposable pen that produces tra-fine lines with accuracy—and thout smearing. Special ng-legged" point is perfect for writing on notebooks, ms, graphs, charts, tables and recording paper. Make precise lines with quares, rulers and flexible curves. Choose from two line sizes: extra e, 0.016" (0.4mm), or super fine, 0.008" (0.2mm).

nk is smooth flowing, fadeproof, and quick drying

Assortment includes red, blue, and special ultrablack for excellent eproduction on office copiers

.arge ink reservoir lets you write for over ½ mile (800m)

Cap design and color indicate point size and color of pen

Built-in super-tight cap seal keeps ink from drying out when pen is iot in use

*Fisherbrand** Permanent Markers

Write on all surfaces

Marking pens write on glass, film, wood, plastic, metal, rubber, and porcelain. Perfect for marking sample bags, microscope or photographic slides, laboratory glassware and more.

13-383

- Produce precise, ultrathin lines 0.3mm wide
- Waterproof and fadeproof, permanent ink dries almost instantly
- An airtight ring seal cap prevents dry-out and ensures instant writing even after lengthy storage
- Unique stainless-steel long leg allows precise writing in a confined space

or general-purpose scissors and transparent tape, see the Scissors and ape sections.

*Fisherbrand** Marking Pens

Quick-drying ink has no unpleasant odor

Designed to write on cold and damp surfaces as easily as they write on dry surfaces. Proven permanent on most surfaces, including plastic, metal, and ceramic.

13-379 Series

- Will not smear when subjected to water or alcohol during normal use
- Highly resistant to abrasion and water
- Fine tip is excellent for general marking
- Extra-fine tip simplifies marking small items such as slides, culture tubes, RIA tubes and scintillation vials

Ink Color	Cat. No.	Pack of 10

Scienceware* Autoradiography Pens

Nontoxic, nonradioactive; ideal for marking X-ray film

HIGH ENERGY

13-380-1A

- Phosphorescent material will not leak or dry out
- No bladders, vials or liquids to spill
- Spectral peak, 5600Å
- Bright green markings do not glow in the dark, but are visible under normal conditions and on X-ray film
- Mark emits no Beta or other isotope emission, so using an intensifier screen will not affect intensity
- Pen is 4½" long (11.4cm)
- Pens available with normal- or high-energy-level emissions
- High-energy-level pen features longer, more intense signal

INCLUDES:
Pocket clip and screw-knob advance to adjust writing tip

LOOKING FOR LABELS?
See Tape and Labels, Fisher Scientific offers a variety of self-adhesive and tamper-evident labels. See our Labels section.

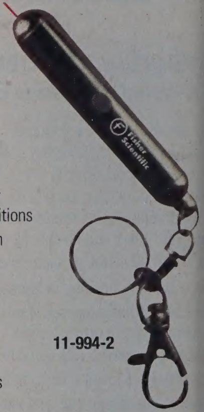
Fisher Scientific* Laser Pointers

For slide presentations, microscope projections, field studies, wall charts and lectures

11-994-1

Pocket Laser Pointer

- Provides brilliant red light at 630 to 680nm wavelength with a beam diameter of 3.5mm
- Features output power of 5mW and range of 300' (91m)
- Measures 5½L × ½" dia. (14 × 1.3cm)



11-994-2

Key Chain Laser Pointer

- Half the size of pocket laser
- Features output power of 4mW and range of 300' (91m)
- Brilliant red beam with 3.5mm diameter can be seen under normal lighting conditions
- 2⅜L × 9/16" dia. (6.0 × 1.4cm) body can be carried securely on keychain
- Switch is momentary ON/OFF

INCLUDES:
Pocket Laser Pointer: Supplied with pocket clip, safety instructions and two "AAAA" batteries that provide two hours of continuous use.

Key Chain Laser Pointer: Supplied with keychain, instructions, and thr silver oxide batteries that provide two hours of continuous use.

Description	Cat. No.	Ea
Pocket Laser Pointer	**11-994-1**	115.

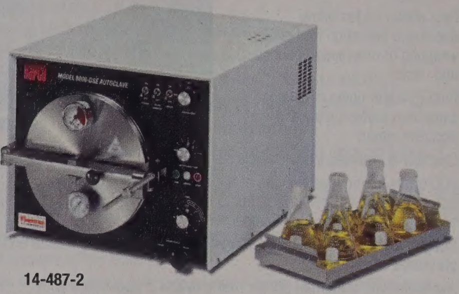
Thermo Scientific* Napco* Model 8000DSE Tabletop Sterilizer

Compact, portable unit for sterilizing liquids, solids and instruments



14-487-2

Features a slow cool-down cycle for use with liquids and a rapid cool-down cycle for solids and instrument sterilization. Equipped with built-in drying element for rapid moisture removal after sterilization.

Features

- Operating range: 121° to 132°C (250° to 270°F), ±0.5°C (±1°F) temperature uniformity
- Pressure range: 15 to 27psi (103 to 186kPa)
- Reservoir capacity: 1 qt. (0.9L)
- 0- to 70-minute timer activates when sterilization temperatures are reached
- Audible alarm at end of timed cycle
- Continuous pressure purge system (CPP) that ensures uniform sterilization
- Overpressure release, overtemperature thermostats and front-mounted controls
- All stainless steel except for brass fittings and copper tubing
- No special plumbing required
- Uses tap water

ORDERING INFORMATION:

Dimensions, overall: 21L × 18W × 14½"H (53 × 46 × 37cm); chamber: 9 dia. × 18"D (23 × 46cm); Net weight: 90 lb. (41kg); Shipping weight, 131 lb. (59kg).

INCLUDES:

Unit and one tray.

NOTE:

Requires a standard 20A small appliance outlet (5-20R receptacle).

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* SterileMax* Tabletop Sterilizers

17% more chamber space than traditional benchtop unit

14-488-24

- Hold up to three 2L flasks simultaneously, or smaller items, using included removable racks and trays
- Four preset cycles allow one-touch operation for liquids, wrapped or unwrapped goods, and packs
- Built-in water pump maintains consistent water supply and accurate steam
- Chamber is insulated for quick cycle start-up and low heat loss between cycles
- LCD offers continuous viewing of the sterilization and diagnostic programs—plus, it displays faults to indicate that sterilization parameters have not been reached in chamber
- Integral access port allows additional verification of temperature and pressures when needed
- Available with a thermal printer that provides a paper tape with validation of sterilizer performance, load-control identification, and quality assurance checks for each cycle
- Optional B/T Sure* Biological Indicators for monitoring sterilizer performance
- Included three chamber locks will not open unless chamber has depressurized, as well as a low-water indicator display
- Preset cycles: liquids, 15 min. at 121°C (250°F); unwrapped goods, 3 min. at 135°C (278°F); wrapped goods, 10 min. at 135°C (278°F); packs, 30 min. at 121°C (250°F). Or, set up custom programs for liquid or hard goods with cycle parameters ranging from 1 to 99 minutes at 100° to 135°C (212° to 278°F)

ORDERING INFORMATION:

Overall L × W × H: 24½ × 23 × 17" (62 × 58 × 43cm). Chamber dia. × D: 12 × 18" (30 × 46cm). Chamber capacity, 1.2 cu. ft. (0.33m^3). Operational weight, 85 lb. (38.5kg). Shipping weight, 134 lb. (60.7kg). With line cord and plug.

INCLUDES:

Come with one rack, and one large and one small tray.

COMPLIANCE:

ASME approved and stamped

CERTIFICATIONS:

UL and cUL listed. 220V models carry CE mark.

Thermo Scientific* Indicators, Incubator and Pouches

Easy and inexpensive methods to monitor steam sterilizer effectiveness

B/T Sure* and Sterilamp II Biological Indicators

- Verify sterility of instruments, media, and other steam-sterilized items just two days, using a simple three-step process
- Easy sterilization identification: Purple color ensures sterilization; yellow, cloudy results indicate an ineffective sterilization
- Indicators can save up to 60% of the cost of outsourcing complete sterility tests
- B/T Sure indicators are for instruments, glassware, and other apparatu have spore population of 10^5
- Sterlilamp II indicators are for media and additives; have spore pollati of 10^6

The B/T Sure Biological Incubator

- Incubate up to 10 indicators at once under ideal conditions—operatin temperature of 57°C with uniformity of ±0.25°C and stability of ±0.15
- Total indication accuracy is ±1.4°C
- Incubator L × W × H: 3⅜ × 4⅜ × 2⁵⁄₁₆" (8.6 × 11.1 × 5.9cm)
- Electrical requirements: 120V 60Hz, 0.2A, 19w
- With line cord and plug

Chemitest Temperature Indicators

- Verify that sterilizer reached adequate sterilization temperature during a c
- Can also be used to verify that an item has been run through a sterilization cycle
- Available in pouches, tabs, strips and tape

inkmann*/Tuttnauer* Tabletop Autoclaves

npact sterilizers featuring electronic or analog con-ls that provide a fast, safe and convenient way to rilize both solids and liquids

Analog Control models and Electronic rol models come in a choice of sizes.

02-964-7

erating Features

- on bench or table
- ME-stamped, Type 316L stainless-steel amber designed for safety and durability
- tomatically controlled sterilizing and dry- cycles
- ntinuous pressure purge eliminates air pockets and ensures rough, even sterilization
- t exhaust control allows quick release of chamber pressure to reduce drying e of solids, slower release for media and liquids to eliminate boilover
- ying cycle prevents rusting of delicate instruments and thoroughly dries sorbent materials
- inless-steel chamber and stainless-steel removable trays
- ge-capacity reservoir provides for less frequent fill-ups
- external plumbing required; uses self-contained water supply
- ne filters guard against debris
- ter drain allows quick and easy reservoir cleaning

ty Features

- at-insulated, double-locking door protects against accidental burns
- ors cannot be opened while chamber is under pressure
- ertemperature cutoff, overpressure valve, and low-level water alarm

og M Series models provide:

- nomical analog controls and gauges for simple operation
- minute cycle timer
- nperature selection from 100° to 134°C (212° to 273°F)
- Combination pressure and temperature gauge with peak indicator

Electronic Control E Series models add

- Microprocessor controls and digital display
- Completely automatic control through water-fill, heating, sterilization, exhaust, and drying: set cycle parameters in any of four one-button programs that provide easy, reproducible cycles for sterilizing solids, liquids, and absorbent materials
- Temperature selection from 105° to 137°C (221° to 279°F)
- Temperature, pressure and running time are constantly displayed on the digital readout
- Battery backup retains all parameter settings
- Sensor prevents start-up until door is closed
- Electronic pressure and temperature sensors, low water signal
- Standby heating keeps chamber warm for quicker cycles

Electronic Control EP Series models offer

- All features of Electronic E models plus a printer for documentation of each sterilization cycle for GLP procedures
- Printed summary at end of each cycle documents temperature, pressure, drying time, sterilization time, cycle number, time and date, and errors or interruptions

Environmental Lab Model 2540EPK offers

- All features of Electronic EP models
- Plus an accelerated cycle time for sterilization cycle validation; helps meet EPA guidelines for sterilization cycle times and autoclave operation

APPLICATIONS:

Sterilization of liquids, media, instruments, glassware, clothing, and waste

WARRANTY:

Two-year warranty on parts

COMPLIANCE:

Model 2540EPK (02-964-25) meets U.S. EPA guidelines for both solids and liquids

CERTIFICATIONS:

UL listed. CSA approved. ASME (chamber).

50/60Hz model also available. Contact your Fisher Scientific Customer Service Representative. Features an accelerated cycle time to meet U.S. EPA guidelines for autoclave operation.
etes entire cycle within 45 minutes when a 12- to 15-minute sterilization period is used.

Brinkmann*/Tuttnauer* Vertical Toploading Autoclaves

NEW

Provide automatic, microprocessor-controlled sterilization—safely and economically

13-880-100

Intelligent Control Technology sterilizes higher load capacities in shorter batch times, saving time and energy. Dual temperature and pressure control systematically increases chamber pressure and temperature throughout heating phase, helping to achieve chamber and sample temperature in half the time of other autoclaves. Cooling system available on select models.

Operating Features

- Digital LCD for pressure, temperature, time and process alerts
- Six preset programs
- PT-100 temperature sensor ensures that vessels achieve desired sterilization temperature before sterilization cycle begins
- Demineralized water level for steam generation is automatically regulated
- Exhaust steam is cooled before venting
- Heat-resistant plastic cover on lid prevents contact with hot parts and protects against burns
- Validation ports allow connection to external temperature sensors (not included) used in validation/qualification methods
- RS-232 interface

Rapid Cooling System (Optional)

- Cools chamber after sterilization cycle
- Lowers cool-down time by up to 90%
- Offered on models ending in letter "C"

APPLICATIONS:

Sterilization of liquids, media, instruments, glassware, clothing, and waste

Model	Version	Electrical Reqts.	Mfr. No.	Cat. No.	Each
2540 ELV	----	220V 50/60Hz	23210900	**13-880-100**	7295.00

3870 ELV	----	220V 50/60Hz	23210940	**13-880-104**	16,995.00
3870 ELVC	With Rapid Cooling System	220V 50/60Hz	23210950	**13-880-105**	18,295.00

Sterilmatic* Steam Pressure Sterilizers

Sterilize laboratory glassware as well as liquids

Two models, each with roomy 16 dia. × 26"D chamber.

14-460

Features

- Capacity, 3 cu. ft.
- Operating pressure: 15psi (1 atm/100kPa)
- Front-mounted controls with 60-minute timer
- Exhaust speed dial with fast (1 minute for instruments and glassware) and slow (10 minutes for liquids) settings
- Fast preheating—reach sterilizing temperature in 8 to 10 minutes from cold start, 3 to 7 minutes in continued use
- Doors lock automatically and cannot be opened until pressure is exhausted
- Incorporate low-water cutoffs, safety valves
- Release pressure and shut off power supply at end of cycle
- Polished stainless-steel exterior with adjustable feet
- Clad aluminum interior chamber
- Fixed-temperature model heats to 121°C (250°F). Variable-temperature model heats from 110°C to 121°C (230° to 250°F).

ORDERING INFORMATION:

Dimensions, Overall: 31L × 18¾W × 29"H (79 × 48 × 74cm); Chamber: 16 dia. × 26"D (41 × 66cm); Net weight, 150 lb. (68kg); For 208/240V 60Hz, 1 or 3 phase. Amperage: 26 for 208V, 3 phase; 30 for 240V, 4-wire; 45 for 208V, single phase; 51 for 240V, 3-wire. Accesories available seperately (see below).

CERTIFICATIONS:

UL listed, CSA, ASME

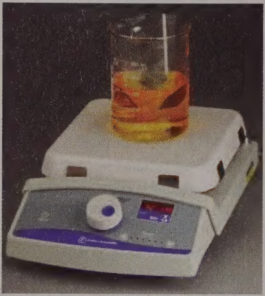
STIRRERS

MAGNETIC

Fisher Scientific* Isotemp* Digital Magnetic Stirrers

Compact, precise, and perfect for timed applications

Operating Features



11-300-49S

- Digital speed control from 60 to 1200rpm
- Stirring speed is easily adjustable in 1rpm increments—even when wearing lab gloves
- Microprocessor-controlled stirring maintains consistent action with changing viscosities
- Large digital display shows set and actual speed
- RESET key restores last settings
- Programmable timer shuts off stirrer after user-defined interval
- "Favorites" feature allows users to store three commonly used settings
- Base includes support rod mount with thumbscrew for rods up to 13mm dia.
- Load capacity: 25 lb. (11kg)

Safety Features

- INSTANT ON begins stirring a slow 50rpm to prevent splashing
- White ceramic top plate (52 sq. in.) resists alkalis and acids, cleans easily
- Cast-aluminum housing diverts spills away from internal components

ORDERING INFORMATION:

Dimensions, Top Plate: 7¼ × 7¼" (18.4 × 18.4cm); Overall: 12¾L × 8½W × 3⅞"H (27.9 × 18.7 × 8.4cm).

INCLUDES:

Detachable 3-wire cord with plug, and PTFE-coated stir bar

WARRANTY:

One year

COMPLIANCE:

IEC 1010

CERTIFICATIONS:

CUS, CSA approved. CE marked (230V model).

Electrical Requirements	Cat. No.	Each
120V 50/60Hz	**11-300-49S**	635.00
230V 50/60Hz	**11-302-49S**	708.00

LOOKING FOR STIR BARS?

We have them in all shapes, sizes, and colors. See Magnetic Stir Bars on p.1743.

Fisherbrand

Fisher Scientific* Isotemp* Basic Magnetic Stirrers

Compact, low-profile stirrers with analog control

Choose reflective ceramic or chip-resistant aluminum top plate models.

11-100-49S

Operating Features

- Variable speed control from 60 to 1200rpm
- Speed is set easily, even when wearing heavy gloves
- Microprocessor controller maintains consistent stirring under changing viscosities
- Large LED speed display
- RESET key restores last settings
- Base includes support rod mount with thumbscrew for rods up to 13mm dia.
- Load capacity: 25 lb. (11kg)

Safety Features

- INSTANT ON begins stirring a slow 50rpm to prevent splashing
- White ceramic top plate models resist alkalis and acids, cleans easily
- Aluminum-top models are scratch- and chip-proof
- Contoured housing diverts spills away from internal components

INCLUDES:

Detachable 3-wire line cord and plug, PTFE stir bar

WARRANTY:

One year

COMPLIANCE:

IEC 1010

CERTIFICATIONS:

120V CUL, CSA approved; 230V CE marked

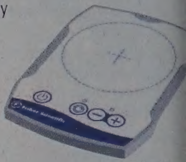
Fisher Scientific* Lab Disc Magnetic Stirre

Ultra-flat and compact personal stirrer speeds to 1500rpm

Can reverse direction of rotation automatically every 30 seconds to ensure better mixing.



14-505-1

- Wear-free drive with no moving parts
- Chemically-resistant polyester set-up plate and casing
- Slip-proof stand
- Accepts magnetic stir bars up to ⅛" (30mm) long

APPLICATIONS:

General-purpose mixing up to 800mL.

ORDERING INFORMATION:

Operates on 12V via plug-in transformer

REQUIRED ACCESSORIES:

Stir bars and stirring vessel (sold separately)

COMPLIANCE:

IP 65 protection; Explosion Hazard Zone 2

SPECIFICATIONS AND ORDERING INFORMATION

No. of Stirring Positions	One
Capacity	800mL
Speed Range	15 to 1500rpm
Stirring Surface Area	3½" dia. (9cm)
Overall L × W × H	6¼ × 4⅜ × ½" (16 × 11 × 1.2cm)
Electrical Reqts.	115V 60Hz
Cat. No.	**14-505-122**
Each	172.85

LOOKING FOR LABORATORY GLASSWARE?

You can find a wide selection of glass vessels for heating and stirring in the Beakers and Flasks sections.

Fisher Scientific* Twistir* Mini Stirrers

Economical personal stirrers with a unique triangular design

Choice of six whimsical top plate designs.

Thermo Scientific* Cimarec* Digital Stirrers

General-purpose stirrers in three sizes offer flexibility from microscale to large-sample procedures

11-675-910Q

Operating Features

- Microprocessor feedback control provides constant speed regardless of changes in viscosity and prevents runaway and magnetic decoupling
- Direct-drive motor and magnet system permit quiet stirring
- Variable speed range from 60 to 1200rpm
- Strong magnetic coupling ensures that the stir bar stays locked with the magnet drive, even in viscous solutions

Design and Safety Features

- Seamless ceramic tops are strong, easy to clean, and resistant to both alkali and acids
- Reflective white top plate color enhances visibility
- Rugged, stable cast-aluminum body
- Tight seal and safety trough ensure that accidental spills do not penetrate casing
- Power-on light
- With integrated ring-stand holder to accommodate ½" dia. (1.3cm) support rod

ORDERING INFORMATION:
For 120V 60Hz

INCLUDES:
Stirrer unit, ⅜ dia. × 2"L (1 × 5.1cm) TFE-coated stir bar, and three-wire detachable cord and plug

Thermo Scientific* Super-Nuova* Digital Stirrers

Provide superior flexibility, precision and safety

Ceramic-top general-purpose stirrers with four-function memory are excellent for labs with multiple users. Choice of single- or four-position models.

Operating Features

- Microprocessor control ensures accurate and stable setpoints for stirring speed
- Single control knob controls speed; lock feature prevents accidental changes
- Digital rpm display
- Stirring range from 50 to 1200rpm; adjustable in 1rpm increments
- StirTrac* technology offers improved low-speed stirring, consistent speed control and superior magnetic coupling
- Powerful motor and magnetic system prevents magnetic decoupling
- Four user-defined speed settings
- Top plate cleans easily, resists chemicals and provides fast boiling time
- Unit can be used in 0 to 27°C, 80% relative humidity, non-condensing environment
- RS-232 port allows output of time count, stirring setpoint and actual speed

Safety Features

- Rugged low-profile cast-aluminum body provides stability and durability
- Unit design protects internal components from accidental spills
- Walk-away timer shuts off stirring after 1, 2, 4, 8, or 12 hrs.

11-675-924Q

Models

- Single-position ceramic-top model (11-675-924Q) for basic stirring applications
- Four-position models (11-475-32Q and 09-050-288Q) function as four stirrers in one—each position is independently controlled

ORDERING INFORMATION:
For 120V 60Hz.

INCLUDES:
6" PTFE-coated Type K probe

CERTIFICATIONS:
CSA approved.

Thermo Scientific* Stir Light and Aluminum Top Magnetic Stirrers

Ideal for general lab applications including mixing standard reagents; stirring bacteriological cultures; and any other procedure involving stirring up to 4L of aqueous solutions

11-496-620

- 49 sq. in. (316cm²) stirring surface
- Stirring speeds from 100 to 1200rpm
- Load capacity: 15 lb. (6.8kg)
- Alnico drive magnet for positive magnetic coupling—even with very viscous solutions

Models

- Standard Aluminum Top Stirrer
- Stir Light Stirrer: with a 5¼" square (13.3cm) light-diffusing Plexiglas* window—suitable for faint endpoint titration determinations; cool fluorescent light source minimizes heat buildup; independent light and stirring controls

INCLUDES:
PTFE coated ⅜ diameter × 2" long (9.5 × 50mm) stir bar; three-wire cord and plug

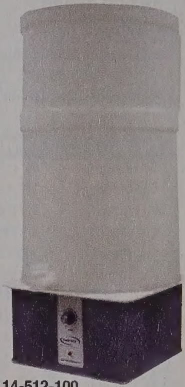
Scienceware* Cool Stir* Large-Volume Magnetic Stirrer

Simplifies large-volume stirring

Safely and effectively mixes using inert PTFE magnetic stir bars.

- Stirring capacity: 10 to 208L
- Load capacity: 485 lb. (220kg); allows stirring in standard plastic drum
- Variable speed control to 600rpm (for gentle stirring); full depth vortex for aggressive agitation
- Direct-drive, air-cooled 100w (1/8hp) motor
- Optimal results with stir bars from 76 to 160mm in length
- Internal aluminum frame and polypropylene platform
- Insulated housing prevents heat transfer to sample solution
- Sturdy polypropylene side panels protect components and are easy to clean



14-512-100

isherbrand* Magnetic Stirring Bars

x convenient, multiple-bar assortments

stir bars are fully encapsulated PTFE.

14-512-132, -131, -134

tagon Shaped

- 2 assorted standard bars with pivot ring
- ncludes two each of the following izes: ½ × 5⁄16, ⅝ × 5⁄16, × ⅜, 1½ × ⅜, 2 × ⅜, and ½ × ⅜"

und Shaped

- 2 assorted bars
- emovable pivot ring on bars onger than 1"
- ncludes two each of the following sizes: ½ × ⅜, ½ × 5⁄16, ¾ × 5⁄16, × 5⁄16, 1 × ⅜, 1½ × 5⁄16, 1¾ × 5⁄16, 2 × ⅜, and 2 × 5⁄16".
- ne each of the following: 1¼ × 5⁄16, 1¼ × ⅜, 1½ × ⅜, and 1¾ × ⅜"

tric Polygon Shaped

- 8 assorted bars
- ncludes two each of the following sizes: 10 × 6mm, 15 × 6mm, 0 × 7mm, 25 × 8mm, 30 × 8mm, 40 × 8mm, 50 × 8mm, 60 × 8mm, nd 80 × 10mm

lor-Coded Octagon Shaped

- 4 assorted bars with pivot ring
- ncludes one each in yellow, red, and blue, in the following sizes: 2 × ⅛, ⅝ × 5⁄16, ⅞ × 5⁄16, ½ × 5⁄16, 1 × 5⁄16, 1½ × 5⁄16, 2 × 5⁄16, and × ½"

lor-Coded Micro Bars

- 2 assorted bars
- ne each in yellow, red, and blue, in the following sizes: × 1.5mm × 2mm, and 10 × 3mm

g-Shaped Bars

- 3 assorted bars
- ne each of the following: 3 × ¾". Two each of the following sizes: 4 × ⅜, 1 × ½, 1¼ × ⅝, 1½ × ⅝, 1⅝ × ¾, and 2 × ¾"

scription	No. of Bars	Cat. No.	Each	Case of

Fisherbrand* MAGNETIC STIR BARS SIX-PACKS

Our most popular sizes in convenient packages. For more information, see p. 1743.

Fisherbrand* 8-Agon Stir Bars

Octagon-shaped, PTFE stir bars with molded-on pivot ring

14-512-146 Series

- Interrupted surface provides greater surface area and added turbulence
- Molded pivot ring aids in reducing friction and chattering

Diameter	Length	Blue Cat. No.	Yellow Cat. No.	Red Cat. No.	Each	Case of 50

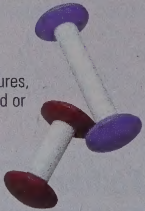
*Fisher*brand* Color-Coded Dumbbell-Style Stir Bars

Provide fast mixing action, strong turbulence, greater stability, and less drifting at higher speeds

- Ideal for all "problem" liquids, highly viscous mixtures, metal particles in fluids, and containers with round or convex bottoms
- Offer reduced surface contact and have excellent centering characteristics
- All sizes have solid PTFE end disks measuring 20mm in diameter
- Bar diameter: 8mm



14-512-158, 14-512-161

Length	Cat. No.	Each	Case of 50
Red			
1¼" (32mm)	**14-512-158**	16.12	671.57
2" (52mm)	**14-512-160**	17.50	729.10
Blue			
1¼" (32mm)	**14-512-159**	16.12	671.57
2" (52mm)	**14-512-161**	17.50	729.10

*Fisher*brand* High-Energy Octagon Stir Bar

Composition and octagonal shape produce exceptional power

14-512-157

- Samarium-Cobalt magnet is encapsulated in PTFE
- Eight edges generate strong turbulence so liquids are thoroughly mixed
- Stability is not impaired in vessels with curved bottoms
- The risk of demagnetization caused by external magnetic fields is completely eliminated
- Transmits torque loads two to three times larger than those of conventional stirring bars of this length

Diameter	Length	Cat. No.	Each	Case of 10
⅞" (21mm)	2" (50mm)	**14-512-157**	79.92	694.93

LOOKING FOR CUVETS?

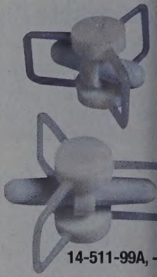
Disposable, clear, four-sided cuvets are ideal for fluorimetry, nephelometry and spectrophotometry. You will find them in the Spectrophotometers section.

Nalgene* Floating Magnetic Stir Bars

Designed for constant low-speed stirring action

- Stir bar slightly raised off bottom of container to minimize grinding effect on cells
- Great for tissue culture applications
- Legs compress to fit 1½" (38mm) opening
- TFE construction with encapsulated Alnico-V magnet and Tefzel* fluoropolymer resin bracket

ORDERING INFORMATION:
Disassemble for cleaning. Autoclavable



14-511-99A,

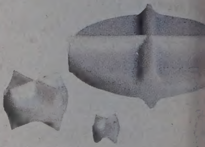
Nalgene* StarHead* Magnetic Stir Bars

Greater mixing action at bottom, side, and top of container, even at low stirring speeds

- For test tubes, round-bottom or flat-bottom labware
- PTFE construction with star-shaped fins and encapsulated Alnico-V magnets
- Chemical and high-temperature (to 260°C [500°F]) resistant
- Autoclavable



14-511-98 Series

BEFORE YOU BUY OVERHEAD STIRRERS

Overhead stirrers can be used for a vide range of applications. These nclude mixing, dissolving, mixing olids into liquids, mixing of highly iscous fluids, and quality inspection y torque monitoring.

IMPORTANT TERMS TO KNOW

Torque—A measure of how much force acting on an object causes that object to rotate

Maximum RPM—The maximum number of full rotations in one minute

Viscosity of Solution (Maximum)—A measure of the resistance of a fluid to deform under shear stress, commonly known as thickness or resistance to flow

Stirring elements—There are multiple types of stirring elements that can be used with overhead stirrers:

- Propeller stirrers—3- and 4-bladed stirrers are used to draw the material to be mixed from the top to the bottom. Used at medium to high speeds.
- Turbine stirrer—Used for drawing the material to be mixed from above. Used at medium to high speeds.
- Dissolver stirrer—Has a radial flow and is used for drawing the material to be used from the top and the bottom. This stirrer has high turbulence and high shearing forces and works at medium to high speeds.
- Centrifugal stirrer—Two-bladed. Blades open with increasing speed; for stirring in round vessels with narrow necks. The effect is similar to that of the 4-bladed propeller stirrer and medium to high speeds are required.
- Paddle stirrer – Has tangential flow, minimum turbulence, good heat exchange, and is gentle with your product. Used at low to medium speeds.
- Anchor stirrer - Has tangential flow, high shearing edges, and leaves minimum deposits on the vessel wall. Used at low speeds to allow even distribution of high mineral contents in liquids. Ideal for medium to highly viscous fluids.
- Kneading stirrer - Has a tangential flow with oscillating compacting between kneading the surfaces. Used at low speeds, the kneading stirrer allows little deposits on the vessel.

Some stirring elements are PTFE-coated to resist certain chemicals.

Stirring motors—There is a difference between electronic-controlled motors and mechanically controlled motors. The electronic-controlled motors have a constant torque through the entire speed range; the mechanically controlled motors have a high torque in the low speed range but the torque decreases with higher speed.

THINGS TO ASK YOURSELF BEFORE BUYING:

- What volume range will I be working with?
- What speed do I need?
- What is the viscosity of my solution?
- What stirring elements do I need?
- What sample size am I working with?

IKA RW 20

OVERHEAD

Fisher Scientific* SteadyStir Stirrers

NEW

For laboratory stirring up to the medium viscosity range (10,000mPas)

Through-shaft design offers limitless adjustment potential and control over propeller depth. Microprocessor feedback loop maintains constant speed under changing viscosity conditions. Available with digital or analog control.

Operating Features

- Stirring volume: 20L
- Speed range: 50 to 2000rpm
- Maximum viscosity: 10,000mPas
- Push-through agitator shafts
- Infinitely adjustable without gear shifting
- Slim, space-saving design
- Quiet running

Safety Features

- Safety circuit
- Overload protection with automatic motor shutoff
- Smooth-start feature prevents splashing

Digital Model

- Crystal-clear digital display for set and actual speed
- Can be switched to torque display mode to monitor viscosity changes

Analog Model

- Offers dependable performance and value for schools, universities and inspection labs

ORDERING INFORMATION:
SteadyStirs can be used with Labworldsoft* software (not included) to give user control over speed and torque via PC. For stirring shafts, see p. 1749.

REQUIRED ACCESSORIES:
Stirring shaft, mounting stand and hardware (sold separately)

WARRANTY:
Two years

CERTIFICATIONS:
UL, cUL listed. CE marked.

IKA* RW 20 Digital Stirrers

For stirring liquid volumes up to 20L and 10,000mPas

Sturdy, slimline, ergonomic design. Sold as kit with stirrer and stand.

- Stepless knob speed control and LED digital readout
- With constant power drive for continuous operation
- Two speed ranges for universal use (see table)
- Power Input/Output: 72w/35w
- Chuck dia. range: 0.5-10mm
- Hollow shaft inner dia.: 10.5mm
- Push-through agitator shafts

ACCESSORIES

Stirring Shafts for Fisher Scientific* SteadyStir and IKA* Overhead Stirrers

- **Four-Bladed Propeller Stirrers.** Standard stirring element. For drawing material to be mixed from top to bottom of vessel. Local shearing forces. Generates axial flow. Used at medium to high speeds.
- **Three-Bladed Propeller Stirrers.** Flow efficient design. For drawing material to be mixed from top to bottom of vessel. Minimum shearing. Medium to high speeds.
- **Turbine Stirrers.** For drawing material to be mixed from above. Axial flow. Medium to high speeds.
- **Dissolver Stirrer.** Radial flow for drawing material to be stirred from top and bottom of vessel. High turbulance, high shearing forces. For particle reduction. Minimum and high speeds.
- **Centrifugal Stirrers** Two-bladed. Blades open with increasing speed. For stirring in round vessels with narrow necks. Medium to high speeds.
- **Paddle Stirrers.** Tangential flow, minimal turbulance, good heat exchange, gentle treatment of product. Low to medium speeds.
- **Anchor Stirrers.** Ideal stirrers for medium-to-high-viscosity fluids. Tangential flow, high shearing rate at edges, minimal deposits. Low speeds.
- **Kneading Stirrers.** Tangential flow with oscillation and compaction between kneading surfaces. Minimum deposits. Low speeds.
- Key to IKA models in ordering table below: RW16 Basic Stirrer (RW16), Eurostar Power Basic (Basic), Eurostar Power Control-Visc (Control-Visc), Eurostar Power Control-Visc P4 (P4), Eurostar Power Control-Visc P7 (P7)

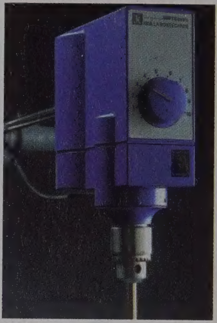
TFE-coated.

IKA* RW 16 Basic Stirrer

Ideal for educational applications and other light-duty stirring tasks of up to 2⅝ gal. (10L)



14-260-31

- Variable speed control from 40 to 1200rpm
- Analog control knob has graduated markings for accurate speed setting
- Precision chuck accepts stainless-steel shafts with diameters from 1⁄64 to ⅜" (0.5 to 10mm)
- Slim design
- Built-in safety circuit

ORDERING INFORMATION:

Available separately or in kit form with support rod hardware. Overall dimensions: 7½D × 3⅛W × 6⅞"H (19 × 7.9 × 17.5cm)

INCLUDES:

Stirrer unit, or kit version with stirrer, Plate Stand Boss Head (14-259-83), and Strap Clamp (14-259-166)

REQUIRED ACCESSORIES:

Stirring shafts (sold separately, see p. 1749)

Electrical Requirements	Mfr. No.	Cat. No.	Each
RW 16 Basic Stirrers			
115V 50/60Hz	2572101	**14-260-31**	794.40

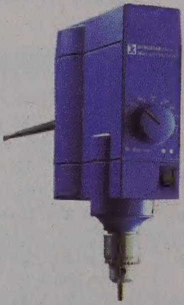
IKA* Eurostar Power Basic Stirrer

For medium- to high-viscosity stirring up to 50,000mPas



14-260-65

- Stirring capacity: 10⅝ gal. (40L)
- Variable speed control from 50 to 2000rpm
- Maximum torque at chuck: 60Ncm
- Graduated markings on control knob for quick settings
- Adjustable stirring height

ORDERING INFORMATION:

Available separately or in kit form with support hardware. Overall dimensions: 7½D × 3⅛W × 6⅞"H (19 × 7.9 × 17.5cm).

INCLUDES:

Stainless-steel chuck and key, cord with three-wire plug, instruction manual and tool kit; kits add Plate Stand, Boss Head (14-259-83), and Strap Clamp (14-259-166)

REQUIRED ACCESSORIES:

Stirring shaft and mounting hardware (sold separately, see p. 1749)

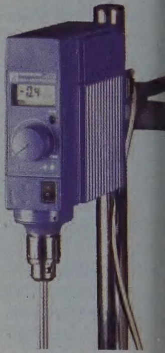
IKA* Eurostar Power Control-Visc Stirrer

Medium- to high-viscosity stirrer with enhanced features



14-260-64

- Digital torque display
- Variable speed control from 50 to 2000rpm/ viscosity to 50,000mPas
- Stirring capacity: 10⅝ gal. (40L)
- Maximum torque at chuck: 60Ncm
- With PC-based control/recording software
- Quiet 130w motor with push-through agitator shafts and electronic safety circuit
- Smooth-start design prevents splashing
- Analog interface for recording speed and torque, plus RS-232-C interface
- Labworldsoft* software to control and document speed and torque parameters via PC

ORDERING INFORMATION:

Available separately or in kit form with support hardware. Overall dimensions: 7½D × 3⅛W × 6⅞"H. (19 × 7.9 × 17.5cm). For 115V, 50/60Hz

INCLUDES:

Stainless-steel chuck and key, cord and plug; instruction manual, tool kit. **Kits** add Plate Stand, Boss Head (14-259-83), and Strap Clamp (14-259-166).

REQUIRED ACCESSORIES:

Stirring shafts and support hardware (order separately, see p. 1749)

8" (200mm)	3⁄16" (5mm)	**11-380C**	41.64
10" (250mm)	¼" (6mm)	**11-380D**	50.32

*Fisherbrand** Cuvet Stirrer

- Disposable polystyrene
- Measures 4¾ long × ⅛" diameter (12 × 0.3cm)

14-386-22

ORDERING INFORMATION:
Packed 50 stirrers in polyethylene bag; 20 bags per case.

Cat. No.	Case of 1000
14-386-22	37.26

Nalgene* Polypropylene Stirring Rod with Paddle

Flat paddle at one end, triangular at the other

- Can be used as a stirring rod and rubber policeman
- Autoclavable

ORDERING INFORMATION:
Length: 9¾" (25cm).

14-518

Mfr. No.	Cat. No.	Pack of 12	Case of 6 Pk.
6169 0010	**14-518**	43.53	174.15

Nalgene* Polyethylene Stirrer Shaft with Blades

High-density polyethylene stirrer with steel insert

Rod may be cut to any length.

ORDERING INFORMATION:
Blade diameter: 1¾" (44mm). Rod: ¼ O.D. × 18" long (6.4 × 457mm).

14-518-75

Mfr. No.	Cat. No.	Each	Case of 12
6160 0010	**14-518-75**	26.97	215.81

Nalgene* Tefzel* Fluoropolymer Resin Stirring Rod

Superior chemical resistance

- Withstands temperatures from -100° to +150°C (-148° to +302°F)
- Flat paddle, ⅝L × ⅝"W (1.6 × 1.6cm) at one end, triangular paddle at the other
- Autoclavable

ORDERING INFORMATION:
Overall length: 9¾" (25cm).

14-518-1

Mfr. No.	Cat. No.	Each	Case of 12
6168 0010	**14-518-1**	26.97	215.81

Chemware* Bendable PTFE Stirring Rods

Contain fully enclosed steel insert for stiffness, yet can be bent to various shapes for use as powered stirrers

- Heat resistant to 288°C (550°F)
- Completely inert to highly corrosive reagents
- Antistick properties facilitate cleaning
- Unbreakable

14-518-10C

Length	Mfr. No.	Cat. No.	Each
8" (20cm)	D1069087	**14-518-10C**	25.17

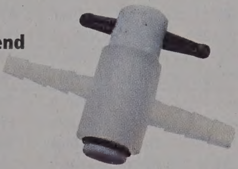
lgene* Polypropylene Stopcocks with FE Plug

rated tubulation on each end

e ¼ to 5⁄16" (6.4 to 8mm) tubing
nseizing



14-630-1 Series

Bore	Mfr. No.	Cat. No.	Each	Case of 6
	6460-0002	**14-630-1A**	49.30	197.20
	6460-0004	**14-630-1C**	48.12	192.50

lgene assigns the term "leakproof": a) To bottle/closure systems with sures smaller than 100mm, after they are filled with water, inverted, nstand air pressure of 2psig for 2 minutes, and no water escapes;. b) bottle/closure systems of 100 or 120mm after they are filled with water, erted for 15 minutes, and no water escapes. **Note:** these tests, using er liquids, may not yield the same results. To ensure safe usage, Nalgene ises customers to test Nalgene bottles and closures under conditions of r planned applications. Nalgene bottles and carboys are leakproof at bient temperature and pressure when used with their Nalgene closures.

Nalgene* Polypropylene Three-Way Stopcocks with PTFE Plug

Connect any two or all three arms

- Take ¼ to 5⁄16" (6.4 to 8mm) tubing
- Nonseizing
- Leakproof plug (see definition at left)

*Fisherbrand** Solid Silicone Stoppers

Create a tight, reliable seal in virtually all sealing applications

- Pure, high-grade, translucent silicone withstands repeated sterilization, as well as temperatures from -60° to +220°C (-76° to +428°F); peaks at 250°C (482°F)
- Resist particle buildup
- Chemically inert and food-grade quality

09-704 Series

APPLICATIONS:
Especially suited for procedures demanding high purity—ideal for biological applications (after normal cleaning and autoclaving)

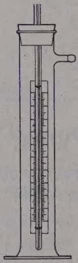
Determines surface tension from height of liquid in capillary tube

- 250mm borosilicate glass capillary tube
- Engraved graduations from 0 to 10cm, in 1mm divisions
- Cork holds capillary tube inside outer tube
- Outer tube accommodates rubber tubing

Cat. No.	Each
14-818	178.68



14-818

Replacement Capillary Tubes

For Fisher Scientific* Surface Tension Apparatus (14-818). With scale.

Cat. No.	Each
14-818A	132.24

Fisher Scientific* Surface Tensiometers

Choose from semiautomatic or manually operated tensiometers

Employ du Noüy ring method: force needed to separate platinum-iridium ri from liquid is measured and read directly to ±0.25 dynes/cm; no calculatio

- Accuracy duplicates data from capillary height or drop weight measurements to ±0.25%
- Platinum-iridium test ring and two stainless-steel torsion wires; integra bubble level
- Tension on stainless-steel wire, support arm length, and zero setting on dial are quickly and easily adjustable
- Two adjustable feet and heavy base minimize vibrations
- Metal case with corrosion-resistant epoxy-enamel finish and carrying hand

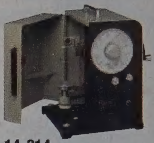
INCLUDES:
Instructions and graph to convert data to absolute values for comparative studies.

COMPLIANCE:
Perform in accordance with ASTM* D 971-99a (oil-water interfacial tensi procedures) and D 1331-89 (methods for measuring surface and interfacia tension of detergents)

Semiautomatic Model 21 Tensiomat* Tensiometer

More accurate than a manual tensiometer

- Reversible, synchronous motor raises and lowers test ring and sample table
- Two-way switch for choosing direction of travel for ring and pilot light
- Reversible, synchronous motor provides movement at a uniform rate, thus eliminating premature ring breakaway from liquid and resulting false tension readings
- Error from manual adjustment of sample level can be avoided by first runni test with motor off to determine sample position when ring breaks free, then allowing table to remain fixed at that position for the actual tests



14-814

ORDERING INFORMATION:
115V 50/60Hz, 0.2A

CERTIFICATIONS:
CSA approved

Cat. No.	Eac
14-814	5030.2

Manual Model 20 Surface Tensiometer

For educational and industrial control applications

- Allows upward and downward measurement of tension
- Dual scale, graduated from 0 to 90 dynes/cm in clockwise and counterclockwise direction
- Torsion to raise ring and simultaneously lower table is applied manually
- Parallax errors are eliminated by aligning index needle on lever arm with line on mirror

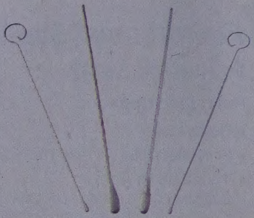
*Fisherbrand** Calcium Alginate Swabs

Soft calcium alginate swabs contain no fatty acids that can inhibit the growth of many fastidious microorganisms

- Exhibit no detectable bacteriostatic activity
- Do not react with or inhibit the activity of antibodies or antimicrobial agents
- Non-irritating and non-sensitizing
- Once a sample is obtained, the swab fibers can be dissolved in 1% sodium citrate solution or 1% sodium hexametaphosphate in ¼-strength Ringer solution, releasing bacteria for greater recovery



Left to right: 14-959-77, 14-959-81, 14-959-79, 14-959-78

SPECIALTY

BD CultureSwab* and BD CultureSwab Plus Collection and Transport Systems

Available in more than 20 swab and shaft configurations

- Create a microenvironment ideal for transporting aerobic, anaerobic and other fastidious pathogens
- Narrow configuration in lower portion of the tube, patented "Venturi-constriction," forces media to circulate around the swab, minimizing specimen exposure to the toxic effects of oxygen
- BD CultureSwab is offered in liquid Amies and Stuart's formulations as well as Cairy-Blair agar formulation
- BD CultureSwab Plus is offered in Amies agar gel formulations, with and without charcoal

CultureSwab and CultureSwab Plus Collection and Transport Systems

ORDERING INFORMATION:
Available addition of charcoal neutralizes bacterial metabolic products.

INCLUDES:
Round-bottomed tube; a nontoxic, rayon-tipped swab; a 5¼" (13.3cm) swab shaft; a security cap that creates a water-tight seal; an extra-large, preattached label; a tamper-evident seal; and the lot number, expiration date and product description printed on the tube and peel pack

V Texwipe* CleanTips* Swabs

raclean head materials are precision molded so that every swab, certified to be silicone free, is constructed to cting tolerances

nstructed from the cleanest materials available and manufactured in a eanroom using state-of-the-art processes and equipment

gh-precision automated process guarantees consistent performance, zing and cleanliness

ha* Polyester Series

layers of cleanroom-laundered AlphaLife* polyester tips thermally sealed polypropylene handles.

o contaminating adhesives

perior resistance to wide range of chemicals and solvents

tra-low releasable particulates, ions, and NRV

ecommended for cleaning validation

cellent sorbency and release properties

orbond* Series

ect for abrasion-sensitive applications requiring very low residue, such viping sensitive coated-optics surfaces.

uble-layered, hydroentangled, continuous-filament polyester heads ermally molded onto polypropylene handles without adhesives

ng filaments reduce risk of fiber release; hydroentanglement lowers nvolatile residue to a very low level

eads are heat molded onto polypropylene handles and perimeter edges at sealed to prevent fiber release

cellent chemical resistance; can be used with a wide range of solvents

Foam Series

High performance for applications requiring sorbency, low particle generation and solvent resistance.

- High-grade, closed-cell polyurethane foam heads
- Softness and low abrasion protect delicate components
- Chemical resistant polypropylene handles

CleanFoam* Series

Laundered CleanFoam heads constructed of 100 pores per inch open-cell polyurethane foam for excellent capacity and cushioning.

- Cleanest foam swabs available with superior solvent capacity and contamination capture
- Solvent-processed for very low levels of nonvolatile residue and particle generation
- Good chemical resistance—can be used with solvents such as isopropyl alcohol and applying lubricants and other liquids
- Heads thermally welded onto polypropylene handles, without any contaminating adhesives

ORDERING INFORMATION:

- Silicone-free Bag-Within-A-Bag* packaging consists of a solvent-resistant, thermally sealed exterior bag that protects the inner bags containing the swabs
- Each outer bag is individually lot-coded for easy traceability and quality control
- Other sizes and configurations are available; visit our Web site for details

BEFORE YOU BUY GLASS SYRINGES

NEEDLE CHARACTERISTICS

Single gauge—Single gauge needles have a constant outer diameter from the hub connection to the
general purpose syringes use single gauge needles.

Dual taper—The diameter of dual taper needles changes from the center to the tip compared to the
the hub. Dual taper needles are frequently used for injection into gas chromatographs where the thin p
penetration of the septum as well as allowing on-column injection while the heavier gauge base provi
and durability.

Bevel tip—Bevel cut needles allow for easy penetration with minimal damage to resealab
septa and other materials with reduced risk of needle bending.

Blunt tip—Blunt tip needles are cut perpendicular to the length of the shaft with
ish finish at the tip. Blunt tip needles perform well for liquid dosing and injection
sampling valves.

Side Hole—Side hole needles are designed to resist clogging by septum
other debris. The side hole configuration is usually found on larger gauge
syringes used for gas sampling

Conical tip—Conical tips are usually found in conjunction with a d
needles for injection into gas chromatographs. The conical shape fit
capillary columns and evenly distributes the sample during ejectio

PLUNGER CHARACTERISTICS:

Button Termination—Button plunger termination is con
operation of the syringe. Some autosamplers are configure
button termination.

Autosampler Terminations—Some autosamplers are d
only specific modifications to the plunger terminations.

Dual-Tapered Design

FEATURES TO LOOK FOR:

Duran* 33 Exp. Borosilicate Glass Barrel—High quality barrels formed from glass exhibiting lo
sion and high chemical purity provides structural integrity and minimal chemical interactions. Dura
can be bored to tighter tolerances providing syringes that exhibit consistently high precision.

Chrome plated, Stainless-steel Plungers—Stainless-steel plungers are precision fit to the syri
plating virtually eliminates ionic leaching of metals from the plunger body reducing the possibility
interactions with sample components. The chrome plating provides a microscopically smooth surfa
glass barrel of the syringe.

Precision bore barrels with tight tolerance plungers—A close fit between the sealing surfa
plunger improves sample uptake and dispensing especially with low viscosity or volatile samples. C
due to retention of sample behind the plunger is reduced.

National Scientific Precision Target* LC Syringes for CTC/Leap* Technologies Autosamplers

Use with A200LC, HTS, and HTC PAL models

- For use with CTC/Leap needle assemblies
- Fixed needle syringes feature a proprietary process that eliminates cement or epoxy for error-free injections
- PTFE-tip on stainless-steel plungers prevent plunger freeze-up for longe syringe life or gas samples
- 22 gauge needle, 51mm length with 90° blunt end point style

Capacity	Mfr. No.	Cat. No.	Ea
25µL	NS620502	**03-378-235**	71.
50µL	NS620605	**03-378-236**	60.
100µL	NS620702	**03-378-237**	59.
250µL	NS620805	**03-378-238**	60.

SGE* Syringes for Autosamplers

Replace syringes for Agilent* Technologies, Varian*, Perkin Elmer, Shimadzu*, Carlo Erba*, Fisons*, CTC/Leap*, Hitachi* and more

- Large selection of SGE syringes for many autosampler models
- See tables for some of the most popular autosampler syringes
- Syringe needles are cone point unless otherwise noted with footnotes

SG-0004 Series

ORDERING INFORMATION:

Additional syringes are available for other autosamplers made by the manufacturers represented here, as well as syringes for Unicam, Waters* and Siemens instruments. For information, contact your Fisher Scientific Customer Service Representative.

Ordering chart on next page.

* Syringes for Autosamplers, Contd.

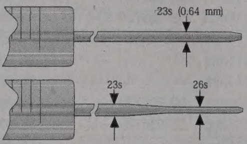
ACCESSORIES

SGE* Autosamplers Syringes Replacement Plungers for Hitachi* and Thermoseparations/Spectraphysics

Capacity	Syringe Type (or termination)	Plunger	Cat. No.	Each
Hitachi Model E7200				
500µL	M10 Screw thread	SG-031837	**SG-007660**	144.89
Thermoseparations/Spectraphysics Models AS1000, AS3000				
250µL	1/4-28 UNF screw thread	SG-031833	**SG-006660**	76.44

Hamilton* Syringes for Agilent* Technologies GC Autosamplers

For use with Agilent Technologies HP7673, HP7683, HP7670, HP7671, and HP7672 autosamplers



- Available with three needle gauges: 23s/26s, 23s, and 26s and two needle point styles: Style 2 and Style HP
- Style 2 is a beveled, noncoring needle point for septum penetration
- Style HP is a special conical style used exclusively on syringes for the Agilent Technologies autosamplers
- Needles are 1.71" long

For HP7673 and HP7683 Autosamplers

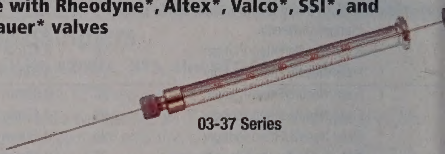
CHROMATOGRAPHY

National Scientific Precision Target* LC Syringes Manual Injection Valves

Use with Rheodyne*, Altex*, Valco*, SSI*, and Knauer* valves



03-37 Series

- LC manual injection valve syringes
- Fixed needle syringes feature a proprietary process that eliminates ceme or epoxy for error-free injections
- Removable needle syringes permit easy removal of bent needles for replacement; same syringe can be used with different gauge needles meet specific application needs
- Cone-shaped 90° blunt tip minimizes septa coring
- PTFE-tipped plungers prevent plunger freeze-up for longer syringe life
- Super Elastic plungers are constructed from titanium nickel to preven bent plungers—flexible to return to memory position
- Needle length 51mm
- Gauge 22s

E* Series II Standard Syringes

ndard syringes with anti-roll flange and needles that aligned with zero mark on barrel to reduce dead ume, improve accuracy and precision to <±1%

ainless-steel plungers are hand fitted, noninterchangeable, nreplaceable

ringes with 5 and 10µL capacities have barrel O.D. of 6.5mm, scale ngth of 54.1mm and include a 50mm long 26s gauge needle

to 500µL capacity syringes have 8mm O.D. barrel, 60mm scale length d 50mm long, 25 gauge needle

xed-needle models have needle glued into barrel with solvent-resistant oxy glue

emovable-needle models feature a PTFE seal, a spring and nut for ak-resistant operation

14-824 and 14-813 Series

Three Syringe Styles

- Fixed-needle syringes have the needle cemented into the glass syringe barrel at a point corresponding to the zero graduation mark; not autoclavable
- Removable-needle syringes allow the use of different needles on the same syringe barrel; autoclavable when disassembled
- Needles seat precisely to the zero graduation mark of the syringe
- Luer-Tip syringes feature ground-glass syringe barrel with male Luer taper; accepts most hypodermic needles and autoclavable when disassembled

Two Needle Point Styles

- Point Style 2 is a beveled noncoring needle point recommended for septum penetration
- Point Style 3 is a blunt needle point for use with HPLC injection valves and for sample pipetting

Hamilton* Model 701 Microliter* Syringe Six Packs

In fixed (701N) or removable (701RN) needles

- Available in 10µL capacity with either fixed (701N) or removable (701RN) needles (Point Style 2)
- Packed in durable storage container with a set of self-adhesive dots for easy syringe identification

14-824-1

Model No.	Capacity	Gauge	Needle Length	Mfr. No.	Cat. No.	Pack of 6

Hamilton* Series 800 Microliter* Syringes with Metal Handles

Extended metal handle makes syringes easier to hold and prevents heat transfer from hand to sample

- Metal plunger stem acts as a support and guide to protect the small plunger against bending
- Glass barrel/plunger assemblies are easily replaceable
- Plunger stop prevents plunger blow-out
- Volumes from 5 to 250µL
- All models have Point Style 2

Hamilton* Model 7000 Modified Microliter* Syringes

Positive displacement syringe for use with liquids

- Sample is contained in the needle; tungsten plunger wire travels into the needle to deliver the sample
- No dead volume
- Replaceable syringe barrel and parts
- Needles are 2¾" (70mm) with Point Style 2 or 3

ORDERING INFORMATION:

Replacement needles are available; contact your Fisher Scientific Custom Service Representative.

Hamilton* Series 900 Microliter* Syringe

All-glass extended-barrel syringes with metal sleeves for protection against breakage

14-824-54A

- Choose 5 or 10µL capacity
- Extra length makes syringes easier to handle
- Metal sheath prevents transfer of heat from hand to sample
- All models have needle Point Style 2
- Plungers and barrels are not interchangeable or replaceable

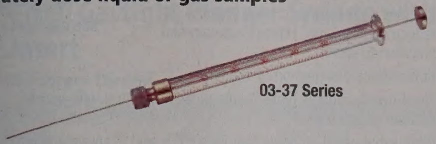
GASTIGHT

ational Scientific Precision Target* astight Syringes

ccurately dose liquid or gas samples



03-37 Series

- Fixed needle syringes feature a proprietary process that eliminates cement or epoxy for error-free injections
- Removable needle syringes permit easy removal of bent needles for replacement; same syringe can be used with different gauge needles to meet specific application needs
- PTFE-tipped stainless-steel plungers prevent plunger freeze-up for longer syringe life
- Needle length 51mm

National Scientific Precision Target* Gastight PTFE Luer-Lok* Syringes

Feature a precision-machined PTFE-tipped plunger

03-377 and 03-378 Series

- Accurately dose liquid or gas samples
- PTFE-tipped plungers prevent plunger freeze-up for longer syringe life for liquid or gas samples
- Needles have a metal luer screw
- Needle Length 51mm

SGE* Gastight Syringes

Suitable for liquid and gas samples

SGE Gas-Tight Syringes

- 10µL to 100mL capacities
- Constructed from borosilicate glass, with PTFE plunger tips and Kel-F* Luer cones (where applicable)
- Needles align with zero mark on barrel to reduce dead volume, improve accuracy and precision to <±1%
- Replaceable plungers on all models
- Fixed-needle models have needle glued into barrel with epoxy solvent-resistant glue
- Removable-needle models feature a PTFE seal, a spring and nut for leak-resistant operation; come with needle
- Luer-tip and Luer-Lok* syringes come without needles; order separately

Hamilton* Series 1700 Gastight* Syringes

Gas-tight and liquid-tight syringes specially designed for gas and liquid chromatography, handling corrosive gases and liquids, radioactive materials or sterile solutions

- Capacities from 10 to 500µL
- Stainless-steel plungers have PTFE precision-machined tips that provide an inert, leak-resistant seal
- Barrels, plunger, and plunger tips are easily replaceable (for more information on replacement parts, contact your Fisher Scientific Customer Service Representative)
- Available with fixed or removable needles with Point Style 2 or 3
- Syringes are also available with Luer tip suitable for hypodermic or chromatographic needles (**Note:** Do not use Luer-tip syringes with metal-hub needles.)

Hamilton* Series 1000 Gastight* Syringes with Slots

Precision-machined PTFE plunger tip for a leak-free seal

- For gas or liquid samples
- PTFE luer lock termination

Volume	Mfr. No.	Cat. No.	Each
1mL	81327	**14-815-129**	85.68
10mL	M81627	**14-815-184**	74.03

Hamilton* Series 1800 Gastight* Syringes

High-performance syringes with metal handle and volumes from 10 to 250µL

14-815 Series

- Ideal for liquid or gas chromatography or for handling radioactive materials, sterile solutions or corrosive gases and liquids
- Extended metal handles give the syringe a more comfortable balance in the hand and prevent heat transfer from hand to sample
- Heavy plunger stem inside the handle acts as a guide to help prevent th small part of the plunger from bending
- Precision-machined "tips" of PTFE-resin provide a gas-tight seal
- Sample loss in high-pressure applications is negligible, even in extreme conditions
- Field repairable in seconds; barrels and needles may be changed quickly for different procedures

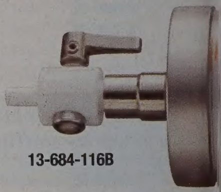
Hamilton* Miniature PTFE Body Valve (MTB)

Small-profile valve is designed for storing and transporting samples in any Gastight TLL syringe

- Pressure tested to 100psig
- Valve's fluid path is made of PTFE, which is autoclavable when separated from syringe
- Kel-F* hub needles attach to valve
- ON/OFF lever is easy to manipulate
- Bore I.D: 0.039" (0.99mm)



13-684-116B

Mfr. No.	Cat. No.	Ea
86580	**13-684-116B**	79.

*Trademark. See Trademark Reference.

Prices subject to change.

erfektum* Jumbo Syringes

or biomedical, laboratory, clinical, research and dustrial applications

14-825-12F

- Capable of dispensing large volumes of corrosive, toxic and noxious liquids
- Durable, borosilicate glass syringes are corrosion and heat resistant
- deal for use in leak-resistant, high-flowrate medical and ndustrial applications

CLUDES:

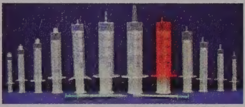
er-Lok* tip

ze	Graduations	Cat. No.	Each
0mL	4mL	**14-825-12C**	236.36
0mL	10mL	**14-825-12E**	397.14
0mL	10mL	**14-825-12F**	497.60

GENERAL PURPOSE

irTite Norm-Ject* Syringes without Needles

ert, hypoallergenic syringes for use in gas or liquid romatography, in vitro fertilization (IVF), embryo-ansfer, and various laboratory procedures



14-817 Series

- Luer-Lok*, Luer-Slip, or catheter tips
- Polypropylene barrel and polyethyl-ene plunger are chemically inert and noncytotoxic; needles contain no latex, synthetic rubber, silicone oil, or styrene
- Positive safety stop prevents accidental spills
- FDA registered

DERING INFORMATION:

ividually wrapped in convenient sterile strip packaging.

EQUIRED ACCESSORIES:

rchase needles separately.

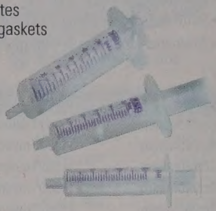
ose saver design with low dead space plug on the piston minimizes waste.
atheter syringe has a large opening similar to a nozzle and is usable with catheters.

National Scientific Target* All-Plastic Disposable Syringes

Disposable syringes with polyethylene barrels and polypropylene plungers; use for all syringe filter applications

- Two-part, all-plastic construction eliminates the need for rubber or synthetic plunger gaskets
- No silicone or oil lubricant is required in the barrel
- Choose Luer-Slip or Luer-Lok* syringes, in capacities ranging from 1 to 50mL



ORDERING INFORMATION:

Nonsterile; packed in bulk.

BD* Multifit Reusable Luer-Lok* Syringes

Made of special shockproof glass

14-823-10 Series

- Precisely engineered so that every plunger fits every barrel of the same catalog number
- Calibrated scale fixed into barrel for permanence
- Molded barrel for friction-free operation
- Use with PrecisionGlide*, Yale*, and Perfektum* needles
- Luer-Lok tips made of chrome-plated brass attached to reinforced heavy glass base

BD* Disposable Syringes

Sterile

- For easy identification of needle gauge, needle package and hub are color coded
- All syringes are sealed in an Easy Peel* package
- Autoclavable out of package
- With detachable PrecisionGlide* needle
- Stainless-steel needle with polypropylene hub and Luer-Lok* tip

14-82 Series

- Cat. Nos. 14-826-11 and 14-826-7 are intramuscular needles with a thin-wall design

NOTE:
Syringes with two capacities listed are dual scale.

amilton* SampleLock* Syringes

llect, store, transport, and analyze fluids without aporative loss or environmental contamination

Top: 14-815-566; Bottom: 14-815-562

o, prevent loss of headspace samples when collecting them m Tedlar* bags or gas sampling tubes.

asy-to-use twist valve locks sample nside syringe

ositive rear stop that prevents lunger blowout and loss of sample

ressurize gaseous samples prior o GC injection

alve port lets you inject internal standards directly into the sample ontained in the syringe

vailable in 11 capacities from 50µL to 50mL

" (5cm) long with Point Style 2

del	Capacity	Mfr. No.	Cat. No.	Each

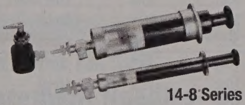
00SL	100mL	86346	**14-815-572**	507.42

amilton* SampleLock* Purge & ap Syringes

egral male Luer adapter connects directly to a rge-and-trap valve



14-8 Series

and 25mL syringes are designed or drinking water analysis according o U.S. EPA Purge-and-Trap oncentration Techniques (U.S. EPA Methods 502.1, 502.2, 503.1, 524.1 nd 524.2)

0µL syringe is used to add an internal standard or surrogate sample to rimary sample through integral twist valve

del	Capacity	Mfr. No.	Cat. No.	Each
05SLPT	5mL	81570	**14-815-573**	161.46

BD* Micro-Fine* IV Insulin Syringes

Double lubricated needles to reduce drag and make injections easier

- Plunger tip lines up exactly with scale marking for accurate dosage
- Minimal dead space between plunger and needle
- All syringes are sealed in an Easy Peel* package except 14-826-77 and 14-829-1D, which are in a self-contained package
- All have 28-gauge needle (13mm [½"] length), except 14-829-1D, which has 27-gauge needle (16mm [⅝"] length)
- Capacity 1mL

Perfektum* Micro-Mate* Interchangeable Syringes

Syringe barrels and plungers fit perfectly—eliminating the task of matching up syringe parts.

- Luer-lock, metal or glass tips
- Constructed of borosilicate glass for heat and corrosion resistance
- Permanently fused graduations
- Reinforced flanges with two flat sides prevent syringes from rolling

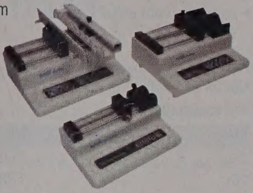
PUMPS

ngle, Dual and Multiple Syringe nfusion/Withdrawal Pumps

sy-to-use programmable syringe pumps

- imple menu-driven setup to program yringe diameter, flowrate and ispense volume
- acklit display
- utomatic shutoff
- ettings can be reviewed and hanged during operation
- ast settings are stored in memory or repeatability



14-831 Series Pumps

ngle Syringe Pump

apacity: 10µL to 60mL

ltiple Syringe Pumps

- apacity: 10µL to 140mL up to 10 syringes (depending on syringe size)
- uilt-in RS-232-C and TTL interfaces for easy external control
- old glass or plastic syringes
- vailable as infusion and infusion/withdrawal models
- nfusion/withdrawal pumps have independent rate settings for infusion nd withdrawal, with five modes of operation

del	Type	No. of Syringes	Flowrate Range (dispensing)	Cat. No.	Each

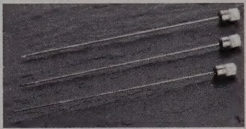
Hamilton* Small-Hub Removable Needles

For use with Hamilton removable needle and SampleLock* syringes 100µL and smaller

- Stainless-steel, standard-length (2", 51mm) needles
- Available with either Point Style 2 or Point Style 3

NOTE:
Not for use with LT or TLL syringes and connectors.



14-815-550 and 14-816-212D

Gauge	Point Style	Mfr. No.	Cat. No.	Pack of 6

)* PrecisionGlide* Needles

any Luer-Lok*, slip tip, or eccentric tip syringe

14-826 Series

rile disposable needles with
erior sharpness minimize patient
comfort.

tainless-steel
heath protects point and cannula

annulae are siliconized to reduce resistance and maintain speed and
moothness throughout injection

ll have regular bevel, except 14-826-10 which has intradermal bevel

4-826-52, -6A, -6B, and -6C needles have thin-wall design

4-826-6A is for subcutaneous use and has the same flowrate as larger
5-gauge needle

4-826-6B and -6C are for intramuscular use and have the same flowrate
s larger 22-gauge needle

4-826-52 has the same flowrate as larger 18-gauge needle

eedle hub fits any Luer-Lok or Luer slip syringe tip, reusable or disposable

dividual Easy Peel* blister pack packages boxed in strips of five
eedles; package carries lot control number

ubs color coded by gauge size: Gray (27-gauge), Tan (26), Blue (25),
urquoise (23), Black (22), Green (21), Yellow (20), Brown (19), Pink (18),
nd Purple (16)

DERING INFORMATION:

kage carries lot control number to indicate complete sterility.

BD* Yale Reusable Hypodermic Needles

Fits either BD Luer-Lok* or standard Luer-tip syringes

- Corrosion-resistant stainless-steel cannula is double swaged to hub, providing strong needle assembly with unrestricted bore
- Specially contoured hub interior eliminates hard-to-clean crevices and permits easy needle wire insertion
- Four-point locking flange

TACHOMETERS

sher Scientific* Traceable* igital Tachometers

e for ISO 9000 and other certifications

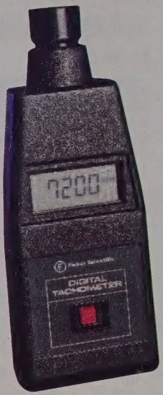
05-028-23

- Measures the speed of a centrifuge from a istance up to 12" (30cm)
- ive-digit LCD; memory feature lets you recall he highest, lowest, and last reading

uchless and Contact easurements Model

- Use the touchless sensor to get speed eadouts in rpm; use the contact sensor or direct readout of surface speeds in eet per minute or meters per minute
- Detects speeds from 0.1 to 99,999rpm; esolution is 0.1 below 1000, and 1 above 1000
- Contact sensor provides readouts from 0.1 o 19,999rpm, 0.05 to 1999.9m/min. or 0.2 o 6560 ft./min; accuracy, 0.05% + 0.1rpm from to 999.9rpm and 0.05% + 1rpm from 000 to 99,999rpm
- Dimensions: 8½L × 2½W × 1½"H 21.5 × 6 × 4cm). Weight: 10½ oz. (298g)

uchless Measurements Model



05-028-24

- Detects speeds from 10 to 99,999rpm; esolution is 0.1 below 1000, and 1 bove 1000
- Measures the speed of a centrifuge from distance of 2 to 78" (5.1 to 198cm)
- Unit is accurate to within 0.05% of full scale
- ndicator on the display panel automatically lerts you when the battery is low
- Dimensions: 7½L × 2¾W × 1½"H 19 × 7 × 4cm). Weight: 9 oz. (255g)

CLUDES:

- ouchless and Contact Measurements Model is supplied with four AA" alkaline 1.5V batteries, rugged ABS case, self-adhesive eflecting tabs, internal light, cone and two wheels (for measuring peeds), and a carrying case
- ouchless Measurements Model is supplied with four "AA" alkaline .5V batteries, rugged ABS case, self-adhesive reflecting tabs, internal ght, and carrying case

RTIFICATIONS:

ividually serial-numbered Traceable Certificate is provided from an ISO 025 calibration laboratory accredited by A2LA. It indicates traceability to ndards provided by NIST*.

Fisher Scientific* Traceable* Tachometer Laser

Touchless handheld point-and-shoot

02-401-3

- Five-digit resolution is 0.001, 0.01, 0.1, or 1, depending on revolutions displayed
- HOLD button freezes results
- Precision quartz crystal ensures stable, repeatable results
- ½" (1.2cm) high LCD digits can be read from 10 feet
- Low-battery condition indicated on the display
- Impact-resistant ABS housing
- Five-digit resolution is 0.001, 0.01, 0.1, or 1, depending on revolutions displayed
- HOLD button freezes results
- Precision quartz crystal ensures stable, repeatable results
- ½" (1.2cm) high LCD digits can be read from 10 feet
- Low-battery condition indicated on the display
- Impact-resistant ABS housing
- Dimensions: 4¾ × 1¾ × 1¼" (12 × 4 × 3cm)
- Weight: 4 oz. (113g)

To Use:

- Optical no-contact measurements are made by placing a piece of self-adhesive reflective tape (30" [76cm] tape supplied) on the rotating object
- Red LED light locks on the tape and counts rotations
- In two seconds, it provides rock-solid answers from 10 to 99,999rpm
- Designed to measure centrifuges, pumps, rollers, shafts, gears, motors, and moving surfaces

ORDERING INFORMATION:

Dimensions: 4¾ × 1¾ × 1¼" (12 × 4 × 3cm). Weight: 4 oz. (113g)

INCLUDES:

9V battery

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate provided from an ISO 17025 calibration laboratory indicating traceability to standards provided by NIST*.

Description	Cat. No.	Each
Tachometer Laser	02-401-3	106.08

Fisher Scientific* Traceable* Touch Tachometer

Simple contact operation with accurate readings

Touch any rotating surface with the cone convex tip, funnel concave tip or speed wheel for results in two seconds.

- Designed to measure centrifuges, pumps, rollers, shafts, gears, motors, and moving surfaces
- Displays rpm from 10.000 to 99,999 with 0.001, 0.01, 0.1, or 1 resolution
- Reports results in 3.0000 to 30,000 feet/min., 1.000 to 10,000 yards/min., 1.000 to 9999.9 meters/min. with resolution of 0.0001, 0.001, 0.01, 0.1 (depending on the revolutions displayed)
- HOLD button freezes reading
- Precision quartz crystal ensures stable, repeatable results
- ½" (1.2cm) high LCD display can be read from 10 feet
- Low-battery condition indicated
- Impact-resistant ABS housing

TEMPERATURE CONTROLLERS AND RECORDERS

For a wide selection of Temperature Controllers and Recorders including Fisherbrand* Exact-Temp* Dataloggers and Fisherbrand Traceable* Temperature Chart Recorders, see the Recorders section.

Fisherbrand* Red-Spirit* hermometers

ery accurate temperature readings without the nvironmental hazards of mercury

- All are filled with red liquid and pressurized with nitrogen except 15-041-4F, -4E, and -5E, which are filled with blue isoamyl benzoate liquid
- Thermometers with low ranges of -200°C to +30°C are filled with pentane; -100° to +50°C with xylene mixture
- Red liquid thermometers at other ranges are filled with kerosene

eneral-Purpose Laboratory Thermometers

leet or exceed NIST* and ANSI*/SAMA tolerances or accuracy

- Feature white backing
- Multiple calibration points are used to compensate for nonlinear expansion of liquid

OTE:
quid in the 15-038 thermometer will begin to freeze at about -193°C, ut only after 30 to 60 minutes of exposure. Indicated immersion levels ust be observed for accurate readings.

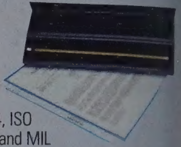
THERMOMETERS—MERCURY

*Fisherbrand** Factory-Calibrated Thermometers

Use to verify and calibrate routinely used thermometers including liquid-in-glass, RTD's, thermistors, thermocouples and bi-metal thermometers



15-041A

- Certified traceable
- Total immersion
- Each thermometer is certified at points listed below
- Calibrated to meet the requirements of ISO/EC Guide 25, ANSI*/NCSL 2540-1-1994, ISO 9000/QS 9000 Series of Quality Standards, and MIL STD 45662A
- Packed in felt-lined leatherette storage case

CERTIFICATIONS:

NIST* traceable. Supplied with documentation to prove traceability to NIST. For certified partial immersion thermometers, contact your Fisher Scientific Customer Service Representative.

NOTE:

For accurate results, total immersion thermometers must be immersed in medium up to point of reading (for proper use).

*Fisherbrand** Thermometers with Fractional-Degree °C Scale

Choose total or partial immersion

Provide readings to 0.1°C; more precise than 14-985, 14-985-5 Series.

- Engraved stem
- Yellow-backed glass filled with nitrogen above mercury column
- Each thermometer packaged in clear, lockable tubing

COMPLIANCE:
Meet ANSI*/SAMA specifications. Calibrated against NIST*-traceable standards; do not come with traceable certificate

CARE AND USE OF LIQUID-IN-GLASS THERMOMETERS

For user confidence and reliability in measuring temperatures, use liquid-in glass thermometers according to the design parameters listed below. Thermometers immersed at levels different than those indicated can lead to inaccuracies in temperature readings of as much as 5° to 10°. Thermometers may also be used according to methods defined by technical societies, such as ASTM*, to indicate required measurements other than "true" temperatures.To reduce the risk of fracture, avoid exposure to extreme changes in temperature and droppage. Store nonmercury thermometers in a vertical upright position to minimize column separation and maintain accuracy.

Total immersion. Bulb and entire column of liquid must be immersed into the medium measured. Most total immersion thermometers can also be completely immersed and exposed to temperature being measured.

Partial immersion. Thermometer bulb and stem are immersed to immersion line or defined depth inscribed on thermometer.

WARNING

These products contain mercury. Do not put products containing mercur in the trash. They should be recycled or disposed of as hazardous waste. Products containing mercury may be regulated by Local, State, or Federa Laws. Some products containing mercury are not available for sale in some states.

Fluoropolymer-Coated Thermometers

Transparent coating of PTFE resin

- Precision grade; yellow back
- PTFE coating prevents shattering; retains glass and mercury in case of damage
- Overall diameters, 6 to 7mm

NOTE:
The PTFE resin coating on these thermometers will be damaged by temperatures higher than 220°C (428°F).

*Fisherbrand** Thermometer Accessories

Armor Cases and Screw Caps

- Constructed of seamless brass tubing with heavy-nickel plating
- Cases slightly longer than stated to allow room for packing
- Case I.D., 0.335" (8.5mm)
- To hold thermometer firmly in place, pack small wad of glass wool in bottom of case and in screw cap

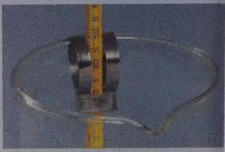
15-025AQ

For Thermometer Length	Cat. No.	Each
12" (300mm)	**15-025AQ**	110.00
14" (350mm)	**15-025BQ**	110.00
16" (400mm)	**15-025DQ**	110.00

Beaker Thermometer Clamp

Clamp holds thermometer upright on side of beaker

- Provides firm support without damaging
- Stainless steel; won't rust or corrode
- 1 dia. × ¾"W (25 × 19mm)



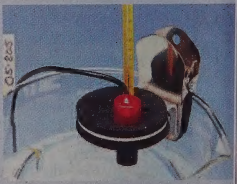
05-825

Cat. No.	Pack of 1
05-825	59.5

Thermometer Holder with Clip

A handy way to hold thermometers, test tubes and electrodes

- Clips firmly on the side of the beaker
- Steel clip has rubber clamping pads
- The holder is foam rubber with five holes of assorted diameters



05-805

Cat. No.	Eac
05-805	31.1

WARNING
These products contain mercury. Do not put products containing mercu in the trash. They should be recycled or disposed of as hazardous wast Products containing mercury may be regulated by Local, State, or Fede Laws. Some products containing mercury are not available for sale in some states.

rtco* Armored Thermometers

artial immersion

recision thermometers mounted in nickel-plated brass armor to withstand ough handling during use.

- Made with flat tops—can easily be inserted or removed from the armor without tools
- With ring top for suspension and slotted front for ease of reading
- Yellow back

ERTIFICATIONS:
IST* traceable. Accurate to within NIST tolerances

LOOKING FOR MORE THERMOMETERS?

Fisher Scientific carries a wide selection of thermometers for all of your application needs.

Visit www.fishersci.com and search for Thermometers

REUNITING SEPARATED COLUMNS OF MERCURY THERMOMETERS

Cooling Method. Works with most mercury thermometers except deep-immersion types. With the thermometer in an upright position, gradually immerse **only the bulb** in a solution of solid CO_2 (dry ice) and alcohol so the mercury column retreats slowly into the bulb. Do not subject the stem or mercury column to the CO_2 solution as it will freeze the mercury column in the capillary and may cause the bulb to fracture. Keep the bulb in the solution until the main column and the separated portion retreat into the bulb. Remove and swing the thermometer in a short arc to force all the mercury into the bulb. Do not touch the bulb until it has warmed sufficiently for the mercury to emerge from the bulb into the capillary.

Heating Method. Applies to thermometers with a maximum range of 260°C/500°F, with expansion chambers large enough to accommodate the separation plus a portion of the main column. (Never fill expansion chamber more than ⅔ full.) Immerse as much of the bulb and stem as possible in a large beaker containing a liquid whose flash point is well above the highest indication on the thermometer being reunited. Heat the beaker, stirring the liquid with the thermometer until the separation and a portion of the main column enter the chamber. (Never use an open flame on the bulb.) Tap the thermometer in the palm of gloved hand to reunite the column. Allow to cool slowly. Thermometers whose ranges exceed 260°C/500°F cannot be reunited using heat.

TEMPERATURE CONTROLLERS AND RECORDERS

For a wide selection of Temperature Controllers and Recorders including the Fisherbrand* Exact-Temp* Dataloggers and Fisherbrand Traceable* Temperature Chart Recorders (shown at right), see the Recorders section on pp. 1518-1526.

*Fisherbrand** ASTM* Thermometers

Made and guaranteed to meet ASTM E 1 specifications in every detail

The tubing used conforms to exacting specifications for composition and physical properties.

- Graduations, numbers, and letters are deeply etched into the glass and filled with improved black pigment that is unaffected by any ordinary solvent
- All ASTM thermometers are filled above the mercury column with an inert gas under pressure
- For certified ASTM Primary References standards that come with a traceable certificate, see p. 1791.

THERMOMETERS—SPECIAL PURPOSE

*Fisherbrand** Red-Spirit* Pocket Thermometers

Filled with kerosene and nontoxic red dye

- With white back and permanently fused markings printed horizontally for easy reading
- Complete with protective metal case and pocket clip

ORDERING INFORMATION:

Case with ring top sold separately (contact your Fisher Scientific Customer Service Representative).

NOTE:

Store in upright position to avoid column separation.

Fisherbrand* Exact-Temp* Bottle-Encased Thermometers

Certified chamber thermometers, graduated in 0.1°C or 0.5°C

High-precision, Ever-Safe* total-immersion thermometer is encased in PETG resin bottle filled with liquid glycol, which insulates the bulb against rapid temperature changes when the door of the appliance chamber is opened.

- Certified traceable
- Thermometers have dual magnets for attaching to wall or door
- Choose thermometers filled with mercury, Blue-Spirit* (isoamyl benzoate-filled), or Red-Spirit* (kerosene-filled)
- Available with PTFE resin coating to contain glass and liquid should breakage occur
- Blue-Spirit thermometers for freezers, refrigerators, and incubators also available without coating
- Blue-Spirit and mercury-filled come graduated in 0.1°C increments for most temperature ranges to enhance critical measurements demanded by regulatory agencies
- 0.1°C division thermometers are encased in 60mL bottles; 0.5°C division thermometers, in 30mL bottles

CERTIFICATIONS:

Individually calibrated and certified traceable to standards provided by NIST* (certificate included).

APPLICATIONS:

For use in chambers such as freezers, refrigerators, incubators, ovens and for ambient use.

NOTE:

Oven thermometers are encased in polycarbonate bottles with vermiculite as the insulating medium.

Freezer Thermometers

- Total immersion thermometers encased in PETG resin bottles filled with propylene glycol
- All thermometers coated with PTFE fluorocarbon resin except 15-171-13

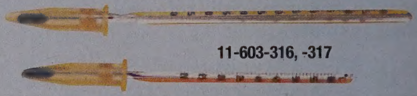
*Fisherbrand** Exact-Temp* Dry Bath/Block Heater Thermometers

Fit directly into dry bath incubator or block heater for critical temperature measurement

- Blue-Spirit* (isoamyl benzoate-filled), partial-immersion thermometers
- Encased in 1.5mL microtube filled with mineral oil
- Individually calibrated and serialized

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided indicating traceability to standards provided by NIST*.



11-603-316, -317

Fisherbrand* Autoclave Thermometer

For use in autoclaves without built-in temperature recording devices

Has constricted capillary to hold temperature after heat is reduced so you can monitor maximum temperature reached during sterilization.

- Range: 85° to 135°C, with 1°C divisions
- Mercury-filled with large, easy-to-read numerals

15-114-10

Range	Length	Immersion	Subdiv.	Cat. No.	Each

Products containing mercury may be regulated by Local, State, or Federal Laws. Some products containing mercury are not available for sale in some states.

Fisherbrand* Maximum/ Minimum Thermometer

Registers both maximum and minimum temperatures

Used for recording temperature differentials.

- U-shaped—high temperature at top of one side, low at top of other side
- Metal floats rise with mercury column; reset with magnet supplied
- Plastic case; 9¾" long (24.8cm) overall

15-116

Ranges	Subdiv.	Cat. No.	Each
-40° to +50°C/-30° to +120°F	1°C/1°F	**15-116**	58.90

Fisherbrand* Partial-Immersion Thermometers with ₷ Joint

Filled with Red-Spirit* kerosene liquid

- Standard taper ground joint fits 10/18 to 10/30
- Immersion depth indicated by stem length below the tapered joint
- Graduated in 1°C divisions

NOTE:
Store in upright position to avoid column separation

*Fisherbrand** ASTM* Thermometers for Flash Point Testing

Guaranteed to meet ASTM E 1 specifications in every detail

- Tubing conforms to exacting specifications for composition and physical properties
- Graduations and numbers are deeply etched into the glass and filled with improved black pigments which are unaffected by any ordinary solvent
- Filled above the mercury column with an inert gas under high pressure

Ertco* Exact-Temp* Thermometers

Available either mercury-filled or red alcohol-filled

Mounted in shatterproof plastic bottle filled with liquid to ensure accurate readings despite opening and closing of instrument door.

- Certified traceable
- With engraved stems and thoroughly annealed for accuracy
- Thermometers are coated with PTFE resin to shock and to contain glass and liquid in case of damage
- With individual serial numbers
- With double magnet for wall or door mounting
- For total immersion

*Fisherbrand** Bimetal Dial Thermometers

Advanced features make them ideal for a wide range of lab applications

High-visibility dial graphics are enhanced by an extended scale design that uses nearly the entire perimeter of the dial face.

- Special dampening process prevents calibration shifts from shock or vibration
- A slim, 0.142" diameter (3.6mm) stem and sensitive bimetal coil provide fast temperature response
- Stainless-steel construction
- Rated accuracy is ±1% of dial range at any point on the dial
- Scales are adjustable to permit recalibration when necessary

Single-Scale Thermometers

- With 1¾" diameter (44mm) dial and 8" long (203mm) stem

15-076B (clamp and beaker not included)

Fisherbrand* Bimetal Dial Thermometers, Contd.

Dual-Scale Thermometers

- Indicate Fahrenheit and Celsius temperatures
- With 2⅜" diameter (60mm) dial and 8" long (203mm) stem

15-077-2A

Fahrenheit Range	Celsius Range	Cat. No.	Each
-40° to +160°F	-40° to +70°C	**15-077-2A**	51.40

+50° to +300°F	+10° to +150°C	**15-077-2D**	51.40
+50° to +500°F	+10° to +260°C	**15-077-2E**	50.65

Ertco* Surface Temperature Thermometers

Choose fully enclosed or open surfaces

Fully Enclosed

- 2" diameter (50mm) dial
- 15-170 Series read in Fahrenheit only; 15-170-10 Series read in Celsius only
- Use silicone grease to hold thermometer in place on vertical surfaces; magnetic clip for ferrous surfaces

15-170-10A

APPLICATIONS:
Measure surface temperature of large pipes, ducts, dies, molds, freezers, and ovens

INCLUDES:
Magnetic clamp, silicone grease

Open Surfaces

- Low mass and design assure rapid readout
- 1¾" diameter (44mm) dial; weight, ½ oz. (14g)
- Supplied with magnetic assembly to hold thermometer in place on vertical or inclined ferrous surfaces

APPLICATIONS:
Ideal for quick temperature checks on hotplates, furnaces, engines, tanks, and ovens.

Ertco* Back-Connected Thermometers

Dual Scale

- With extremely responsive bimetal temperature-sensing helix
- Stainless-steel construction and stainless-steel welds
- Rated accuracy: ±1% of total scale range
- Hermetically sealed against moisture
- With breakage-resistant glass windows and permanent metal scale plates
- Convenient external adjustment for recalibration (except on 15-060-17)
- Removable bezel
- Stem diameter, ¼" (6mm)
- ¼ NPT connection on 2" diameter thermometers; ½ NPT connection on 3 and 5" diameter thermometers

15-060-58 and 15-060-19

Stainless-steel stem is chemically resistant to acids, bases, solvents, and may be used to measure temperature of gases, food, and other semisolids.

- Short-stem piercing models are ideal for carrying in a pocket
- Longer probes are excellent for measuring sample temperatures while stirring in deep vessels or water baths
- Thermometers with longer sampling rates allow thermometer to be removed from sample before reading—ideal when display is difficult to read in measuring position

Range	Resolution/Accuracy	LCD Display

APPLICATIONS:

Ideal for monitoring liquids, air/gas or semisolids

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

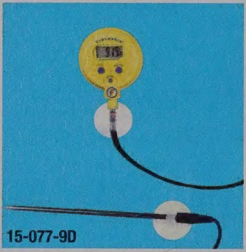
Features	Dimensions	Cat. No.	Each
Traceable. Ideal for cooling water systems, freezers and refrigerators; alarm set in 1° increments activates flashing red-LED light and sounds when temperature rises above setpoint; programmable DELAY button silences alarm for 15 to 120 minutes; alarm sounds soft reminder chirp every 30 seconds; supplied with Velcro* strip for mounting; battery powered.	5L × 4½W × 2"H (13 × 11 × 5cm)	**15-077-18**	279.61
Traceable. Simultaneously displays current, high and low temperature; HIGH/LOW memory reset button; low-battery signal; can shut refrigerator door on 1mm cable; supplied with probe-wire mounting bracket, plastic hanging hook, Velcro mounting tape, flip-open stand for lab bench and one "AAA" battery; ABS case.	2½L × 2⅝W × ¾"H (6.4 × 6.6 × 2cm)	**15-077-17B**	47.97
Traceable. Extra-large two-line display reads ambient and probe temperatures; four alarms—above or below a setting, between or outside two settings; alarm activates green/red lights and intermittent sounds until temperature returns to in-range conditions or until alarm is turned off; front-panel controls. Supplied with self-adhesive wall mount and flip-open lab bench stand; ABS case.	4L × 4W × ⅝"H (10.2 × 10.2 × 1.6cm)	**15-077-27**	39.08
Traceable. Two-line display reads ambient and probe temperatures; four alarms—above or below a setting, between or outside two settings; alarm activates green/red lights and intermittent sounds until temperature returns to non-alarm conditions or until alarm is turned off; front-panel controls. Supplied with self-adhesive wall mount and flip-open lab bench stand; ABS case.	3L × 3W × ½"H (7.6 × 7.6 × 1.3cm)	**15-077-30**	37.54
Traceable. Same as 15-077-17B.	2½L × 2⅝W × ¾"H (6.4 × 6.6 × 2cm)	**15-077-17A**	48.25
Traceable. Same as 15-077-27.	4L × 4W × ⅝"H (10.2 × 10.2 × 1.6cm)	**15-077-28**	39.08
Traceable. Same as 15-077-30.	3L × 3W × ½"H (7.6 × 7.6 × 1.3cm)	**15-077-31**	39.45
Traceable. Dual range; displays ambient or probe temperatures; three-line display of current, high and low readings permit unattended monitoring; set alarm in 1° increments; alarm sounds for 12 hours even if temperature returns to non-alarm conditions; Supplied with slot for wall mounting, Velcro mounting tape, lab bench stand and two "AA" batteries; ABS case.	4¼L × 2¾W × ¾"H (11 × 7 × 2cm)	**15-077-8D**	53.31
Traceable. Dual range; displays ambient or probe temperatures; MIN/MAX button; supplied with mounting bracket for probe; Velcro mounting tape, stand for lab bench and 1-year "AAA" battery; ABS case.	2L × 2½W × ½"H (5.1 × 6.4 × 1.3cm)	**15-077-8C**	45.11
Traceable. Dual range; updates every 10 seconds; solar powered with battery backup. Supplied with slot for wall mounting, Velcro mounting tape, or sits on lab bench; ABS case. External probe.	2¾L × 2¾W × ¾"H (7 × 7 × 2cm)	**15-077-20**	32.20
Traceable. Dual range; two-line display reads ambient and probe temperatures; MIN/MAX button; supplied with slot for wall mounting, Velcro mounting tape, and flip-open stand for lab bench; ABS case.	2¾L × 4¼W × ¾"H (7.0 × 10.8 × 0.6cm)	**15-077-22**	41.86

Fisher Scientific* Digital Thermometers with Stainless-Steel Probe on Cable

Stainless-steel probe is chemically resistant to most acids, bases and solvents

15-077-16

15-077-32



15-077-9D

15-077-8B

15-077-21

14-648-46

15-077-29

- Easy-to-read digital thermometers are compact to hold in your hand or mount on wall in restricted areas
- Stainless-steel probe may be used to measure temperature of gases, liquids, food, and other semisolids
- Models 15-077-16, -15, -21, -8B, -29 and 14-648-46 have alarm that can be set to alert user to temperatures that exceed setpoints
- Some models (such as 15-077-16 and -15) have special features that print temperature, high/low memory and time of day; 15-077-29 thermometer has additional timer alarms
- For a miniature-size thermometer, see model 15-077-32

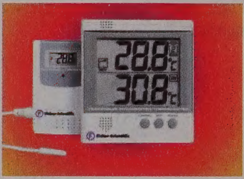
Fisher Scientific* Traceable* Radio-Signal Remote Thermometer

Monitors temperature from a distance of 65 to 100' without wires or cables

Mount sensor module outdoors or inside a hood, incubator, refrigerator, or other storage facilities. Data transmits on a radio frequency of 433MHz to a main unit placed on a desk or lab bench. Receiver unit and module are housed in high-impact, chemical-resistant ABS plastic.



15-077-50

Receiver unit

- Battery operated
- Receives and displays data from up to three different remote sensor modules at one time
- Trend indicator shows rising or falling temperature changes, minimum and maximum display for short- or longer-term monitoring—alarm sounds when temperature rises above or below maximum or minimum setpoints
- Alarm setpoints adjustable in 1° increments
- Switch-selectable temperature ranges available: -50° to +70°C and -58 to +158°F
- Resolution, 0.1°; accuracy, ±1.5°C (±2.7°F)
- Dimensions: ⅝L × 4¼W × 4½"H (1.6 × 10.8 × 11.4cm); weight, 6 oz. (170g)
- Large 1⅛"H (3cm) digits can be read from up to 25'

Remote sensor module

- Splash-resistant
- Comes complete with internal sensor and submersible, plastic external sensor probe, 3⁄16 dia. × ⅞"L (0.5 × 2.2cm), with 10' (3m) cable
- Measures ambient temperature with internal sensor or displays external sensor probe plugged into side of module to monitor gas, liquid or semi-solid temperatures
- Select transmission channel with three-position switch on unit
- Data is transmitted to remote receiver unit every 30 seconds and displayed on ⅜"H sensor module LCD
- Dimensions: ¾L × 2⅓W × 3½"H (1.9 × 5.9 × 8.9cm); weight, 3 oz. (85g)

ORDERING INFORMATION:

May also be used with bottle-encased probe (15-077-53) or stainless-steel probe (15-077-52), available separately online. Additional sensor modules (15-077-51) available on our Web site.

INCLUDES:

Receiver unit; one sensor module with internal probe and plastic external probe with 10' (3m) cable; two each "AA" and "AAA" batteries; flip-open stand, wall bracket and Velcro* tape

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

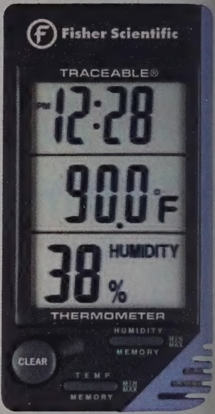
Range	Cat. No.	Each
-50° to +70°C/-58° to +158°F	**15-077-50**	69.29

Fisher Scientific* Traceable* Thermometer/Clock/Humidity Monitor

Measures ambient temperature, relative humidity and tells time

Easy-to-read LCD reports temperature with accuracy to ±1°C and resolution to 0.1°C/°F.

- Certificate
- Dual ranges: 0° to 50°C and 32° to 122°F
- Three-line LCD display with ½"H (13mm) digits
- Flip-down easel for desktop use
- Switch selectable Celsius or Fahrenheit readings
- Relative humidity range is 20 to 90%, resolution is 1% RH, and accuracy is ±4%
- Memory recalls highest and lowest temperature and humidity readings
- Clock shows time of day to the minute, with accuracy to 0.0190 seconds



06-662-4

APPLICATIONS:

Ideal for use in incubators, storerooms, drying chambers, hoods, cleanrooms, environmental cabinets, and general lab applications. Designed for easy operation, accuracy and reliability in industrial, educational, hospital and government labs.

ORDERING INFORMATION:

Overall dimensions: 4¼L × 2¼W × ½"H (10.8 × 5.7 × 1.3cm).

INCLUDES:

1.5V "AAA" battery

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-20° to +70°C/0° to +160°F	**06-662-4**	43.66

isher Scientific* Traceable* Refrigerator/Freezer larm Thermometer

Temperature-buffered" sensor—sealed in bottled lycol solution—provides accurate reading when reezer/refrigerator doors are open

- Monitors temperature in freezers, refrigerators, incubators, water baths, and heating blocks
- Triple display simultaneously shows current, high, and low temperatures
- Alarm (on 06-664-11 only) set in 1° increments alerts user with visual and audible signals if temperature goes outside setpoints
- 10' long (3m) microcable
- Dimensions: 4¼L × 2¾W × ¾"H (11 × 7 × 2cm)

INCLUDES:

Velcro* and magnetic mounting strip; one "AA" battery; ABS plastic case

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

isher Scientific* Traceable* Noncontact Infrared Thermometers

ortable thermometers measure infrared surface emperatures with view fields of 6:1 to 8:1

a unit has a view field of 7:1, and the thermometer is held 14" from bject, it reads infrared radiation emitting from a 2" dia. spot.

- Switch to view either Celsius or Fahrenheit scales
- Laser sighting beam permits aiming precisely at the target surface
- 15-077-57 and 06-664-39 assure accurate measurements using adjustable control to account for differences in surface infrared emissivity of objects
- One-second sampling, backlighting button, data hold, low-battery indicator and dual ranges

PPLICATIONS:

deal for petroleum, electronics, plant and field use

NCLUDES:

V battery; 06-664-38 comes with wrist strap

ERTIFICATIONS:

ndividually serial-numbered Traceable Certificate is provided from an SO 17025 calibration laboratory accredited by A2LA; indicates traceability o standards provided by NIST*.

Fisher Scientific* Traceable* Infrared Thermometer Gun

Takes instant, less-than-a-second, temperature readings of any surface

- Unique design permits one-handed "point and shoot" readings
- Laser-sighting beam permits aiming precisely at target surface
- Ideal for food preparation, pharmaceuticals, field use, electronics, and safety inspection
- Field of view is 50:1 (example: reads a spot the size of 6 inches from 25 feet away)
- Includes backlighting, data hold (freezes display reading), laser, low-battery indicator, and °C/°F buttons
- 15-077-970 also features min/max memory, average readings, and high/low alarms
- Range is -50° to +1000°C/-58° to +1832°F
- Resolution is 0.1° to 200°, 1° over 200°; accuracy, ±1.5% + 2°C

15-077-969 15-077-970

ORDERING INFORMATION:
Dimensions: 9 × 4 × 2¼" (22.9 × 10.2 × 5.7cm). Weight: 10 oz.

INCLUDES:
9V battery

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Description	Cat. No.	Each
Emissivity fixed at 0.95	**15-077-969**	207.04
Emissivity adjustable from 0.10 to 1.00 in 0.01 steps	**15-077-970**	259.06

Fisher Scientific* Traceable* Infrared Thermometer with Pocket Clip

Pocket IR thermometer with simple point-and-shoot operation

Easy to use—just turn it on, point at sample, and take a reading in less than a second.

15-077-966

- Units read both Fahrenheit and Celsius of any surface—solids, semisolids, and liquids
- Noninvasive, no-touch, measurements are ideal for food preparation, life sciences, pharmaceuticals, petroleum products, cleanrooms, electronics, and field use
- "HOLD" command freezes the display at the current reading
- Field of view is 1:1
- Display indicates low battery
- Fixed emissivity of 0.95 covers 90% of all applications
- Resolution, 0.1°; accuracy, ±1°C + 2%

ORDERING INFORMATION:
Dimensions: 3¼ × ¾" (8.3 × 1.9cm). Weight: ¾ oz.

INCLUDES:
Handy pocket clip, key-chain strap, batteries

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-33° to +220°C/-27° to +428°F	**15-077-966**	36.68

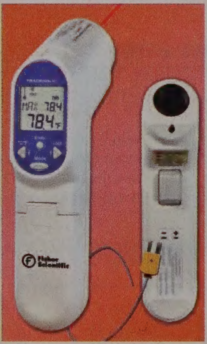
Fisher Scientific* Traceable* Infrared Thermometer with Trigger Grip

Instantly reads both Fahrenheit and Celsius for any surface, including solids, semisolids, and liquids

- Simple operation—point at sample and take a reading in less than a second
- Noninvasive, no-touch, measurements are ideal for food preparation, life sciences, pharmaceuticals, petroleum products, cleanrooms, electronics, and field use
- Thermocouple jack may be used for reading all Type K thermocouples
- Resolution, 0.1°; accuracy, ±1°C + 2%

Special Features

- Minimum/maximum feature permits viewing highest and lowest readings at any time
- Displays the average of all readings made and the difference between two readings
- Audible, user settable, high and low alarms signal out-of-range conditions



15-077-968

- "Hold" function freezes display at the current reading
- Backlighting permits viewing in low-light conditions; low-battery indicator
- Memory permits recalling individually captured temperatures

ORDERING INFORMATION:
Dimensions: 7 × 2¾ × 1½" (18 × 7 × 3.8cm). Weight: 6 oz. (0.2kg).

INCLUDES:
Batteries

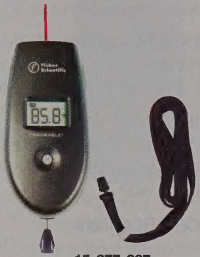
CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-60° to +500°C /-76° to +932°F	**15-077-968**	118.60

Fisher Scientific* Traceable* Infrared Thermometer with Wristband

Noninvasive, no-touch, measurements

Ideal for food preparation, life sciences, pharmaceuticals, petroleum products, cleanrooms, electronics, and field use.



15-077-967

- Simple to use: turn on, point at sample, and take reading in less than a second
- Reads Fahrenheit and Celsius of any surface—solids, semisolids, and liquids
- Hold command freezes the display at the current reading
- Emissivity of 0.05 to 1.00 in .01 steps covers 90% of all applications
- Minimum and maximum feature permits viewing highest and lowest readings at any time
- Laser beam pointer permits perfect sample target sighting
- Display indicates low battery
- Resolution: 0.1°
- Accuracy: ±1°C + 2%
- Field of view is 6:1

ORDERING INFORMATION:
Dimensions: 4 × 2 × ¾" (10.2 × 5 × 1.9cm).
Weight: 2¼ oz.

INCLUDES:
Handy wristband, batteries

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-55° to +250°C /-67° to +482°F	15-077-967	62.68

Fisher Scientific* Mini IR Traceable* Thermometers

Pocket-size infrared thermometer captures temperature readings of any surface—liquids, solids and semisolids—in less than a second

Operation is simple—turn it on, point at sample and take reading. Noninvasive, "no-touch" temperature measurements are ideal for food preparation, life sciences, field use, cleanrooms, and for fast inspections.

72.3°F
TRACEABLE
Mode

02-401-1

- Easy-to-read, ½"-high digital display
- Sophisticated, break-through NASA-type microelectronics
- Soft-touch keys, flip-open stand, key chain
- Switchable °C/°F, hold, minimum only/maximum only readings, continuously on mode
- Low-battery alert, and battery with 40 continuous hours life
- Resolution: 0.1°
- Accuracy: ±1°C between 15.0° to 40.0°C and ±1.5°C outside of this range
- Field of view is 1:1; emissivity is fixed at 0.95

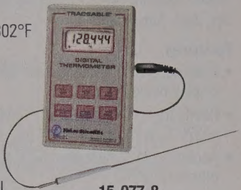
ORDERING INFORMATION:
Dimensions: 2½ × 1½ × ½" (6.4 × 3.8 × 1.3cm).
Weight: 1 oz.

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-22° to +110°C/-7° to +230°F	02-401-1	37.43

Fisher Scientific* Traceable* Digital Thermometers

Ideal for routine measurements with semisolid, liquid, or air/gas



15-077-8

- Switch-selectable temperature ranges: -50° to +150°C and -58° to +302°F
- Accuracy is ±0.05°C and ±0.09°F
- Resolution: 0.001°
- Easy-to-read ½"H (13mm) LCD, a MIN/MAX memory
- HOLD button, and datalogger with 50 readings and an RS-232 port
- Optional fast-response, stainless-steel, triple-purpose probe; readings are updated three times per second

ORDERING INFORMATION:
Also available without probe, so you can choose YSI Series 400 probes that meet your exact requirements. (Order additional YSI probes separately; contact your Fisher Scientific Customer Service Representative.) Accessory adapter also available.

INCLUDES:
Replaceable 9V alkaline battery; high-impact, chemical-resistant ABS plastic case

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Accepts YSI* Series 400 probes (supplied without probe)	15-078-1	457.85
Accepts YSI Series 400 probes (supplied with probe)	15-078-2C	486.08

ACCESSORIES

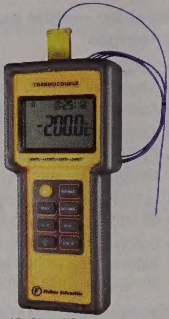
Additional Probes for 15-077-8

Probe	Cat. No.	Each
General purpose probe. Stainless-steel, triple-purpose replacement probe for 15-077-8. ⅛ dia. × 8½"L (3mm × 21.6cm). Cable is 5'L (1.5m).	15-077-7	73.72
Micro stainless-steel probe. For air/gas, liquids, and semisolids; 0.05 dia. × 5"L (1mm × 12.7cm). Cable is 54"L (137cm).	15-077-9A	116.25
Surface probe. With aluminum, flat disk-end probe on stainless-steel tube. 0.32 dia. × 6"L (8mm × 15.2cm). Cable is 70"L (178cm).	15-077-9B	115.56
Air probe. With stainless-steel, multi-vented cylinder probe. 0.13 dia. × 6½"L (0.33 × 16.5cm). Cable is 72"L (183cm).	15-077-9C	79.95

Fisher Scientific* Traceable* Total-Range Thermometer

Technologically advanced, pocket-size thermometer with water-resistant case

Constructed of shock-resistant ABS plastic, thermometer is designed for rough handling. Water-resistant case with O-ring gasket stops dirt, dust, fumes, and water.



15-077-14

Features

- Fast-response microprocessor updates display twice a second
- Reads from -328° to +2498°F and -200° to +1370°C, with resolution of 0.1° and 1°
- Accuracy: ±1°C between -50°C to +740°C; otherwise ±2°C
- Jumbo-size, ⅝" digits; back-lighting button
- HOLD button freezes display to capture current reading

Functions

- Switches from °F to °C at the touch of a button
- Recalls minimum and maximum temperature readings captured during any time
- Alarm sounds when temperature rises above or falls below high/low setpoints
- Countup timer alarm may be set from 23 hours, 59 minutes to 1 minute

ORDERING INFORMATION:
Dimensions: 7L × 3¼W × 1½"H (17.8 × 8.3 × 3.8cm). Weight: 8 oz. (227g). Uses all Type-K thermocouple probes.

INCLUDES:
PVC protective casing with flip-out stand; three "AAA" batteries; power unit for one year of routine use; Type-K beaded probe with 4' long (1.2m) cable

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

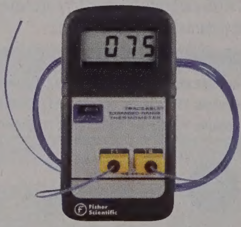
Range	Cat. No.	Each
-200° to +1370°C/-328° to +2498°F	**15-077-14**	114.98

Fisher Scientific* Traceable* Expanded-Range Thermometers

Shockproof, pocket-size thermometers are ideal for lab, plant, and field use

Expanded range, fast response and one-switch operation make them the perfect routine thermometers.

- Resolution: 1°
- Typical accuracy is ±(1°C + 1%)
- Two models are available in either °C or °F
- Range of Celsius model is -40° to +1200°C; range of Fahrenheit model is -40° to +2000°F



15-077-10

ORDERING INFORMATION:
Dimensions: 5L × 3W × 1"H (12.7 × 7.6 × 2.5cm). Probe cable length: 4' (1.2m).

INCLUDES:
9V battery; two fast-response Type-K beaded sensors for measurements up to 250°C (482°F) continuous and 300°C (572°F) short term (for replacement, order 15-077-45)

REQUIRED ACCESSORIES:
For measurements up to 700°C (1292°F), use the Type-K Triple-purpose Accessory Probe (15-078-2B).

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-40° to +1200°C	**15-077-11**	111.05
-40° to +2000°F	**15-077-10**	111.05

Fisher Scientific* Traceable* Wide-Range Thermometer

Certified traceable for ISO 9000 and other requirements

- With thermocouple sensor
- Low-battery indicator; high- and low-peak memory
- Extra-wide, switch-selectable temperature ranges: -212° to +1200°C and -350° to +2200°F
- Accuracy is ±1°C and ±1.8°F
- Resolution: 0.1°C or °F from -99.9 to +999.9°, 1° elsewhere

81.9
DIGITAL THERMOMETER
Fisher Scientific

15-078-2

ORDERING INFORMATION:
Chemical-resistant, high-impact ABS plastic case measures 3½L × 1¼W × 5½"H (8.9 × 3.2 × 14cm). Supplied probe is ⅛ dia. × 9"L (3.2mm × 23cm), with 40"L (102cm) cable; for replacement probe, order 15-078-2B. Also accepts low-cost Type-K Beaded Probe (15-077-45). Accessory probe for surface measurements also available. See 15-078-2A.

INCLUDES:
9V battery; 115VAC 60Hz adapter for continuous use; stainless-steel, triple-purpose Type-K thermocouple probe with handle for semisolid, liquid or air/gas systems

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-212° to +1200°C/-350° to +2200°F	**15-078-2**	670.88

Fisher Scientific* Traceable* Thermometer with Recorder Output

Recorder output provides hard copy for QC documentation

- Recorder output provides a 1mV signal per degree, which enables thermometer to be used with any chart recorder, strip recorder, or computer that accepts mV signals
- Range is -50° to +1300°C and -58° to +1999°F with an accuracy of ±0.3% of the reading plus 1°C
- Resolution is 0.1° from -50° to +199.9° and 1° for all other readings
- MAXIMUM button captures highest reading
- HOLD button freezes display to capture current reading
- Portable, measures 2¾L × 5¼W × 1¼"H (7 × 13 × 3cm)

Fisher Scientific

142.4
TRACEABLE
MAX
HOLD
°C/°F
Type K THERMOMETER

15-078-38

APPLICATIONS:

Ideal for monitoring chambers, cleanrooms, food processing, laboratories, and all temperature-sensitive manufacturing operations.

ORDERING INFORMATION:

Uses all Type-K thermocouple probes. For accessory stainless-steel Type-K probe with handle, see 15-078-2B.

INCLUDES:

9V battery; Type-K beaded probe with 4' long (1.2m) cable (for replacement, order 15-077-45)

CERTIFICATIONS:

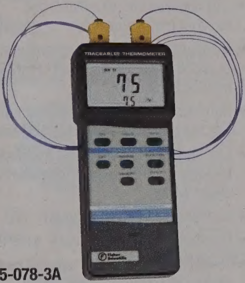
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +1300°C/-58° to +1999°F	**15-078-38**	134.78

Fisher Scientific* Traceable* Dual-Channel Thermometer

Displays simultaneous readings from two probes as well as the difference in the two readings

- Digital display shows temperatures in °C or °F
- Ranges are -50° to +1300°C and -58° to +1999°F
- Accuracy is 0.3% plus 1°C/1.5°F
- Resolution is 0.1° below 200°C or °F, 1° above 200°C or °F
- HOLD switch freezes the display to capture current reading
- ABS plastic case is chemical and shock resistant with flip-open bench stand



15-078-3A

APPLICATIONS:

Ideal for checking temperature variations in incubator or oven, temperature gradient in water bath, or inlet/outlet temperatures in any system.

ORDERING INFORMATION:

Dimensions: 7L × 3W × 1¼"H (19 × 7.6 × 3cm). May be used with any Type-K probe. For accessory stainless-steel Type-K probe with handle, see 15-078-2B.

INCLUDES:

Two Type-K beaded probes with 4'L (1.2m) cables; 9V alkaline battery.

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

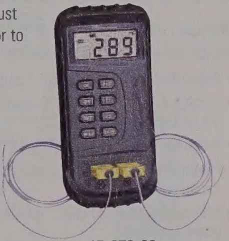
Range	Cat. No.	Each
-50° to +1300°C/-50° to +1999°F	**15-078-3A**	196.56

Fisher Scientific* Traceable* Dual-Channel Thermometer with Offsets

Features recessed front panel with adjustable offsets on two channels

Increases accuracy because you can adjust thermometer to a specific temperature or to a particular sensor.

- With ⅝" high (16mm) easy-to-read digital display
- Display can show temperatures of probe 1, probe 2, or the difference of the two probes in °C or °F
- Ranges are -50° to +1300°C and -58° to +1999°F
- Accuracy is ±0.3% plus 1°C/1.5°F; resolution is 1°C or °F
- MAXIMUM button displays highest reading achieved; HOLD button freezes the display to capture current reading
- Immediate-response probes show temperature changes in less than a second



15-078-39

ORDERING INFORMATION:

Measures 5¼L × 2¾W × 1¼"H (13.3 × 7 × 3.2cm). For replacement Type-K beaded probe, order 15-077-45. For accessory stainless-steel Type-K probe with handle, see 15-078-2B.

INCLUDES:

Two Type-K beaded probes with 4' (1.2m) cable lengths; 9V alkaline battery; Velcro* wrist strap, stand for use at lab bench, and rubberized case

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST.

Range	Cat. No.	Each
-50° to +1300°C/-58° to +1999°F	**15-078-39**	160.48

ACCESSORIES

Type-K Digital Thermometer Probes

For use with all Fisher Scientific* Type-K Digital Thermometers including 15-077-10, -11, -14, -26 and 15-078-2, -3A, -3B and -39.

Type-K Beaded Probe

- Fast-response Type-K thermocouple beaded 1/16" diameter (1.6mm) probe for use with all Type-K thermometers in liquids, semisolids, and air and other gases
- PTFE-resin coated 4' (1.2m) cable
- Probe's temperature range is -40° to +250°C continuous and up to 300°C short term

Type-K Triple-Purpose Probe

- For temperature measurements from -50° to +700°C (-45 to +1300°F)
- Ideal for lab, plant, and field use—wherever liquids, air/gas and semisolids are routinely monitored
- Heavy-duty, stainless-steel probe with handle has a diameter of ⅛" (3mm) and length of 9¾" (248mm)
- With 40"L (102cm) cable

15-077-45

Surface Probe

- Stainless-steel Type-K thermocouple (NiCr/NiAl)
- Spring loaded
- Fast response with time constant of one second
- Universal keyed connector and non-heat-conductive handle
- Probe length (including handle) × diameter: 9 × ⅛" (140mm × 3mm)
- Cable length: 36" (91cm); temperature range is -73° to +760°C

15-078-2B

Description	Cat. No.	Each
Type-K Beaded Probe	15-077-45	25.65
Type-K Triple-Purpose Probe	15-078-2B	56.58
Surface Probe	15-078-2A	170.00

Fisher Scientific* Traceable* RTD Platinum Thermometer

High-precision, durable thermometer with platinum RTD probe, and linear "fuzzy logic" chip for wide temperature-range operation

Platinum (100ohm) four-wire RTD probe can be used in liquids, air/gas, and semisolids.

- Resolution: 0.01° below 200° and 0.1° above 200°
- Accuracy: ±0.1% plus 0.2°C below 200°, ±0.15% plus 0.5°C above 200°
- Probe range: -58° to +752°F (-50° to +400°C)
- Features HOLD button to freeze display and capture reading
- Fail-safe display indicates low-battery and probe condition
- Easy-to-read, high-contrast LCD with ½"H (1.3cm) digits
- Readings are updated 2½ times every second

157.29
TRACEABLE THERMOMETER

15-077-55

APPLICATIONS:

- Ideal for experimental applications and in severe environments
- Reproducible one-button operation minimizes operator error in quality control environments
- Use to measure temperatures in soil, foods, ovens, cuvets, gas systems, reagents, water baths, wastewater, incubators, chemical solutions, petroleum products, and extreme cold

ORDERING INFORMATION:

Unit dimensions: 1¼L × 3W × 7"H (3.2 × 7.6 × 17.8cm). Weight: 9.5 oz. (269g). Probe measures 6"L; overall length, 12".

INCLUDES:

9V battery and probe with 40" (102cm) cable

CERTIFICATIONS:

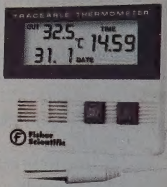
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +400°C/-58° to +752°F	15-077-55	274.95

Fisher Scientific* Traceable* Thermomete with Time/Date, Max/Min Memory

Shows exact time and date when minimum and maximum temperature occurred

- Displays current, minimum, and maximum temperatures
- Display shows min/max of ambient or probe temperature, time of day, and month/day
- Submersible probe; wire mounting bracket permits easy probe placement
- Stainless-steel sensor and 6' (1.8m) cable perform accurately even when both are under water
- Sensor diameter: 3/16"; length: 1½"
- Resolution is 0.5°; accuracy, ±1.5°C
- 15-077-976 comes with special bottle probe specifically for refrigerator/freezer applications



14-648-26

APPLICATIONS:

Perfect for long-term recording. Ideal for monitoring solutions, refrigerators, and room temperature.

ORDERING INFORMATION:

Replacement battery is Cat. No. 02-440-3A. Dimensions: 3½L × 3½W × 1"H (8.9 × 8.9 × 2.5cm).

INCLUDES:

Flip-open stand for benchtop use, slot for wall mounting, Velcro* to attach to any surface, and "AAA" battery for continuous one-year monitoring. High-impact ABS plastic case measures 3 9/16 × 3 9/16 × 15/16"; weight is 3½ oz.

CERTIFICATIONS:

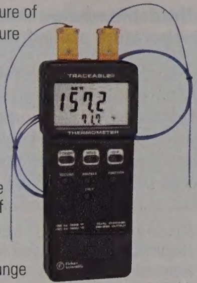
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST.

Range	Cat. No.	Each
Thermometer Only		
-40° to +80°C/-40° to +176°F	14-648-26	31.75
Thermometer with Bottle Probe		
-40° to +80°C/-40° to +176°F	15-077-976	34.06

*Trademark. See Trademark Reference.

Fisher Scientific* Traceable* Double Thermometer with Computer Output

Monitors two Type-K probes on separate channels



15-077-26

Jumbo 1⅜"H (3.5cm) LCD displays temperature of oth probes simultaneously, or the temperature f one probe and the difference between robes. Dual readings displayed with the emperature of probe 1 in ½" (1.3cm) digits tacked over that of probe 2 (or the T1-T2 ifferential) in ¼" (0.6cm) digits.

- Comes with two Type-K beaded thermocouple probes with a response time of less than one second and 48" (1.22m) of PTFE-coated cables
- Includes switch-selectable Celsius and Fahrenheit scales; operates over a wide range of -50 to +1230°C and -50 to +1999°F
- Resolution: 0.1° below 199.9°C/°F and 1° over 200°C/°F
- Accuracy: ±0.75% plus 1°C (±0.75% plus 2°F)
- Housed in durable, impact-resistant ABS plastic case
- Features maximum, minimum and average memory recalls
- HOLD button to freeze display and capture reading
- Serial RS-232 port connects thermometer to computer or datalogger for data collection

ORDERING INFORMATION:
Dimensions: 1¼L × 3W × 7"H (3.2 × 7.6 × 17.8cm). Weight: 9.5 oz. (269g). Can be used with Fisherbrand* Stainless-Steel Probe (15-070-2B) and Surface Probe (15-078-2A), available separately. Can also be used with Fisher Scientific Datalogger (06-662-72) and Data Acquisition System (11-661-22), available separately (contact your Fisher Scientific Customer Service Representative).

INCLUDES:
Two Type-K beaded probes and 9V battery

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +1230°C/-50° to +1999°F	**15-077-26**	197.83

Fisher Scientific* Traceable* Full-Scale Thermometers

Stainless-steel probe with piercing tip allows constant exposure to extreme temperatures at the end of the range

15-077-23

06-664-34

- Switchable °F/°C temperature ranges
- Readings are updated every second and displayed on a ⅜" LCD readout
- Magnetic back allows placement on metal surfaces (incubators, freezers, water baths)
- Flip-open easel allows use on lab bench; spring fastener clips onto any edge
- Resolution, 0.1° from -20 to +200 and 1° elsewhere
- Measure just 2⅛ dia. × 9⁄16" depth (5.3 × 1.3cm)
- Probe dia. × L: 0.14 × 5½" (0.4 × 14cm)
- Cable length: 10'

INCLUDES:
1.5V silver-oxide battery for 1½ years of continuous use. Plus model also includes high/low alarm, minimum/maximum memories, and hold.

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Description	Range	Accuracy	Cat. No.	Each
Full-Scale	-50° to +250°C/ -58° to +500°F	±1°C between -20° and +100°C	**15-077-23**	47.53

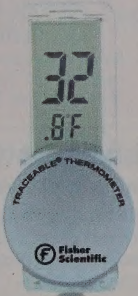
Full-Scale Plus	-50° to +300°C/ -58° to +572°F	±1°C between -20° and +100°C	**06-664-36**	43.61
Full-Scale Plus Ultra	-50° to +300°C/ -58° to +57C°F	±0.5°C between -20° and +100°C	**06-664-34**	54.56

Fisher Scientific* Econo Traceable* Refrigerator Thermometer

Inexpensive refrigerator thermometer with easy-view display



15-077-944

- Switchable °F/°C temperature range
- Always-hold* suction cup allows secure placement anywhere inside refrigerator; also supplied with Velcro*
- Display updates every 30 seconds; allows capture of reading without any effect from open refrigerator door
- Wide range of thermometer makes it ideal for monitoring temperatures in storerooms, labs, offices, hoods, and cabinets
- Easy-view, LCD digit height is ½"
- Accuracy is ±1°C in the range of 0 to 25°C and ±1.5°C outside range; resolution of 0.1°

ORDERING INFORMATION:
Dimensions: 1 × 2½ × ⅜" (2.5 × 6.4 × 1.1cm); weight: ½ oz.

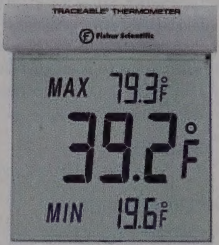
INCLUDES:
Long-life, 1.5V silver-oxide battery

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-9.9° to +55.0°C/14.2° to 131.0°F	**15-077-944**	13.59

Fisher Scientific* Traceable* Big-Digit See-Thru* Thermometer

May be attached to the outside of a window to view outdoor temperatures



15-077-959

- Use outdoors, in storerooms, fume hoods, labs, cleanrooms, refrigerators, and plant areas
- Window mount; wall mount
- Transparent display with 1¼" high digits shows current and minimum/maximum temperatures
- Automatically clears and updates the min/max readings daily
- Accuracy, ±1°C; resolution, 0.1°

ORDERING INFORMATION:

Dimensions: 3½ × 4¼ × ¾" (8.9 × 10.8 × 1.9cm); weight: 8 oz.

INCLUDES:

Mounting tape, Velcro*, "AAA" battery

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST.

Range	Cat. No.	Each
-13.0° to +158.0°F	**15-077-959**	24.09
-25.0° to +70.0°C	**15-077-960**	24.09

LOOKING FOR TEMPERATURE CONTROLLERS AND RECORDERS?

For a wide selection of Temperature Controllers and Recorders including the Fisherbrand* Exact-Temp* Dataloggers and Fisherbrand* Traceable* Temperature Chart Recorders, see the Recorders section.

Fisher Scientific* Traceable* Digital Thermometer with Stainless-Steel Probe

Affordable routine thermometer monitors temperature around the clock

139.4
digi-thermo
Fisher Scientific

15-077-8A

For nonstop monitoring. With convenient high and low alarms, thermometer automatically "watches" solutions. At the touch of a button, display temperatures, switch from °F to °C, or set high/low alarms. Use in foods, soils, cuvets, water baths, wastewater and incubators.

- Can be programmed in 1° increments, producing an audible signal when temperature rises above or falls below setpoints
- Resolution is 0.1°, accuracy is ±1°C
- Alarm mode may be switched off when not required
- Probe clips to unit for handy storage
- Single battery runs continuously for one year
- ½" display is readable from 10'

ORDERING INFORMATION:

Dimensions: 2 × 4 × ½" (5 × 10.2 × 1.3cm). Probe dia. × L: 0.14" × 7¼". Cable length: 3' (0.91m). Weight: 3 oz. (85g).

INCLUDES:

Probe, "AAA" battery, flip-open stand for bench use

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability for temperature only to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +260°C/-58 to +500.8°F	**15-077-8A**	61.85

Fisher Scientific* Traceable* Kangaroo* Thermometer

Carries its 42" probe cable in a reel-compartment "pouch" located in back of unit

Perfect carry-around portable thermometer fits in shirt pocket, or use the built-in stand with a bench footprint of only 4½ square inches.

NEW
Fisher Scientific
21.4C

14-649-79

- Intuitive operation allows every user to record identical results
- Unit automatically captures and recalls minimum and maximum temperature readings over any time period
- High and low alarm may be programmed in 1° increments
- Alarm sounds every minute until temperature returns to non-alarm condition
- Hold button freezes display to record a current reading
- Stainless-steel probe for use in acids, bases, and solvents

Specifications

- Range: -50.0 to +300°C and -58.0 to +572°F
- Resolution: 0.1° (between -19.9 and +199.9), otherwise 1°
- Accuracy: ±1°C (between -30 and +250°C), otherwise ±2°C
- Probe diameter: 0.14"; length, 7½"
- Large ¾" digits are readable from 20'
- Compact size is 4¾L × 2½W × ½"H (12 × 6.4 × 1.3cm)
- Weight: 2¾ oz.

INCLUDES:

Silver-oxide battery—runs continuously for one year

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +300°C/-58 to +572°F	**14-649-79**	29.18

*Trademark. See Trademark Reference.

Fisher Scientific* Traceable* Pocket-Size K Thermometer NEW

Shockproof, pocket size thermometer is ideal for lab, plant, and field use

Wide-range, fast-response, and one-switch operation make it the perfect routine thermometer.

- Compatible with all Type-K probes
- New microchip design for ultralow cost
- Battery provides 150 to 200 hours continuous use
- Range is -50 to +750°C or -58 to +1382°F
- Resolution of 1°; accuracy of ±(1°C + .75%) between 0 to 500°C and ±(1°C + 1%) 500 to 750°C
- Below 0 accuracies are: -20°C ±2°C, -40°C ±4°C, and -50°C ±5°C

14-649-80

ORDERING INFORMATION:
Dimensions: 4¼L × 2¾W × ⅞"H (10.8 × 7 × 2.2cm). Weight: 4 oz. (113.4g).

INCLUDES:
Type-K probe with beaded sensor, 4-foot cable, leatherette case, and 9V battery

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

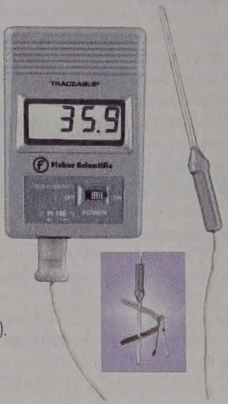
Range	Cat. No.	Each
-58° to +1382°F	**14-649-80**	25.55
-50° to +750°C	**14-649-81**	25.55

Fisher Scientific* Traceable* RTD Platinum Freezer Thermometer

-100°C, platinum thermometer designed for freezers

Accurately monitors temperatures in freezers, water baths, heating blocks, incubators, and refrigerators.

- Ten-foot, ultra-thin, ribbon micro-cable permits freezer doors to close on it without affecting the seal
- Fast-response, 100 ohm platinum probe is triple purpose for use with liquids, air/gas, and frozen material
- RTD platinum probe measures ⅛ dia. × 5"
- Resolution, 0.1°; accuracy, ±2°C



15-077-961

ORDERING INFORMATION:
High-impact, chemical-resistant ABS case is 2¾ × 4¼ × ¾" (7 × 10.8 × 1.9cm). Weight: 4¼ oz.

INCLUDES:
Adjustable probe holder, probe carrying case, 9V battery, Velcro*, and magnetic strips for mounting of thermometer and probe.

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-99.9° to +199.9°C	**15-077-961**	52.43

Fisher Scientific* Traceable* Sentry* Thermometer with Bottle

Triple display simultaneously shows high, low, and current temperatures

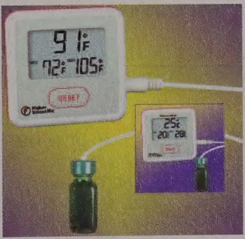
Allows you to instantly view if freezer, water bath, or incubator is within temperature spec. Monitor temperature of any experiment when you're not there—overnight, weekends, even during lunch.

Features

- Simple, one-button operation resets high/low memories
- Probe's wire mounting bracket permits easy sensor placement
- ABS plastic case has flip-open stand, wall hanging hook, magnet, and Velcro* mounting tape
- Low battery is signaled on display
- Resolution, 1°; accuracy, ±1°C

Micro cable for sealed spaces

- Sensor and 10' (3m) cable may be placed under water, in refrigerator, or freezer
- Small cable diameter (1⁄16") allows refrigerator doors to close on it with no effect
- Unplugging the cable activates sensor inside unit for monitoring ambient room temperature



15-077-942, -941

ORDERING INFORMATION:
Dimensions: 2⅝ × 2½ × ¾" (6.5 × 6.4 × 1.9cm). Weight: 1⅞ oz.

INCLUDES:
Battery (provides one year continuous operation)

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-58° to +158°F	**15-077-942**	38.57
-50° to +70°C	**15-077-941**	38.57

LOOKING FOR MORE THERMOMETERS?

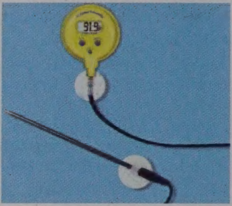
Our complete selection of thermometers and accessories is available online.

Visit www.fishersci.com and search for Thermometers

Fisher Scientific* Traceable* Waterproof Thermometer

Perfect for wet areas; with waterproof case, cable and probe

Use for round-the-clock monitoring of liquids, air/gas, or semisolids in freezers, water baths, outdoor tanks, incubators and refrigerators. Waterproof construction is ideal for wet labs, washdown areas and virtually all field applications.



02-402-0

- Stainless-steel probe is resistant to most acids, bases and solvents
- Wide temperature range covers 99% of routine temperature measurements
- Memory recalls highest and lowest temperature readings over any time period
- Solid-state construction eliminates dangers inherent in breakable glass and toxic mercury thermometers
- Resolution: 0.1° from -19.9° to +199.9°, otherwise 1°
- Accuracy: ±0.2°C or ±1°C between -20° and +100°C
- Easy-view, ¼"-high LCD digits may be read at a glance

All-Weather Compatible

- Operates in rugged and outdoor conditions
- Stainless-steel probe, 10' (3m) cable and digital display housing are all waterproof
- Case is waterproof and shockproof
- Shockproof in drop tests up to 5'

INCLUDES:

Probe, cable, 1.5V silver-oxide battery for one-year continuous monitoring, suction cups/magnet to attach to metal, and Velcro* to attach to any surface

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each
-50° to +300°C/-58 to +572°F	**02-402-0**	43.13

TYPE K
Fisher Scientific

14-649-82

Recessed front-panel-adjustable offset allows user to adjust thermometer to a specific temperature, in-house calibration, or particular sensor for increased accuracy.

- High-accuracy meter, wide temperature range
- Long battery life (150 to 200 continuous hours)
- HOLD button freezes display to capture current reading
- Probe diameter: ⅛", stem length: 3⅛", overall length: 5"
- Weight: 6 oz. (170g); cable length: 40"
- Dimensions: 5½L × 2¾W × 1¼"H (14 × 7 × 3cm)
- Type-K range is -50 to +1300°C and -58 to +2372°F
- Resolution is 0.1° between -50° and +200° and 1° elsewhere
- Accuracy is ±(1°C + .75%) between 0° and 500°C; ±(1°C + 1%) between 500° and 750°C; ±(1°C + 2%) between 750° and 1000°C; ±(3°C + 4%) between 1000° and 1200°C; ±2°C at -20°; ±3°C at -40°; and ±4°C at -50°

ORDERING INFORMATION:

Compatible with all Type-K probes.

INCLUDES:

Type-K probe, bench stand, 9V battery, and carrying case

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA; indicates traceability to standards provided by NIST*.

Range	Cat. No.	Each

Ertco* Digital Thermometer with Stainless-Steel Stem

Easy-to-read handheld digital thermometers

Stainless-steel stem is chemically resistant to acids, bases, solvents, and may be used to measure temperature of gases, food, and other semisolids.

- Probe is excellent for measuring sample temperatures while stirring in deep vessels or water baths
- Dual range, continuous reading, ON/OFF, auto power off, °C/°F button, probe guard
- LCD display: 5⁄16"H (7.9mm)

ORDERING INFORMATION:

Dimensions: 1⅜ dia. × 5.5"L (3.5 × 15cm). Probe dimensions: ⅛ dia. × 5"L (3.5mm × 13cm).

- Resolution: 0.1° from -19° to +199°; 1° outside this range
- Accuracy: ±1°C (±2°F) between -20° and +100°C (-4° and +284°F); ±2°C (±4°F) outside this range
- Includes 5000-hour battery (1.5V)

Digi-Sense* ThermoLogR* RTD Thermometers

Use to log up to 1000 readings in real time

Perfect for onsite documentation; infrared output allows data transfer to your computer via the optional RS-232 adapter.

- Simultaneously monitor current, minimum, and maximum readings
- Housing is IP54-rated for splash- and dust-resistance; silicone membrane keypad
- CAL button enables you to field calibrate the meter
- °F/°C selectable range is -330 to +2210°F (-201 to +1210°C)
- Resolution is 0.01°F/°C from -99.99 to +99.99°F/°C; 0.1°F/°C from -100.0 to -330°F/°C and from 100.0 to 999.9°F/°C; and 1°F/°C above 1000°F/°C
- Accuracy is ±0.06°F (±0.03°C) from -99.99 to +99.99°F/°C; ±0.1°F/°C from -100.0 to -330°F/°C and 100.0 to 999.9°F/°C; ±1°F/°C above 1000°F/°C
- Display measures 0.4"H for top LCD; 0.2"H for bottom
- Use probes (not included) with round, 3-pin locking connector

13-621-830

ORDERING INFORMATION:
Dimensions: 3¼W × 6¼H × 1¼"D (84W × 158H × 30mmD)

INCLUDES:
Two "AA" batteries; battery life is more than 300 hours; rugged ABS plastic case; available with or without probe

WARRANTY:
Three years

CERTIFICATIONS:
CE marked. Available with NIST* certification.

Acorn* Temp 6 RTD Thermometer

Compact, rugged meters with splash-resistant membrane keypad

Compatible with 100W Pt RTDs for excellent accuracy, stability and repeatability over a wide temperature range.

- Large, easy-to-read display
- All push-button operation for fast ease-of-use—no trimpots to adjust
- Minimum/maximum keys display highest/lowest temperature (°F/°C selectable) since meter was switched on
- Use MIN/MAX HOLD Mode to display the lowest or highest temperature measured since entering this mode
- Push-button temperature offset calibration adjustment enables fine-tuning of factory calibration
- Hold function freezes measurements for convenient reading and recording
- Auto-off function turns meter off after 17 minutes of non-use to save batteries
- Protective boot (included) protects meter and features a built-in stand
- Resolution is 0.1°C/0.1°F from -99.9 to +199.9°C/-147.8 to +391.8°F; 1.0°C/1.0°F outside this range
- Accuracy is ±0.2°C /0.4°F from -99.9 to +199.9°C/-147.8 to +391.8°F; ±2.0°C/4.0°F outside this range
- Input via three-pin locking connector
- Single-line LCD operating display, with -328 to +1562°F (-200 to +850°C) temperature range

ORDERING INFORMATION:
Meter weight: 1 lb. (450g). Meter dimensions: 5½ × 2¾ × 1¼" (14 × 7 × 3.5cm).

INCLUDES:
Four 1.5V "AAA" batteries, for more than 200 hours of continuous use. Available with or without probe.

WARRANTY:
Three years

CERTIFICATIONS:
CE marked. Available with NIST* certification.

Acorn* Temp Thermocouple Meters

Rugged, multitype thermocouple thermometers are economical, compact, and dependable

- All push-button operation lets you display min/max temperature momentarily
- MIN/MAX HOLD mode displays the lowest or highest temperature measured since entering this mode
- Offers easy access connections for thermocouple probe
- Splash-resistant membrane keypad helps protect meter components from occasional spills
- Large, ⅞" LCD gives you a clear reading at a glance, and warns of low-battery or calibration errors
- Rubber boot protects meter from drops and dings
- Range: Type J: -200° to +1000°C/-328° to 1832°F; Type K: -250° to +1372°C/ -418° to +2501°F; Type T: -250° to +400°C/-418° to +752°F
- Resolution: 0.1° from -299.9°C to 299.9°C/°F; 1° outside this range
- Accuracy: ±0.25% of reading plus 0.5°C/0.9°F above -99.9°C/°F
- Factory calibrated, push-button offset adjustment

13-621-826

ORDERING INFORMATION:
Meter dimensions: 5½ × 2¾ × 1¼" (14 × 7 × 3.5cm). Weight: 1 lb. (0.5 kg). Probe: use any type J, K or T thermocouple probe with mini-connector (sold separately).

INCLUDES:
Four 1.5V "AAA" batteries (included), for more than 200 hours of continuous use; available with or without probe.

REQUIRED ACCESSORIES:
Use with Digi-Sense* thermocouple probes

Thermometer with General Purpose Probe nd NIST Certification	13-621-845	427.80

Digi-Sense* DuaLogR* Thermocouple Meters

Feature real-time datalogging with infrared output o transfer data to your computer via the optional RS-232 interface

- Logs up to 1000 readings in one second to 60-minute intervals
- Thermometer measures minimum, maximum and differential readings using one to two probes
- Temperature range and accuracy matches the Digi-Sense Dual-Input Thermocouple Thermometer (see 15-176-100)

15-176-96

CERTIFICATIONS:
UL listed intrinsically safe for use in Class I; Groups A, B, C, and D Division hazardous locations. Available with NIST* certification; contact your isher Scientific Customer Service Representative.

Description	Cat. No.	Each
DuaLogR Thermometer	15-176-96	289.23
Adapter, 115 VAC	13-621-820	46.69

Carrying Case	15-078-21	22.58

ACCESSORIES

Digi-Sense Probes

Have 5½" long (13.9cm) glass-filled nylon handles and 5' long (1.5m) coiled PVC cable. Order by intended use and thermocouple type.

General-purpose

- For liquids, gases, or surfaces of small objects
- Grounded tip, Type 316 stainless-steel shaft
- Time constant: 1 second (liquids)
- Total shaft length: 4⁷⁄₁₆" (11.3cm); main shaft: ⁵⁄₃₂" dia. (0.4cm)
- Shaft tip tapered to ³⁄₃₂" dia. (0.2cm)

Penetration

- For interiors of soft or semisoft materials
- Grounded tip, Type 316 stainless-steel sheath
- Time constant: 5 seconds (liquids)
- Shaft: 4L × ⁵⁄₃₂" dia. (10.1 × 0.4cm)

Surface

- Length: 10"
- Use to monitor such surfaces as hotplates, furnaces, and molds
- Time constant: 6 seconds; response time: 30 seconds

TIMERS

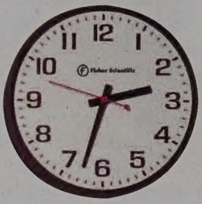
CLOCKS

Fisher Scientific* Wall Clocks with 12" dia. Face

Need no oiling, cleaning, or regulating

Accurate laboratory clocks with sweeping second hand.

- Synchronous motor movement
- Large white dial with black numerals for easy reading
- Enclosed in brown, impact-resistant plastic case with safety lens
- Concealed mounting bracket
- 12" diameter (30.5cm) dial



06-664-5A

ORDERING INFORMATION:
Electric model (06-664-5) power requirements: 110/120 VAC 50/60Hz. Quartz model (06-664-5A) uses "AA" battery (not included).

CERTIFICATIONS:
Electric model is UL listed.

Type	Cat. No.	Each	Case of 10
Electric	**06-664-5**	72.80	644.21
Quartz	**06-664-5A**	82.66	731.50

Fisher Scientific* Traceable* Wall Clock with 10" dia. Face

Sturdy laboratory wall clock with sweeping second hand

- Clock tells time to the second with 0.01% quartz-crystal accuracy
- 10" diameter (25cm) dial

06-664-20

INCLUDES:
Dust- and splash-resistant case, wall-mounting screw, and one "AA" battery.

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

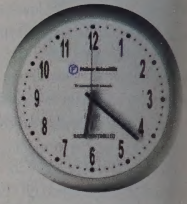
Cat. No.	Each
06-664-20	18.05

Fisher Scientific* Traceable* Analog Radio Atomic Wall Clock

Automatically sets itself

Receives radio signal directly from the NIST* atomic clock in Boulder, CO.

- Accurate to 1⁄10,000 of a second
- Highly visible sweeping second hand
- Automatically adjusts for Daylight Savings time and leap seconds (Earth rotation wobble corrections)



06-664-13

ORDERING INFORMATION:
Dimensions (D x O.D.): 1¼ × 12" (3.2 × 30.5cm). Weight: 1⅜ lb. (0.6kg).

INCLUDES:
Wall mount, screw, and "AA" battery

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST.

Cat. No.	Each
06-664-13	37.80

Fisher Scientific* Traceable* Futuristic Thermometer/Humidity Clock

State-of-the-art clock shows crisp readable dials and displays in a low profile case

Triple display shows precise quartz-crystal timing with 0.01% accuracy, temperatures from -37° to +47°C and -34° to +116°F with ±1.5°C accuracy, and relative humidity from 8 to 92% with ±5% accuracy.

- Displays time, temperature, and humidity
- Readable at 20' (6.1m)
- Bright orange, sweeping second hand

06-664-50

ORDERING INFORMATION:
Dimensions: 12½H × 11W × 1"D (31.8 × 28 × 2.5cm). Clock dial diameter: 9" (22.9cm). Temperature and humidity dial diameters: 3" (7.6cm). Weight: 1 lb., 7 oz.

INCLUDES:
ABS impact-resistant case, "AA" battery, wall mount, and screw

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

Cat. No.	Each
06-664-50	63.62

Clock sets time using a signal received directly from the National Institute of Standards and Technology (NIST*) atomic clock in Boulder, CO (which is accurate to one hundred billionth of a second).

- Accurate to 1⁄1000 of a second at all times
- Automatically adjusts for Daylight Savings time, leap year, and leap seconds
- Displays signal-reception strength indicator and U.S. map (showing user-selected time zone)
- Electroluminescence backlighting allows viewing in the dark
- Settable alarm is ideal for noisy areas
- Displays time of day to the second, AM/PM, month, date, and day of the week
- LCD digits (½" [1.3m] high) are readable from over 10' (3m)

ORDERING INFORMATION:

Dimensions: 1½L × 3⅜W × 4"H (3.8 × 8.6 × 10.2cm). Net weight: 6 oz. (168g).

INCLUDES:

Two "AAA" batteries that power the unit for one year

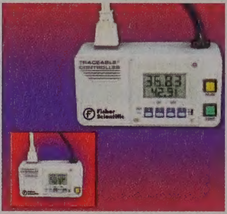
CONTROLLERS

Fisher Scientific* Traceable* Walkaway* Count-up Controllers

Use for timed shutdown or repeated ON/OFF timing

- Accuracy: 0.01%
- ½" high (1.3cm) red LCD display indicates ON/OFF status of equipment
- Internal NiCd battery protects programs against power outages
- Three-pronged grounded receptacle relay controls equipment to 120V, 15A, 1800w, ⅓ hp
- Perform reproducible stirring, heating, or pumping times
- Manual pause switch overrides program without disturbing it and permits equipment to be instantly turned off
- Intuitive operation permits setting a program in <5 seconds
- High-impact ABS case



15-077-964 (top); 15-077-965 (bottom)

Turn-off Controller

- Counts up and turns any piece of equipment off at the end of a set time period
- Programmable in three interval settings: 0.01 to 99.99 seconds, 1 to 99 minutes, 1 to 99 hours

Repeat Turn-on/Turn-off Controller

- Counts up and turns any piece of equipment on for a programmed time and off for a different programmed time until manually stopped
- Programmable for separate on and off timing periods in three interval settings: 1 to 99 seconds; 1 to 99 minutes; 1 to 99 hours

ORDERING INFORMATION:
Dimensions: 6L × 2¾W × 3¼"H (15.2 × 7 × 8.3cm). Weight: 12 oz. (340.2g).

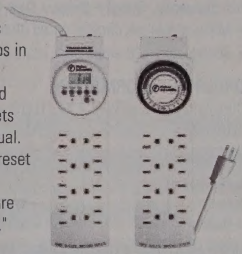
isher Scientific* Outlet Controller Strips

wo unique controllers are available



06-662-42 (left), 06-662-43 (right)

ight-outlet strips are combined with 24-hour or 7-day controller—permits urn-on of chemical, water, or air pumps in he sampling process; warming up of nstruments at preset times; automated esting, heating, or mixing. Three outlets re time-controlled and three are manual. lighted ON/OFF switch and push-to-reset ircuit breaker are included. To avoid ossibility of field failure, controllers are ested and components are "burned in."

4-hour Electromechanical ontroller
- Index pin is raised or lowered to set trip times
- Pins constantly display all time settings—one glance verifies an entire program
- Set in 15-minute increments; program repeats daily

-day Traceable Electronic Digital Controller
- Digital unit can be programmed to turn on or off any minute of the week
- Eighty-four ON/OFF switchings per week; up to 12 switchings per day
- Accuracy of 0.01%
- LCD [¼" high (63mm)] shows time of day, AM/PM, day of the week, and ON/OFF program status
- Repeat mode allows cycle repetition by day or by week
- Can even be programmed to skip weekends or other selected days
- Equipment can be switched on or off with manual override without disturbing the program
- Memory chip and display are supported during power failure by a NiCd battery
- Rugged plastic case with 4' long (1.2m) cord with three-prong grounded plug

RDERING INFORMATION:
imensions: 1½L × 3W × 9½"H (3.8 × 7.6 × 21cm). Net weight: 1 lb. (454g). lectrical Requirements: 120VAC 60Hz, 15A, 1800w.

ERTIFICATIONS:
ndividually serial-numbered Traceable Certificate is provided from an ISO 7025 calibration laboratory accredited by A2LA. It indicates traceability o standards provided by NIST*.

ontroller Type	Cat. No.	Each
4-hour	06-662-42	56.80
-day	06-662-43	61.78

Fisher Scientific* Traceable* Digital Outlet Controller

Can be programmed to turn equipment on and off any time of the day in intervals as short as one minute or as long as 168 hours

- Timing accuracy: 0.01%
- Digital display shows time, day, and event number
- LED indicates the ON/OFF mode of attached equipment
- Backup battery maintains program and clock times in case of electrical outage
- Switching capacity: 15A, 1800w
- Permits programming 14 different switchings per day allocated over four separate weekly programs
- Allows 196 ON/OFF switchings per week
- With manual override so equipment can be switched on or off without disturbing the program

06-662-24

ORDERING INFORMATION:
Dimensions: 2L × 3½W × 4"H (5 × 9 × 10cm). Electrical Requirements: 125VAC 50/60Hz, three-prong plug.

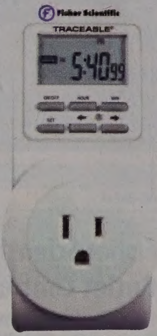
COMPLIANCE:
CSA approved and NTRL-C listed.

CERTIFICATIONS:
Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST*.

Cat. No.	Each
06-662-24	58.38

Fisher Scientific* Traceable* Electronic Programmable Controller

Program up to 14 unique switchings per day allocated over four separate weekly programs



06-662-12

Timing intervals from one minute to 168 hours. Day program allows repeating the same cycle every day of the week, weekdays only, weekends only, or any selected day.

- LCD (½" high [1.3cm]) shows the time of day, day of the week, and number of the program being used
- LED shows ON/OFF status of equipment
- Switching capacity: 125VAC, 15A, 1850w
- Simple to program—display walks you through the steps
- Six switches on the front panel control the unit
- Check an entire week's program easily in less than two minutes
- Change a setting with only one instruction
- Manual override allows you to switch equipment off or on without disconnecting from the timer and without losing program
- Impact- and chemical-resistant ABS plastic case

ORDERING INFORMATION:
Dimensions: 1¾L × 2¾W × 6"H (4.5 × 7 × 15cm). Net weight: 8½ oz. (241g). Electrical Requirements: 125VAC 60Hz.

ChronTrol* Controllers and Timers

Can be used to operate lights, valves, solenoids, pumps, motors, fans or other equipment

12:55
ChronTrol

Provide push-button control of up to four independent circuits.[1] Twenty independent ON/OFF programs assure control to the second, AM and PM, every day of the week.[2] Enter time settings at keyboard. 9V battery backup keeps time during power outages.

Each ON/OFF program includes:

- On-and-off time or duration
- Cycle repeat rate from two seconds through one year
- Weekly cycle with day omission

Outlet Models

- Equipment plugs into two or four independent 120VAC grounded outlets on rear panel
- Controls up to 15 amps per outlet

Single-pole, Single-throw Dry Contact Models

- Make and break circuits wired directly to terminal strip on rear panel
- Control up to 20 amps per circuit at 240VAC

ORDERING INFORMATION:
Dimensions: 5L × 8¼W × 4¾"H (13 × 21 × 12cm). Electrical Requirements: 120V 60Hz.

Model 451 Electronic Timer/Intervalometer

For use in lab, factory or photographer's studio

GraLab 451
START / RESET

With two separately programmable memories: one controls "on time," the other controls "off time." Use one memory for single-cycle switching timer or use both in tandem for a continuously recycling intervalometer.

- Choice of three time ranges: 1 to 99 in minutes, 1 to 99 in seconds, and 0.1 to 9.9 in tenths of a second
- Accuracy: ±0.01% at one second
- Repeatability: ±0.005% at one second
- Temperature range: 0° to 55°C (32 to 131°F)
- Two-digit LED display with floating decimal point
- Brightness easily adjusted or switched off completely using membrane control
- 120VAC outlet power rating: 600w maximum lamp load; 1200w maximum resistive load; ⅓hp maximum motor load
- Input voltage: 100 to 130VAC 50/60Hz
- Automatic reset allows same cycle or interval to be run without manual reset
- Resistant to dust
- Nonskid case can be used on table or hung on wall
- Manufactured using ISO 9001: 2000-certified processes

CERTIFICATIONS:

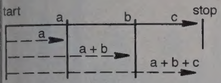
isher Scientific* Traceable* Digital Stopwatch Functions

ombinations depend on model. See individual stopwatch specifications.)

Single-action Timing: Press START button to begin timing; press again to stop clock.

Time-in/Time-out: Records total elapsed time with any number of "time-outs." Permits stopping the timer for "off" periods, holds reading where stopped, and starts again from that point.

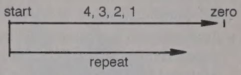
Continuous Timing: When maximum display is reached, digits roll over to zero and automatically begin timing again. Permits timing for hours, days, or weeks.



umulative Split: Freezes display r partial event times while ternal clock continues to measure tal elapsed time.

Interval Split: Yields readout of each individual time increment of connected series of events.

Memories: Capture and store separate times. Display times after the event is over.



Programmable I: Allows setting unit to count down from 10 hours to one second in 0.1-second increments. Alarm sounds at zero, and program automatically repeats.

TITRATION

POTENTIOMETRIC

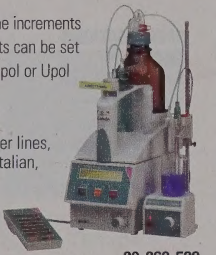
rinkmann*/Metrohm* 702 SM Titrino*

NEW

ompact, economical, versatile set-endpoint potentiometric titrator

our Versatile Modes

- MET: monotonic titration with selectable volume increments
- SET: titration to preset endpoint; two endpoints can be set
- MEAS: reads pH, potential U, temperature T, Ipol or Upol
- CAL: pH calibration with up to nine buffers



20-860-529

nformative Display, Versatile Control

- Backlit LCD is 5mm high with two 24-character lines, dialogs in English, Spanish, French, German, Italian, Portuguese, Swedish
- Keypad accesses all functions; disconnectable for routine operation via front-panel controls

ultiple Memories

- Use one titration dataset to reevaluate endpoints, recalculate
- Stores user methods
- Silo memory for series of sample data, useful for sample changer applications
- Comes with method memory for commonly applied methods

ensor Inputs

- Two high-impedance inputs for pH electrodes, ISEs
- Separate input for polarized electrode
- Input for Pt 100 or Pt 1000 resistance thermometer

xtensive Programmability and Statistical Capabilities

- Programmable to ask for sample IDs and sample size after each start of a titration
- Lets you specify start volume at beginning of titration in absolute terms (0 to 99.99mL) or as a function of sample size
- Lets you specify dosing rate for the start volume
- After addition of start volume, a reaction time can be inserted
- Up to nine formulae can be freely programmed per method; result designations can be formulated by the user in %, ppm, g/L, mg/mL, mol/L, g, mg, mL, mg/pc (mg per piece)
- Program common variables to be used in different methods, including titers, blank values, other specific results to be used in subsequent titrations
- Calculate mean value, absolute/relative standard deviation; delete a given result and recalculate statistics

Flexible Connectivity and Control Options

- RS-232-C data interface lets user print relevant data (results, endpoints, titration curve, parameters) on most IBM*-compatible printers; or pass data to a LIMS
- Connect to Sartorius*, Mettler* or Precisa* balances, alone or together with a printer

APPLICATIONS:

Set End Point applications in petrochemistry, pharmaceutical, water/wastewater/environmental testing, food and beverage testing, metals and electroplating, and many more.

ORDERING INFORMATION:

Available with stirrer and buret options as listed in table; additional accessories are available online.

Dimensions, including Exchange Unit: 5.9 × 17.7 × 10.8" (150 × 450 × 275mm). Weight, including keypad: 7.5 lb. (3.4kg). All models operate on 110V 50/60Hz.

INCLUDES:

Instrument; stirrer and buret options as shown in table; pH electrode; required cables.

Buret Capacity	Mfr. No.	Cat. No.	Each

KARL FISCHER

Brinkmann*/Metrohm* Models 756 and 831 Coulometric Karl Fischer Titrators

Compact coulometric titrators determine trace quantities of water in liquids, solids, and gases down to 10µg

Features

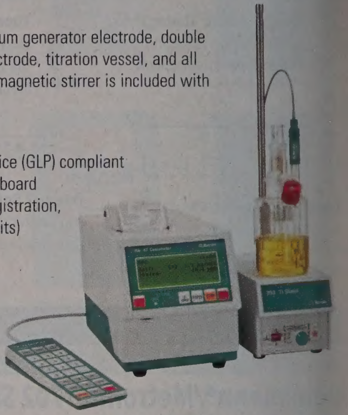
- Generate necessary reagent electrolytically in the titration vessel
- Precisely measured and controlled current allows the addition of high-resolution reagent necessary for trace moisture analysis
- Use titration time and current (two absolute values) to eliminate the need for reagent calibration or standardization
- Available with two titration cell types; cell without diaphragm reduces reagent consumption and electrode contamination, and is easy to clean (Standard cell with diaphragm is also available; see ordering chart below)
- Large-screen display for observation of real-time curves for side reactions or titration progress, or scrolling through method parameters
- Method memory creates and stores settings specifically for your samples and applications
- Dual RS-232-C interfaces connect to a balance and PC or external printer simultaneously
- **Model 756** has built-in printer
- **Model 831** requires an accessory printer for documentation
- **Model 703 Pump/Stirrer,** included with 20-815-159 and 20-814-152, aspirates KF waste and adds fresh reagent at the touch of a button without exposing the titration vessel to atmospheric moisture. Reduces personal contact with reagent

INCLUDES:

All cells include platinum generator electrode, double platinum indicator electrode, titration vessel, and all required accessories; magnetic stirrer is included with 20-815-108.

COMPLIANCE:

Good Laboratory Practice (GLP) compliant (user-level access, keyboard lockout, user-name registration, and result window limits)



756 Coulometric Titrator with 703 Pump/Stirring Stand (20-815-159)

Includes	Mfr. No.	Cat. No.	Each
Model 756 KF Coulometer with Magnetic Stirrer and Built-In Printer			
Cell without diaphragm	20 81 510-8	**20-815-108**	8410.00
Cell with diaphragm	20 81 500-1	**20-815-001**	8300.00
Model 756 KF Coulometer with Model 703 Pump/Stirrer and Built-In Printer			
Cell without diaphragm	20 81 515-9	**20-815-159**	9050.00
Model 831 KF Coulometer with Model 703 Pump/Stirrer			
Cell without diaphragm	20 81 415-2	**20-814-152**	7750.00

SPECIFICATIONS

Precision	<±3% at mg/g
Resolution/Accuracy	10–1000µg H_2O: <±3µg; >1000µg: 0.3% or better
Calibration Range	Full scale
Endpoint Time/Level	Max. 2.24mg H_2O/min.
Variable Stirrer Speed	Yes
Dimensions	12L × 10W × 8"H (30 × 25 × 20cm)
Electrical Requirements	100–240V 50/60Hz

ACCESSORIES

Accessories and Replacement Parts for Models 756 and 831 KF Coulometers

Description	Mfr. No.	Cat. No.	Each
For Model 756 KF Coulometer			
Thermal Paper; 1 roll	20 80 575-7	**20-805-757**	13.08
Thermal Paper; pack of 5 rolls	20 80 576-5	**20-807-565**	45.77
For Models 756 and 831 KF Coulometers			
Volumetric Electrode for KF Volumetric Cell (without cable)			
Double Platinum Wire Electrode	20 92 884-1	**20-928-841**	240.00
Coulometric Electrode for KF Coulometric Cell (without cable)			
Double Platinum Wire Electrode	20 92 890-5	**20-928-905**	245.92
Cable for Double Platinum Electrode	20 97 734-5	**20-977-345**	90.46
Generator Electrodes for Coulometric Cell			
Generator Electrode without diaphragm	20 92 897-2	**20-928-972**	700.00
Generator Electrode with diaphragm	20 92 896-4	**20-928-964**	760.00
Cable for Generator Electrodes	20 97 746-9	**20-977-469**	96.91

rinkmann*/Metrohm* Titrino* Model 95 Karl Fischer Titrators

uilt-in multiple method storage creates and stores p to 100 methods for different samples and reagent oncentrations

5 Karl Fischer Titrino with 703 Pump/Stirring Stand

its provide 100ppm to 100% H_2O content measuring range with duced personal contact with reagent. Large-screen display allows for sy programming and shows real-time titration curve, enabling you to ickly troubleshoot and change parameters during titration.

atures

100ppm to 100% H_2O content measuring range
Stirring begins automatically at the start of a titration and stops as soon as it is finished
Dual RS-232-C interfaces allow simultaneous connection of balance and printer or PC
Metrohm pump/stirrer aspirates Karl Fischer waste and adds fresh reagent at the touch of a button without exposing the titration vessel to atmospheric moisture

RDERING INFORMATION:

ailable accessories: Brinkmann Workcell* Titration Software for hanced data management (Cat. No. 20-810-004), Seiko* DPU-414 ermal Printer Package (Cat. No. 20-016-051).

CLUDES:

it with Metrohm pump/stirrer, cell and buret; cell includes double atinum indicator electrode, titration vessel, and all required accessories

MPLIANCE:

od Laboratory Practice (GLP) compliant (user-level access, keyboard kout, user-name registration, and result window limits)

ret Capacity	Mfr. No.	Cat. No.	Each
nL	20 85 820 6	**20-858-206**	7990.00

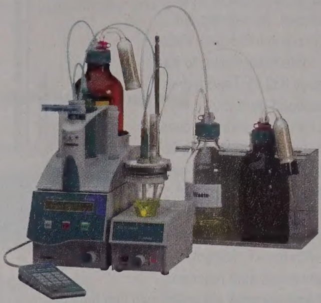
ectrical Requirements	100 to 240V 50/60Hz

Brinkmann*/Metrohm* Titrino* Model 787 Volumetric Karl Fischer Titrator

Dedicated, economical, single-method titrators for routine volumetric KF analysis



787 Karl Fischer Titrator with 703 Pump/Stirring Stand

For routine volumetric KF analysis. Units provide 100ppm to 100% H_2O content measuring range with reduced personal contact with reagent.

Features

- Automatic storage and retrieval of titer and blank values
- Calculate the result, mean, standard deviation, and relative standard deviation
- With backlit LCD for easy viewing of results
- RS-232-C interface allows connection of balance, printer, or PC
- Metrohm pump/stirrer aspirates KF waste and adds fresh reagent at the touch of a button without exposing the titration vessel to atmospheric moisture

ORDERING INFORMATION:

Available accessories: Seiko* DPU-414 Thermal Printer Package (Cat. No. 20-016-051).

INCLUDES:

Unit with Metrohm pump/stirrer, cell and buret; cell includes double platinum indicator electrode, titration vessel, and all required accessories.

Buret Capacity	Mfr. No.	Cat. No.	Each

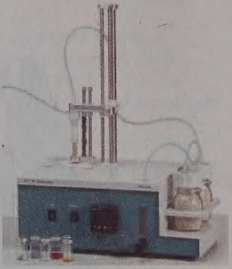
ACCESSORIES

Brinkmann*/Metrohm* KF Thermoprep 832 Drying Oven

NEW

Thermal sample preparation for use with any Metrohm Karl Fischer titrator



20-825-159

Quickly drives off moisture in solid and liquid samples, for subsequent coulometric or volumetric determination of the water content according to Karl Fischer. The new 832 KF Thermoprep has been developed from the conventional Karl Fischer drying oven for single determinations. Sample is heated in the oven and released water is transferred by carrier gas to the titration cell. Only the water enters the KF cell; sample itself does not come into contact with the KF reagent, eliminating unwanted side reactions and matrix effects. Samples are introduced into the oven in tightly sealed vials.

Refined methodology

- Sample vial (6mL) containing sample is positioned above oven and lowered into heating block
- At the same time, a double hollow needle pierces sample vial septum
- Via inlet needle, a stream of dry carrier gas (air or inert gas) is passed through heated sample
- Carrier gas, loaded with the released moisture, flows through outlet needle and connected tube directly into titration cell for Karl Fischer determination
- Depending on the sample water content, determination can be carried out either volumetrically or, at the trace level, coulometrically

Convenient features

- Temperature range, 50° to 250°C
- Manual sample introduction via tight-sealed vials
- Integrated oven heating block, gas pump, flowmeter and flow controller, and two drying flasks

Decisive advantages:

- Strictly reproducible conditions yield results with improved precision
- Manual sample preparation is reduced to a minimum
- Considerable savings in time
- No contamination of the oven by the sample; no carryover, no memory effects
- Reagent consumption is diminished, since the solvent is exchanged less frequently
- Improved water release from the sample, since carrier gas does not just pass over the sample but directly through it

COMMON APPLICATIONS:

Petrochemicals – including fuels, oils, crudes, hydraulic fluids and lubricants; polymers – including pellets, polymer/solvent mixtures, raw materials and precursors; pharmaceuticals – including powders, liquids, tablets/pills and lyophilized samples; any sample run currently using a conventional Karl Fischer oven, such as food, salts, metals, soaps and toothpaste

ORDERING INFORMATION:

Operates on 115V 60Hz. Accessories and replacements include Septa, 6mL Sample Vials, Molecular Sieve, Hollow Outlet Needle, Hollow Gas-inlet and Injection Needle; contact your Fisher Scientific Customer Service Representative for details.

Oven can be modified for use of other sample vial sizes; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

Oven, integrated gas pump, flowmeter and flow controller, and two drying flasks

Brinkmann*/Metrohm* Model 703 Pump/Stirrer

Titration stand with pump and magnetic stirrer

20-850-051

- Aspirates KF waste and adds fresh reagent at the touch of a button, without exposing the titration vessel to atmospheric moisture
- Reduces operator contact with reagent

Model Selection:

- Model for 9VDC connects directly to Metrohm Titrators
- Freestanding 110V models are for use with titrators from other manufacturers

Description	Mfr. No.	Cat. No.	Each
Model 703 for 9VDC Operation with Metrohm Titrators			
Standard model with all necessary accessories; without cell	20 85 005-1	**20-850-051**	1290.00
Model 703 for 110VDC Operation with other KF Titrators			
Standard model with all necessary accessories; without cell	20 85 003-5	**20-850-035**	1390.00
For use with standard pH electrodes; with electrode/buret tip holder	20 85 004-1	**20-850-041**	1195.00

ACCESSORIES

Seiko* DPU-414 Thermal Printer Package

Dimensions, 6$\frac{5}{16}$D × 2$\frac{3}{4}$W × 6$\frac{11}{16}$"H (16 × 7 × 17cm)

ELECTRODES

rinkmann*/Metrohm* Titrator Electrodes

hoose from glass and metal electrodes

etrohm electrodes, designed for pH, redox, and surfactant titration, are necessary for potentiometric measurements. Indicator electrodes provide a otential dependent upon the composition of the analysis solution. Combination electrodes contain both indicator and reference electrodes within e sensor.

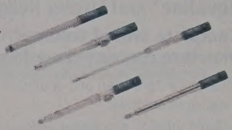
etrohm Glass pH Combination Electrodes

or aqueous and nonaqueous solvents, high-alkaline and high-temperature conditions, and w-ionic-strength solutions

- Respond to hydrogen ions in solution—ion selective for H⁺
- Ag/AgCl cartridge reference system ensures fewer diaphragm problems and provides longer life
- Ceramic diaphragm measures 1.0mm dia.; outflow rate, 5 to 25µL/h; resistant to alkali
- Internal buffer is exactly pH 7 or 0mV, simplifying pH measurements at elevated temperatures
- Allow for calibration at room temperature and measurements at a higher temperature
- Internal buffer and electrode design ensure rapid response to temperature changes and accuracy of measurements
- Wet chemical tested
- Manufacturing number for traceability and GLP/ISO documentation

INCLUDES:
Individual test certificate

REQUIRED ACCESSORIES:
Order electrode cables separately; see Accessories for Metrohm Electrodes.



Glass pH Combination Electrodes.

Aqualine* Karl Fischer Reagents

Complete line of volumetric and coulometric Karl Fischer reagents and standards required to analyze moisture content in a wide range of applications

- Carefully developed and optimized to meet the exacting demands of trace moisture analysis.
- Rapid titration and stable endpoint
- Extended product shelf life ensures stable titer, high titration speed, and accurate results
- Safer reagents are pyridine free, and less toxic with no unpleasant odor.
- Includes two nonhalogenated reagents, Electrolyte AG and Electrolyte CG

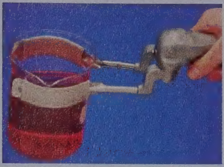
TONGS

*Fisherbrand** Deluxe Beaker Tongs with Fiberglas*-Covered Jaws

Handle beakers from 100 to 2000mL

- Stainless-steel, Fiberglas-covered jaws are 3" (7.6cm) lower than handgrip
- Hand is a safe 6" (15cm) from beaker
- Diecast aluminum handgrip
- Screw adjustment for maximum opening



02-622

ORDERING INFORMATION:
Length: 13" (33cm). Replacement Fiberglas jaw mittens available online (see 02-621)

Cat. No.	Each	Case of 10
02-622	84.85	750.85

*Fisherbrand** Beaker Tongs with Fiberglas*-Covered Jaws

Handle beakers from 100 to 1500mL

- Stainless steel

ORDERING INFORMATION:
Length: 13" (33cm)

02-620

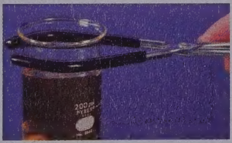
Cat. No.	Each
02-620	34.82

*Fisherbrand** Beaker Tongs

Handle beakers from 50 to 1500mL capacity

- Made of ¼" dia. (6mm) nickel-plated steel wire
- Flat riveted joint
- Plastisol*-coated jaws open to 4½" (11cm) maximum

ORDERING INFORMATION:
Length: 9" (23cm)



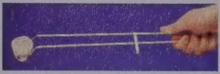
15-211

Cat. No.	Each
15-211	17.05

*Fisherbrand** Julian-Style Crucible Tongs

For crucibles in muffle furnace

- Nickel-plated steel
- Curved ends
- Compressing guide



15-210

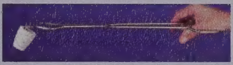
ORDERING INFORMATION:
Length: 22" (56cm)

Cat. No.	Each
15-210	62.88

*Fisherbrand** Jumbo Crucible Tongs

For grasping crucibles deep in furnace

- Fabricated with integral forefinger and thumb openings
- Handle extends into palm
- Stainless steel



15-207

ORDERING INFORMATION:
Length: 18" (46cm)

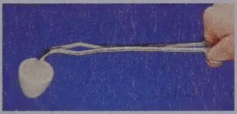
COMPLIANCE:
Meet OSHA standards

Cat. No.	Each
15-207	55.99

*Fisherbrand** Crucible Tongs with Platinum Shoes

For very high-temperature work

- Provide a contamination-free gripping surface
- Hollow platinum shoes for grasping crucibles



15-205

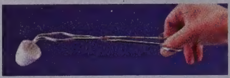
ORDERING INFORMATION:
Approx. weight: 1⁄16 oz. (2.5g)
Length: 10" (25cm)

Cat. No.	Each
15-205	807.55

*Fisherbrand** Economical Crucible Tongs

Stainless-steel tongs with nonbinding joints

- Accurately fabricated parts are flattened at the joint
- Fastened with a spun (not hammered) rivet
- Large finger openings facilitate firm grip and good control of tongs
- Corrosion resistant



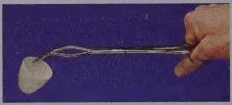
15-193

Cat. No.	Each
15-193	30.66

*Fisherbrand** Stainless-Steel Crucible Tongs

Well-balanced, strong, accurately aligned

- Precision instrument joint ordinarily found only on high-quality surgical instruments
- Carefully tapered, serrated tips meet precisely when closed
- Withstand high temperatures
- Won't rust



15-186

ORDERING INFORMATION:

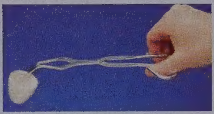
Length: 9" (23cm)

Cat. No.	Each	Case of 12
15-186	33.85	347.14

*Fisherbrand** Budget-Priced Crucible Tongs

Plated steel resists rust

- Long neck
- Serrated tips



15-200

ORDERING INFORMATION:

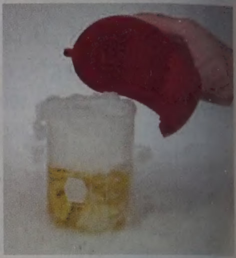
Length: 9" (23cm)

Cat. No.	Each	Case of 12
15-200	10.33	103.30

Scienceware* Hot-Hand* Protector

Pockets for thumb and fingers fit every hand size

- Silicone rubber hand protector
- Handles hot objects to 260°C (500°F)
- Handles cold objects to -57°C (-70°F)
- Gripping surface studded for positive grip
- Hole for hanging

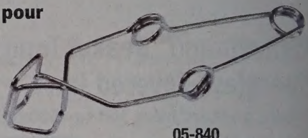


11-394-300

Mfr. No.	Cat. No.	Each	Case of 24
38000-0000	**11-394-300**	20.65	396.50

Test Tube Clamps

Easy to carry and pour



05-840

- Stoddard-style clamps
- Self-closing, rectangular jaw

ORDERING INFORMATION:

Jaw opening: up to 1" (25mm)

Length: 5" (12.7cm)

Type	Jaw Construction	Cat. No.	Each	Pack of 12
With finger grips	Nickel-Plated Steel Wire	**05-840**	24.10	245.80
Without finger grips	Plain Brass Wire	**05-841**	24.15	246.35

*Fisherbrand** Instrument Repair Kit

All the tools you need for design, research, maintenance, repair and service requirements

15-230

- Professional tool kit includes 46 precision-engineered tools (see list at right) on two removable, custom-fitted pallets
- Sturdy case covered with simulated black top-grain leather
- Large, extra-heavy vinyl pocket in lid holds catalogs, manuals
- Partitions create ample space in bottom for power tools, meters, and other equipment

RDERING INFORMATION:

ase is 14½L × 19W × 6"H (37 × 48 × 15cm). Net weight, 20 lb. (9kg).

ARRANTY:

ools have full lifetime warranty.

escription	Cat. No.	Each
nstrument Repair Kit	15-230	1005.94

Kit contains the following tools:

7 Hollow-shaft Nut Drivers:

Socket sizes of ³⁄₁₆, ¼, ⁵⁄₁₆, ¹¹⁄₃₂, ⅜, ⁷⁄₁₆, and ½"

18 Screwdrivers:

⅛" slotted
#0 Phillips
¼" slotted stubby
#1 Phillips
#1 Phillips stubby
#2 Phillips
¼" slotted, cushion grip
¼" Bull Driver*
#2 Phillips, cushion grip
#1 square recess
#2 square recess
⁵⁄₃₂" clutch head Frearson
Reversible ³⁄₁₆" slotted × #1 Phillips
Reversible ¼" slotted × #2 Phillips
⅛" slotted tip, screw holding
³⁄₁₆" slotted tip, screw holding
¼" slotted tip, screw holding
Phillips tip, screw holding

2 Wrenches:

6" adjustable
⅜ × ⁷⁄₁₆" ratcheting box

7 Pliers:

5" diagonal
6½" adjustable
6" diagonal
4" electronic chain nose
6" needle nose
6" long nose
4" electronic diagonal

Electronic Tools and Testers:

Adjustable wire stripper and cutter
Crimping tool with bolt slicer
Continuity tester with wire lead and clip
100-500 volt twin lead tester
6/24 volt tester

Problem-solving Tools:

Folding hex key wrench set
Slotted-tip offset screwdriver
Phillips-tip offset screwdriver
3-in-1 tapping tool
Spring tool
External snap-ring pliers
Magnetic screwdriver

*Fisherbrand** Original Labtool

Compact, folding multiuse tool meets hundreds of laboratory needs

- Scores/breaks glass tubing; opens septas and bottles; cuts stoppers and tubing; and much more
- Stainless steel

ORDERING INFORMATION:

losed length, 4" (10cm).

15-226-1

INCLUDES:

Large/medium/small slot and Phillips screwdrivers, knife blade, file, opener, saw, inch/millimeter ruler, needle-nose pliers, grippers, wire cutters, serrated blade, and nut driver

Cat. No.	Each
15-226-1	88.36

*Fisherbrand** Tool Kit

High-quality, precision-made tools

- 13 tools organized in heavy blue vinyl case with clear, heavy-duty vinyl compartments
- Tool Kit rolls and ties shut for compact storage
- Can be hung on wall with its three metal grommets
- Tool handles are cushioned in heavy rubber

Fisherbrand

15-226

ORDERING INFORMATION:
For replacement tools, contact your Fisher Scientific Customer Service Representative.

Description	Cat. No.	Each
Tool Kit	**15-226**	232.44

† Replacement not available individually.
‡ Additional batteries available from stock as Cat. No. 17-926C.

Kit contains the following tools:
6 Screwdrivers
Jeweler's
4 × 3/16", rubber grip
4 × 1/4", rubber grip
6 × 1/8"
Offset, 1/4"
Phillips #1, 3" long, rubber grip
3 Pliers
Utility, 7" long, rubber grip
Slip-joint, 6" long
Long-nose Side, 6" long, rubber grip
Adjustable Wrench
6" long, insulated grip
Folding Hex Key Set †
8 keys from 0.050 to 5/32"
Contact Burnishing Tool
Penlight
With pocket clip and 2 "AA" batteries‡

TRANSFECTION

CELLS

Genlantis* MaxPAK* Competent Mammalian Cells

NEW

The world's first commercially available competent mammalian cells

Ideal for both protein production and high-throughput testing of expression constructs. MaxPAK cells are not genetically modified and perform better than your routinely cultured cells without needing two days to prepare.

- Simply thaw cells, plate and transfect
- No cell passing—3 hr. incubation after thawing
- Revolutionary cell culture technology for achieving 4X more cell density, results in higher protein yield
- Start and finish your experiment in hours instead of days
- Available cell lines: HeLa, HEK 293, CHO-K1
- Comparable to competent *E. coli* cells

ORDERING INFORMATION:
Each kit contains four ampules of cryopreserved MaxPAK Mammalian Competent Cells (approximately 2.5 × 10^6 cells suspended in 0.5mL medium) and 90mL of MaxPAK Plating Medium (Incomplete).

STORAGE CONDITIONS:
Store at -80°C. Store in an area of the freezer where there is minimal temperature fluctuation. Cells can also be stored in the vapor phase of liquid nitrogen. The MaxPAK Plating Medium (Incomplete) should be stored at 4°C. Do not freeze the medium. All components are stable for six months if stored properly.

Description	Quantity	Cat. No.	Each
HeLa S3 Cells	4 vials (10 million cells)	**C501300**	236.32
CHO-K1 Cells	4 vials (10 million cells)	**C502300**	236.32
HEK 293 Cells	4 vials (10 million cells)	**C503300**	236.32

REAGENTS AND KITS

Mirus Bio *Trans*IT*-LT1 and -LT2 Transfection Reagents

A broad spectrum, low toxicity, DNA transfection reagent

- Broad spectrum DNA delivery—utilize one transfection reagent and protocol for a variety of cells
- Low cellular toxicity—maintain cell density and reduce experimental biases
- High efficiency delivery—achieve expression in a large population of cells for experimental success
- Deliver single or multiple plasmids—suitable for many applications such as gene expression, siRNA/shRNA expression, viral production, and promoter analysis

STORAGE CONDITIONS:
Store for one year at 4°C or -20°C.

lirus Bio *Trans*IT*-Express ransfection Reagent

ecommended for high-throughput applications

- Combine an optimized reagent and a streamlined protocol for maximum speed and efficiency
- DNA/reagent complexes can be added directly to cells in complete media at any time in seeding cells) and do not have to be removed after transfection
- Supplied as a ready-to-use ethanol solution
- Performs 5000 transfections in 96-well plates per milliliter of reagent
- Cell lines successfully transfected include COS-7, HeLa, HEK293, and NIH3T3

'ORAGE CONDITIONS:
n be refrigerated at 4°C or frozen at -20°C for up to one year.

LOOKING FOR REPORTER SYSTEMS?
A wide selection of reporter systems can be found in the Cell Biology section.

Mirus Bio *Trans*IT-HeLaMONSTER* Transfection Kit

Enhances the overall transfection efficiency of HeLa cells[1]

Each milliliter of reagent performs up to 500 transfections in 35mm plates.

INCLUDES:
Pair of reagents, each supplied as ready-to-use ethanol solutions.

STORAGE CONDITIONS:
Can be refrigerated for up to one year at 4°C (do not freeze).

Quantity	Cat. No.	Each
0.4mL	**MIR 2904**	183.18
1mL	**MIR 2900**	282.85

---

[1] *For best results, transfections should be performed in a complete growth medium and the media change eliminated*

Mirus Bio *Trans*IT*-CHO Transfection Kit

Developed for high transfection efficiency and cell viability in CHO-K1 cells

- Produces 50 to 60% efficiency using green fluorescent protein (GFP) as a reporter[1]
- One milliliter provides sufficient reagents to perform up to 500 transfections in 35mm dishes
- Quality control tested on a standard CHO-K1 cell line

Mirus
Gene Transfer Specialists
www.genetransfer.com

MIR 217 Series

INCLUDES:

Trans IT-CHO reagent and CHO Mojo reagent, both supplied as ready-to-use ethanol solutions.

STORAGE CONDITIONS:

Store for one year at -20°C.

Quantity	Cat. No.	Each
0.4mL	**MIR 2174**	183.18
1mL	**MIR 2170**	282.85

[1] *Transfections should be performed in serum-containing media, with no media change.*

Mirus Bio *Trans*IT*-COS Transfection Kit

Designed for high transfection efficiency in COS-7 and COS-1 cells

- Results in 90 to 95% efficiency using green fluorescent protein (GFP) as a reporter[1]
- One milliliter provides sufficient reagent to perform up to 500 transfections in 35mm dishes
- Quality control tested on a standard COS-7 cell line

Mirus
Gene Transfer Specialists
www.genetransfer.com

MIR 219 Series

INCLUDES:

Trans IT-COS reagent and COS Boss reagent, both as ready-to-use ethanol solutions.

STORAGE CONDITIONS:

Store for one year at -20°C.

Quantity	Cat. No.	Each
0.4mL	**MIR 2194**	189.28
1mL	**MIR 2190**	293.28

[1] *Transfections should be performed in serum-containing media, with no media change.*

Mirus Bio *Trans*IT*-293 Reagent

Designed for optimal plasmid DNA transfection in HEK293 cells

- Supplied as a ready-to-use ethanol solution
- Performs 500 transfections in 35mm plates per milliliter of reagent

STORAGE CONDITIONS:

Can be refrigerated for up to one year at 4°C (do not freeze).

Quantity	Cat. No.	Each
0.4mL	**MIR 2704**	173.00
1mL	**MIR 2700**	265.00
5 × 1mL	**MIR 2705**	1186.00
10 × 1mL	**MIR 2706**	2241.00

Mirus Bio *Trans*IT*-3T3 Transfection Kit

Designed for high transfection efficiency with minimal cellular toxicity in NIH 3T3 cells

- Produces 55 to 65% efficiency using green fluorescent protein (GFP) as a reporter[1]
- One milliliter provides sufficient reagents to perform up to 500 transfections in 35mm dishes
- Quality control tested on ATCC* 3T3 cells

Mirus
Gene Transfer Specialists
www.genetransfer.com

MIR 218 Series

INCLUDES:

Trans IT-3T3 Reagent and 3T3 Authority Reagent, both as ready-to-use ethanol solutions.

STORAGE CONDITIONS:

Store for one year at -20°C.

Quantity	Cat. No.	Eac
0.4mL	**MIR 2184**	183.1
1mL	**MIR 2180**	282.8

[1] *Transfections should be performed in serum-containing media, with no media change.*

Takara* RetroNectin* Reagent

Significantly enhances retrovirus-mediated gene transduction into mammalian cells when coated on the surface of dishes or flasks

RetroNectin is a chimeric peptide of human fibronectin produced in *E. coli* and consisting of three binding domains. Its enhancement of gene transduction is hypothetically attributed to the colocalization of retroviral particles and target cells.

- Available as a lyophilized protein or precoated dishes

STORAGE CONDITIONS:

Store lyophilized protein at -20°C; dishes at 4°C.

Description	Quantity	Cat. No.	Ea
Lyophilized Protein	0.5mg	**TAK T100A**	164.
	2.5mg	**TAK T100B**	633.
Precoated Dishes	10 dishes	**TAK T110A**	325.

TRANSFORMATION

Fisher BioReagents* *TransMax** Competent Cells

Recommended for Blue/White screening and standard cloning applications

TransMax competent cells are produced according to rigorous quality control standards to ensure dependable performance and lot-to-lot consistency. Transformations are performed, at least in triplicate, to verify efficiency specifications using pUC19 plasmid DNA.

BP4001-1

- recA1 and endA1 markers minimize recombination and improve plasmid quality and yield
- Superior quality and consistency; equivalent to widely used host cells such as DH5α and DH10B
- Offered in a wide range of efficiencies (10^7 to 10^{10}) and formats (both tubes and 96-well plates)
- 96-well plates are ideal for high throughput cloning applications
- Both electrotransformable and chemically competent cells are available

APPLICATIONS:

Recommended for Blue/White screening and standard cloning applications, cloning PCR fragments, complex ligations, in vitro mutagenesis, cDNA and genomic library construction

STORAGE CONDITIONS:

Stable for two years at -70° C.

Genlantis* TurboCells* BL21 Competent Cells

High-level *E. coli* expression using three-minute transformation protocol

- Achieve high-level recombinant protein expression with the T7 expression system
- No hour-long recovery step or inconvenient 42°C water bath
- Convenient and efficient single-use packaging
- Two useful genotypes

STORAGE CONDITIONS:
Store TurboCells BL21 at -70°C and Transformation Buffer at room temperature.

Description	Quantity	Cat. No.	Each
BL21 (DE3) Competent *E. coli*	20 × 50µL	**C302020**	196.10
BL21(DE3) pLysS Competent *E. coli*	20 × 50µL	**C303020**	196.10

Genlantis* SMARTCells* Competent Cells

Competent *E. coli* for the highest transformation efficiency of ligated DNA

- Optimized for difficult-to-transform ligated DNA
- Ideal for all miniprep DNA experiments
- Obtain maximum efficiencies at different DNA concentrations
- Easy-to-use format and protocol
- Provides the high transformation efficiencies using less-than-ideal conditions of post-ligation DNA

STORAGE CONDITIONS:
Store at -70°C.

Description	Cat. No.	Eac
SmartCells; For TAP cloning	**C100100**	135.76
SmartCells	**C101020**	191.07
SmartCells F'	**C101120**	191.07

Promega* JM109 and HB101 Competent Cells

Ready-to-use preparations provide convenient, efficie transformation

- Include positive control for reliable performance
- Each cell type is available in two preparations: High Transformation Efficiency (greater than 10^8cfu/µg); or Subcloning Efficiency (greater than 10^7cfu/µg)
- Versatile: Use JM109 cells for subcloning, T-vector cloning, blue/white screening, production of single-stranded DNA from phagemids; HB101 cells are recommended for cloning in vectors that do not require alpha-complementation for blue/white screening
- Safe: recA-mutation prevents undesirable recombination events; endA-mutation in JM109 cells prevents carryover nuclease in miniprep DN

STORAGE CONDITIONS:
Store at -70°C.

TRANSILLUMINATORS

pectroline* Ultraviolet Transilluminators

pical peak UV intensity of 9000 to 6000μw/cm^2 (6000 4500μw/cm^2 on dual-light models) produces brilliant uorescence and high clarity

11-992-84

ledium-wave 312nm UV light irtually eliminates transmission of estructive 254nm radiation

pecial diffusing screen on all 12nm and 365nm models ensures niform light distribution for mproved photographic results

oth dual-light and variable intensity models come with a hinged V-blocking cover and ON/OFF switches

ariable-intensity models provide both the highest intensity and the ongest sample preparation time

ixed-intensity models are equipped with either an ON/OFF switch or a imer that serves both as an ON/OFF switch and allows presetting of the V exposure time

DERING INFORMATION:

ailable in 120V 60Hz, 230V 50Hz, 240 50Hz or 100V 50/60Hz versions ecify voltage when ordering)

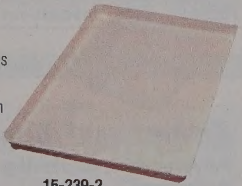
TRAYS AND TROUGHS

FIBERGLASS/GLASS

Fiberglass Safety Tray for Reagents

Lightweight tray resists acids, mild alkalis, and most solvents

- Rounded edge contains spills
- Won't corrode or warp
- Strong enough to carry several bottles
- Excellent dimensional stability
- Clean with steam or heat sterilization



15-239-2

ORDERING INFORMATION:

Outside dimensions: 30L × 20W × 2"H (76 × 51 × 5.1cm)

COMPLIANCE:

Meets OSHA requirements.

Cat. No.	Each
15-239-2	96.69

Pyrex* Glass Drying Trays

Designed for use as drying, staining, or developing trays

- Can be used with paper or gel electrophoresis or paper chromatography
- Autoclavable

NOTE:
Do not place over direct heat; for oven use only

Clockwise from top: 15-242-C, 15-242-D, 15-242-B, 15-242-A

Chemical-Resistant Multipurpose Trays and Pans

Ideal for soaking, cleaning, autoclaving, storing, or carrying lab products and containing spills

- Reinforced white thermoset polyester composite construction
- Resistant to most detergents, mild acid and alkaline solutions, corrosive salts, and many reagents
- Withstand temperatures from -40° to +121°C (-40° to +250°F) continuous exposure or 149°C (300°F) intermittent
- High load-bearing capacity
- Excellent dimensional stability
- Easily steam cleaned

TUBES

CENTRIFUGE—PLASTIC

*Fisherbrand** 50mL Higher-Speed Easy Reader Tubes

Withstand higher speeds than other Easy Readers—up to 9400×G

Key Features

- With black graduations and white marking area
- With conical bottoms
- Made of durable, chemical-resistant, clear polypropylene
- Black printed graduations are marked in 5mL increments from 5 to 50mL; a large white marking area makes labeling samples easy
- Tubes are sterilized by gamma radiation

06-443 Series

Two Cap Styles

- Both styles offer secure, leak-resistant seals
- Blue plug-seal closure features double-start thread design for an exceptionally tight seal
- Flat-top caps offer faster handling and allow you to label the top of the tube

ORDERING INFORMATION:
Available packaged in foam racks or in bulk packs.

- Hinged, flip-top cap provides easy, single-hand opening and closing
- Leakproof (see definition below) and airtight
- Use 50mL tubes up to 9500×G; 15mL tubes withstand forces up to 8500×G
- White writing area, printed volume markings, and graduations
- Compatible with any fixed-angle or swing rotor

12-565-800 Series

ORDERING INFORMATION:

Tubes are sterile and are supplied in a bulk pack (sleeve) or a rack.

O.D. × L (cap closed)	Packaging	Mfr. No.	Cat. No.	Case of 500
15mL				
17 × 121mm	50/sleeve	362694	**12-565-801**	171.16
17 × 121mm	50/rack	362695	**12-565-802**	181.49
50mL				
28 × 116mm	50/sleeve	362696	**12-565-803**	233.36
28 × 116mm	50/rack	362697	**12-565-804**	243.68

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nunc* 15mL Graduated Tubes

Fit a wide range of fixed and swing rotors used in research or medical labs

- Conical bottoms
- Polypropylene or polybutadiene styrene tubes with high-density polyethylene screw caps
- Frosted writing area and flat, leakproof (see definition above) cap
- Clear molded graduations on conical portion of tube from 0 to 1mL in 0.1mL subdivisions; remaining portion of tube has graduations printed in white from 1.5 to 14.5mL in 0.5mL subdivisions
- Autoclavable polypropylene has excellent resistance to many solvents, withstands a wide range of temperatures from -20° to +125°C (-4° to +257°F), and is RNase- and DNase-free
- Nonpyrogenic polybutadiene styrene has excellent clarity for easy viewing and withstands temperature to 90°C (194°F)
- Screw caps and polybutadiene styrene tubes not autoclavable
- Cap and both tubes are suitable for freezing
- Sterilized with gamma radiation

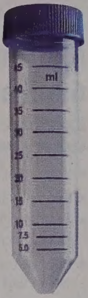
Tested in a conical-shaped rotor cavity or with a conical adapter.

D* Falcon* BlueMax* 50mL raduated Tubes

aps have level labeling area and a unique read design for easy one-handed manipulation



14-432-22

- Conical bottoms
- Clear polypropylene or modified polystyrene
- Polypropylene tubes withstand exposure to a range of temperatures, provide excellent solvent resistance
- Standard polypropylene tubes can be centrifuged to 9400×G
- Polystyrene tubes can be centrifuged to 2000×G
- Graduations from 5 to 10mL in 2.5mL increments and 10 to 50mL in 5mL increments
- Large white writing area
- Fit a variety of centrifuge rotors
- Sterile, nonpyrogenic and packaged in bags or foam racks made from expanded polystyrene

ICLUDES:

lyethylene flat-top screw caps

WARNING

May not be liquidtight during high-speed centrifugation

Nalgene* Oak Ridge High-Speed 35mL Graduated Tubes

Excellent for separations and pelleting required in cell culture work and microbiology

- With conical bottoms
- Can withstand forces to 50,000×G
- Feature silk-screened graduations from 5 to 35mL in 1mL increments
- Supplied with linerless, polypropylene screw closure which will not leak during ordinary use
- For a more secure seal, see 05-563-2B (p. 1856)
- Polycarbonate tubes feature white graduations and are transparent for easy viewing
- Polypropylene copolymer tubes are translucent and offer better chemical resistance than polycarbonate
- Both tubes require white polycarbonate tube adapter (see 01-003-13 below) to centrifuge
- O.D. × L: 28.2 × 114mm

05-579-31

ORDERING INFORMATION:

To assure leakproof service (see definition p.1852), especially at speeds greater than 10,000×G or when spinning hazardous materials, use Nalgene sealing cap assemblies 05-563-1B or -1C (p.1856)

INCLUDES:

Supplied with linerless, polypropylene screw closure which will not leak during ordinary use.

REQUIRED ACCESSORIES:

Both tubes require white polycarbonate tube adapter (see 01-003-13 belo to centrifuge.

Actual brim capacity, 43mL.

Measurement includes cap.

Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, nverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

WARNING

Must be filled to 80% of total capacity for centrifugation

LOOKING FOR RACKS?

Fisherbrand* Vinyl-Coated Wire Racks are made of heavy-gauge steel for excellent chemical resistance. For details and ordering information, see the Racks section.

Nalgene* Oak Ridge High-Speed Polycarbonate Centrifuge Tubes

Use at up to 50,000×G

- Withstand temperatures from -135° to +135°C (-211° to +275°F)
- Round bottom, with leakproof (see definition, left) polypropylene screw caps or sealing caps
- Autoclavable; transparent

05-529 Series

ORDERING INFORMATION:

Optional sealing caps for 05-529B, C, and E tubes are available; see 05-563-2B and -2C, p.1856.

CENTRIFUGE—MICRO

*Fisherbrand** Premium Microcentrifuge Tubes

Flat-top snap caps provide a safe, liquid-tight, reliable seal even with prolonged boiling

- Choose from 0.5, 1.5, or 2.0mL tubes
- Made of high-clarity polypropylene
- Withstand forces up to 30,000xG
- Easy-open caps with needle insertion spot and textured marking area
- Labeling area on tube exterior
- Graduated: for 0.5mL tubes, 0.1mL markings; 1.5mL tubes, 0.1 and 0.25mL; 2.0mL tubes, 0.25mL

05-408 Series

- Highly polished interior for maximum sample recovery
- Temperature range of -80° to +121°C
- Fit all standard rotors
- Nonpyrogenic
- Autoclavable at 121°C/15psi for 15 minutes

ORDERING INFORMATION:
Available in eight colors or in assorted-color packs.

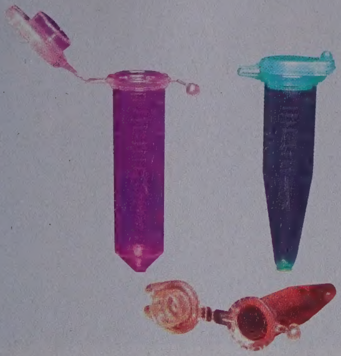
*Fisherbrand** Locking-Lid Microcentrifuge Tubes



02-681-297 (left), 02-681-282 (right), 02-681-278 (bottom)

Convenient, pierceable locking lids snap into place with one-handed operation

- Polypropylene tubes with flat tops
- Ideal for sample-handling applications, including centrifugation, boiling and freezing of specimens, incubation and storage
- With graduation marks for volume estimation

NOTE:
Centrifuges that develop excessive heat may damage this tube.

*Fisherbrand** Siliconized/Low Retention Microcentrifuge Tubes

Snap-cap lid provides a secure seal—even over extended periods

- Manufactured from durable chemical-resistant polypropylene
- Available in three sizes: 0.6mL, 1.5mL, and 2.0mL
- Fully graduated with a frosted writing area for easy marking
- 0.6mL tube is graduated in 0.2mL increments; 1.5mL tube, in 0.5mL increments with an additional graduation at 0.1mL; and 2.0mL size, in 0.5mL increments
- Designed for use in critical applications where minute sample recovery is important
- Withstand speeds up to 30,000×G
- Recommended for freezer-to-centrifuge use
- Autoclavable up to 120°C and withstand freezing temperatures as low as -80°C

Fisherbrand* Microcentrifuge Tubes with Tether Cap

Reduce sample contamination by keeping cap with tube

Natural-colored polypropylene tubes include leash-and-loop tether. Ultragrade polypropylene caps are fitted with ethylene/propylene O-rings. Available sterile or nonsterile with round or skirted bottoms.

- Removable tether rotates freely for easy opening and closing
- O-ring forms positive seal with tube to reduce leakage
- Frosted writing area
- Withstand 20,000×G
- Suitable for vapor-phase liquid nitrogen storage, boiling and autoclaving

ORDERING INFORMATION:

Nonsterile tubes come separate from tether cap. Sterile tubes come attached; 500 per pack.

Eppendorf* Snap-Cap Microcentrifuge Safe-Lock* Tubes

Polypropylene tube with patented locking cap

- Positive sealing cap snaps shut for sample incubation, storage, and transportation
- Can be easily and single-handedly opened
- Flat-top cap provides an ideal writing surface for sample identification
- Tubes are autoclavable, when opened, at 121°C (250°F), 20 minutes
- Volume graduation scale
- Rated to 30,000×G
- Choose from six colors, including amber for light-sensitive samples

05-402-25

CULTURE—PLASTIC

*Fisherbrand** Nonsterile Plastic Tubes

Extra-heavy wall construction

NEW

- Round bottom
- Made from tough, translucent polypropylene or clear polystyrene
- Special molding avoids leaks and cracks
- 12 O.D. × 75mm long tube has 5mL capacity and heavier wall than competitive tubes
- Slight lip at top provides seal when used with Cat. No. 14-961-12 Snap Cap (see our Web site)

14-961-20

† Tubes are oriented in one direction within box for easier, safer use.

*Fisherbrand** Sterile Plastic Tubes

Ideal for tissue culture procedures

NEW

- Gamma irradiated and tested for sterility; ready to use
- No chance of residual contamination
- All screw-cap tubes have outside threads and unconstricted necks, making filling and pipetting easier
- All snap caps can be positioned for aerobic or anaerobic applications

Corning* Polystyrene Disposable Culture Tubes

Available treated or untreated

- Tissue culture-treated tubes are available in polyfoam racks of 50 tubes; untreated tubes are bulk packed 25 per bag
- Reference mark on tubes helps position cap
- Sterile
- O.D. × L: 16 × 125mm

14-959 Series

INCLUDES:

Plug-seal screw caps

Type of Tube	Mfr. No.	Cat. No.	Case of 500
Treated	430172	**14-959-15**	320.25
Untreated	430157	**14-959-14**	320.68

Corning* Costar* Brand Cluster Tube System

Ideal for harvesting cells, cell uptake and receptor binding assays, and radioimmunoassays

NEW

- Convenient for large-volume transfer and collection from microtitration plates
- Useful with single- and multi-channel pipetters and in robotic workstations and centrifuges
- 1.2mL individual tubes or breakaway strips of eight tubes; microtitration plate format
- Assembled in 12- or 96-tube racks†
- Both tubes and racks are autoclavable clarified polypropylene

07-200-300 Series

APPLICATIONS:

Ideal for harvesting cells, cell uptake and receptor binding assays, and radioimmunoassays

† 07-200-317 and 07-200-318 are supplied without racks.

Thermo Scientific* ABgene* 2DCypher* Twist-Lock Tube Rack with Tubes and Caps

deal for sample collection and storage of DNA, blood, cell lines, and tissue

AB-1248

- Suitable for storage at -20°C, -80°C and in vapor phase liquid nitrogen†
- Encapsulated 2D Matrix* code on each tube base provides robust sample management and tracking; all codes guaranteed to be unique
- Matching castellations on rack and tube allow caps to be applied and removed from tubes while still located in the rack
- Caps made of a proprietary inert polymer that increases seal strength at cold temperatures
- Internal thread design "locks in" with the cap in two distinct positions, providing robust 100% sealing down to -196°C
- Tubes and caps can be easily handled and accessed using Twist-Lock Cap-It (included) or Twist-Lock Tool (available separately through your Fisher Scientific Customer Service Representative)
- Tube working volume 900µL when capped (810µL recommended when freezing)
- Low height maximizes freezer space
- All components cleanroom produced and contamination free

COMPLIANCE:

Comply with SBS guidelines

Cat. No.	Price
AB-1248	692.00

† Immersion of tubes and racks in liquid nitrogen introduces safety and contamination risks. Recommended storage is in vapor-phase liquid nitrogen only.

Thermo Scientific* ABgene* 2DCypher* Cluster Tubes and Racks

Designed for high-throughput, individual sample identification

ubes are compatible with robotic systems. Labeled with a Data Matrix* and uman readable code encapsulated in clear polypropylene window to protect gainst abrasion and chemical solvents (including DMSO). Over 3.6 × 1015 nique code combinations; codes can be scanned while racked.

- Flat V internal well minimizes dead volume
- Lockable lid; sealable
- Temperature range -170° to +120°C
- Alphanumeric grid referencing molded into rack lid
- Grid-referenced racks have an alphanumeric grid-reference that corresponds to the tube's position in the rack
- Available loose (case of 960 tubes) or in heavy-duty rack (10 racks of 96 per pack) in microplate format with SBS footprint

0.65mL Cluster Tubes and Racks

Available packaged in low profile rack

AB1186

- Rack features a square well entrance for maximum placement area
- Tubes are supported at the base while still allowing scanning of codes in the rack

Description	Plug Type	Cat. No.	Price
10 Racks of 96 tubes	None	AB-1186	363.59
10 Racks of 96 tubes	Septum	AB-1187	759.48
960 Loose tubes	None	AB-1188	335.71

1.2mL Cluster Tubes and Racks, MK5

MK5 rack features a tapered well entrance to aid tube placement

- Stacking shoulders have been removed from rack for compatibility with certain robotic instruments
- With flat, V-shaped well, rounded end caps

Description	Plug Type	Cat. No.	Price
10 Racks of 96 tubes	None	AB-1185	363.59
10 Grid-referenced racks of 96 tubes	Septum	AB-1180	613.80

1.2mL Cluster Tubes and Racks, MK3

MK3 rack features stacking shoulders to allow racks to be stacked when open

Description	Plug Type	Cat. No.	Price
Flat, V-Shaped Well, Square End Caps			
10 Racks of 96 tubes	None	AB-1047	363.59
	Septum	AB-1048	613.80
Flat, V-Shaped Well, Round End Caps			
960 Loose tubes	None	AB-1150	335.71
Round Well, Square End Caps			
960 Loose tubes	None	AB-1054	335.71

Thermo Scientific* ABgene* Grid-Referenced Cluster Tube Racks

Lockable lid and silicone tube plugs for security during transport

AB-1260

- 96 individual 0.65 or 1.2mL tubes
- Alphanumeric grid-referencing molded into the rack and lid
- Temperature range -170° to +120°C
- Heavy-duty rack in a microplate format and in accordance with SBS footprint
- Stackable with or without lid
- Open bottom to allow full robotic access to micro-tubes—each tube is fully supported to withstand pressure applied by robotic systems
- Sealing options include MULTISIP* septum plugs, silicone tube plugs, storage plate cap strips (see following page)

ORDERING INFORMATION:

Supplied in packs of 10 racks, 96 tubes each

Description	Cat. No.	Price
1.2mL Grid-Referenced Cluster Tube Rack	AB-0977	233.33
0.65mL Grid-Referenced Cluster Tube Racks and MULTISIP* Plugs	AB-1260	524.47

Thermo Scientific* ABgene* 1.2mL Microtubes and Cluster Rack

Ideal for storage and screening applications

- 96 individual 1.2mL tubes in heavy-duty rack in a microplate format (tubes also available loose in bags of 1000)
- Temperature range -170° to +120°C
- Open bottom allows full robotic access to microtubes
- Alphanumeric grid-referencing molded into rack and lid
- Beveled corner for one-way fit
- Seal with MULTISIP* Septum Plugs, Silicone Tube Plugs, or Storage Plate Cap Strips (below)

Description	Cat. No.	Price
1000 Individual Tubes	**AB-0672**	49.47
10 Racks of 96 Tubes	**AB-0595**	59.53

ACCESSORIES

Thermo Scientific* ABgene* Storage Plate Cap Strips

Permit simultaneous sealing of eight wells

AB-0981

- Strips of eight caps for sealing storage plates and racked cluster tubes
- Each cap individually numbered, with low profile for increased well volume and end tabs for easy removal
- Use with microplates, 0.8mL storage plates, 1.2mL round-well storage plates, or 1.2mL cluster tube range

Cat. No.	Case of 120
AB-0981	49.32

Thermo Scientific* ABgene* Silicon Tube Plugs

Individual plugs for sealing cluster tubes

- Can be individually pierced up to 50 times
- High chemical resistance, including DMSO
- Excellent temperature stability (-80° to +200°C)
- Fully autoclavable

Cat. No.	Case of 1000
AB-0971	198.91

Thermo Scientific* ABgene* MULTISIP* Split Septum Plugs

Unique patented split septum design

AB-0972

- Individual plugs made from an inert polymer
- Pierceable with standard pipetting equipment
- 96 plugs can be pierced simultaneously
- 100% resealing even after 200 piercings
- Less than 4N pierce pressure
- Solvent resistant, including acetonitrile and DMSO (for long-term storage with DMSO, samples should be stored at 4°C or below)
- Temperature range -170° to +120°C; fully autoclavable
- Apply 96 plugs individually with the Cap-It tool

Description	Cat. No.	Each
7mm Plugs; 1000/Case	**AB-0972**	318.55
10mm Plugs; 1000/Case	**AB-1065**	915.88

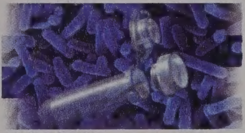
NCLUDES:

crew caps

ackaging	Mfr. No.	Cat. No.	Case of 500
5/bag	353033	**14-959-45**	326.70

ppendorf* Lid$_{Bac}$* Reusable Plastic ulture Tubes

nable growth of miniprep bacterial cultures in same ube needed for preparation



05-402-98

onsist of a gas-permeable, ydrophobic, 0.2µm pore-size embrane lid which is impermeable bacteria and a 2.0mL Eppendorf afe-Lock* microcentrifuge tube. Can e used easily for almost all xperimental steps, including entilation and drying, without transferring the sample to a new container.

ey Features

- Tubes can be centrifuged at 16,000×G when sealed with the membrane lid
- Reduce plastic waste associated with bacterial cultivation
- Tubes and membrane lid are produced in an automated manufacturing process and can be used directly for bacterial cultivation if handled under clean conditions
- Open tube and the lid can be autoclaved at 121°C without function being adversely affected
- Lid is compatible with all 1.5 and 2.0mL Eppendorf Tubes

uperior Bacterial Cultivation

- Reduce culture volumes needed
- Require the same cultivation period for *E. coli* and other bacteria as that required for 5mL cultures in other culture vessels and produce the same bacterial densities
- Increased shaker velocity is recommended for use in standard shakers; should mixing movements cause the culture medium to come into contact with cap membrane, its hydrophobic properties will prevent any adverse effect on gas exchange

fficient Lyophilization

- Protects samples from infiltration by foreign particles that are present in the freeze-drying unit, typically eliminating the need for expensive decontamination methods
- Following lyophilization, the tube can be sealed with its lid, and rewetting can be limited to <0.1% of the weight of the lyophilisate for a 20-day period if the tube is stored in a freezer
- When used to dry sample material in concentrators, prevents valuable, and sometimes radioactively labeled, sample material from being forced from the tube when the bowl is flushed with air

lfr. No.	Cat. No.	Pack of 10
2 65 500-1	**05-402-98**	43.25

CULTURE—GLASS

*Fisherbrand** Disposable Borosilicate Glass Tubes

Provide the chemical stability and biological inertness of hard, borosilicate glass—at the price of disposable tubes

- Round bottom
- Start clean—no lost samples due to contaminated, cloudy or scratched tubes
- Avoid pH problems caused by soft glass

With Polypropylene Screw Cap

- With natural linerless polypropylene screw cap and marking spot

APPLICATIONS:

Ideal for tissue culture, bacteriology, clinical chemistry, blood typing, and crossmatching procedures

Kimax* Disposable Glass Tubes

Designed from ASTM* Specification E 890

- Premium quality tubes with sturdy, uniform bottoms and consistent lengths
- Borosilicate glass KIMAX-51* composition ensures outstanding all-around chemical durability
- Excellent chemical resistance against sodium leaching
- 10 × 75mm and 12 × 75mm sizes are suitable for cell washing procedures and fit into Kimble* 73510 stainless-steel dispensers.
- 6 × 50mm size is often referred to as a "Durham tube"

03-341 Series

ORDERING INFORMATION:
Tubes are packed in convenient trays for ease of use on bench-tops and in drawers. Trays are shrink wrapped in plastic film with tubes remaining in constant alignment for protection against in-transit breakage and contamination. Tubes come in cases of 1000 except 14-957-96J and 14-957-96K, which come in cases of 500.

COMPLIANCE:
Complies with ASTM Specification E438, Type I, Class B glass requirements

***Fisher**brand** Color-Coded TainerTop* Safety Closures

Seven colors correspond to Vacutainer* cap colors, ensuring easy identification

Recap blood drawing tubes, disposable glass test tubes, and plastic culture tubes. Protect from aerosols of highly infectious organisms such as TB and the HTLV-III virus. Guard samples against cross-contamination, and lab work areas against infectious agents and mess. Ensure integrity of serum samples after freezing or en route to reference labs.

- Polyethylene
- Information can be written directly on cap with indelible ink
- Don't require precutting
- Won't pop or crack when frozen
- Provide liquid-tight seal—will not aerosol when opened
- Hold fast under most rigorous procedures including agitation, centrifugation, refrigeration, and freezing
- Flexible closures are not autoclavable

Pyrex* Reusable Test Tubes

All sizes except 6, 22, and 25mm O.D. have marking spot

- Round bottom
- Borosilicate glass

With Plain End

- Rimless, round-bottom tubes provide greater convenience for plugging and rack storage
- Walls and bottom are of uniform thickness
- Ends are fire-polished

14-957 Series

Pyrex* Round-Bottom Reusable Glass Tubes with Screw Caps

Round-bottom culture tubes have white enamel marking spot

- Black phenolic cap resists effects of temperature and steam in autoclaving

Tubes with Rubber-Lined Cap

Deep-form phenolic caps facilitate handling and sealing after autoclaving

- Caps are fabricated from a special formula resistant to the effects of temperature and steam in autoclaving
- White enamel marking spot gives an excellent surface for pencil notations; pencil marks are easily erased

PyrexPlus* Reusable Tubes with Screw Caps

Protective PVC coating helps prevent glass from shattering

- Round-bottom culture tubes are fully autoclavable to 121°C (250°F) and resistant to thermal shock
- Deep-form phenolic cap that resists effects of autoclaving and features a glued-in, white-rubber liner

NOTE:

Do not place over direct heat or flame. Do not heat above 121°C (250°F) moist heat or 110°C (230°F) dry heat.

ACCESSORIES

Kimble* Black Phenolic Screw Caps

Bond between liner and cap retains adhesive properties even after repeated autoclaving

14-930-14G

With PTFE-faced rubber liner

- Identified in ASTM* specification E 982-94, Class B requirements

With 14B rubber liner (SBR)

- Has fewer threads than regular GPI caps for easier application and removal
- Not recommended for use with standard GPI finishes usually found on blown-molded bottles
- Identified in ASTM specification E 982-94, Class A requirements

GPI Thread	Mfr. No.	Cat. No.	Case of

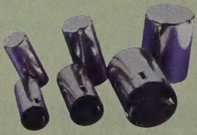
Morton* Stainless-Steel Culture Tube Closures

Ideal for use with standard glass culture tubes



05-888 Series

- Noncontaminating, noncorrosive stainless-steel cylindrical closures
- Top surface indentations allow adequate gas exchange under aerobic and anaerobic conditions, yet prevent buildup of dust and microorganisms
- Reduce amount of specimen evaporation by 50% as compared to cotton plugging
- Withstand repeated autoclaving without loss of resiliency
- Available as plain or lanced closures
- Lanced closures feature three resilient fingers that adjust to nominal variations in tube O.D

Size	Cat. No.	Pack of

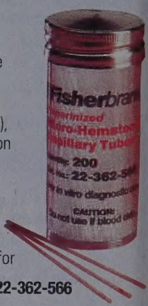
MICROCAPILLARY

*Fisherbrand** Microhematocrit Capillary Tubes

Low-taper wall construction guarantees error less than 1% absolute, 0.4 hematocrit, relative



22-362-566

- Ends can be sealed by sealing clay or flame
- Manufactured from low-taper, soft glass
- Red band on tube indicates heparinization; blue band indicates nonheparinized tube
- Interior surface of heparinized tubes is evenly coated with ammonium heparin (4 to 7 USP units), which will not interfere with sodium determination
- Taper does not exceed 0.0254mm in 75mm
- Available plain or heparinized with not less than two USP units of ammonium heparinate
- Color-coded tube tips and labels
- Packaged in Fisher Scientific* shaker-top vials for ease in dispensing

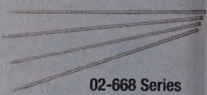
ORDERING INFORMATION:

Length: 75mm ±0.02mm. Inner diameter: 1.1 to 1.2mm. Wall: 0.2mm ±0.02mm. Capacity: 70µL 200 tubes per vial.

Description	Cat. No.	1 Vial	Case of 5 Vials
Heparinized	**22-362-566**	24.20	100.80
Plain	**22-362-574**	22.78	94.92

*Fisherbrand** Micro Blood Collecting Tubes

With tapered bottom tips to facilitate micro blood sample collection



02-668 Series

- For Natelson and Caraway techniques
- Color-coded tops distinguish between plain and heparinized tubes
- Heparinized tubes are treated with ammonium heparin
- Natelson tubes have 250µL capacity; 1.44 to 1.76mm I.D.; 147mm leng
- Caraway tubes have 350µL capacity; 2.59 to 2.81mm I.D.; 75mm lengt

Type	Anticoagulant	Color Code	Fill Volume	Cat. No.	Pack of 100	Case of 6 Pk.
Natelson	Ammonium heparin	Red	250µL	**02-668-10**	45.15	225.72
	None	Blue	250µL	**02-668-15**	40.11	200.53

	None	Blue	350µL	**02-668-30**	42.94	214.73

ACCESSORIES

*Fisherbrand** Hemato-Seal* Capillary Tube Sealant

Nondrying, non-hardening, nontoxic compound for sealing hematocrit and other blood collecting tubes

02-678

- Light color provides sharp contrast for easy reading
- Excellent retention during centrifugation

Cat. No.	Pack of 10	Case of 10 Pk.
02-678	53.27	391.27

Hemato-Clad* Mylar*-Wrapped Hematocrit Tubes

Combine the precision of glass with the safety of Mylar wrapping

- The chance of contamination due to glass fragments or aerosols is greatly reduced
- Accidental breakage is significantly reduced, particularly when pressing into clay sealant (not included)
- In the event of breakage, the Mylar wrapping will help contain the blood sample and provide an added layer of protection against cuts from broken glass
- Available both plain and heparinized

Hemato-Clad
Hemato-Clad

21-176-6, -5

Type	Color Code	Inside Diameter	Tube Length	Wall Thickness	Cat. No.	Pack of 200

ACCESSORIES

Critoseal* Capillary Tube Sealant

Seals any type of capillary tube with fast, heatless, flat-bottomed seal

- A vinyl plastic putty
- Remains pliable
- Will not dry out
- Supplied in tip-proof tray with numbered slots for 24 sets of tubes
- With sufficient sealant for several hundred tubes

02-676-20

NMR

Kontes* Brand Valved 5mm O.D. NMR Tubes

Ideal for handling volatile, air-sensitive and toxic samples

- Permit condensing of samples directly into NMR tube
- Greaseless, Hi-Vac* valve lets you recover samples, then reseal; no need to permanently seal off, as with conventional tubes
- With glass tube and Viton* O-ring for connection to a vacuum system
- Wall thickness is 0.01475" (0.37mm); Wall variation and camber depend, in part, on tube length

K897435-0000

For Instruments with Field Strength of	Length	Wall Variation TIR[1]	Camber TIR[1]	Cat. No.	Each

Kontes* NMR Sample Tubes

Each tube meets rigid specifications for wall thickness, variation and camber so as to assure precise measurements and reproducibility

- Precision-manufactured tubes designed for use in high-resolution NMR spectroscopy that characterizes organic molecules through measurement of the resonant frequencies of atomic nuclei. Research applications include analysis of polymer structures and organic solutions.
- Made from Type I borosilicate glass
- Wall variation and camber depend, in part, on tube length
- All sample tubes come with plastic compression-fit caps and sandblasted marking spots

3mm O.D. (0.12") Tubes

Wall thickness: 0.01118" (0.028cm)

ACCESSORIES

Kontes* NMR Sample Tube Caps

For Kontes 5 or 10mm NMR sample tubes

K897095 Series

- Convenient 100-cap variety pack of tight-fitting polyethylene color caps
- Stay in place even with a buildup of internal vaporization pressure

ORDERING INFORMATION:

Variety pack for 5mm (0.19") tubes includes 20 caps each of red, black, white, green and yellow. Variety pack for 10mm (0.39") tubes contains 25 each of red, black, green, and yellow.

Description	Cat. No.	Case of 100
5mm Cap Variety Pack	**K897095-0011**	8.59
10mm Cap Variety Pack	**K897095-1011**	13.50

Pyrex* 5mm O.D. NMR Sample Tubes

Precision tubes made of Pyrex borosilicate glass

14-972 Series

- Compatible with all ground joints, valves, and vacuum racks
- Suitable for all types of NMR spectrometers
- Meet industry standards of magnetic susceptibility
- Supplied in 7 and 8" (17.7 and 20cm) lengths, with caps
- Cat. No. 14-972-7A has wall thickness of 0.01378" (0.35mm); all others 0.015" (0.38mm)

LOOKING FOR PCR TUBES?

PCR tubes have moved to the PCR Section.

*Trademark. See Trademark Reference.

TUBING SELECTION CRITERIA

S – Size (OD, ID, Wall, Length)
T – Operating and Cleaning Temperature Range
A – Application (USP, FDA, NSF, 3A)
M – Operating and Cleaning Medium
P – Operating and Cleaning Pressure or Vacuum

IMPORTANT KEY WORDS:

Absorption/Adsorption—When components of a fluid, such as drug, beverage, or food preservatives are absorbed into the wall of the tubing or adhere to the wall of the tubing, reducing fluid flow

Antimicrobial—Inhibiting growth of microbes in the tubing fluid path

Extractables—Contaminants that can be drawn out of a material during fluid transportation

Pump Life—Reduce downtime due to pump tubing failure and replacement

Regulatory Compliance—Products that have met government/market requirements for FDA, NSF, 3-A, or USP Class VI standards

Smooth Inner Bore—Reduces the risk of adsorption and microbial buildup

Spallation—The erosion of peristaltic pump tubing which creates particulate matter and contaminates the fluid path

Validation—Fully characterized products with physical, chemical, and biological testing already completed

Rubber Stopper Sizing Guide

To use: Place large end of stopper flat on page. Align edge with horizontal line so that vertical line runs through middle of stopper. Where opposite edge intersects sizing arcs indicates stopper size. Other stopper sizing information is available in the Stoppers Section on p. 1784.

TUBING

PLASTIC

*Fisherbrand** Vinyl Tubing and Connector Kits

Resist fruit acids, lye, alcohol, greases, and oils

- Clear, flexible vinyl tubing
- Nontoxic and tasteless
- Can be used at temperatures from -33° to +100°C (-27° to +212°F) at low pressures
- Tensile strength: 2000psi (13.8MPa)
- Durometer hardness: Shore A, 65

ORDERING INFORMATION:

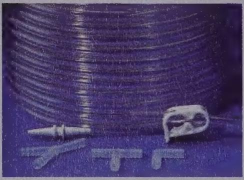
One kit per pack

INCLUDES:

50' (15.2m) of tubing, four autoclavable polypropylene connectors (one T, one elbow, one straight, and one Y), autoclavable polypropylene tubing clamp with 15-position flow control (Kits 14-174-1E and 14-174-1G have two clamps)

COMPLIANCE:

U.S. Pharmacopeia XIX, Class VI, and National Formulary Vol. 14 Standard. FDA criteria: 178.3740, 178.2010, and 175.300 (Tubing only).



14-174-1 Series

I.D.	Wall Thickness	O.D.	Cat. No.	Pack
3⁄16" (4.8mm)	1⁄16" (1.6mm)	5⁄16" (7.9mm)	**14-174-1A**	39.78

⅜" (9.5mm)	⅛" (3.2mm)	⅝" (15.9mm)	**14-174-1J**	127.41
½" (12.7mm)	1⁄16" (1.6mm)	⅝" (15.9mm)	**14-174-1M**	80.21

*Fisherbrand** Clear PVC Tubing

General-purpose polyvinyl chloride tubing for rinse and drain tubes

- Nonaging; nonoxidizing
- Highly flexible
- Size and foot markings at 1' (30cm) intervals
- Maximum operating temperature, 73.8°C (165°F)
- Durometer hardness: Shore A, 65

ORDERING INFORMATION:

In pack of 50' (15.2m)

*Fisherbrand** Manifold Tubing

Two-stop tubing is color coded for easy size identification

Accu-Rated PVC

- Great versatility for a wide range of uses
- Moderate chemical resistance

Solva

- PVC-based compound with greater resistance to oil, gasoline, kerosene, and many aromatic hydrocarbons
- Flexible translucent yellow

ORDERING INFORMATION:

Supplied in 16" (41cm) lengths

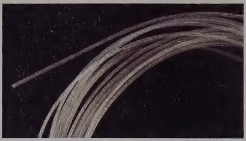
Dow Corning* Silastic* Laboratory Tubing

Flexible, translucent silicone elastomer tubing



11-189-15 Series

- Platinum-cured to provide high purity for low extractables
- Contains no phthalates or plasticizers
- Easily cleaned and does not impart taste or odor
- Excellent tear strength and resistance to solvents and harsh chemicals
- Nonpyrogenic; bacteria-, fungus- and chemical-resistant
- Microbore sizes available
- Working temperature range, -54° to +249°C (-65° to +480°F)
- Autoclavable; also can be radiation-sterilized
- Durometer hardness is Shore A, 53 for 11-189-14 and 11-189-15A to -15K; Shore A, 51 for 11-189-15L to -15V and 11-189-13A to -13D
- Both elastomers and finished tubing are manufactured under Bulk Pharmaceutical cGMPs using ISO 9002: 2000-certified processes

APPLICATIONS:

Specially designed for applications requiring ultrapure fluid processing, separation, and filtration—such as parenteral drug manufacturing; oxygen delivery in production processes; and chemical, pharmaceutical, and environmental analyses. Also suitable for peristaltic pump use

ORDERING INFORMATION:

In pack containing 50' (15.2m) coil; packaged in sealed polybag.

COMPLIANCE:

Elastomers meet or exceed USP Class VI Plastics Test requirements.

NOTE:

Not intended for use in human implantation; in or in conjunction with cosmetic surgery, contraception, reproduction, obstetrics and gynecology; or in weight- or load-bearing devices.

Spectra/Chrom* Tubing Cutter

Cuts to make an even, flat edge

11-187-15

- For all polymer-type tubing (vinyl, fluoroelastomer, silicone, polyethylene, TFE)
- Razor-sharp hardened-steel blade
- Special "V" socket firmly holds tubing perpendicular to the cutting blade

Description	Cat. No.	Each
Tubing Cutter	11-187-15	31.30

LOOKING FOR GLASS TUBING?
Please see the Glass Tubing section.

Nalgene* 180 Clear PVC Tubing

Transparent, nontoxic and noncontaminating

- Made from the highest-grade resins and special plasticizers—no fillers or extenders are added
- Resists hardening, discoloration, and a wide range of chemicals
- Marked every 12" for easy measurement
- All coils also marked with both I.D. and regulatory compliance
- Autoclavable
- Durometer hardness: Shore A, 55

COMPLIANCE:

Meets Food Additives Amendment of the Federal Food, Drug, and Cosmetic Act; also USDA and U.S. Pharmacopeia Class VI requirements for plastic materials (However, it is not a medical device as defined by Class VI criteria set forth in the current U.S. Pharmacopeia, as amended)

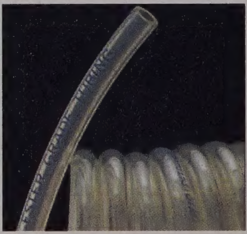
Nalgene* 280 Polyurethane Tubing

Ester Grade tubing ideal for high-purity work

- Contains no plasticizers and only low levels of extractables
- Superior chemical resistance to fuels, oils, and some solvents (not recommended for aqueous solvents)
- Marked every 12" for convenient cutting
- Not autoclavable; can be gas sterilized
- High tensile strength and toughness for pressure and vacuum applications; won't collapse under full vacuum



14-176-170 Series

Nalgene* 489 Linear Low-Density Polyethylene Tubing

Translucent so fluid levels can be easily seen

- Linear low-density, semirigid polyethylene
- Nontoxic, odorless, tasteless
- Not autoclavable; can be chemically sterilized

14-176-120 Series

ORDERING INFORMATION:
14-176-125 and 14-176-127 available in packs of 50' (15.2m); all others in packs of 100' (30.5m).

COMPLIANCE:
Complies with FDA regulations for food use.

NOTE:
Does not comply with NSF Standard 51 for Food Zone Use.

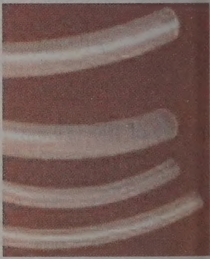
Nalgene* 689 Polypropylene Tubing

Translucent, semirigid tubing that has excellent chemical resistance to many acids and alkalis

- Unaffected by most solvents at ambient temperatures
- Should not be exposed to halogenated hydrocarbons for an extended period
- Autoclavable

ORDERING INFORMATION:
In packs of 50' (15.2m)



14-176-150 Series

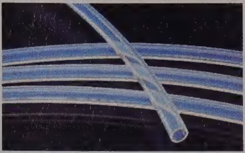
Nalgene* 870 PFA Tubing

Tough, translucent tubing for low-pressure use with mechanical, compression-type fittings

- Matches chemical resistance of Nalgene 890 PTFE FEP Tubing, but withstands a wider temperature range of -270° to +260°C (-454° to +500°F)
- Very low water absorption
- Autoclavable
- Durometer hardness: Shore D



14-176-200 Series

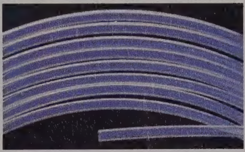
Nalgene* 890 PTFE FEP Tubing

For trace metal analysis, pollution sampling, and corrosion testing; use also to transfer biological preparations, and in applications where binding/adsorption is a problem

- Noncytotoxic, noncontaminating
- Highly chemical and temperature resistant
- Autoclavable
- Durometer hardness: Shore D, 58



14-176 Series

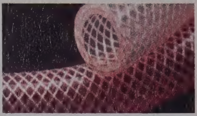
Nalgene* 980 Braided Clear PVC Tubing

Braided, reinforced PVC tubing for high-pressure laboratory applications



14-169-10 Series

- Tasteless
- Excellent for use with weak acids, weak bases, and salt solutions
- Added flexibility makes it easier to bend and permits tighter compression of crimp fittings
- Marked with inside diameter and maximum working pressure for easy reordering

ORDERING INFORMATION:

In pack of 50' (15.2m)

Nalgene* 50 Platinum-Cured Silicone Tubing for Peristaltic Pumps

Flexible, durable, high-purity translucent tubing for use with peristaltic pumps; designed to extend service life of pump and tubing

14-176-200 Series

- Tasteless, odorless, nontoxic, nonpyrogenic, and nonhemolytic
- Contains no phthalate plasticizers that can leach out into transported fluid
- Resists adhesion of tissue, blood, proteins, and food products
- Provides greater durability and resiliency; improves stroke volume
- Operating temperature of -46° to +93°C (-50° to +200°F)
- Autoclavable; also can be sterilized by radiation, EtO and chemical procedures
- Durometer hardness: Shore A, 50

ORDERING INFORMATION:

Double-bagged in case of 25' (7.6m)

COMPLIANCE:

Meets FDA, USDA, U.S. Pharmacopeia XIX, Class VI requirements for plastic materials; and 3-A standards.

NOTE:

Not intended for invasive use.

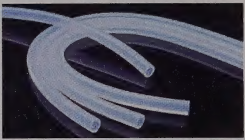
Nalgene* 50 Platinum-Cured Silicone Tubing

Flexible, durable, high-purity translucent tubing for a variety of pump and transfer applications, including pharmaceutical, laboratory, bioprocess manufacturing, and food and beverage applications



14-176-332 Series

- Tasteless, odorless, nontoxic, nonpyrogenic, and nonhemolytic
- Contains no phthalate plasticizers that can leach out into transported fluid
- Resists adhesion of tissue, blood, proteins, and food products
- Working pressure of 5psig†
- Operating temperature of -46° to +93°C (-50° to +200°F)
- Autoclavable; also can be sterilized by radiation, EtO, or chemical means
- Durometer hardness: Shore A, 50

ORDERING INFORMATION:

† Tubing with ¼" I.D. and 1/16" thick (6.4 × 1.6mm) wall, measured at room temperature. Higher temperatures will reduce working pressure.

Saint-Gobain* Tygon* Vacuum Tubing, Formula R-3603

Extra-heavy walls withstand full vacuum of 29.9"Hg (759mm) at 23°C (73°F) and up to 27"Hg (686mm) at 60°C (140°F)

- Outlasts rubber tubing; resists most inorganic chemicals, nonaging and highly resistant to cracking
- Can be used in corrosive atmospheres
- Clear walls enable an easy visual check for backups that could damage equipment
- Ideal for analytical testing of gases or vapors; well suited for use in making manometers
- Low vapor pressure (low outgassing) makes it suitable for vacuum applications down to 3×10^{-2}mmHg at 60°C (140°F)
- Will not swell closed if vacuum pump oil should back up into it

Saint-Gobain* Tygon* R-3603 Clear Laboratory Tubing

Crystal clear and flexible tubing with very high chemical resistance

14-169 Series

- Nonoxidizing and noncontaminating
- Handles virtually all inorganic chemicals found in the lab
- Long lasting and crack-resistant
- Foot markings at 3' intervals
- Durometer hardness: Shore A, 55

COMPLIANCE:

Meets FDA CFR Part 175.300 criteria.

In pack of 10' (3m)

Saint-Gobain* Tygon* Sanitary Silicone Tubing Formula 3350

Translucent tubing ideal for biotechnological, pharmaceutical, and peristaltic applications

02-587 Series

Ultrasmooth inner bore reduces risk of particle entrapment, inhibits microscopic bacterial buildup during fluid transfer, and allows thorough cleaning and sterilization.

- Tasteless, odorless
- Nonpyrogenic, nontoxic, nonhemolytic
- Low extractable content helps to maintain integrity and purity of transported fluids
- Smooth inner surface provides low adsorption for improved fluid flow (hydrophobic surface also improves fluid flow)
- Maximum recommended operating temperature 200°C (392°F)
- Autoclavable; also can be radiation- and gas-sterilized
- Durometer hardness: Shore A, 50

ORDERING INFORMATION:
Packaged in heat-sealed, double-wrapped polyethylene packs of 50' (15.2cm)

COMPLIANCE:
Complies with requirements of USP XXII Class VI criteria. Meets 3-A Sanitary Standards, FDA 21 CFR Part 177.2600 criteria and NSF 51 Standard.

NOTE:
Not intended for use as an implant material.

Saint-Gobain* PharMed* BPT Tubing

Ideal for life science applications employing perisaltic pumps

14-170 Series

- Nontoxic, nonhemolytic, and nonpyrogenic tubing has long flex life and high biocompatibility—outlasts silicone tubing up to 30 times longer
- Very good general chemical resistance and excellent acid, alkali, and oxidation resistance
- Opaque to visible and UV light, tubing will protect sensitive fluids
- Withstands temperatures from -51° to +135°C (-60° to +275°F)
- Withstands repeated clean-in-place and steam-in-place cleaning and sterilization; can be repeatably autoclaved for up to five cycle times without affecting overal service life
- Durometer hardness: Shore A, 64

APPLICATIONS:
Ideal for life science applications employing peristaltic pumps such as diagnostic test product manufacturing, cell harvest, media process system vaccine manufacturing, bioreactor process lines, production filtration and fermentation, sterile filling, shear-sensitive fluid transfer

ORDERING INFORMATION:
In pack of 25' (7.6m)

COMPLIANCE:
Fully tested to ISO 10993 standards. Meets USP Class VI, FDA, and NSF criteria.

Saint-Gobain* Tygon* Biocompatible Tubing, Formula S-50-HL

Tubing ends closed by heat-sealing to prevent contamination in shipment

- Crystal clear for easy visualization of fluid flow
- Nonwetting surface permits complete drainage
- Greater flex-life than rubber
- Can be autoclaved or sterilized with steam, radiation, chemicals, or gas
- Durometer hardness: Shore A, 66

14-169-9 Series

ORDERING INFORMATION:

In pack of 50' (15.2m)

COMPLIANCE:

Meets U.S. Pharmacopeia Class VI criteria for medical plastics. Complies with CID A-A-55697 for medical tubing. Follows ISO 10993 standards.

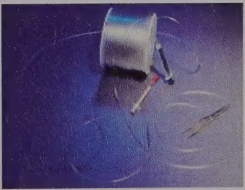
Saint-Gobain* Tygon* Microbore Tubing, Formula S-54-HL

Use as catheters for intravenous and arterial infusion

- Nontoxic, nonpyrogenic, and blood compatible
- Flexible enough to permit use of single size with several different needle gauges; yet sufficiently rigid to minimize danger of wall collapse
- Gas, chemical, and gamma sterilizable
- Durometer hardness: Shore A, 80



14-170-15 Series

ORDERING INFORMATION:

On reel of 500' (152.4m)

COMPLIANCE:

Meets U.S. Pharmacopeia Class VI criteria for medical plastics.

Micro-Mix Pack

ORDERING INFORMATION:

Contains a 100' (30m) reel of each size of Tygon* Microbore Tubing, Formula S-54-HL

Mfr. No.	Cat. No.	Pack
AAQ04118	**14-170-15F**	195.43

Saint-Gobain* Tygon* Formula 2275 High-Purity Tubing

Environmentally friendly—safe to dispose of through incineration

- Contains no plasticizers that can leach into or contaminate fluid, yet tubing remains flexible
- Virtually no absorption of key fluid constituents into tubing material or fluid adsorption onto tubing walls; fluid alteration and loss is limited
- Ideal for handling sensitive fluids such as pharmaceutical or biological solutions
- Also available braid-reinforced to withstand solutions with elevated working pressure (See Formula 2275 I.B., Cat. Nos. 02-593-1A and 1C to -1F. Contact your Fisher Scientific Customer Service Representative for details.)

14-169-23 Series

ORDERING INFORMATION:

In packs of 50' (15m)

COMPLIANCE:

Meets USP Class VI, FDA and NSF specifications. Documented biocompatibility to ISO 10993 standards.

Saint-Gobain* Tygon* Ultra-Chemical-Resistant Tubing, Formula 2075

Suitable for many applications, from battery acid filling to hazardous material handling

14-169-22 Series

- Contains no plasticizers, eliminating fluid contamination and the premature embrittlement and cracking common with many flexible tubings
- Offers unequaled chemical resistance, clarity, and flexibility
- Virtually unaffected by acids, bases, ketones, salts and alcohols (resistant to highly aggressive chemicals)
- Exceptionally smooth inner surface inhibits particulate buildup and reduces the potential for contamination

Saint-Gobain* Tygon* Tubing with Inert Liner, SE-200

Crystal clear, highly flexible PTFE jacket with inert fluoropolymer FEP liner

14-169-8 Series

- Liner is odor- and taste-free, important in food and beverage analysis, and it's inert—won't contaminate liquids
- Replaces PTFE tubing where continuous use doesn't exceed 82°C (180°F)
- Durometer hardness (of Tygon jacket): Shore A, 67

ORDERING INFORMATION:

In pack of 50' (15m)

COMPLIANCE:

Meets U.S. Pharmacopeia Class VI and 21 CFR 177.2600 criteria.

NOTE:

Not for use in peristaltic pumps.

Saint-Gobain* Tygon* Pressure Tubing with Inner Braid, Formula B-44-4X-I.B.

Tubing wall has reinforced braid to handle long-term continuous pressure up to four times greater than nonreinforced tubing will withstand

14-169-12 Series; vacuum gauge not included

- Odorless, tasteless, and nontoxic
- Smooth bore won't entrap bacteria
- Outer surface is smooth, minimizing sanitation problems
- Also offers visual inspection, flow control, and flexibility

COMPLIANCE:

Meets FDA and 3-A Plastics Standard for food and dairy products handling and NSF criteria under Standard 51.

WORKING AND BURST PRESSURES AT 23°C FOR TYGON* PRESSURE TUBING WITH INNER BRAID

Tubing I.D.	Max. Working Pressure	Burst Pressure
1⁄4"	250psi	1000psi

Saint-Gobain* Tygon* Beverage Tubing, Formula B-44-3

Lightweight and flexible for easy installation

14-168 Series

- Crystal-clear tubing is taste- and odor-free—won't alter flavor or fragrance
- Ideal for food, beverage, odor, and fragrance analysis
- Use in permanent or temporary lines; also with rigid piping systems
- Nonwetting surface for complete drainage
- Maximum operating temperature, 74°C (165°F)
- Autoclavable
- Durometer hardness: Shore A, 63

COMPLIANCE:

Meets FDA and NSF criteria.

Saint-Gobain* Tygon* Clear Tubing, Formula B-44-4X

Dense bore is smoother than bore of most stainless-steel tubing

- Nontoxic, taste- and odor-free
- Won't trap bacteria-harboring particles
- Resistant to alkaline cleaners and unaffected by sanitizers
- Excellent wetting properties facilitate complete drainage and permit simple flushing
- Maximum operating temperature, 74°C (165°F)

14-169 Series

- Durometer hardness: Shore A, 65

ORDERING INFORMATION:

In pack of 50' (15m), except as indicated in table.

COMPLIANCE:

Meets FDA, 3-A Plastics Standard, and NSF Standard 51 criteria.

*Fisherbrand** Butyl Rubber Tubing

For use with air and carbon dioxide

- Resists oxygen degradation
- Heavy wall

ORDERING INFORMATION:
Package contains approximately 10' (3m).

14-168B

I.D.	Wall Thickness	O.D.	Cat. No.	Pack	Case of 5 Pk.
1/4" (6.4mm)	1/8" (12.7mm)	1/2" (12.7mm)	**14-168B**	57.25	242.30

*Fisherbrand** Natural Rubber Latex Tubing

Contains dry natural rubber

- Soft, pliable, seamless tubing in amber or black
- Talc-free; nontacky
- Environmentally friendly—manufactured with no ozone-depleting chemicals
- Use at temperatures from -18° to +70°C (0° to 158°F)
- Autoclavable; can be EtO-sterilized
- Tensile strength, 2500psi
- Ultimate elongation, 700%

14-178-2 Series

COMPLIANCE:
Meets Fed. Spec. ZZ-T-831D Types I and III. Amber tubing meets U.S. Pharmacopeia Class VI criteria.

Kantleke* Cloth-Covered Rubber Tubing

For burner and hotplate connections

- Each length has heavy rubber connections on both ends
- Flexible

14-185-5 Series

Length	Cat. No.	Each	Pack of
2' (61cm)	**14-185-5A**	62.38	100/4798.25
4' (122cm)	**14-185-5B**	86.95	50/3695.40

CHECK VALVES

Nalgene* Vacuum Check Valve

One-way high-density polyethylene valve for vacuum lines

- Serrated, 3/4" long (19mm) connectors taper from 5/16 to 1/4" (7.9 to 6.4mm)
- Silicone rubber flap in valve prevents back pressure in filter flask configurations
- Works best between 10 and 28"Hg
- Easy to disassemble for cleaning

NOTE:
Not for use with liquids.

15-339-2

6120-0010	**15-339-2**	52.27	418.20

CONNECTORS—STANDARD

*Fisherbrand** Polypropylene Tubing Connectors

Very durable, autoclavable, and highly resistant to many chemicals

With Straight Ends

- Straight, serrated ends provide a secure fit
- Can accept flexible tubing of slightly smaller I.D. than the indicated size

With Tapered Ends

- Serrated ends with taper provide tight fit for several tubing I.D. sizes

Four-Way Connectors with Straight Ends

Fits Tubing I.D.	Cat. No.	Pack of 20	Case of 100
5/32" (4mm)	**15-315-32A**	----	141.39
7/32" (6mm)	**15-315-32B**	34.83	147.58
5/16" (8mm)	**15-315-32C**	----	186.32

CONNECTORS—QUICK-DISCONNECT

*Fisherbrand** Polyethylene Quick-Disconnects

For easy joining of plastic or rubber tubing

Tight fitting, with tapered ends that accept several tubing sizes.

Reducing connectors can be made by combining:

- 15-315-27C with 15-315-27D for tubing from ¼ to 7/16" (6.4 to 11cm)
- 15-315-27E with 15-315-27F for tubing from 7/16 to ⅝" (11 to 15.9cm)

15-315-27D

Fit Tubing I.D.	Cat. No.	Case of 100
¼ to ⅜" (6.4 to 9.5mm)	**15-315-27C**	215.14
⅜ to 7/16" (9.5 to 11mm)	**15-315-27D**	270.09
7/16 to 9/16" (11 to 14mm)	**15-315-27E**	288.45
½ to ⅝" (12.7 to 15.9mm)	**15-315-27F**	307.99

*Fisherbrand** All-Metal Quick-Disconnects

Inline hose connector with automatic shutoff on disconnect to prevent leakage

- Chrome-plated brass hookups
- Compatible with most tubing
- Operate at temperatures to 82°C (180°F), pressures to 250psi (1.7MPa) and vacuum to 30"Hg

ORDERING INFORMATION:

Order male and female connectors separately so tubing of the same or different size can be connected.

15-340 Series

Coupling Type	Fits Tubing I.D.	Cat. No.	Each
Female	⅛" (3.2mm)	**15-340-5**	44.09
Female	¼" (6.4mm)	**15-340-6**	46.12
Male	⅛" (3.2mm)	**15-340-10**	29.24
Male	¼" (6.4mm)	**15-340-11**	31.56

Nalgene* Quick-Disconnects

High-density polyethylene connecting tubes

- Consist of two tapered tubulations that fit tightly together with male/female connection
- Rapidly join or separate apparatus lines

15-315A

Fits Tubing I.D.	Mfr. No.	Cat. No.	Pack of 12	Case of 6 Pk.
¼ to 5/16" (6.4 to 7.9mm)	6150-0010	**15-315A**	37.84	151.37
⅜ to 7/16" (9.5 to 11mm)	6150-0020	**15-315B**	52.47	209.88

Nalgene* Valved Quick-Disconnects

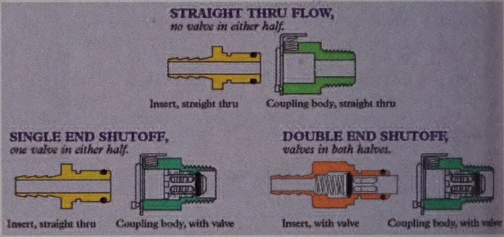
Two-part barbed fittings for one-handed quick disconnect

- Use with flexible tubing
- Fluid flow stops when fitting halves are separated
- Made of polypropylene, with acetal sleeve, stainless-steel springs and EPR seal

15-315-55

Fits Tubing I.D.	Mfr. No.	Cat. No.	Pack of 2	Case of 6 Pk.
¼" (6.4mm)	6177-0250	**15-315-55**	74.55	298.20
⅜" (9.5mm)	6177-0375	**15-315-56**	76.50	306.00

CPC* Quick-Disconnect Couplings



- Flow sizes to ⅜" (9.5mm)
- Easy push-button or twist-off disconnection
- Chemical and corrosion resistant quick-disconnect bodies and inserts compatible with polyurethane, polyethylene, nylon, PVC, silicone and other tubing materials
- In white acetal or almond polypropylene, which can be mixed or matched for a variety of coupling types
- Type 316 stainless-steel metal parts (internal springs, valves or thumb latches)
- Ideal for use in laboratory equipment, medical and surgical instrumentation, water transfer, air systems and other applications
- Audible click is heard when coupling has been fully engaged; push-button or twist-off disconnection
- Complete coupling set requires both a body and an insert (sold separately)
- Inserts are available in straight-through or shut-off valve flow configurations (see Flow Guide for examples of coupling types)

Note: Body and insert flow sizes must match, but tubing I.D. sizes can be different.

CPC* Quick-Disconnect Couplings, Contd.

CPC* Standard-Volume Quick-Disconnect MNPT Pipe-Thread Bodies

⅛" (3.2mm) or ¼" (6.4mm) flow diameter

- Convenient one-handed disconnect
- Leak-resistant O-ring seals and shut-off valves

MNPT pipe-thread body

Connectors with white acetal bodies and valves

- Buna-N seals and Type 316 stainless-steel springs, pin and latch
- Working pressure: vacuum to 120psi (8.3 bar); operating temperature: -40° to +82°C (-40° to +180°F)

Connectors with almond polypropylene bodies and valves

- EPDM seals and Type 316 stainless-steel springs, pin and latch
- Working pressure for ⅛" (3.2mm) flow diameter couplings: vacuum to 120psi (8.3 bar); for ¼" (6.4mm) flow diameter couplings: vacuum to 120psi (8.3 bar)
- Operating temperature: 0° to 71°C (32° to 160°F)
- Can be radiation sterilized

† Requires ½" dia. (12.7mm) opening, panel 0.050 to ½" thick (1.2 to 12.7mm). Includes ⅝" (15.9mm) hex panel nuts.

‡ Requires 11/16" dia. (17.5mm) opening, panel 0.020 to ½" thick (0.5 to 12.7mm). Includes 13/16" (20.6mm) hex panel nuts.

CPC* HFC Series High-Volume Quick-Disconnect Coupling Bodies

⅜" (9.5mm) flow diameter

- High-volume ⅜" (9.5mm) flow couplings permit flow comparable to many nominal ½" couplings
- With shut-off valves
- Chemical-resistant gray polypropylene with 316 stainless-steel springs and leak-resistant EPDM O-rings
- Working pressure: vacuum to 60psi (4.2 bar)
- Operating temperature: 0° to 71°C (32° to 160°F)
- Can be radiation sterilized
- Bodies have MNPT pipe-thread or hose-barb (for inline connection) fittings; with shut-off valves
- Inserts have MNPT pipe-thread, straight or right-angle hose-barb fittings; with or without shut-off valves

ULTRASONIC CLEANERS

Fisher Scientific* Digital Control Ultrasonic Cleaners

Digital control for consistent batch-to-batch cleaning

Ideal for use in laboratories, medical facilities, and manufacturing operations to remove contaminants, dirt and grease from glassware, tools or equipment parts.

- Power switch plus convenient touch controls
- SELECT OPTION lets you read or set solution temperature, set timers for sonics and degassing, turn heat on and off; lights indicate which mode you are using
- SET DISPLAY has + and - tabs to adjust temperature and timer settings
- CLEAR DISPLAY button lets you reset display
- Six digital models from 3 to 20 qt. (2.8 to 18.9L)
- Microprocessor-controlled timer with cycle times to 99 minutes
- Thermostat with LED readout maintains optimum cleaning temperature of 69°C (156°F)
- Automatically reset to last setting for consistent batch-to-batch cleaning
- Full-power instantly, no warmup
- Corrosion-resistant, Type 304 stainless-steel tank with rolled edges to minimize leaks
- Stainless-steel cover
- Manufactured using ISO 9001:2000-certified processes

Fisher Scientific* Ultrasonic Cleaners

Full power instantly—without warmup

Ideal for use in laboratories, medical facilities, and manufacturing operations to remove contaminants, dirt and grease from glassware, tools or equipment parts. Choose from six general-purpose models or compact Model FS6, all manufactured using ISO 9001:2000-certified processes.

Models FS20, FS30, FS60, FS110, FS140 and FS220

- Deliver uniform ultrasonic activity for consistent cleaning
- Six sizes, from 3 to 20 qt. (2.8 to 18.9L), with or without built-in heater
- Full-power instantly, no warmup
- Corrosion-resistant, Type 304 stainless-steel tank with rolled edges to minimize leaks
- Stainless-steel cover
- Built-in, 60-minute countdown timer has continuous-run mode
- Heated models with thermostat that maintains an optimum cleaning temperature of 60°C (140°F)
- Pans, covers, and beaker covers with rings available separately (see Accessories)
- Model sizes 6 qt. and larger include drains with valves

Model FS6

- Compact, portable nonheating unit for cleaning small parts and instruments
- 18 oz. (0.5L) stainless-steel tank and impact-resistant plastic housing
- Five-minute timer with automatic shutoff
- Cover and parts basket included

Branson* Ultrasonic Cleaners

Rugged transducer systems for effective cleaning of dirt, grease, and wax

- Ideal for safely removing blood, proteins, and contaminants from glassware, as well as dirt, grease, waxes, and oils from motors, gears, and parts
- Choose from heated digital models or mechanical models with or without heating
- All models provide deep cleaning action that removes stubborn contaminants, even from blind holes and internal surfaces
- Built-in sweep frequency ensures uniform cleaning activity throughout the bath
- Manufactured using ISO 9001:2000-certified processes
- **Digital models** automatically reset to last setting for consistent batch-to-batch cleaning and come with microprocessor-controlled timer, cycle time to 99 minutes and thermostat with LED readout. Heat to 69°C (156°F).
- **Mechanical models** have rugged mechanical timers, adjustable to 60 minutes, plus a HOLD feature for continuous cleaning. Mechanical heated models heat to 69°C (156°F).

- Assembled lamps measure 18¾L × 4½W × 3½"H (47.6 × 11.4 × 8.9cm)

With Tubes	Intensity†	Cat. No.	Each
254/365nm	550/490µw/cm²	**FB-UVLS-150**	879.29
Two 312nm	1150µw/cm²	**FB-UVM-150**	871.94

† Relative intensity at 12" (30cm).

8w Lamps

Each 8w tube has rated life of 6000 hours

- Can be used as handheld lamps or with FisherBiotech UV Viewing Cabinets FB-PDS-80 and -81 (order separately)
- Assembled lamps measure 13¼L × 3¼W × 2½"H (33.7 × 8.3 × 6.4cm)

With Tubes	Intensity†	Cat. No.	Each
254/365nm	470/500µw/cm²	**FB-UVLS-80**	324.82
Two 312nm	620µw/cm²	**FB-UVM-80**	360.35

† Relative intensity at 6" (15cm).

Spectroline* Mini UV Shortwave/Longwave Lamps

Battery-operated 4w lamp with compact design

- Overall dimensions: 6¼L × 2W × 1"H (15.9 × 5.1 × 2.5cm)
- Includes carrying strap

11-992-140 Series

REQUIRED ACCESSORIES:
Four "AA" batteries

Wavelength	Mfr. No.	Cat. No.	Each
254nm (UV-C)	UV-4BSW	**11-992-146**	52.28
365nm (UV-A)	UV-4B	**11-992-145**	35.74
254/365nm (UV-C, UV-A)	UV-4BNF	**11-992-147**	78.51

Spectroline* Germicidal UV Sterilizing Lamps

Unfiltered 254nm shortwave (UV-C) lamps provide high-intensity, wide area UV sterilization coverage

- For use wherever disease may be transmitted by air currents
- Choose from 15w single-tube or 15w dual-tube models
- All units have enameled sheet metal or anodized aluminum housing with mounting brackets

11-992-103

ORDERING INFORMATION:
For 115V 60Hz

CERTIFICATIONS:
UL listed

Model	Dimensions (L × W × H)	Intensity†	Mfr. No.	Cat. No.	Each
Single-tube					
15w	18¾ × 4½ × 3½" (48 × 11 × 9cm)	820µw/cm²	X-15G	**11-992-103**	266.99
Dual-tube					
15w	18¾ × 4½ × 3½" (48 × 11 × 9cm)	1550µw/cm²	XX-15G	**11-992-150**	287.14

† Peak 254nm at 10" (25cm).

Spectroline* High-Intensity Longwave UV Lamps

Precision-engineered lamps ideal for inspection applications

- Ergonomically designed for easy handling
- Impact-resistant polymer housing
- Bulbs have a rated life of 5000 hours; unique Bulbsaver* feature protects and extends bulb life
- UV-absorbing spectacles included with lamp

SB-100P Model

- Comes with either a 100w spot or flood bulb
- Lamp head easily lifts from the handle of the transformer base for comfortable, handheld use
- For bench use, lamp can be conveniently rotated 360° when mounted on base handle

BIB-150P Model

- Features a 150w Built-in-Ballast* bulb that requires no heavy external transformer
- Equipped with a vinyl-coated heat guard/stand to protect against burns and act as a convenient lamp stand

11-992-135

INCLUDES:

SB-100P Model has two 8' long (2.4m) cords. BIB-150P Model has 8' long (2.4m) power cord.

ORDERING INFORMATION:

For 115V 50/60Hz

† Relative intensity at 15" (38cm).

NEED MORE LIGHT?

Fisher Scientific has many types of lights from which to choose—lights for inspection, general task, and classroom use, as well as light meters and even more UV lamps not listed here

Visit www.fishersci.com and search for Lamps, Lights, Lighting, Light Meters

Spectroline* E-Series Handheld Lamps

A full range of models in this lamp series

Select the best combination of UV wavelength, intensity, size and wattage for specific applications, including chromatography, gel electrophoresis, germicidal, UV irradiation, and UV curing.

- Specular aluminum reflector ensures optimum UV irradiance
- Aluminum housings provide comfortable, long-lasting service
- All short- and medium-wave models feature Longlife* filter glass for higher initial UV transmission and maximum resistance to solarizations
- Outfitted with convenient, removable carrying handle for use with lamp stand
- Available in 120V 60Hz, 230V 50Hz, or 100V 50-60Hz

Amber, with marking area	1.8mL	**03-391-41**	18.28

ACCESSORIES

*Fisherbrand** Pre-assembled Snap Caps with Septa

Easy to apply and remove eliminating need for crimping or decapping tools

03-391-42

- For use with 2mL wide-opening snap cap glass vials
- PTFE/silicone septa
- 12mm I.D.
- 03-391-43 includes pre-slit septa

Description	Cat. No.	Pack of 100
With solid septa	**03-391-42**	21.61
With pre-slit septa	**03-391-43**	34.16

National Scientific Aluminum Crimp Seals with Prefitted Septa

For 12 O.D. x 32mm long vials

- Anodized aluminum seals fit all 11mm crimp top vials
- Seal 2000* material is specially formulated for improved background performance over PTFE/Red Rubber
- Viton* septa perform well with ECD detectors and are resistant to many aggressive solvents

National Scientific Unassembled Target* LoVial* Wide Opening Vial Kits

- Two-compartment benchtop storage tray
- Include matched quantities of vials and silver aluminum seals with prefitted septa
- All items remain handy and dust-free

03-375 Series and 03-378 Series convenience kits

NOTE:
03-375-4A through 4D are bulk packs that do not include the convenience kit tray.

National Scientific Target* Wide-Opening Screw-Thread Vials

Wide neck vial is easy to fill

- 10-425 thread
- Borosilicate clear glass (Type 1, Class A) or 51A amber glass
- Uniformly flat bottom for security with inserts
- Graduated I-D* patch measures 0.5, 1.0 and 1.5mL

National Scientific Target* Convenience Kits

- Two-compartment benchtop storage tray
- I-D* vials feature write-on patch with graduations
- All items remain handy and dust-free
- Caps with septa are not attached to vials (packed in separate polybag)

NOTE:
PTFE septa are not pretreated into caps (packed in separate polybag).

INCLUDES:
100 vials and 100 caps with pre-assembled septa

National Scientific Assembled Caps and Septa for 8-425 Standard-Opening Vials

- Open top caps can be used with any 8mm septa
- Phenolic caps are suitable for autoclaving and low temperature applications
- Polypropylene caps are chemically inert and suitable for most chromatography applications
- Kim-Lok* cap/septum assemblies feature a molded centering ring to eliminate septum movement during injection
- PTFE/Red Rubber septa are economical for many GC applications
- PTFE/Silicone septa are most popular for HPLC and IC applications
- Pre-slit septa are easier to pierce with thin-gauge needles

National Scientific 8-425 Empty Caps (No Septum)— for 8-425 Standard Opening Vials

- Open top caps are designed to be used with any 8mm septa
- Phenolic caps are suitable for autoclaving and low temperature applications
- Polypropylene caps are chemically inert and suitable for most chromatography applications
- Flanged caps are particularly suitable for many Japanese autosamplers
- Kombo-Kit contains 200 each of black, blue, green, red, and yellow flanged caps

Note:
Caps with a flange are preferred for use with Shimadzu* and Hitachi*

National Scientific Assembled Certified* Vial Kits

High-quality chromatography vial kits certified to give the extra assurance that the vials uphold rigorous manufacturing standards

- Include choice of vials and closures, conveniently packaged in benchtop storage compartments
- Vials of clear or amber borosilicate glass, with or without an I-D* patch
- Feature the vials with PTFE/silicone caps already assembled

Description	Mfr. No.	Cat. No.	Pack of 100
2mL Certified Clear I-D Vial Kit with 9mm Preslit PTFE/Silicone Caps	CERT4000-193W	**03-377-401**	55.90
2mL Certified Amber I-D Vial Kit with 9mm Preslit PTFE/Silicone Caps	CERT4000-176W	**03-377-400**	49.50
4mL Certified Clear Vial Kit with 13mm Preslit PTFE/Silicone Caps	CERT4015-84-ASM	**03-377-402**	79.15
4mL Certified Amber Vial Kit with 13mm Preslit PTFE/Silicone Caps	CERT4015-87-ASM	**03-377-403**	79.90

National Scientific Unassembled Certified* Vial Kits

High quality chromatography kits certified to give the extra assurance that the vials uphold rigorous manufacturing standards

- Include choice of vials and closures, conveniently packaged in benchtop storage compartments
- Vials of clear or amber borosilicate glass, with or without an I-D* patch
- Closures with pre-inserted septa for GC, HPLC, and headspace analysis, except for SepCap* Kits, which have caps without septa

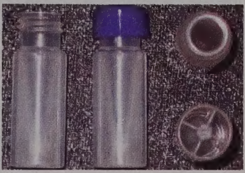
National Scientific Target DP* Polypropylene MicroVials*

NEW

12 × 32mm microvials designed with the profile of glass vials



03-340-620 Series

- Manufactured from molded polypropylene—ideal for inert microsampling
- Sharp shoulder and high neck clearance ensure dependable operation with all autosamplers; external neck width is smaller, making it easier for robotic autosamplers to grasp the vials
- Compatibility with Target DP 9-425 screw thread closures provides a wide variety of closures
- Mandrel reservoir allows for maximum sample extraction and working volumes from <5 to 300µL
- Four-radiating–fin base provides high stability in autosampler trays
- High-quality molding process produces a clean profile, eliminating autosampler stalls

ORDERING INFORMATION:

Choose from Vials Only, Convenience Kits (include vials and caps), and Assembled Kits (vials with PTFE/silicone caps already assembled).

SUN-SRi Microsampling Vials

Excellent for small samples or samples that must be evaporated and reconstituted without having to use multiple sample vials

- Have a standard 12 × 32mm profile

8-425 Polypropylene Vials

- For aqueous samples in pharmaceutical applications, sodium analysis or for pH sensitive samples
- Excellent clarity
- Highly resistant to chemical attack

14-823-168, 14-823-313

SUN-SRi StepVial II Vials

Designed to ensure proper centering of limited volume inserts, eliminating missed injections

22-030 Series

- Standard graduated write-on patch provides easy filling and identification of sample
- Manufactured of Clear, Type 1 Class A or Amber, Type 1 Class B, borosilicate glass
- May be used with robotic autosamplers in place of crimp style vials
- 40% larger opening for easier sample preparation
- Must be used with 9mm, StepVial II closures to ensure proper fit and functionality
- Maximum fill volume: 1.5 mL
- 12 × 32mm

Description	Mfr. No.	Cat. No.	Pack of 100

ACCESSORIES

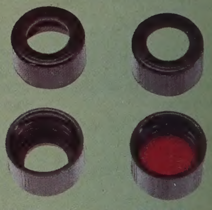
National Scientific Screw Caps

For 4mL vials

- Open-top caps are designed to be used with any 13mm septa
- Polypropylene caps are chemically inert and suitable for most chromatography applications
- Phenolic resin caps perform well at high temperatures and with exposure to corrosives



03-378-315 and 03-378-316

Assembled, With Inserted Septa

- PTFE/Red Rubber septa are economical for many GC applications
- PTFE/Silicone septa are most popular for HPLC and GC applications
- Pre-slit septa are easier to piece with thin gauge needles

ACCESSORIES

National Scientific Septa

For 4mL screw thread vials

- PTFE Disk septa are chemically inert
- PFTE/Red Rubber septa are economical for many GC applications
- PTFE/Silicone septa are most popular for HPLC and IC applications
- Pre-slit septa are easier to pierce with thin gauge needles

03-377-10 Series

Description	Features	Mfr. No.	Cat. No.	Pack of 100	Case of 1000
White Virgin PTFE	Not re-sealable, single use	C4015-10	**03-340-10D**	----	42.86
Ivory PTFE/Red Rubber	For general chromatography	C4015-30	**03-377-105**	18.81	172.54

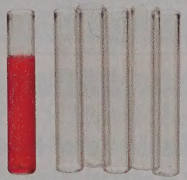
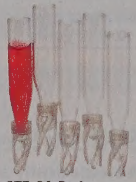
AUTOSAMPLER—INSERTS

National Scientific Inserts

- Polyspring* inserts feature a polyethylene spring to center the bottom of the insert and to provide a cushion against needle contact
- Precision point inserts minimize residual sample losses
- Deactivated inserts are Silanized or Kimshield* pretreated
- Pulled point inserts are an economical choice for non-critical applications



03-375 Series



03-375-3A Series

For Target* LoVial* Wide–Opening Vials

- Have a nominal O.D. of 6mm to fit Target wide-opening vials

SUN-SRi Headspace Vials

Designed with a round bottom that is more easily handled by robotic arms

- Available with a 20mm crimp-seal or an 18mm screw-thread finish
- Compatible with Gerstel* and CTC/Leap* Technologies headspace samplers when used with magentic closures
- Beveled-edge finish on crimp-top vials provide for a sturdy rim that presses into the septum for a more effective seal

COD VIALS

accu-Test* Vials for COD Testing

For low-, standard- and high-range concentrations

- Convenient to use
- Give excellent analytical results
- Compatible with all standard COD reactors and spectrophotometers
- For samples with low chloride and ammonia levels, mercury-free reagents are available for nonreporting purposes

ORDERING INFORMATION:

Supplied in modular packs that are easy to stack

INCLUDES:

16mm vial with 1.5mL digestion solution, 3.5mL catalyst solution, and screw cap

CERTIFICATIONS:

U.S. EPA approved (for standard and low ranges) micro Chemical Oxygen Demand test

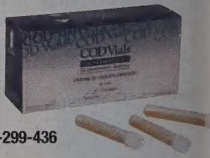
CHEMetrics* COD Reagent Vials

Contain premeasured reagents for accurate, economical determination of COD



13-299-436

- No need to modify or recalibrate existing equipment or procedures
- Optical-quality glass for accuracy
- Available in mercury and mercury-free versions
- Screw caps lined with PTFE for inertness
- Standard ⅝" (16mm) diameter for compatibility with standard COD reactors and spectrophotometers; can also be used in micro-COD reactors
- Follow the EPA-approved method for compliance reporting and use potassium dichromate as the oxidizing agent, silver sulfate as the catalyst, and mercury chloride to remove chloride interference
- Mercury-free version uses the same oxidizing agent and catalyst without the chloride compensator

ORDERING INFORMATION:

In packs of 30 reagent vials

INCLUDES:

*Fisherbrand** EnviroWare* Assembled Borosilicate Glass EPA Vials

For the collection and storage of water samples

- Manufactured from Type I, Class A or amber 203 borosilicate glass
- GPI thread: 24-400

ORDERING INFORMATION:

Replacement caps and septa available.

INCLUDES:

White open-top polypropylene closures and 0.005" PTFE/0.120" silicone rubber septa

COMPLIANCE:

All EnviroWare vials comply with guidelines for establishing test procedures for the analysis of pollutants (Ref. U.S. EPA Methods 601, 602, 603, and 624).

03-339-14E

03-339-14A

Assembled EPA vials meet the revised U.S. EPA 40CFR136 and 40CFR141 specifications for discrete water sampling.

I-Chem Certified* and Economy Vials

05-719 Series

I-Chem Certified 300 Series Vials

- Come with a Certificate of Analysis showing that the vials meet the specifications of U.S. EPA document Specifications and Guidance for Contaminant-free Sample Containers
- The Certificate includes a bar code of the production number for traceability
- A bar code label attached to each vial contains the production number and the vial's unique identification number
- Analysis labels are included

I-Chem Certified 200 Series Vials

- Processed under the same procedures as the 300 Series vials but a Certificate of Analysis[†] and bar code labels are not provided
- Analysis labels are included

I-Chem 100 Economy Series Vials

- Made of the same materials and subject to the same material specifications as the I-Chem Certified 300 and 200 Series; however, they are not processed, certified or bar code labeled, and analysis labels are not included

20mL Vials

Clear borosilicate glass vials with blue polypropylene cap and choice of open top with 0.125" PTFE-resin/silicone septum or closed top with PTFE-resin liner.

- GPI thread, 24-414
- Vials measure 1¹⁄₁₆ diameter × 2¼" high (28 × 57mm)

40mL Vials

Clear or amber borosilicate glass with blue polypropylene closures in choice of open- or closed-top styles.

- Vials with 0.125" septa come with or without attached SeptaGard* polyethylene protective tabs
- Vials with low-bleed septa have reduced siloxane bleed and are ideal for EPA Method 5035
- Molded-in retainer ring holds septa in place
- Closed-top closures have PTFE-resin liners
- GPI thread, 24-414
- All vials measure 1¹⁄₁₆ diameter × 3¾" high (27 × 95mm)
- Without graduations

I-Chem* Certified and Economy Vials, Contd.

60mL Vials

Clear or amber Type I borosilicate glass with blue polypropylene closures in choice of open- or closed-top styles.

- Closed-top closures have PTFE/silicone liners
- Open-top closures have 0.125" PTFE/silicone septa
- Molded-in retainer ring holds septa in place without bonding to the closure, yet allows for easy removal/replacement
- GPI thread 24-414
- Vials measure 1 1/16 diameter × 5 11/16" high (27 × 144.8mm)

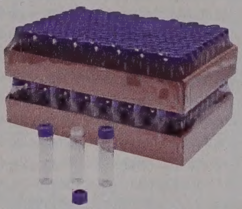
† Certificate of Analysis available for 200 Series products.

I-Chem* Economy Pack 40mL Vials

Ideal for U.S. EPA Volatile Organics Analysis, yet economically priced for general laboratory use

- Borosilicate glass vials available in clear glass or amber glass for light-sensitive materials
- Similar to I-Chem Certified* 200 and 300 Series vials, except supplied without certification or container labels



14-965-90 (top), 05-719-106

ORDERING INFORMATION:
Use with I-Chem color-coded labels to easily identify samples and type of environmental preservative.

INCLUDES:
Vials with 0.125" thick PTFE resin/silicone septa and polypropylene closures with 24-414 finish

Color	O.D. × H	Mfr. No.	Cat. No.	Case of 144
Clear	1 1/16 × 3¾" (27 × 95.2mm)	SB36-0040	**05-719-106**	185.86
Amber	1 1/16 × 3¾" (27 × 95.2mm)	SB46-0040	**14-965-90**	185.86

I-Chem* Field-Ready* 40mL Vials

No need to transport, measure and pour from reagent bottles

- I-Chem Certified 300 Series containers prefilled with chemical preservative for convenient sample preparation in the field
- Color-coded labels/seals are attached to each container to identify preservative, concentration, and tamper evidence

05-719-528

ORDERING INFORMATION:
Each case is sealed with tamper evident tape.

INCLUDES:
Blue polypropylene caps and PTFE-resin/silicone septa

COMPLIANCE:
Meet EPA analyte specifications for volatile organic analysis. Certificate of Analysis stating a listing of all analytes and their respective detection/quantitation limits and a special Field-Ready Certificate accompany each case.

Color	Chemical Preservative	Mfr. No.	Cat. No.	Case of 72
Clear	0.5mL 1:1 Conc. HCl	S336D0.5012	**05-719-528**	200.77
Amber	0.5mL 1:1 Conc. HCl	S346D0.5012	**05-719-540**	201.51
Amber	65mg Ammonium Chloride Powder	S346D6 5179	**14-965-89**	255.84

I-Chem* Low Level TOC Certified Vials

Vials contain less than 50ppb total organic carbon

- 40mL capacity
- Manufactured from clear borosilicate glass
- O.D. × H: 1 1/16 × 3¾" (2.8 × 9.5cm)

05-719-420

APPLICATIONS:
Ideal for use in pharmaceutical water sampling (Ref. U.S. EPA Method 643).

INCLUDES:
Open-top 24-414 polypropylene caps with bonded 0.125" thick PTFE/silicone septa, Certificate of Analysis; vials are bar-coded and lot number traceable

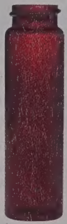
COMPLIANCE:
Meet specifications outlined in *EPA Specifications and Guidelines for Contaminant-free Sample Containers for Volatile Organic Analysis.* Analysis labels included.

Mfr. No.	Cat. No.	Case of 72
S336 0040TOC	**05-719-420**	226.83

Kimble* Glass Vials for EPA Water Analysis

Clear KG-33 or amber 203 borosilicate glass vials with screw threads.

- GPI threads 24-400
- Without closures



03-339-11C

COMPLIANCE:
Vials comply with guidelines for establishing test procedures for analyzing pollutants in water (Ref. U.S. EPA Methods 601, 602, 603, and 604).

Wheaton Glass EPA Vials

Choose clear or amber borosilicate glass vials

- 40mL capacity
- GPI thread, 24-400

APPLICATIONS:
Ideal for use in water sampling according to U.S. EPA 40CFR136 *Guidelines for Establishing Test Procedures for the Analysis of Pollutants.*

INCLUDES:
Open-top screw caps with 10mm TFE and 90mm silicone septum

06-412-37

Color	O.D. × H	Mfr. No.	Cat. No.	Pack of 72

SAMPLE VIALS—GLASS

*Fisherbrand** Class A Clear Glass Threaded Vials

- Low alkali content
- Borosilicate glass vials are free of calcium, magnesium and zinc

ORDERING INFORMATION:
Closures are packaged separately.

INCLUDES:
Autoclavable black phenolic closures with white rubber liners

COMPLIANCE:
Meet Type I, Class A ASTM* E 438 requirements.

*Fisherbrand** Glass Shell Vials

Straight-sided

- Made from Type 1, N-51A borosilicate glass
- Ideal for storing dry products
- Good visibility of contents

ORDERING INFORMATION:
Vials without closures use corks (See Corks).

*Fisherbrand** Glass Tooled-Neck Vials with Polyethylene Closures

General-purpose

- Made from Type 1, N-51A borosilicate glass
- Tooled necks ensure accurate fit with closures

ORDERING INFORMATION:
Closures are packaged separately.

INCLUDES:
The 1- and 2-dram sizes come with open-bottom closures; all other sizes come with closed-bottom, two-piece closures.

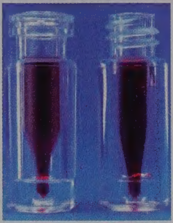
Wheaton 12 x 32mm Glass Autosampler Vials

Limited volume, glass/plastic vials

- 0.1mL volume
- Vials with glass inner core combine Type I borosilicate glass with thermoplastic polymer outer shell
- Glass is only contact between sample and seal
- Polymer provides excellent dimensional tolerance reliability for capping and instrumentation, and prevents breakage



03-336-7, 03-336-3

Wheaton Lab File* Glass Sample Vials with Rubber-Lined Caps

Wheaton-33* low-extractable borosilicate glass protects against change of pH and maintains purity of contents

- Suited for research studies
- Autoclavable
- Can be stored at low temperatures
- Packaged in corrugated trays with partitions

INCLUDES:

Rubber-lined screw caps

06-408 Series

Capacity	O.D. × H	GPI Thread Finish	Mfr. No.	Cat. No.	Case of

32½ dr. (120mL)	50 × 95mm	225546	**03-335-10D**	72/118.75

Wheaton Glass Screw-Thread Sample Vials

For storage of reagents and standards

- 5 dr. (20mL) or 10 dr. (40mL) capacity
- Excellent for derivatization reactions
- Clear glass vials made from Wheaton-33* low-extractable borosilicate glass
- Wheaton "320" amber borosilicate glass available for light-sensitive materials
- GPI Thread Finish: 24-400

Color	Capacity	O.D. × H	Mfr. No.	Cat. No.	Case of 200
Clear	20mL	27.75 × 57mm	224831	**06-412-36**	148.22
Clear	40mL	27.75 × 95mm	224833	**06-406-9**	168.87
Amber	40mL	27.75 × 95mm	224836	**06-412-10**	190.10

Wheaton V Vial*

Conical interior bottoms are designed to provide total downward drainage and maximum retrieval of contents by syringe

- Clear vials are manufactured from Wheaton-33* low extractable borosilicate glass
- Amber vials are made of "320" Type I glass for light-sensitive materials

06-444A, 06-444B, 06-444C, 22-281-410, 02-927-005

INCLUDES:

14B rubber-lined black phenolic screw caps faced with PTFE

Wheaton LVI* Vials with Crimp Top

One-piece 0.3mL clear or amber glass vials eliminate leakage and evaporation

A 300µL tapered insert is fused into a 12 × 32mm vial, ensuring that sample is sealed in by cap and septa.

- Vial features a residual volume that can be as low as 4µL, depending on the solvent, needle style, and depth adjustment of the autosampler
- Compatible with autosamplers using 12 O.D. × 32mmH vials
- Slight flare at top of insert provides a larger needle target area
- Inserts and clear vials are made from ASTM* Type I Class A borosilicate glass
- Amber vials are made from ASTM Type I Class B borosilicate glass
- With white ceramic marking spot for easier sample identification

03-344-130, 03-337-47

Color	Closure	Mfr. No.	Cat. No.	Case of 100
Clear	11mm Crimp Top	225220-01	**03-344-130**	117.47

Amber	10mm Screw Thread	225328	**06-446-2**	131.26

Wheaton LVI* Vials with ABC Screw Thread

Similar to Wheaton LVI Vials with Crimp Top, except feature a 9mm ABC screw-thread finish that can be used only with ABC caps

- Available in both clear and amber with white ceramic marking spot for sample identification
- Cap color: natural

03-410-400 Series

ORDERING INFORMATION:

Packaged in convenience packs of 100 LVI Vials with inserts and 100 lined polypropylene ABC caps. Additional cap colors are available, contact your Fisher Scientific Customer Service Representative for details.

*Fisherbrand** Polypropylene Sample Vials with Hinged Cap

- High-density polypropylene vials
- Withstand temperatures up to 100°C (212°F)
- Hinged cap provides leak-resistant, airtight seal
- Cap permanently attached to vial
- Flat surface on cap top for sample identification and organization; suitable for bar coding
- For storing dairy samples, blue and red vials have fill ridges at 45mL
- For water sampling, opaque 4 oz. (120mL) vial has 1 oz. marked graduations and fill ridge at 100mL
- Opaque 8 oz. (240mL) size also graduated

Nunc* Containers with Caps

High mechanical strength for safe handling and transport of blood, urine, and fecal specimens

Universal Containers

- Hold 25mL
- Made of polystyrene with polyethylene caps
- Available sterile or nonsterile, and with a spoon for handling of solid and semi-solid samples
- Available with writing area

12-565-20 Series

Transport Container

- Polypropylene with polyethylene cap

COMPLIANCE:

Transport and Universal Containers have passed the 95 kPa test described in UN packaging instructions 602/650 for transport of infectious substances and diagnostic specimens.

CERTIFICATIONS:

Universal containers are CE marked.

SCINTILLATION—GLASS

*Fisherbrand** 7mL Borosilicate Glass Scintillation Vial

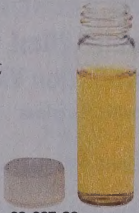
Smaller capacity vial saves in solvent use and disposal

ORDERING INFORMATION:

Packed in five shrink-wrapped trays of 200 vials; five polybags of 200 caps

INCLUDES:

White plastic screw cap with cork-backed metal foil liner



03-337-26

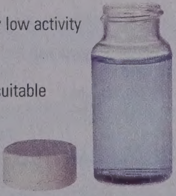
O.D. × H	GPI Thread Finish	Cat. No.	Case of 1000
17 × 54mm	15-425	**03-337-26**	283.17

*Fisherbrand** 20mL Borosilicate Glass Scintillation Vials

- Potassium-free glass provides consistently low activity counts and excellent light transmission
- Fit all common counters`
- Caps fit GPI 22-400 thread finish and are suitable for marking

ORDERING INFORMATION:

O.D. × H (with cap): 28 × 61mm. Vials with caps attached are shrink-wrapped in five trays of 100 per case. When caps are separate, vials are shrink-wrapped in five trays of 100 per case, and caps are packed in five polybags of 100 caps each.



03-337-15

Cap Style	Packaging	Cat. No.	Case of 500
White Urea Caps			
Cork-backed metal foil liner	Caps attached	**03-337-5**	198.99

SCINTILLATION—PLASTIC

*Fisherbrand** 20mL HDPE Scintillation Vials

03-337-23B

Provide low background counts and excellent light transmission

- Resist leaking and swelling caused by solvent degradation
- Fit all common counters
- Caps fit GPI 22-400 thread, and are suitable for marking

ORDERING INFORMATION:

O.D. × H (with cap): 28 × 61mm. Vials with caps attached are shrink-wrapped in five trays of 100 per case. When caps are separate, vials are shrink-wrapped in five trays of 100 per case, and caps are packed in five polybags of 100 each. Also available in bulk pack with vials and caps in polybags of 1000 each.

*Fisherbrand** 4, 6, and 8mL HDPE ScintiVials*

High-density polyethylene (HDPE) vials with white polypropylene caps

03-337-41

Choose 4mL Scinti-4* vial, 6mL Scinti-6* vial, or 8mL Scinti-8* vial.

- 4mL vial supplied with six polypropylene push caps connected by a plastic string (string "disappears" into cap's notches for snag-free operation in counter)
- 6mL vial available with a "twist-off" cap with unique shouldered design (allowing vial to be centered in 20mL carrier vial) or with a flush cap (for immediate use in miniature vial LS counters)
- 8mL vial supplied with flush cap

Capacity	Cap Style	O.D. × H (with cap)	Cat. No.	Case of 1000
4mL	String of 6 push caps	14.2 × 60.8mm	**03-337-40**	147.19
6mL	Twist-off cap with shoulder	16 × 56.6mm	**03-337-41**	255.93

8mL	Flush cap	17.5 × 62mm	**03-337-42**	264.69

*Fisherbrand** 7mL HDPE Scintillation Vials

03-337-1

Smaller capacity saves in solvent use and disposal

- With linerless white polyethylene closure and improved sealing membrane
- Resists swelling caused by solvent degradation
- Saves in solvent use and disposal

In Trays

In four trays of 250 vials, with polybag of 250 caps packed in each tray.

O.D. × H	GPI Thread Finish	Cat. No.	Case of 1000
17 × 54mm	15-425	**03-337-1**	245.31

Bulk-Packed

One polybag of 2000 vials and two polybags of 1000 caps each.

Cat. No.	Case of 2000
03-337-20	277.79

Kimble* Polyethylene Scintillation Vials

03-337-34

Especially suitable for low activity counting

- Made from high density polyethylene to rigid specifications for low background characteristic
- Smaller vial dimensions permit a substantial reduction in the quality of solvent required
- Linerless white polyethylene closure

Capacity	Cat. No.	Case of
7mL	**03-337-34**	1000/164.79
20mL	**K58515-20**	500/204.78

Kimble* 4mL Polypropylene Scintillation Vial

For low-activity counting

- Seamless with wide-mouth openings
- Polyethylene plug-style stoppers permit fast application and removal

ORDERING INFORMATION:

1000 vials are bulk packed in a single polybag; separate polybag contains 1000 plug-style stoppers.

O.D. × H	Mfr. No.	Cat. No.	Case of 1000
14 × 56mm	58552 4	**03-337-25**	130.57

Kimble* 20mL Screw Thread Polyethylene Scintillation Vials

- Vials supplied with choice of 22-400 GPI thread closure
- 28 O.D. × 57mm H

Wheaton 20mL PET Liquid Scintillation Vials

Polyethylene terephthalate (PET) vials provide benefits previously unavailable in counting vials. Safely dispose by incineration—no harmful gases are emitted; generates only CO_2 and H_2O.

- Vials also offer low permeability to solvents and minimal background count
- Lightweight, unbreakable plastic construction provides the same clarity as glass
- GPI 22-400 thread

03-341-73 and -71 Series

STYLES:
Choose from caps made from polypropylene, urea, or polyethylene. Polypropylene caps are available with foamed polyethylene or metal foil liners. Urea caps available with metal foil or Poly-Seal* cone liners. Polyethylene caps are not lined.

ORDERING INFORMATION:
Vials with caps attached are packed in individual cells in five trays of 100 per case. O.D. × H: 27 × 61mm with cap on. Minimum neck I.D., ½" (12.3mm).

With Caps Attached

SUN-SRi Electronic Crimpers and Decrimpers

Ergonomically designed, handheld tools with quick and easy push-button operation

- Attach or remove aluminum seals from 11mm and 20mm microsampling vials while vials remain in most standard sample trays
- Both crimpers and decrimpers include adjustable settings to allow for septa with varying thicknesses and compatibility with most vial/septum/seal combinations

03-340-900, -902

INCLUDES:

Wall plug charger

REQUIRED ACCESSORIES:

Black & Decker* 3.6V VersaPak* Gold Rechargeable Battery Module (Cat. No. 03-340-904) that easily snaps into the instrument

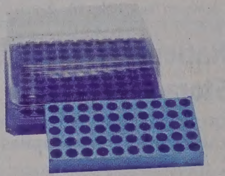
National Scientific Vial Racks for 2mL and 4mL Vials

Use for storage, sample preparation or transport



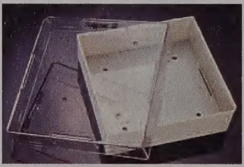
03-375-24L (top), 03-375-9 (bottom)

Description	Mfr. No.	Cat. No.	Each
For 2mL, 12 × 32mm vials			
Polystyrene with Lid, 100 holes with alphanumeric index	C4011-25	**03-375-24L**	8.75
Polypropylene Rack, 50 holes with alphanumeric index	C4012-25	**03-375-9**	15.64
For 4mL, 15 × 45mm vials			
Polystyrene with Lid, 100 holes with alphanumeric index	C4015-27	**03-375-24Q**	8.79
Polypropylene Rack, 50 holes with alphanumeric index	C4015-25	**03-389A**	20.71

Nalgene* Storage Box

Sturdy polycarbonate box for storage of various sizes of vials, bottles, and bags in a wide range of environments

- For storage from -196° to +121°C (-320.8° to +249.8°F)
- Sturdier than cardboard boxes — can be washed and autoclaved repeatedly
- For extra versatility, accommodates 5¼" (13.3cm) cardboard inserts (not supplied) for storing glass dram vials
- Removable clear polycarbonate lid



15-350-55

L × W × H	Mfr. No.	Cat. No.	Pack of 4	Case of 6 Pk.

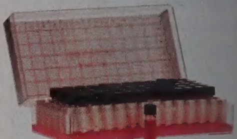
Wheaton Vial File* Storage System Case

Compartmentalized storage case of clear polystyrene with foam inserts

- Alphanumerical index card in hinged case lid for sample location
- Stackable
- Vial File Case holds up to 40 vials with ⅝ O.D. × 2" high (16 × 60mm)
- Without vials



03-336-30

ORDERING INFORMATION:

Overall dimensions: 7½L × 3¾W × 2½"H (190 × 95 × 63mm)

Mfr. No.	Cat. No.	Case of 6
228780	**03-336-30**	93.02

Wheaton Lab File* Storage System with Clear Vials with Solid Caps

Provides economical, space-saving organization

- Vials are made of Wheaton-33* low-extractable borosilicate glass to protect against changes of pH and maintain purity of contents
- Vials can be sterilized and stored at low temperatures
- With white marking area for sample identification
- Caps have 14B white rubber liner

INCLUDES:

144 vials packaged in a Lab File

03-337-21A

Capacity	Vial O.D. × H	Mfr. No.	Cat. No.	Case of 144
1⅛ dr. (4mL)	15 × 48mm	225012	**03-337-21A**	89.91
2 dr. (8mL)	17 × 63mm	225014	**06451188**	105.19

Wheaton Vial File* Storage System with Borosilicate Glass Vials

- Vials are made of Wheaton-33* low-extractable borosilicate glass and come with white 14B rubber-lined solid top caps
- Standard autosampler type
- Autoclavable

INCLUDES:

60 or 40 vials packaged in a Vial File

Vial Capacity	Vial O.D. × H	Mfr. No.	Cat. No.	Case of
½ dr. (2mL)	12 × 38mm	224891	**03-336**	60/56.48

VISCOSITY

VISCOMETERS

Thermo Scientific* Haake Viscotester* 1 Plus and 2 Plus Rotational Viscometers

One-button operation for quick, reliable tests and comparative measurements

- Can be operated handheld or on support stand
- Viscosity value is shown on easy-to-read digital display
- Push button once to turn unit on; push again to select rotor type and start measurement
- Use almost anywhere—small, battery-operated unit requires no electrical supply
- Measuring principle: a rotor rotating at constant speed is immersed in sample fluid; fluid's resistance to rotation is a measure of viscosity
- Temperature up to 150°C
- Rotor speed: 62.5rpm
- Standard measuring accuracy of ±5%—also available with increased accuracy of ±1%; contact your Fisher Scientific Customer Service Representative for details

13-874-71 Series

APPLICATIONS:

- Viscosity testing for process optimization, machine adjustment, or batch control in production
- Samples that can be processed include printing inks, paints, shampoos, creams, lotions, oils, greases, pastes, sauces and thickeners

INCLUDES:

Sturdy carrying case, Viscotester, batteries, support stand, three rotors and measuring cup

Model	Viscosity Range	Mfr. No.	Cat. No.	Each
VT1 Plus	1.5 to 330mPas	399-0100	**13-874-711**	2350.00
VT2 Plus	0.3 to 4000dPas	399-0200	**13-874-715**	2350.00

Thermo Scientific* Haake Viscotester* 550 Rotational Viscometer

Speed-controlled viscometer with cylinder measuring system

- Step motor with up to 100 predefined speeds
- Viscosity measurements according to DIN53019/ISO3219
- Substances with small particles (<0.3mm) can be measured
- Time measurements, automatic recording of flow curves, temperature programs (with optional circulator), CD-method (preset deformation) for determination of yield point
- Measurements can be performed manually (push button), internally via programmed methods, or computer controlled (with optional accessory)
- Printout of measuring results to printer via RS-232 interface
- Interchangeable rotors for medium and high viscous products

13-874-580

APPLICATIONS:

- Suitable for extensive quality-control investigations as well as routine measurements
- Food: sauces, mayonnaise, mustard, ketchup, thickening agents, stabilizers, starch, pectin
- Cosmetic/pharmaceutical: creams, lotions, shampoos, toothpastes, liquid soaps
- Paint: water-based and latex paints, bonding agents, resins
- Chemical: liquid and paste-like raw materials

INCLUDES:

Viscotester 550, support stand for base unit, temperature control vessel with connector to circulator, PT100 temperature sensor, MV DIN and SV DIN measuring cup and rotor

SPECIFICATIONS

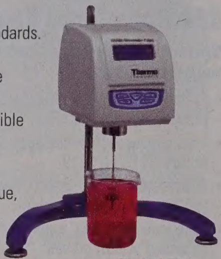
No. of Speeds	Continuous
Speed Range	0.5–800rpm
Temperature Range	-20° to +100°C
Typical Measuring Time	2 to 3 min.
No. of Sensors	2 cups, 2 rotors
Reproducibility	±1%
Voltage/Frequency	100-230V 50/60Hz

Mfr. No.	Cat. No.	Each
362-0022	**13-874-580**	14,872.00

Thermo Scientific* Haake Viscotester* VT6 Plus and VT7 Plus Rotational Viscometers

Available in two models for measuring medium- and low-viscosity substances

Ideal for quickly determining viscosity as defined in ISO 2555 and many ASTM* standards. Measure the torque resistance of a test substance at a preset speed; the higher the resistance to the substance, the higher the viscosity. Measurements are 100% compatible to the Brookfield method.



13-874-708

Model VT6 Plus

- Features a digital display of mPas, % torque, rpm, and rotor spindle number
- RS-232-C interface for data transfer to PC or printer
- Sample temperature range is up to 150°C (302°F)
- Speed steps: 0.1, 0.2, 0.3, 0.5, 0.6, 1, 1.5, 2, 2.5, 3, 4, 5, 6, 10, 12, 20, 30, 50, 60, 100, and 200rpm
- Sample volume: $600cm^3$
- Typical test time is 1 to 2 min.
- Viscosity accuracy, ±1% of full scale; reproducibility, ±0.2%

Model VT7 Plus

- Offers all the features of the VT6 Plus
- Also includes RS-232-C bidirectional control interface, Pt100 temperature sensor to monitor sample temperature
- Optional RheoWin* software for measurement and data evaluation

APPLICATIONS:

- R-version is typically used for medium-viscosity substances (e.g., sewing machine oil and whipped cream)
- L-version is ideal for low-viscosity substances such as diluted solutions, milk-like fluids, motor oils, dispersions, and emulsions

ORDERING INFORMATION:

Dimensions: 20⅞L × 17W × 10⅝"H (53 × 43 × 27cm). Electrical requirements: 110/240V 50/60Hz.

INCLUDES:

Base unit, spindles, spindle rack, spindle guard, and documentation

Model	No. of Spindles/ Type	Viscosity Range	Mfr. No.	Cat. No.	Each

*Fisherbrand** Cup-Type Viscometers

For quick measurement of the viscosity of liquids such as paint, lacquer, varnish, syrup, and oil

- Portable cups measure the viscosity of a liquid in Zahn seconds (the amount of time required for a steady stream to flow from the orifice in the bottom of the cup)
- One-piece, corrosion-resistant stainless steel

ORDERING INFORMATION:

Capacity, 1½ oz. (44mL); length, 13¾" (35cm)

VISCOMETER TUBES

*Fisherbrand** Glass Ubbelohde Calibrated Viscometer Tubes

For measurement of kinematic viscosities of petroleum products according to ASTM* D 445 and D 446

- Certified accurate (certificate included)
- Excellent precision
- Borosilicate glass
- Minimum sample volume, 11mL
- Require liquid bath depth of 241mm

ORDERING INFORMATION:

Holder not supplied. Popular sizes listed; other ASTM sizes available. Contact your Fisher Scientific Customer Service Representative for more information.

Fisherbrand* Glass Kinematic Viscometer Tubes

Cannon*-Fenske type

- Available calibrated (with calibration certificate) or uncalibrated
- Excellent precision
- Borosilicate glass
- For measuring kinematic viscosity of petroleum products by ASTM* D 445
- Specifications also conform with ASTM D 446
- Minimum sample volume, 7mL
- Require liquid bath depth of 203mm

ORDERING INFORMATION:

VISCOSITY BATHS

Koehler* KV3000 and KV4000 Constant-Temperature Baths

Simple push-button operation

22-172-591

- Constant-temperature baths with a range between ambient and 150°C (302°F); broader range of -20° to +150°C (-4° to +302°F) if used with an external chiller; sold separately
- Microprocessor PID circuitry for precise, reliable temperature control
- Selectable temperature scale in °C or °F
- Dual digital displays show setpoint and bath temperature

Timing Specifications

- **KV3000** has seven integrated digital timers on the front control panel for timing and monitoring efflux interval for each viscometer
- **KV4000** has integrated LCD microcomputer with start and stop buttons; enables user to enter the viscosity constant for each viscometer, then obtain the test result in both efflux time and viscosity units automatically after stopping each of the seven timers

Bath Specifications

- Clear Pyrex* bath chamber enclosed in polyester-epoxy finished steel housing
- Top working surface has seven 2" (51mm) viscometer ports to accommodate various types of glass capillary viscometers (contact your Fisher Scientific Customer Service Representative for selection)
- Glare-free fluorescent illumination and baffle background
- Motorized stirrer
- Built-in cooling coil connects unit to tap or recirculating water chiller

Safety Features

- Microprocessor temperature controller circuitry interrupts heater power under overtemperature conditions or if primary probes are disconnected
- Adjustable redundant controller with separate sensor probe also interrupts power under overtemperature situations
- Low liquid level cut-off circuitry
- Both circuit types will latch and prevent further operation until fault is removed

COMPLIANCE:

Conform to ASTM* D445, D2170, and related specifications

TEMPERATURE

Range	Ambient to 150°C (302°F); -20° to +150°C (-4° to +302°F) with an external chiller; sold separately
Resolution	0.1°
Calibration	0.01°
Integrated Timing	
KV3000	Seven individual start/stop timers
KV4000	Seven timers controlled by LCD microcomputer that includes start/stop buttons
Timer Display Resolution	KV3000: To 0.01 seconds KV4000: Viscosity units or in 0.1 seconds
Timer Accuracy	0.01%
Capacity	22L (5¾ gal.)
Overall Dimensions (L × W × H)	20¼ × 15¼ × 24½" (51 × 39 × 62cm)
Net Weight	78 lb. (35.5kg)
Electrical Reqts.	115V 50/60Hz, Single Phase 12.6A

Model	Mfr. No.	Cat. No.	Each
KV3000	K23700	**22-172-590**	5749.80
KV4000	K23702	**22-172-591**	6428.13

VISCOSITY ACCESSORIES

Kimble* Varnish Viscometer Tubes

For rough control work

Viscosity bubble tube has flat bottom with graduation lines at 27, 100, and 108mm from the outside bottom.

ORDERING INFORMATION:

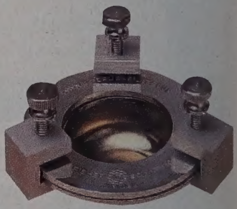
Approximate I.D., 0.42" ±0.005 (10.7mm ±0.125). Length, 4½" (11.4cm).

13-339

Mfr. No.	Cat. No.	Pack of 36	Case of 4 Pk.
46463 1075	**13-339**	90.75	264.96

Fisher Scientific* Permeability Cup

Simple, reproducible



13-338Q

- Aids in permeability determinations of paints, varnishes, and resins
- Paint is allowed to dry on a support (freshly amalgamated tin or Patapar parchment), then stripped off, cut, and clamped over cup with known amount of water
- Sample cup and water are then weighed and put into desiccator for specific length of time
- Weight checks are made at constant intervals (usually 24 hours)
- Permeability is directly determined from test data

INCLUDES:

Three aluminum clamps, aluminum clamp ring, chromium-plated brass cup body, and instructions

Cat. No.	Each
13-338Q	193.25

CSC Bostwick Consistometer

Accurately determines sample consistency

- Measures the distance a material flows under its own weight during a given time interval to determine consistency
- Used extensively by preservers, producers of jams, jellies, and other highly viscous products such as tomato paste, ketchup, baby foods, cosmetics, lotions, and paint
- Enables user to predetermine formulas to standardize production lots
- Made of durable stainless steel and equipped with a level and two leveling screws
- Spring-operated gate is held by a positive-release mechanism permitting instantaneous flow of sample
- Trough is graduated in 0.5cm divisions to permit accurate measurement of flow
- Engraved graduations won't wear off
- Originally designed by E. P. Bostwick of the U.S. Department of Agriculture, Canned Fruits and Vegetable Service

INCLUDES:

Instructions

15-347-50

L × W × H	Cat. No.	Each
14L × 3½W × 5½"H (35 × 9 × 14cm)	15-347-50	702.98

Cannon* Viscosity Standards

All standards are traceable to NIST*

- Cannon certified viscosity standards provide kinematic viscosities (in cSt or mm^2/s), densities (in g/mL), and viscosities (incP or mPa/s) at many temperatures, ranging from -55° to +150°C; prepared in Cannon's A2LA-accredited laboratory
- Values for viscosity, kinematic viscosity, and density at a variety of temperatures are printed on the container label
- Clearly identify your unit of viscosity measure (centistokes or centipoises) when ordering
- Multiple viscosities/temperatures available
- Custom-blended and/or added temperature standards can be provided—additional charges will apply
- Manufactured using ISO 9001: 2000- certified processes

ORDERING INFORMATION:

Ordering table provides an abridged listing of available standards, sold in 500mL quantities. High viscosity (to 5,300,000cp) and low-temperature standards (to -60°C) are available. Standards may also be purchased in 120mL, 500mL, 1L, and 4L quantities; contact your Fisher Scientific Customer Service Representative.

BEFORE YOU BUY GLASSWARE WASHE

Hand washing in the lab may be as simple as washing soiled glassware in hot, soapy water or as complicated as washing in an acid or base followed by rinsing and soaking. Either way, a final rinse in purified water usually completes the process. In most cases, hand washing water will reach 120°F maximum, requiring sanitization or sterilization to be done in an autoclave. For drying, the glassware can be hung on a drying rack, placed in an oven, or dried manually. Hand washing is time consuming, labor intensive and sometimes requires a person dedicated to the task full time.

GLASSWARE WASHING: HAND WASHING VERSUS AUTOMATIC LAB WASHERS

Automatic lab washers offer a variety of features designed to clean difficult to remove soils, with exposure to basic laboratory reagents, save time and increase productivity. Features to consider incl

Stainless steel interior—Components, including the liner, to withstand traces of everyday chem used in a laboratory; retain heat for faster drying

Purified water pump—When purified water rinses are part of the protocol, a built-in water pum eliminates the need for pressurized source or separate pump

High heat—Best for cleaning heavy and difficult-to-remove soil such as waxes, oil or agar

Spindle rack—Narrow-neck flasks and graduated cylinders effectively washed and dr on individual spindles

Built-in forced air dryer—Eliminates the need for a separate dryer or oven. HE filtered forced air drying, which traps dirt, lint and other particulate contaminan the air, should be considered if your research is sensitive to this type of contam

RS-232 port—If validation is required for your research, conditions are tra to a printer or computer

Accessory baskets and inserts—Accommodate various types of glass including beakers, pipets, culture tubes, BOD bottles and media plates

MODEL	FLASK SCRUBBER®	STEAM SCRUBBER®	FLASK SCRUBBER VANTAGE® SERIES
Warranty	2 years	2 years	2 years
Built-in purified water pump	Up to 6 rinses	Up to 6 rinses	Up to 6 rinses
Maximum H_2O Temperature	82° - 93°C	82° - 93°C	93°C

PERFORM A LAB WASHING ANALYSIS

To determine the best washing system for your lab, an analysis tool may be used to calculate your p daily cost of hand washing vs. the cost of buying and using an automatic glassware washer. Inform tion—such as the amount of time spent per day hand washing glassware, costs of labor, electricity and detergent, types of glassware and how much of it—are important considerations. Once all the are calculated and compared, you can decide if the purchase of an automatic glassware washer pro a logical payback and consistent results. Find the analysis tool at **www.labconco.com/washerwo**

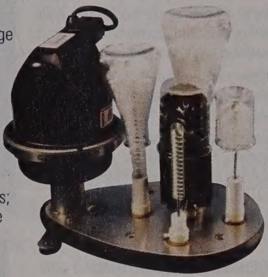
WASHERS/DRYERS

Fisher Scientific* Portable Electric Labware Washer

Compact and installs in any sink in seconds with no special plumbing or electrical requirements



- Heavy-duty motor, bronze bearings, and polished 11-gauge stainless-steel housing ensure high quality and reliability
- Partially submersible, sealed motor helps to maintain warm water temperature
- Cleaning base has enough ports to hold five brushes in a wide variety of styles and sizes; brushes spin quickly to remove residue and other substances from many types of labware quickly and easily
- Best results obtained using a low suds liquid detergent
- Made in the U.S.A.

13-641-705 shown with brushes 13-641-712 (back), 13-641-711 (middle), 13-641-708 (left), 13-641-707 (front), and 13-641-732 (right) (all sold separately). Note: For illustration purposes only; it is recommended that only one brush is used at a time.

INCLUDES:

Three-wire 8' (2.4m) cord with switch. 13-641-706 includes four brushes: Small Flask Brush, 250mL; Standard Tall Brush: 8½" (21.6cm); Test Tube Brush; and Beaker Brush, 250mL. (13-641-705 does not include brushes). Other accessory brushes sold separately.

COMPLIANCE:

ETL tested; UL listed, CE marked, NSF certified. CSA approved.

Dimensions (L × W × H)	12 × 8 × 12" (30.5 × 20.3 × 30.5cm)
Shipping Weight	26 lb. (11.8kg)

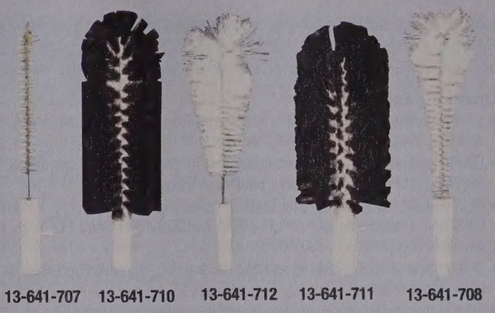
Each	676.50
Model	FS-100 without brushes
Cat. No.	**13-641-705**
Each	594.50



*Fisherbrand** Labware Washer Brushes

Heavy-duty, long-life brushes are designed to give optimum cleaning results

- Brushes are stiffer on top and softer on the sides for better cleaning
- Variety of shapes and sizes to fit most labware
- Made in the U.S.A.

Description	Cat. No.	Each
Test Tube Brush	**13-641-707**	22.76
Small Flask Brush, 125mL	**13-642-706**	25.46

LOOKING FOR DETERGENTS?

You'll find a complete selection of detergents for use with laboratory glassware washers in the Detergents section.

Labconco* FlaskScrubber* and SteamScrubber* Glassware Washers

NEW

Provide thorough, efficient and economical cleaning that meets demanding laboratory standards

Ideal for college and university, government, pharmaceutical and industrial labs, or any facility utilizing reusable glassware. Choose from single-rack FlaskScrubber series models or dual-rack SteamScrubber models. Accessory spindle and open racks are designed specifically for laboratory glassware and are interchangeable between models to allow customization to user needs. Made in U.S.A.

Operating Features

- Achieve higher water temperatures for enhanced washing, faster drying, and sanitizing (see ordering table for specs)
- LCD information center for customizing cycles and monitoring operations, including internal water temperature (°C or °F) and alarms
- High water circulation rates for thorough cleaning: 96 gal./min. (363L/min.) when operated on 115V 60Hz and 230V 50Hz, and 112 gal./min. (424L/min.) on 230V 60Hz
- Dual pumps: one for washing and one for draining, to reduce potential for cross-contamination
- Built-in purified heater pump brings nonpressurized or pressurized purified water into tank for up to six pure water rinses
- Built-in steam generator produces hot vapor to penetrate and remove dried residue for cleaner glassware
- Manual-fill dispensers for detergent (powder or liquid) or rinse aid solution
- Built-in forced air drying up to 99 min. and programmable from 38° to 70°C (100°-158°F)
- Two user-set cycle programs
- User-set delayed start (up to 8 hours)

Structural Features

- Type 304 brushed stainless-steel door, tank, and upper and lower wash arms
- Free-standing models have stainless-steel exterior sides and top
- One-piece, stainless-steel, fine mesh particle drain filter to trap debris in tank to protect pumps
- Four leveling feet
- ⅜" female NPT inlet fitting for hot water tap connection
- Factory-installed drain hose and band clamp

FlaskScrubber Washers

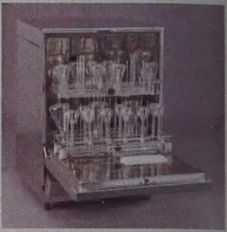
- Outfitted for washing narrow-necked flasks
- Supplied with one Type 304 stainless-steel spindle rack with 36 detachable large spindles, 18 holders, 36 clips and 10 interchangeable small spindles
- Factory-set cycle programs: For 115V models, 7 (RINSE ONLY, PLASTIC, GLASS, GLASS PLUS, SCIENTIFIC, SCIENTIFIC PLUS, DRY ONLY) for 208/240V models, 10 (add INTENSE, INTENSE PLUS and EXTREME)

FlaskScrubber Vantage* Series Washers

- Factory-set cycle programs: 10
- Automatic dispensers for liquid detergent dispenser (with peristaltic pump) and rinse aid
- Water conductivity monitor to confirm rinse water cleanliness and effective detergent removal
- Built-in HEPA[†]-filtered forced-air drying through the spindles up to 99 min. and programmable from 38° to 70°C (100° to 150°F)
- RS-232 port for monitoring washing operation on user-supplied computer or recorder
- Tempered safety glass viewing window with 25w interior light
- Other features same as FlaskScrubber washers

SteamScrubber Washers

- Supplied with upper and lower Type 304 open stainless-steel racks for washing wide-mouth glassware
- Upper rack has additional wash arm and side release latches for easy removal
- Factory-set cycle programs: For 115V models, 7 (RINSE ONLY, PLASTIC, GLASS, GLASS PLUS, SCIENTIFIC, SCIENTIFIC PLUS, DRY ONLY) for 208/240V models, 10 (add INTENSE, INTENSE PLUS and EXTREME)



10-359-100

10-359-112

ORDERING INFORMATION:

Accessories are interchangeable between models and are sold separately. Onsite validation is available through Labconco; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

One spindle rack (FlaskScrubber and FlaskScrubber Vantage Series), or two open racks (SteamScrubber Series); see model information, above, for details

WARRANTY:

Two years on parts and labor

COMPLIANCE:

Meet NSF International sanitization requirements

CERTIFICATIONS:

ETL listed, CE marked

System Requirements

Inlet Water Temperature, Minimum	49°C (120°F)
Inlet Water Temperature, Recommended	60°C (140°F)
Purified Water Pressure, Minimum	0psi
Water Consumption per Fill	3.4 gal. (13L)
Hot Tap Water Pressure at Washer	20-120psi
Hot Tap Water Flowrate	1.25 gal./min. (4.7L/min.)
Connection	⅜" O.D. copper tubing for connection to water inlet valve Purified water with supply piping min. ⅜" I.D. to permit at least 0.9 gal./min. (3.4L/min.) flow

ACCESSORIES

Base Stands

For use with Labconco* FlaskScrubber* and SteamScrubber* Washers

Elevate washers 17" (43.2cm) for convenient loading

- Type 304 stainless-steel construction
- For stationary use
- Includes storage compartment(s) with door, leveling feet and instructions
- No assembly required

For Use with	No. of Storage Compartments	L × W × H	Mfr. No.	Cat. No.	Each
Freestanding FlaskScrubber or SteamScrubber washers	1	27½ × 24¼ × 17"H (70 × 61 × 43"H)	4595400	**10-359-127**	780.00
FlaskScrubber Vantage Series washers	2	27½ × 32¼ × 17"H (70 × 82 × 43"H)	4595500	**10-359-126**	970.00

ACCESSORIES

Racks

For use with Labconco* FlaskScrubber* and SteamScrubber* Washers

Type 304 stainless-steel construction.

Upper Spindle Rack

- Provides direct injection cleaning and forced air drying through the spindles
- Accommodates glassware up to 8½"H (21.6cm)
- With side release latches and side rails for tank side wall installation
- Includes 30 removable spindles, 30 adjustable-height clips, 10 small spindles, 15 plastic glassware folders, tool, 30 nylon plugs and wash arm
- Spindles may be removed and plugged to accommodate various accessory inserts (sold separately)

Upper and Lower Standard Racks

- Supplied with SteamScrubber washers
- Can be used with FlaskScrubber and FlaskScrubber Vantage Series washers
- With acetal rollers
- Accessory basket inserts (sold separately) can be added to suit glassware washing needs

Description	For Use with	L × W × H	Mfr. No.	Cat. No.	Each
Upper Spindle Rack	FlaskScrubber and FlaskScrubber Vantage Series	20⅞ × 20 × 7¼" (53 × 51 × 18cm)	4595600	**10-359-125**	1760.00

Inserts

For use with Labconco* FlaskScrubber* and SteamScrubber* Washers

Type 304 stainless-steel inserts are available in various styles to hold specific labware.

BOD Bottle Insert

- Capacity: 18 bottles
- Grid size: 70 × 70mm
- With handles for easy lifting

Culture Tube Insert

- Capacity: 242 tubes from 10 to 12mm O.D.
- With handles for easy lifting

48-Pin Insert

- Holds a variety of glassware
- Stainless-steel pins are plastic-tipped to protect glassware

Petri Dish Insert

- For Petri dishes, watch glasses and microplates
- Capacity: 24 plates
- Grid size: 22 × 140mm

Pipet Insert

- Permit direct injection pipet cleaning
- Capacity: 16 pipets, 1 to 50mL in size
- Self-sealing silicone check valves allow washing of partial or full loads
- Includes two 1¼" (3.2cm) mounting spindles and PVC-coated holder
- FlaskScrubber and FlaskScrubber Vantage Washers hold up to two inserts

Description	L × W × H	Mfr. No.	Cat. No.	Each
BOD Bottle Insert	8¾ × 19½ × 6" (22.2 × 49.5 × 15.2cm)	4589201	**10-359-121**	149.00
Culture Tube Insert	8⅝ × 18 × 4½" (22 × 46 × 11cm)	4588600	**10-359-119**	212.00

National Undercounter Glassware Washers

Use in university, pharmaceutical, bioresearch, chemical research, clinical, and industrial environments

Simple-to-operate microprocessor control interface and multiple cycle selections ensure each load is processed with the minimum energy required.

- Depending on model selected, a maximum 4.3 gal. (15L) or 5.4 gal. (20L) of tap water and 1.3 gal. (5L) of DI water is used
- Smart fill system has 14 water management and control features to maintain proper fluid level and prevent leak damage
- 29° to 77°C (85° to 170°F) temperature selection range
- Easy flexible loading; all models have 7¾" (20cm) upper rack clearance and 9¾" (25cm) lower rack clearance
- Six wash programs
- Automatic detergent and neutralizer dosing
- Separate drain and wash pumps for high cleaning capability and controlled flowrate
- Three separate filters trap debris located in front of units for easy access; no tools required for filter removal
- Drain pump has magnetic impeller for protection from debris; units automatically reverse flow if debris is present
- Safe to use on plastic labware because of the inline heating element and no exposed high-temperature components in the wash chamber
- Fit in standard cabinet opening
- Adjustable legs on all models
- High-quality Type 304 stainless-steel chamber for corrosion protection and long life
- Acoustical and thermal insulation for ultra quiet operation
- Manufactured using ISO 9001:2000-certified processes
- All washers are available in a choice of undercounter installation versions, freestanding (FS) versions that have a stainless-steel outer cabinet, and freestanding mobile (FSM) versions that have a stainless-steel outer cabinets and casters
- **NLW-88 Series** models are a cost-effective choice for washing basic glassware
- **NLW-108 Series** models are similar to the NLW-88 series, but have a DI final rinse cycle
- **NLW-128 Series** models consist of spindle-ready models that can accommodate one or two direct injection spindle racks for narrow-neck glassware (clean 22 flasks 20¾" [53cm] tall or 44 shorter flasks—22 up to 9¾" [25cm] tall and 22 up to 7¾" [20cm] tall); also have the DI final rinse cycle
- **NLW-1285 Series** models are similar to the NLW-128, but add a high-performance pump for critical applications and tough cleaning requirements

National Large-Capacity Glassware Washers

Ideal for high volume washing in large laboratories and research centers

User-friendly Operation

- Single tube system
- PLC Control System located at eye level and incorporates easy-to-use touchscreen with menu-driven software
- Smart fill system features 14 water management and control features to maintain proper fluid level and prevent leak damage
- Three preset wash routines: light, medium, heavy
- Store up to 20 custom wash routines with up to 15 steps of flush, wash, rinse, exhaust, or dry
- For any cycle, select from hot, cold, warm tap water and DI water; wash/rinse water temperatures up to 95°C; dry water temperatures up to 105°C; and times up to 99 minutes
- Detergent and neutralizer dispensing system—select detergent or neutralizer to be used from control panel and it is automatically injected into the wash cycle

Cleaning System

- Multiple rows of laser-drilled spray tubes travel back and forth beneath the glassware, creating moving walls of water
- Spray tubes are grouped in two sets to provide complete corner to corner washing coverage for consistenly clean glassware
- Spray tubes are easily removed for quick cleaning
- Separate drain and wash pumps offer maximum cleaning capability and a controlled flowrate for discharge into typical lab drains
- Three separate filters trap debris
- Drain pump has magnetic impeller to protect pump if debris is present; units automatically reverse if it senses debris

Interior Features

- One loading level—large wash chamber is constructed of Type 316 stainless steel for corrosion resistance, heavy-duty use, and long life
- Washers hold two, four, or six baskets; and one, two, or three spindle racks—up to 96 spindles (baskets, spindles, and spindle racks are available separately; contact your Fisher Scientific Customer Service Representative for information); 25" (63cm) shelf clearance
- Insulation layer between inner and outer walls conserves heat and with the linear spray motion, provides extremely quiet operation

15-365-55

Exterior Features

- Ergonomically designed with a convenient chamber height for easy loading of glassware without bending
- Tempered glass door is electrically operated and lifts vertically for easy access to the chamber and to conserve floor space
- Exterior 304 stainless-steel panels
- Select from electric or steam-generated heat models.

*Fisherbrand** Sharps-A-Gator* Point-of-Use Sharps Containers

Horizontal loading, nonmechanical sharps opening provides one-hand, one-step, no-touch sharps depositing

- For use in patient rooms and all patient-care areas
- Opening design impedes hand entry to reduce risk of needle sticks when disposing of sharps
- Clear tops and translucent containers allow you to monitor fill level
- Puncture-resistant, durable polypropylene
- Can be autoclaved or incinerated
- Clearly marked with biohazard label

Top, left to right: 14-827-129, 14-827-128, 14-827-131. Bottom: 14-827-122, 14-827-120, 14-827-117.

*Fisherbrand** Burn-up Bin* Biohazard Waste Boxes

Store flat, assemble in seconds

- Corrugated cardboard—single use
- 2mil polyliner safely holds biohazard waste
- Tight-fitting lid has flap opening to accept material; to dispose, simply close lid and transfer filled box to incinerator
- Graphics and biohazard symbols readily identify contents, encourage proper use

12-009-8A

Model	L × W × H	Opening Dia.	Cat. No.	Case of 6
Benchtop	8 × 8 × 10" (20 × 20 × 25cm)	5¼" (13.3cm)	**12-009-8B**	37.11

Rubbermaid* Slim Jim* Wastebasket

Ideal for tight spots

- Large 23 gal. (87L) capacity rectangular container made of chemical-resistant polyethylene
- Durable, easy-to-clean construction
- Optional swing-top lid offers more hygienic hands-free disposal

15-353-17

Color	L × W × H	Mfr. No.	Cat. No.	Each
Wastebasket				
Beige	20 × 11 × 30" (51 × 28 × 76cm)	3540 BEIGE	**15-353-17**	62.96
Swing-top Lid

Rubbermaid* Step-On Waste Containers

For hands-free, sanitary waste management

- Quiet, heavy-duty foot pedal conveniently opens durable plastic lid
- Seamless, all-plastic construction and rounded corners make disinfecting easier
- Overlapping, self-closing lid shuts tight to contain odors
- Puncture resistant and leakproof; won't rust or chip

15-353-23

ORDERING INFORMATION:

Containers also available in white; contact your Fisher Scientific Customer Service Representative for orderin information. Use with Fisherbrand* Biohazard Autoclavable Bags, availabl separately in the Bags section.

COMPLIANCE:

Assists in complying with OSHA 29CFR1910.1030 Occupational Exposure to Bloodborne Pathogens. **Note:** May be used for biohazards **only** when container is properly labeled with a biohazard label sold separately; see th Labeling section.

CERTIFICATIONS:

FM and California State Fire Marshal approved for fire safety.

† 18-gal. container also uses 38 × 47" and 38 × 48" Fisherbrand Autoclavable Bags.

Nalgene* Large Waste Containers

With cover for added safety

- Made of autoclavable, heavy-duty polypropylene
- Ideal for holding and sterilizing refuse, clothing, equipment, labware, and contaminated material
- Molded-in handgrips

COMPLIANCE:

Meet OSHA Standard 29CFR1910.1030 for use as protection against bloodborne pathogens.

NOTE:

Cover must be removed before autoclaving.

Nalgene* Safety Waste Systems

For temporary waste containment on the bench or under a hood

10-437-36, 10-437-35

System consists of a chemical- and break-resistant 1⅛ gal. (4L) HDPE or 2⅝ gal. (10L) fluorinated HDPE container, removable funnel with lid, closure/funnel adapter, filter, and screen insert.

- Large-diameter funnel has attached cover with Easy-Snap safety latch to minimize accidental spills and volatile emissions
- Funnel easily unscrews from polypropylene closure/funnel adapter for cleaning and quicker access
- Closure/adapter includes vent with polypropylene/PTFE vent plug that releases pressure during pouring, and prevents emissions during use; adapter can also connect to external syringe filter
- Removable polypropylene screen insert fits at bottom of funnel to trap large particles
- Resist common lab solvents, acids, and bases; not resistant to long-term UV light exposure

ORDERING INFORMATION:

Secondary containers (sold separately) should be used with Safety Waste Systems during transport, transfer or storage.

NOTE:

These systems are not safety cans as defined by OSHA guidelines and are designed for temporary waste disposal only. Waste should be disposed of prior to 90 days in accordance with OSHA regulations.

Capacity	Closure Size	Funnel Top Dia. × Stem L	Container Material	Mfr. No.	Cat. No.	Each

Scienceware* Touch Free* Automatic Waste Cans

Automatically open and close without a touch

11-394-453, 11-394-451, 11-394-452

When a hand or solid object is moved over the top, waste can detects motion, opens lid to accept waste, and then closes automatically.

- Protect users from contact with waste receptacle and its contents
- Fitted well helps to reduce odor and airborne contamination
- ON-OFF switch deactivates AUTO-OPEN/CLOSE function

2.5 Gallon

- Ideal for benchtop use
- Removable rigid autoclavable polypropylene liner will not leak or rust
- Body and lid made from easy-to-clean, molded ABS plastic
- White pail with white top

7.3 Gallon

- Pail made from polypropylene with an ABS plastic top
- Small footprint enables a fit into tight spaces
- Gray pail with gray top

12 Gallon

- Small footprint enables a fit into tight spaces
- Stainless-steel pail with black ABS plastic top

INCLUDES:

Each unit is supplied with a brightly colored biohazard label and three other labels (recyclables, trash, and a blank label for individual applications).

REQUIRED ACCESSORIES:

Requires four "D" batteries (not included) which will provide approximately 4000 openings. All cans should be lined with disposable trash or biohazard bags (sold separately). Batteries and bags available on our Web site.

NOTE:

Prior to use, cans should be appropriately labeled with one of the included labels to indicate the type of waste to be placed inside the can.

FISHERBRAND* BIOHAZARD AUTOCLAVE BAGS

Strong, pliable, leak- and puncture resistant bags are available in red and clear polyethylene and polypropylene. Bags available plain or printed with biohazard symbol.

Visit www.fishersci.com and search for Fisherbrand Biohazard Bags

NORTH* BLOODBORNE PATHOGEN RESPONSE KITS

Provides fast, effective cleanup of potentially infectious materials. Includes necessary supplies to clean up a spill containing bloodborne pathogens, such as blood, vomit and other bodily fluids. Three kit sizes available.

Visit www.fishersci.com and search for North Bloodborne Pathogen Kits

Eagle* Polyethylene Oily Waste Cans

Ideal for temporary storage of solvent, waste rags, and other materials subject to spontaneous combustion

- Durable, fire-safe cans won't rust or dent and resist most chemical compounds
- Cans feature foot treadle that opens cover; lid self-closes
- Choice of red or high-visibility yellow

18-010, 18-944, 18-009

COMPLIANCE:

Meet OSHA 29CFR1910.108 and 20CFR1910.106 requirements.

A WATER SYSTEM IS NOT JUST THE "POLISHING" UNIT.

It is the "polishing" unit plus the feedwater; hence, a system.

Underlying all scientific applications is the universal need for high quality water and reagents. The quantity and quality of the water used in the lab has a profound effect on every phase of your research—from washing glassware to making culture media for sensitive cells.

There are four basic contaminants in water:

- **Inorganic ions** (measured in µs/cm or megaohms)
- **Organics** (measured in ppb)
- **Bacteria** (measured in cfu/mL)
- **Particles/colloid**s (measured by silt density index)

There are different types of purification technologies that will purify tap water, and advantages to each of them. The efficiency of each purification technology at removing the contaminants is demonstrated in the chart below:

- Deionization
- Distillation
- Reverse Osmosis
- Electrodeionization

There are also different polishing technologies:

- UV light
- Membrane filtration

ore Elix 3/5/10 Systems*

er consistently pure water with low operating costs
solution for daily applications that require pure water
de 5 to 200L/day of Type II water

QUESTIONS TO ASK

- What is the feedwater source?
- How much water is needed on a daily basis? Weekly basis?
- What is the final application for the water being produced?
- What final quality is needed?
- Conductivity?
- Total Organic Carbon?

WATER PURIFICATION

MILLIPORE

Millipore* Water Purification Systems Selection Guide

Millipore Water Purification Systems are designed to support a wide variety of applications and analyses to meet the needs of laboratories requiring from 5 to 8000L/day of pure and ultrapure water. Each system listed in the Selection Guide is designed to meet or exceed Type I, Type II or Type III water purity standards.

UL-listed: Milli-Q*, Elix*, RiOs*, and Simplicity* systems.

Millipore* Milli-Q* Advantage A10 Water Purification System

Delivers ultrapure water with flexibility for a wide variety of daily applications

Features two distinct components: compact production unit and Q-POD point-of-use delivery unit. Ideal for labs with limited space. Both units are required for a complete system. Manufactured using ISO 9001: 2000-certified processes.

Production Unit

- Built-in UV lamp and TOC monitor
- Small footprint
- Fits on or under bench, or can be wall-mounted
- Graphic display guides user through system operation, performance, troubleshooting and maintenance and can be password-protected
- RFID tag functions ensure that you are putting in the correct consumables

Q-POD (Quality-Point-of-Delivery) Unit

- Provides final polishing
- Multicolor graphic display allows easy interaction with system and provides water quantity/quality information
- Manual or precise-volume dispensing
- Maximum flowrate: 2L/min.
- Removable dispensing arm adjustable to lab glassware/plasticware
- Double monitoring allows control over both ionic and organic contaminants that can impact research results
- Up to three Q-POD units can be used with each Advantage system at different locations in the lab

How It Works

- Pure water from external purification system enters Q-Gard pretreatment pack (chosen based on feedwater source)
- Pretreated water passes into double wavelength UV lamp (destroys organic molecules and bacteria)
- Quantum polishing catridge removes ionic and organic contaminants below trace levels to match required water quality requirements
- Ultrapure water moves to Q-POD unit for final purification
- Calibrated TOC and resistivity meters measure organic/ionic water quality at system outlet

APPLICATIONS:

Spectrophotometry, spectroscopy, chromatography, and biochemistry

ORDERING INFORMATION:

Order both the production unit (Z00Q 0V0 US) and Q-POD point-of-use dispenser (ZMQS POD 01) for a complete system. Accessories and consumables, including wall mounting brackets, flow regulator, purification packs, filters and replacement lamps, are sold separately. Technical support, training, maintenance and laboratory validation services are available; contact your Fisher Scientific Sales Representative for details.

REQUIRED ACCESSORIES:

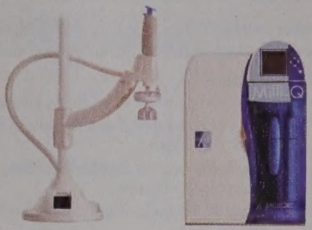
Pure water source (Elix* system or equivalent, not included); purification packs and cartridges (sold separately)

COMPLIANCE:

USP 645 suitability requirements

CERTIFICATIONS:

ISO 14001



ZMQS POD 01, Z00Q 0V0 US

Millipore* Milli-Q* Ultrapure Water Systems

Five systems support HPLC, IC, GC/MS, ICP-MS, PCR, 2-D electrophoresis, tissue culture, molecular biology, and more

Polish pretreated water to produce up to (1.5L/min.) ultrapure reagent-grade Type I water with 18.2 megohm·cm resistivity. Accept water pretreated by reverse osmosis, distillation, deionization or electrodeionization.

Left to right: ZMQS6V001, ZMQS6VF01, ZMQS60001, ZMQS60F01, ZMQS6VE01

Key Features

- Hold three, easy-to-install filters (sold separately)
    - Q-Gard* pretreatment pack, specific to feedwater source, provides initial purification
    - Application-specific Quantum* polishing cartridge provides secondary purification
    - Millipak* filter unit, at point-of-use, removes remaining bacteria and particles
- Choice of continuous or intermittent water circulation maintains water purity when system is not in use
- Point-of-use dispenser with ergonomic trigger delivers water continuously or at fixed volumes from 8 oz. to 17 gal. (0.25 to 64.5L) in 8 oz. (0.25L) increments
- Backlit LED displays system parameters in six languages (English, Spanish, French, German, Italian and Japanese)
- Setpoint alarm activates if system malfunctions
- Systems can be bench-, wall- or underbench-mounted

Optional Features

- Built-in, inline A10 TOC (Milli-Q Element only) monitor provides continuous TOC measurements when system is purifying water and intermittent measurements when system is not in use
    - Ensures low ppb levels of ionic contaminants
    - Designed according to current USP requirements
    - Measures between 1 and 999ppb
    - Outputs TOC and resistivity values to external printer (not included) via built-in RS-232-C port
- Gradient, Synthesis and Element systems irradiate water at 254 and 185nm to effectively destroy organic molecules and bacteria
- Element systems monitor and reduce TOC levels to <5ppb
- Bench-integrated systems come with a point-of-use dispenser that allows water to be dispensed where it is needed, not just where it was produced
- Accessory Remote display (Cat. No. ZMQS RMD S1) permits water-quality monitoring and operation up to 10' (3m) away
- Accessory Foot pedal (ZMQS FTS 01) provides hands-free water delivery
- Optional Remote point-of-use dispenser (ZMQS POU R1) adds a second dispenser that delivers purified water up to 8' away from nonbench-integrated Milli-Q systems; Accessory Kit (ZMQS POU KT) required

Milli-Q Academic System

- Designed for general laboratory applications
- Uses Q-Gard, Quantum, and 0.22µm Millipak filters
- Measures resistivity compliance

Milli-Q Gradient System

- Ideal for HPLC, GC/MS, LC and ILC analyses
- Incorporates the same purification and monitoring techniques as the Milli-Q Academic, plus photo-oxidation technology to reduce organics to <5ppb[1]
- Includes a UV lamp to lower bacterial levels within the system

Milli-Q Biocel System

- Designed for life science applications
- Ideal for electrophoresis gel preparation, mammalian cell culture, recombinant DNA studies, and monoclonal antibody production
- Removes pyrogens and other bacterial byproducts
- Utilizes Pyrogard* 5000 UF cartridge to ensure very low nuclease and pyrogen levels (<0.02Eu/mL)
- Produces water that can be used as replacement for DEPC-treated water

Milli-Q Synthesis System

- Designed for critical biological applications
- Incorporates three-step purification process and monitoring with UV photo-oxidation and ultrafiltration technologies
- Produces water with extremely low ionic, organic, pyrogen and nuclease contamination
- Ideal for PCR, 2-D electrophoresis, and DNA sequencing
- Can also be used for preparing buffers and media for mammalian cell culture

Milli-Q Element System

- For elemental ultratrace analyses such as ICP-MS, flame atomic absorption spectroscopy (FAAS), and ion-liquid chromatography (ILC)
- Utilizes an optimized succession of filters to produce water without contaminants detrimental to trace elemental analyses
- Uses Q-Gard B1 (removal of Boron), Quantum ICP, and 0.1µm Optimizer* LW final filter to produce ultrapure water with ppt and ppq detection limits (depending on element)
- Includes foot pedal for hands- and contamination-free operation in clean areas
- Available w/TOC monitoring

ACCESSORIES

Accessories and Consumables for Milli-Q* Water Purification Systems

Remote Display

- For operating and monitoring wall- or underbench-mounted Water Purification Systems up to 10' (3m) away (cable included)
- Displays all monitoring information shown on system display, including pressure, temperature, conductivity, resistivity, nontemperature operating parameters, maintenance requirements and alarm messages†
- Also shows nontemperature-compensated resistivity and conductivity values as required by USP 26
- Built-in RS-232-C interface connects remote display to printer or computer

Remote Point-Of-Use (POU) Dispenser

ZMQS POU R1

- Dispenser connects to system's recirculation loop and precisely dispenses 8 oz. to 17 gal. (0.25 to 64.5L) up to 8' (2.5m) away from Milli-Q* Ultrapure System
- Ergonomic trigger enhances operator comfort
- Longer tubing facilitates filling tall flasks
- Durable dispensing arm rotates 180°
- Green LED indicates dispensed water meets specifications
- Unit can be wall mounted or set on benchtop

INCLUDES:
Millipak* 0.22µm final filter for removing microorganisms and particulates at point of use

REQUIRED ACCESSORIES:
Accessory kit (ZMQS POU KT, below) required when adding a remote dispensing unit to Milli-Q systems for two dispensing locations.

NOTE:
Bench-integrated models are supplied with remote point-of-use dispenser

Description	Cat. No.	Each
Remote Dispenser	**ZMQS POU R1**	947.00
Remote Dispenser Accessory Kit	**ZMQS POU KT**	122.68

Millipore* Synergy* Ultrapure Water Systems

Point-of-use system delivers up to 20L/day of ultrapure water from a purified water source

Synergy Water System with optional wall-mounting bracket

Compact design; fits easily on benchtop or on wall. Allows delivery of a fixed volume of Type I water and automatically shuts off once the selected volume has been delivered. Ideal complement to Millipore Elix* or RO systems. UV system is available for applications requiring very low levels of organic contaminants.

- Simple, intuitive operation
- Water quality parameters (resistivity, conductivity, temperature) are clearly indicated on color LED display
- Produces Type I water (18.2megohm·cm at 25°C ultrapure water) on demand from pretreated water (reverse osmosis or demineralized water)
- For users needing between 2 to 20L/day with instant flowrate of 1L/min.
- Dispensing can be adjusted for different size lab glassware
- Time-saving fixed volume dispense
- Low maintenance—only one cartridge to replace, one or twice per year based on usage

UV System

- Suitable for HPLC, GC ILC and TOC analyses
- Features dual-wavelength UV lamp
- Produces water with <5ppb TOC (when feedwater TOC is <50ppb)

APPLICATIONS:

HPLC and other spectrophotometric/spectroscopic analytical techniques for biological, biomedical and cell culture applications

ORDERING INFORMATION:

When equipped with optional BioPak* cartridge as final filter, Synergy produces pyrogen-free, Nuclease-free water.

REQUIRED ACCESSORIES:

SynergyPak* cartridge and one final filter (either MilliPak*-20 or BioPak)

Model	Electrical Requirements	Cat. No.	Each
Synergy Ultrapure Water System	120V 50/60Hz	**SYNS000US**	2936.00

Millipore* Simplicity* Ultrapure Water Systems

Economical alternative to bottled water

Portable, on-demand system delivers up to 5L/day of ultrapure water from pretreated water (Elix* system, distilled, deionized, or reverse osmosis water). Fits anywhere in the lab and requires no special installation or water feed connection. Simplicity ultrapure water is not subject to the degradation and contamination that affects bottled water. UV system is ideal for applications requiring very low contaminant levels.

- Produces Type I water (18.2megohm·cm at 25°C ultrapure water) on demand from pretreated water (reverse osmosis or deionized water)
- For users needing between 1 to 5L/day of ultrapure water with instant flowrate of 0.5L/min.
- System draws from a removable, refillable, built-in reservoir
- Installation requires no plumbing
- Alarm alerts user to sudden drop in quality of product water, ensuring water quality at all times
- Dispensing can be adjusted for different size lab glassware
- Very low maintenance—one catridge to change, once or twice per year based on resistivity displayed for product water

SIMS 600 00

Simplicity UV System

- Suitable for sensitive analyses such as HPLC, GC and TOC
- Built-in dual wavelength UV lamp (185 and 254nm)
- Produces water with <5ppb of organic contaminants

INCLUDES:

2L reservoir that stores pretreated water

REQUIRED ACCESSORIES:

Cartridge and final filter

LOOKING FOR PRETREATMENT SYSTEMS?

Millipore* Elix* systems produce TypeII analytical-grade water–directly from potable tap. See p. 1965.

Millipore* Direct-Q* 5 Ultrapure Water System

Designed for labs that require 1¼ to 4 gal. (5 to 15L) of ultrapure water per day and do not have access to acceptable pretreated water

Produces up to 0.6L/min. Type I water "on demand" with 18.2 megohm·cm resistivity and <30ppb Total Organic Carbon (TOC) directly from potable tap water.

ZRQS 600 5Y

Key Features

- Flexible dispenser conveniently delivers water
- Compact unit can be wall- or bench-mounted
- RS-232-C interface

Direct-Q 5

- Built-in booster pump increases flowrate through the RO membrane and ensures constant, consistent flow regardless of feedwater density and temperature
- High-recovery loop after the RO membrane recycles water through the system, conserving water and reducing operating costs

APPLICATIONS:

Produce water ideal for preparing buffers, culture media, blanks and standard solutions.

REQUIRED ACCESSORIES:

- One pretreatment pack, one Quantum* cartridge and one Millipak* final filter (each sold separately)
    - Progard* pack pretreats feedwater
    - Quantum EX polishing cartridge removes organic contaminants
    - Quantum IX removes inorganics
    - Quantum VX cartridge removes volatile organic contaminants
    - Millipak-40 Filter Unit provides final filtration

Model	Direct-Q 5
Flowrate	1⅜ gal./hr. (5L/hr.)
Resistivity	18.2megohm·cm
Total Organic Carbon (TOC)	<30ppb with Quantum IX; <10ppb with Quantum EX
Particulates	0.22µm sterilizing filter
Dimensions†	18 × 10 × 20" (45.5 × 25.5 × 50cm)
Weight (Operating)	65¼ lb. (29.6kg)
Electrical Requirements	120V 60Hz
Cat. No.	**ZRQS 600 5Y**
Each	5718.57

† With 10L reservoir attached.

Millipore* Direct-Q* 3 Ultrapure Water Systems

Provide Type I and Type III water from a single device

Designed for labs that require 1¼ to 4 gal. (5 to 15L) of ultrapure Type I water per day but do not have access to acceptable pretreated water. With Biopak* Final Filter (CDUFBI001, order separately), systems can produce pyrogen-free, RNase-free water at a flowrate of 0.2L/min. Type III water is available from built-in 1.5 gal. (5.6L) reservoir at a flowrate of ¾ gal./hr. (3L/hr.) at 15°C with a 15% recovery.

ZRQS OPO US

Key Features

- Water quality parameters (resistivity or conductivity, temperature) are clearly indicated on a bright color display
- Maintenance is limited to infrequent and easy replacement of required SmartPak* DQ3 cartridge (SPRO 0SI A1, available separately)
- Volumetric dispensing function regulates water delivery for volumes up to 2⅝ gal. (9.75L) in ⅛ gal. (0.25L) increments
- Systems connect to potable tap water feed with ½ NPTF connector and inlet strainer, and 8mm O.D. tubing (supplied)

Direct-Q 3

- Produces up to >0.1 gal./min. (>0.5L/min.) Type 1 water on demand at 25°C and 30ppb Total Organic Carbon (TOC) directly from potable tap water
- Product water is suitable for preparing buffers for liquid chromatography separations and biochemical experiments, also for use with such analytical techniques as spectrophotometry and spectroscopy

Direct-Q 3UV

- Reduces bacteria and TOC to 10ppb via a dual wavelength UV lamp
- Product water is suitable for applications requiring very low organic contaminants levels such as HPLC, GC, ILC and TOC analyses

REQUIRED ACCESSORIES:

SmartPak DQ3 Purification Pack (SPRO 0SI A1) and one final filter, either MilliPak*-20 (MPGP 020 01) or BioPak Ultrafiltration Cartridge (CDUF BI0 01)

Millipore* Elix* 3/5/10 Water Purification Systems

Purified water meets or exceeds CAP, ASTM*, NCCLS, BS 3978, and ISO 3696 Type II water quality

Combine reverse osmosis (RO) and the Millipore patented Elix electrodeionization technology to produce Type II analytical-grade water from potable tap water.

ZLXS 600 5Y

Key Features

- Three-step purification in one unit
    - Progard* Pretreatment Pack provides primary purification and protects RO membrane
    - Secondary purification is achieved with a high-recovery reverse osmosis cartridge that removes 95–99% of inorganic ions and 99% of dissolved organics (>200 Dalton), bacteria, and particulates
    - Elix module provides final purification using electrodeionization
- Advanced reverse osmosis technology minimizes reject water flow by recycling portion of rejected water to the RO membrane feedwater stream
- Final resistivity cell with 0.01cm^{-1} cell constant is linked to a temperature compensation system to assure accurate water quality measurements
- Unique temperature feedback and built-in booster pump maintain steady flowrate
- Small footprint saves benchtop space
- Can be wall-, benchtop-, or underbench-mounted
- Manufactured using ISO 9001:2000-certified processes

Elix Electrodeionization Technology Features

- Combines ion-permeable membranes, ion-exchange resins, and an electric field to remove ions from water without chemicals
- Utilizes a small, electric current within the Elix module to continuously regenerate resin and prevent exhaustion
- Flushes removed ions from system into waste stream
- Provides uninterrupted supply of water of consistent quality
- Requires no softeners to remove calcium ions, less than 60w to operate, and consumes less water than traditional deionization methods

System Operation Features

- Simple, four-button operation
- System status and performance are displayed on two-line alphanumeric LCD in choice of six languages (English, German, French, Spanish, Italian, and Japanese)
- System also signals need for cartridge replacement and RO-membrane cleaning
- Automatic RO-membrane flush simplifies maintenance
- Alarm signals and displays help messages if system malfunctions
- Built-in RS-232-C port for connection to external printer (not included) helps meet Good Laboratory Practice (GLP) requirements

UV Model

- Lamp operates at 254nm, assuring bacterial counts of less than 1 CFU/mL
- Upgrade kit available to add UV lamp to non-UV models (Cat. No. ZLXUVLP01)

APPLICATIONS:

- Ideal for preparing media, buffers and reagents, and as final rinse for glassware
- Can also be used as feedwater for Milli-Q* Water Systems and laboratory equipment

COMING IN 2008!

MILLIPORE* MILLI-Q* INTEGRAL WATER PURIFICATION SYSTEM

Looking for total confidence and perfect convenience in your lab water supply? Millipore's new Milli-Q Integral System provides both pressurized and ultrapure water–directly from tap water – giving you complete control over the water quality and volume required for your lab.

Placed at the outlet of each of the three possible dispensers, the system purifies by removing the very specific contaminants that can impact your results, ensuring that the product water qualities perfectly match your application requirements.

For more information, contact your Fisher Scientific Customer Service Representative, or

Visit www.fishersci.com and search for Milli-Q Integral

Millipore* RiOs* 5/8/16 Reverse Osmosis Systems

Ideal for general laboratory use

Produce up to 16L/hr. of Type III water from tap water by reverse osmosis (RO).

Key Features

- Two purification steps in one compact unit
  - Plug-in Progard* pretreatment pack (available separately) provides primary purification
  - High-recovery reverse osmosis loop with RO membrane cartridge provides final purification
- Pump-assisted flow guarantees consistent flowrate at any temperature
- Automatic membrane sanitization simplifies maintenance
- Reverse osmosis loop generates high water recovery rate and reduces costs by purifying waste stream and decreasing the frequency of filter changeouts
- >95% of most contaminants and ions are removed
- Manufactured using ISO 9002:2000-certified processes

System Operation Features

- Easy to run—all operating parameters are monitored
- Mount on wall, on benchtop or under bench
- Can be upgraded to increase flowrate or converted to Elix* Water Purification Systems (contact your Fisher Scientific Customer Service Representative for details)
- RS-232-C printer interface
- Optional backlit Remote Display (ZMQS RMD S1) permits water quality monitoring when system is underbench-mounted

RiOs
MILLIPORE

RiOs-8 (ZROS 600 8Y)

APPLICATIONS:

Suitable for nonquantitative analyses, preparing chemical reagents, cleaning/rinsing glassware, and as feedwater for Milli-Q* Water Systems, humidifiers, autoclaves and glassware washers.

Millipore* RiOs*-DI 3 Water Purification Systems

Ideal for low-volume, routine laboratory applications

Produce 10L/day of high-quality analytical grade (Type II) water from tap water.

Key Features

- Water is dispensed from fixed tap delivering about 1L/min. when using wall bracket (WMB SMT 001), sold separately
- Integral reservoir holds 1½ gal. (5.7L); larger reservoirs available separately
- Automatic stand-by mode stops production when the built-in tank is full; automatically begins refill when water has been withdrawn
- System alerts user when resistivity drops below acceptable levels
- Manufactured using ISO 9001:2000-certified processes

SmartPak* RODI "Plug-and-use" Cartridge Features

- Holds a reverse osmosis membrane, activated carbon, and an ion exchange resin to remove particles, ions, organics and bacteria
- Removes greater than 99% of the organics in the water, resulting in TOC levels of less than 100ppb
- Pump-assisted flow through the cartridge ensures a steady production rate and reliable contaminant removal, in spite of low pressure on the supply side or drop in water temperature
- Cartridge should be replaced once per year or every 400L of water produced

ZRDS VP0 US

System Operation Features

- Backlit color display shows resistivity, temperature and water level in tank
- A flashing icon on the display alerts operator to change cartridge and/or UV lamp (RiOs-DI 3 UV model only)
- Display dimensions: 1¾L × 1¾"W (4.3 × 4.3cm)
- System can be used on benchtop or mounted on wall

RiOs-DI 3 UV System Features

- Includes UV lamp to produce bacteria-reduced water

APPLICATIONS:

- Produces water suitable for use in analytical and bioscience laboratories, as well as for general rinsing tasks and for feeding small autoclaves, humidifiers and glassware washers
- Systems can also be used to produce direct feed water for Milli-Q* ultrapure water systems

REQUIRED ACCESSORIES:

- SmartPak RODI Cartridge (SPRO OSI A2)

Millipore* Milli-DI* Water Purification System

Battery-powered system produces 3 to 5L/day of Type II purified water directly from tap water

Supplies purified water at a flowrate of 0.125 gal./min. (0.5L/min.) attaining >1 megohm·cm resistivity at 25°C (77°F).

Key Features

- Two-stage purification sequence
  - Activated carbon first removes chlorine and colloids
  - Ion exchange resins remove typical inorganic ions
- Optional Millipak*-40 Final Filter connects directly to water supply or faucet to remove bacteria particles >22µm at point of use (requires Millipak-40 thread adapter, MDI0 2AD AP)

System Operation Features

- LED indicates when it is time to change cartridges
- Temperature-compensated resistivity cell activates a red/green LED to indcate water quality meets requirements
- Resistivity meter operates on one 9V battery
- Minimum feedwater pressure: 14psi
- Maximum feedwater pressure: 65psi

DI-Pak* Deionization Cartridge (sold separately) Features

- Exclusive simple "plug-and-use" design
- Easily replaced in seconds with no risk of leakage
- Available in two sizes
  - Large pack contains 0.7 gal. (3.2L) of ion-exchange resin capable of purifying up to 106 gal. (400L) of feedwater (400µS/cm and 0ppm CO_2)
  - Medium pack contains 0.5 gal. (2.3L) of ion-exchange resin capable of purifying up to 79.3 gal. (300L) of feedwater (400µS/cm and 0ppm CO_2)

APPLICATIONS:

- Water produced is suitable for chemical and electrochemical applications, as well as for making buffers, reagents and microbiological culture media
- Can also be used as feedwater for Simplicity* Ultrapure Water Systems, small autoclaves, and humidifiers, as well as general applications in analytical and bioscience laboratories

REQUIRED ACCESSORIES:

DI-Pak deionization cartridge

Model	Milli-DI
Nominal Product Flowrate	⅛ gal./min. (0.5L/min.)

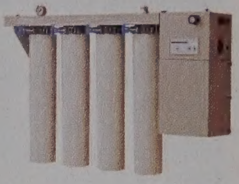
Visit www.fishersci.com and search for Milli-DI

Millipore* Super-Q* Plus Water Purification Systems

Produce up to 12L/min. of Type I ultrapure water



ZFSQ 115 Series

High-flow water systems provide final polish to water which has been pretreated by reverse osmosis, deionization or distillation. Eliminates need for water storage systems. Consistenlty produce ultrapure quality water that exceeds Type I ASTM*/CAP/CLSi specifications.

- Water in bowls is automatically recirculated hourly to maintain water quality between uses
- Gauge indicates pressure of incoming feedwater
- Display shows resistivity measurement
- Modular design allows customization for specific applications
- Also available with ⅓hp pump motor to move gravity-fed feedwater at a controlled flowrate and equalize flowrate in pressurized loops

APPLICATIONS:

Produce water ideal for preparing tissue culture media and reagents, and as rinse water for electronics.

ORDERING INFORMATION:

Systems shown here are 4-bowl systems; 3-bowl system without pump (ZFSQ 115 03) is available through your Fisher Scientific Customer Service Representative.

REQUIRED ACCESSORIES:

- Required filter cartridges each sold separately
  - Super-C* cartridge removes organic contaminants (CDFC 022 023)
  - Ion-Ex* cartridge removes inorganics (CPMB 022 02)
  - Organex-Q* cartridge removes trace organic contaminants (CPEX 02201)
  - For applications requiring particulate prefiltration and/or ultralow bacteria levels, contact your Fisher Scientific Customer Service Representative

ACCESSORIES

Cartridges for Super-Q* Plus Systems

Super-C* Carbon Cartridge

- Contains synthetic activated carbon
- Removes organic contaminants in Super-Q Plus Systems

Ion-Ex* Cartridge

- For use in Super-Q Plus Systems
- Contains ion-exchange resin for removal of inorganic contaminants

Organex-Q* Cartridge

- Removes trace organic contaminants
- Contains mixed bed ion-exchange resin with carbon resin
- For use in Super-Q Plus Systems

Durapore* TPE Cartridge

- For bioburden reduction and particle removal

Description	Length	Cat. No.	Pack of
Super-C Carbon Cartridge	22" (56cm)	**CDFC 022 03**	3/506.11
Ion-Ex Cartridge	22" (56cm)	**CPMB 022 02**	2/490.40
Organex-Q Cartridge	22" (56cm)	**CPEX 022 01**	1/283.60
Durapore TPE Cartridge	20" (51cm)	**CVDI 02T PE**	1/216.30

Millipore* Pure Water Storage Reservoirs

Store purified water without compromising quality

Key Features

- Polyethylene construction minimizes extractables that can contaminate water
- Cylindrical shape minimizes area in contact with water
- Smooth inner surface prevents biofilm formation
- Conical bottom allows complete drainage for effective cleaning and sanitization
- Hermetically sealed lid on large reservoir opening prevents air from leaking into reservoir and facilitates manual sanitization

TANK PE series shown with Water Distribution Pump (far left) and Water Sensor (left), Vent Filter (top) and A.S.M. Module (top).

Filling and Dispensing Features

- Sensor-rod float triggers automatic reservoir refill
- Water is fed into bottom of reservoir to prevent absorption of CO_2
- Two bottom valves allow direct connection to water polishing system and glassware washer
- Water dispenses through valve on front of reservoir

Optional Features

- Vent filter (available separately) guards against airborne impurities
- 30, 60 and 100L reservoirs can be wall-mounted (require TANK FIX 01 wall mounting bracket)
- Automatic Sanitization Module (A.S.M.) available separately to reduce bacteria levels
- Optional distribution pump continuously delivers water under pressure
- Water detector sensor (available separately) detects water on most surfaces such as floors and lab bench

Capacity	Dimensions	Weight (Full)	Cat. No.	Each

Millipore* Pure Water Storage Reservoir

Fit Millipore Pure Water Reservoirs with capacities from 7⅞ to 26⅜ gal. (30 to 100L)

TANK S60 UV

- Utilize low-pressure mercury-vapor lamp that produces ultraviolet (UV) light at 254nm
- Turn on twice a day to prevent bacterial growth and biofilm formation in purified water storage containers
- Eliminate need for chemical sanitization, conserving water and reducing risks associated with chemical residues
- Available with or without water detector

ORDERING INFORMATION:

Remote Point-Of-Use (POU) Dispenser

ZMQS POU R1

- Dispenser connects to system's recirculation loop and precisely dispenses 8 oz. to 17 gal. (0.25 to 64.5L) up to 8' (2.5m) away from Milli-Q* Ultrapure System
- Ergonomic trigger enhances operator comfort
- Longer tubing facilitates filling tall flasks
- Durable dispensing arm rotates 180°
- Green LED indicates dispensed water meets specifications
- Unit can be wall mounted or set on benchtop

NOTE:
Bench-integrated models are supplied with remote point-of-use dispenser

Purification Packs, Cartridges, and Filters for Millipore* Water Purification Systems

QGAR-D00-R1

QTUM 000 IX

CDUF 000 D2

Purification Packs, Cartridges, and Filters for Milli-Q* Ultrapure Academic, Gradient, Biocel, and Synthesis*

Description	Characteristics	Cat. No.	Price
Purification Packs			
Q-Gard* 1	For use with water pretreated by reverse osmosis, distillation or electrodeionization. Contains mixed ion-exchange resin.	**QGAR D00 R1**	Ea./216.61
Q-Gard 2	For use with deionized water. Contains mixed bed ion-exchange resin, microfilter for particulate removal, and activated carbon for organic adsorption.	**QGAR D00 D2**	Ea./216.61
Q-Gard VX	For removing volatile organic compounds from feedwater.	**QGAR D00 VX**	Ea./369.82
Cartridges			
Quantum* IX	For removal of ionic contaminants to trace levels.	**QTUM 000 IX**	Ea./260.89
Quantum EX	For removal of ionic and organic contaminants to trace levels.	**QTUM 000 EX**	Ea./260.89
Quantum VX	For removal of ionic and volatile contaminants to ultralow levels.	**QTUM 000 VX**	Ea./291.07
Pyrogard* 5000 Hollow-Fiber UF	Internal replacement ultrafiltration cartridge for Biocel and Synthesis Systems to reduce pyrogen, endotoxin, and nuclease levels.	**CDUF HF0 5K**	Ea./1318.75
Cartridge Kits			
Quantum IX (Ionex)[1] Cartridge	For removal of ionic contaminants to trace levels. Includes point-of-use final filter.	**QTUM MPE IX**	Ea./376.07
Quantum EX (Organex)[1] Cartridge	For removal of ionic and organic contaminants to trace levels. Includes point-of-use final filter.	**QTUM MPE EX**	Ea./376.07
Final Filters			
Millipak*-40 Filter Unit	0.22µm point-of-use final filter removes bacteria from water. Sterile.	**MPGL 04S K2**	Pk. of 2/108.40
Millipak Express 20 Filter	Standard point-of-use final filter. Removes bacteria. Specialized construction also reduces VOC levels and endocrine disrupters. Nonsterile.	**MPGP 020 01**	Ea./129.66
Biopak* Cartridge	Disposable ultrafiltration cartridge for point-of-use dispenser. Removes pyrogens, endotoxins and nucleases for 30 days. For use in cell culture and molecular biology (13,000 d NMWL).	**CDUFB I001**	Pk. of 2/143.04

[1] Comes with Millipak Express 20 Filter

[2] Requires Pyrogard D Fitting (PYRO CNT 01) to connect to system.

Purification Pack, Cartridge, and Filter for Milli-Q* Ultrapure Element

Description	Characteristics	Cat. No.	Each
Q-Gard* Boron Purification Pack	Significantly lowers boron levels in feedwater. Ideal for use in applications, such as ICP-MS, that are sensitive to boron.	**QGAR D00 B1**	307.33
Quantum* ICP Cartridge	For removing contaminants detrimental to trace element analyses (sub-ppt).	**QTUM 00I CP**	394.82
Optimizer LW Final Filter	0.1µm, semiconductor-grade particle filter for ppt and ppq trace analyses.	**MPEV ICP KJ**	317.08

Cartridges for Super-Q*

Description	Characteristics	Cat. No.	Price
Super-C* Carbon	Contains synthetic activated carbon. Removes organic contaminants. Length: 22" (56cm).	**CDFC 022 03**	Pk. of 3/506.11
Ion-Ex*	Contains ion-exchange resin for removal of inorganic contaminants. Length: 22" (56cm).	**CPMB 022 02**	Pk. of 2/490.40
Organex-Q*	Removes trace organic contaminants. Contains mixed bed ion-exchange resin with carbon resin. Length: 22" (56cm).	**CPEX 022 01**	Ea./283.60

Pack, Cartridges, and Filter Unit for Direct-Q*

Description	Characteristics	Cat. No.	Price
For Direct-Q 3 Systems[1] and Direct-Q 5 Systems			
Progard* 2 Pretreatment Pack	Pretreats feedwater. Antiscaling compound provides primary purification and protects RO membrane when used with Elix systems.	**PROG 000 02**	Ea./261.00
Quantum* IX	For removal of ionic contaminants to trace levels.	**QTUM 000 IX**	Ea./260.89
Quantum EX	For removal of ionic and organic contaminants to trace levels.	**QTUM 000 EX**	Ea./260.89
Quantum VX	For removal of ionic and volatile contaminants to ultralow levels.	**QTUM 000 VX**	Ea./291.07
Millipak*-40 Filter Unit	0.22µm point-of-use final filter removes bacteria from water. Sterile.	**MPGL 04S K2**	Pk. of 2/108.40
For Direct-Q 3 Systems[2]			
SmartPak DQ3 Purification Pack	Pretreatment of tap water by activated carbon, purification by reverse osmosis followed by ion-exchange resin.	**SPRO 0SI A1**	Ea./420.52
Millipak Express 20 Filter	Standard point-of-use final filter. Removes bacteria. Specialized construction also reduces VOC levels and endocrine disrupters. Nonsterile.	**MPGP 020 01**	Ea./129.66
Biopak Cartridge	Disposable ultrafiltration cartridge for point-of-use dispenser. Removes pyrogens, endotoxins and nucleases for 30 days. For use in cell culture and molecular biology (13,000 d NMWL).	**CDUF BI001**	Pk. of 2/143.04

[1] Purchased before June 2005.

[2] Purchased after June 2005.

ACCESSORIES

Cartridges and Filter for Synergy*

Description	Characteristics	Cat. No.	Each
SimPak* 1	For use with water pretreated by reverse osmosis, electrodeionization or distillation.	**SIMP AK0 R1**	243.59
SimPak 2	For pretreated deionized water.	**SIMP AK0 D2**	242.51
Millipak* Express 20 Filter	Standard point-of-use final filter. Removes bacteria. Specialized construction also reduces VOC levels and endocrine disrupters. Nonsterile.	**MPGP 020 01**	129.66

[1] Requires Pyrogard D Fitting (PYRO CNT 01) to connect to system purchased before June 2004.*

Cartridges for Simplicity*

Description	Characteristics	Cat. No.	Each
SimPak* 1 Kit	For water pretreated by reverse osmosis, electrodeionization or distillation. Kit contains one Purification Pack; one self-venting SimFilter that removes residual particulates and bacteria; and one 0.05µm Reservoir Vent Filter that protects pretreated water from airborne contaminants.	**SIMP AKK R1**	329.65
SimPak 2 Kit	For pretreated deionized water. Kit contains one each Purification Pack, SimFilter, and 0.05µm Reservoir Vent Filter.	**SIMP AKK D2**	329.65

Cartridge for RiOs*-DI 3

Description	Characteristics	Cat. No.	Each
SmartPak* ROD*I Cartridge	Three-stage pack. Includes ion exchange resin, active carbon, and high-recovery reverse osmosis.	**SPRO OSI A2**	321.00

Pack and Cartridges for Elix* 3/5/10 and RiOs* 5/8/16

Description	Characteristics	For Use With	Cat. No.	Price
Progard* 2 Pretreatment Pack	Pretreats feedwater. Antiscaling compound provides primary purification and protects RO* membrane when used with Elix systems.	Elix 3/5/10, RiOs 3/5/8/16	**PROG 000 02**	Ea./261.00
RO Membrane Cartridges	Removes inorganic ions.	Elix 3, RiOs 3/5	**CDRC 002 01**	Ea./438.00
RO Membrane Cartridges	High-recovery reverse osmosis cartridge that removes 95–99% of inorganic ions and 99% of dissolved organics (200 d), bacteria and particulates.	Elix 5, RiOs 8	**CDRC 602 01**	Ea./502.00
		Elix 10, RiOs 16	**CDRC 602 02**	Pk. of 2/937.00

Pack and Cartridges for Milli-RO* Plus and Milli-RX*

Description	Characteristics	Cat. No.	Price
For Milli-RO Plus and Milli-RX Systems			
ROPak* Pretreatment Pack	Combines depth filtration, chlorine removal, and an antiscaling compound that protects RO membrane from contamination. Reverse double pretreatment pack when one half is exhausted. Housing constructed of pure polypropylene with thermally welded endcaps to minimize extractables associated with adhesives.	**CPRO P04 02**	Ea./368.00
Hi-flux RO Cartridge	In disposable housing. Removes inorganic ions.	**CDRC H12 HG**	Ea./1516.00
For Milli-RX Systems			
Rogard* II Prefilter	RO membrane. Mesh filter removes particles >5µm. Recommended for efficient pretreatment of water with high levels of Cl_2 or particulates. Use in combination with cartridge CDFC 012 04.	**CDPR M12 06**	Pk. of 6/274.00
Super C* Carbon Cartridge	12" (30cm) cartridge removes organics from water pretreated by reverse osmosis, deionization or distillation. Use in combination with prefilter CDPR M12 06.	**CDFC 012 04**	Pk. of 4/323.04

*Trademark. See Trademark Reference.

THERMO SCIENTIFIC

Thermo Scientific* Barnstead* Nanopure* DIamond* Water Purification Systems

Choose from four application-specific models—all available with or without TOC monitoring

Ultrapure water systems supply Type I water with resistivity up to 18.2 megohm·cm.

Key Features

- Maximum flowrate (at 10psi pressurized feed): 0.40 gal./min. (1.5L/min.)
- Inlet water temperature: 40–104°F (4°–40°C)
- Built-in UV oxidation chamber in some models oxidizes and measures the levels of organics in the water
- 0.2µm absolute final filter maintains bacterial- and particle-free water
- Systems can be customized with a cartridge pack (available separately) to meet your specific needs and feedwater

System Operation Features

- Volumetric or timed dispensing of ultrapure water
- Multilanguage display
- Whisper-quiet operation
- Pressure-regulating valve minimizes problems associated with fluctuations in feedwater pressure
- Automatic sanitization cycle keeps system clean
- Standby mode recirculates water every 10 minutes per hour during periods of nonuse to maintain water quality
- Automatic calibration verifies electronics and assures accurate purity readings
- System may be wall or bench mounted without additional items
- Optional remote dispenser and Accu DIspens are available for water delivery up to 8' away (contact your Fisher Scientific Customer Service Representative)

DIamond Analytical

- For sensitive analytical procedures including atomic absorption, ICP and ICP/MS, ion chromatography (IC), gas chromatography (GC) and high-wavelength HPLC

DIamond UV

- For critical applications requiring 18.2megohm·cm water with <2ppb TOC, including low-wavelength HPLC, IC, GC/MS and TOC determinations
- Uses a dual-wavelength UV lamp to oxidize organics down to virtually undetectable levels and maintain minimal bacterial levels within the system
- Automatically alerts user for UV lamp replacement

09-035 Series

DIamond Bioresearch (UF)

- For any pyrogen determinant analysis including PCR and cell and tissue culture
- An ultrafilter in the system produces ultrapure water with undetectable levels of pyrogens—less than 0.001Eu/mL, log reduction values (LRV) over 6
- To prevent buildup of contaminants on surface of membrane, the DIamond will periodically flush water to drain
- Automatic sanitization cycle enables routine sanitization with the push of a button

DIamond Life Science (UV/UF)

- For the most demanding molecular biology applications including PCR, electrophoresis, cell and tissue culture
- Includes latest advances in ion exchange and filtration technologies as well as dual-wavelength UV bulb and ultrafilter
- Includes automatic sanitation and automatic and manual ultrafilter flushing
- Produces 0.40 gal./min. (1.5L/min.) ultrapure water containing <0.001Eu/mL of pyrogens, TOC values <3ppb, and resistivities up to 18.2megohm·cm

All Models Available with TOC-Monitoring Option

- TOC models measure and display Total Organic Carbon content from <1 to 250ppb

INCLUDES:

⅜" inlet tubing

COMPLIANCE:

Produces water that exceeds ASTM*, CAP and NCCLS Type I water requirements and complies with USP XXIII guidelines with compensated and uncompensated resistivity measurements

Model	L × W × H	Shipping Wt.	Electrical Requirements	Mfr. No.	Cat. No.	Each

ACCESSORIES

Thermo Scientific* Barnstead* Nanopure* DIamond* Cartridge Packs

Customize your system with the cartridge pack that best suits your application and feedwater

- Simple, one-connection installation and removal

INCLUDES:

One 0.2µm absolute final filter

DIamond Cartridge Type	Capacity	Cat. No.	Each
Ultralow Organics, Type I Water			
Reverse osmosis or distilled water feed	1160 as NaCl	**09-050-284**	579.00
Deionized water feed	1160 as NaCl	**09-050-283**	604.00
Low Organics, Type I Water			
Reverse osmosis or distilled water feed	1160 as NaCl	**09-035-13**	569.00
Deionized water feed	1160 as NaCl	**09-050-282**	588.00

Thermo Scientific* Barnstead* Easypure* II Compact Ultrapure Water Systems

Six application-specific models meet most critical analytical, biological or life science needs

All systems produce Type I water with resistivity of 18.2 megohm·cm and TOC (Total Organic Carbon) levels as low as 1ppb. For applications requiring less than 4 gal./day (15L/day) of ultrapure water.

09-050-44

Key Features

- Ultrapure water is dispensed directly from the system, eliminating cross-contamination that may occur with use of large containers or bottled water
- Standby mode recirculates water within the system for 10 minutes during every hour of inactivity
- Digital resistivity monitor measures system purity
- Three disposable cartridges provide increased capacity over similar systems
- Lightweight system features small, space-saving footprint
- Optional remote dispenser 09-035-15 delivers water up to 8' (2.4m) from system

Reservoir Feed Models (RF and RF/UV)

- No permanent supply of water required; unit can be placed virtually anywhere in laboratory
- Integral 1¾ gal. (6.5L) reservoir is filled with pretreated water (RO, distilled, or DI) and is used to feed cartridges
- Model RF/UV uses integral dual wavelength (184 and 254nm) UV lamp that provides for organic-free water and bacterial control within the system

Line Feed (LF) Reagent-Grade Water System

- Fed from pretreated water (RO, distilled or DI) delivered by a pressurized line or a storage reservoir
- Ideal for analytical applications including AA, ICP/MS and higher wavelength HPLC

UV Line Feed Reagent-Grade Water System

- Incorporates dual wavelength UV lamp (185 and 254nm) that controls bacteria and oxidizes organics to virtually undetectable levels
- Produces water for critical organic applications including TOC determinations, HPLC, GC/MS and Ion Chromatography
- Fed from a pressurized pretreated water line or storage reservoir

UF Line Feed Reagent-Grade Water System

- Hollow fiber ultrafilter provides pyrogen-free water below 0.001EU/mL for critical biological applications, including monoclonal antibody production or cell and tissue culture
- Automatic intermittent flush cleans the ultrafilter
- Fed from pressurized pretreated water line or storage reservoir

UV/UF Line Feed Reagent-Grade Water System

- Comprehensive Type I reagent-grade water system produces water for any pure water needs applications, including DNA amplification where RNase-free water is critical for success
- Eliminates need to use DEPC for nuclease removal
- Incorporates hollow fiber ultrafilter and dual wavelength UV lamp (185 and 254nm)
- Fed from a pressurized pretreated water line or storage reservoir

INCLUDES:

Bracket for wall mounting (except RF and RF/UV)

REQUIRED ACCESSORIES:

Cartridges and filters must be ordered separately.

Model	Flowrate	TOC (ppb)	L × W × H	Shipping Wt.	Electrical Requirements	Mfr. No.	Cat. No.	Each

Thermo Scientific* Barnstead* EASYpure* RoDi System

Single compact system delivers up to 15L/day of Type 1 water directly from tap water

13-935-80

Easy to use, with automatic operation to dispense purified water on demand for a wide range of critical applications.

- Continuous water recirculation between reservoir, cartridges and UV lamp ensures highest purity
- Microprocessor-controlled system alerts operator to vital information including system water purity, membrane performance and pretreatment cartridge status
- 6.5L non-contaminating internal reservoir incorporates air filter to prevent airborne impurities from contaminating water during storage
- Dual-wavelength quartz UV lamp (185 and 254nm) oxidizes organics down to virtually undetectable levels and controls bacteria
- Capacity: 15L/day
- Maximum flowrate: 800mL/min.
- Resistivity up to 18megohm-com
- Total Organic Carbon (TOC) content: <5ppb
- Inlet temperature: 1° to 35°C (34° to 95°F)

ORDERING INFORMATION:

Start-up Kit (13-935-81) is available separately online.

100/240V 60Hz	35 lb. (15.8kg)	D13321	**13-935-80**	4004.00

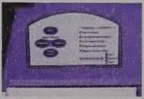
THERMO SCIENTIFIC* BARNSTEAD* FREE WATER ANALYSIS SERVICE

Do you have the right pure water equipment to meet your laboratory needs? Consult your Fisher Scientific Customer Service Representative for a Thermo Scientific Barnstead W.A.T.E.R. Analysis mailer. Based on your water purity requirements and an extensive analysis of a sample from your water supply, we will match the results to a system that is right for you.

Thermo Scientific* Barnstead* Dlamond* RO Reverse Osmosis System

Uses state-of-the-art prefiltration and membranes to purify water

09-313-711 Dlamond RO System, 09-313-713 Storage Reservoir, and 09-035-14 Nanopure* Dlamond System



Provides 6, 12, and 24L/hr. of purified water. Removes up to 99% of the impurities present in feedwater sources including ionized, organic, bacterial and particulate impurities commonly found in most tap water supplies.

Key Features

- Barnstead's MPS cartridge inhibits scale buildup on the membrane surface, extending the life of the membrane without the need to soften
- Microprocessor controls provide automatic operation with the required storage tanks (sold separately)
- Automatic flush cleanses RO membrane during periods of inactivity, eliminating buildup of contaminants on membrane surface

System Operation Features

- Series of internal pressure gauges allows user to monitor membrane operating pressure and pressure drops across pretreatment cartridges
- System operating conditions, including membrane performance and reservoir level, are monitored with indicator lights that alert if attention is required
- Minimum inlet pressure: 30psig (2kg/cm^2)
- Maximum inlet pressure: 100psi (7kg/cm^2)
- Units can be mounted on bench or wall
- Supplied with all required pretreatment cartridges and membranes (replacements available separately)
- Controls and indicators can be mounted up to 10' (3m) away from the system with the accessory remote mounting control panel assembly (09-313-714)

APPLICATIONS:

Provides source of purified water for general lab use such as glassware washing, or as feed to a Barnstead Ultrapure* water system such as the NANOpure Dlamond, Easypure* II or E-pure*.

Flowrate	L × W × H	Mfr. No.	Cat. No.	Each
1.6 gal./hr. (6L/hr.)	13½ × 16⅞ × 19½" (34.3 × 43 × 49.5cm)	D12671	**09-313-710**	2727.00
3.2 gal./hr. (12L/hr.)	13½ × 16⅞ × 19½" (34.3 × 43 × 49.5cm)	D12651	**09-313-711**	3672.00
6.3 gal./hr. (24L/hr.)	13½ × 16⅞ × 19½" (34.3 × 43 × 49.5cm)	D12661	**09-313-712**	4151.00

ACCESSORIES

Membranes, Cartridges and Prefilters for Thermo Scientific* Barnstead* ROpure LP* and ST* Systems

Membranes

- Flowrates in table are for new membranes under these conditions:
    - 25°C (77°F) feedwater temperature
    - Feedwater composition of 1000ppm NaCl at a pH of 6.0 to 6.5
    - Stated design specifications for operating pressure and feedwater recovery
- Membrane life expectancy will vary with feedwater conditions from one to three years

Membrane	Flowrate	Mfr. No.	Cat. No.	Each
For Thermo Scientific Barnstead ROpure LP System				
Standard CA	4 gal./hr. (15L/hr.)	D2730	**09-034-177B†**	968.00
High Flow CA	8 gal./hr. (30L/hr.)	D2731	**09-034-177C†**	1102.00
Polyamide	10 gal./hr. (40L/hr.)	D2732	**09-034-177D†**	1501.00
For Thermo Scientific Barnstead ROpure ST System (Discontinued)				
Standard CA	3 gal./hr. (11L/hr.)	D6317	**09-050-36**	717.00
Thin Film	5 gal./hr. (19L/hr.)	D6318	**09-050-37**	969.00

†Can also be used with discontinued Ultrapure systems. Flowrates: 16 gal./hr. (60L/hr.) for 09-034-177B membrane; 29 gal./hr. (110L/hr.) for 09-034-177C; 41 gal./hr. (157L/hr.) for 09-034-177D.*

Cartridges

- Pretreatment/Prefilter, Thin Film
- Extruded carbon cartridge (with 5µm prefilter) extends life of 09-050-37 membrane by removing chlorine from feedwater

Ultrapure Ion Exchange

- Capacity: 760 grains as NaCl to 1megohm endpoint
- Can also be used with Thermo Scientific Barnstead E-pure* systems and Thermo Scientific Barnstead Nanopure* systems

Cartridge Use, Composition	Mfr. No.	Cat. No.	Each
For Thermo Scientific Barnstead ROpure ST (Discontinued)			
Pretreatment/Prefilter, Thin Film	D63112	**09-050-47**	78.93
Ultrapure* Ion Exchange	D5027	**09-050-276**	103.00

5µm Prefilters

- Length: 10" (25.4cm)
- Can also be used with Economy Filter Holders

Material	Mfr. No.	Cat. No.	Each
For Thermo Scientific Barnstead ROpure LP			
Cellulose Acetate	D2729	**09-034-177A**	35.21
For Thermo Scientific Barnstead ROpure ST (Discontinued)			
Cellulose Acetate	D63111	**09-050-39**	80.40

Prefilters

- Remove suspended particles from feedwater
- Contain cellulose acetate fibers wound in precise patterns on polypropylene core
- Overall: 10 × 2½" (25 × 6.3cm)

Submicron Postfilters

- Remove all particulates and microorganisms larger than rated pore size
- 10" (25cm) double open-ended cartridges have 2 Buna-N gaskets for positive seal
- Pleated membrane has 4.75 sq. ft. (0.46m^2) surface area
- Recommended flowrate: 2 gal./min. (7.5L/min.)
- Autoclavable at 118°C (245°F)

Pore Size	Mfr. No.	Cat. No.	Each
Prefilters			
10µm	18011	**09-034-153**	34.21

Thermo Scientific* Barnstead* ROpure LP* Reverse Osmosis System

Economical method of removing a high percentage of raw feedwater contaminants—90 to 99% of all impurities

Provides RO (reverse osmosis) purified water for volume requirements of 4, 8, or 10 gal./hr. (15, 30, or 40L/hr.) depending on membrane selection (order membranes separately). Operates from tap water line pressure.

- Built-in, solid-state periodic flush timer automatically flushes the membrane when storage reservoir is full; prevents accumulation of contaminants on the membrane
- Connects directly to a Nanopure* Quad-style, Nanopure II, or older Nanopure system, glassware washer and storage reservoir without complicated plumbing
- Maximum inlet pressure: 100psi (7kg/cm^2)
- Minimum inlet pressure: 30psi (2kg/cm^2)
- System is wall mounted

APPLICATIONS:

Ideal as pretreatment to a Nanopure Quad-style, Nanopure II, or older Nanopure system for significantly extending the life of consumable ion-exchange cartridges.

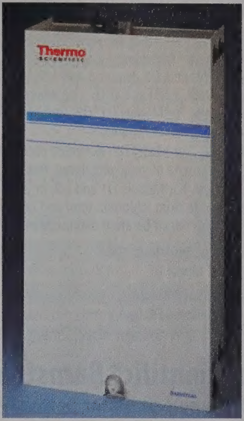
INCLUDES:

10" long (25cm), 5Rm prefilter; Wall bracket; 15' (4.5m) of ½" O.D. tubing; 20' (6m) of ⅜" O.D. tubing; Adapters; Storage interlock jumper plug

REQUIRED ACCESSORIES:

Membranes sold separately.

L × W × H	Shipping Weight	Electrical Requirements	Mfr. No.	Cat. No.	Each
8¾ × 20¾ × 38" (22 × 53 × 97cm)	75 lb. (34kg)	115V 60Hz	D2716	**09-034-125**	3029.00



09-034-125

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* Barnstead* MegaPure Deionizers

Pretreat feedwater for MegaPure still boilers[†]

Deliver 0.5 to 25L/hr. Feedwater valve provides system control.

- Unit preset for 50 kilohm·cm resistivity
- Green light on temperature-compensated purity monitor goes out if purity falls below setpoint
- Built-in drain valve for no-spill cartridge changes
- Sturdy aluminum housing has baked-epoxy finish
- Mount on wall or bench

Model D1

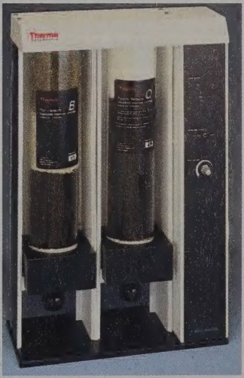
- Provides reagent-grade water for general lab use
- Accepts one cartridge (09-035-68 extended-capacity cartridge recommended)

Model D2

- Removes both organics and inorganics
- Ideal for pretreatment of still feedwater
- Accepts two cartridges (09-035-68 extended-capacity and 09-035-61 organic-removal cartridges recommended)

REQUIRED ACCESSORIES:

Cartridges sold separately.



09-035-91 shown with 09-035-68 (left) and 09-035-61 (right).

Model	L × W × H	Operating Weight	Electrical Requirements	Mfr. No.	Cat. No.	Each
D1 Deionizer	7½ × 10½ × 25½" (19 × 27 × 65cm)	26 lb. (12kg)	120V 50/60Hz	D440046	**09-035-90**	1540.00
D2 Deionizer	7½ × 16¾ × 25½" (19 × 43 × 65cm)	41 lb. (19kg)	120V 50/60Hz	D440066	**09-035-91**	1863.00

[†] *Not recommended for use with MP-1 still.*

ACCESSORIES

Cartridges and Filters for Thermo Scientific* Barnstead* MegaPure* Deionizers

Description	Mfr. No.	Cat. No.	Price
High-capacity 4 × 16" Cartridge			
High Purity. For Models D2 deionizer and MP-12A still, and discontinued Model DF deionizer. Removes 1600 grains as NaCl, 1370 as $CaCO_3$. Use where high-resistivity water is required.	D400377	**09-035-78**	Ea./183.00
Extended Capacity. For Models D1, D2. Removes 2810 grains as NaCl, 2400 as $CaCO_3$. Use where 1 megohm·cm average purity required.	D400499	**09-035-68**	Ea./191.00
Organic Removal. For Model D2. Activated carbon resin removes organics, taste, odor, color, most weak organic acids, products of vegetable decay, free chlorine, iron contamination and manganese.	D440265	**09-035-61**	Ea./169.00
Prefilter Cartridge. For Models D1 and D2, or prefiltering any distillation or deionization system. Removes particulates down to 5µm, chlorine, odor and color from tap water. Activated charcoal capped with hard porous foam above. Used before a demineralizer, will extend the resin bed life by absorbing chlorine.	440087	**09-035-303**	Ea./98.70
0.2µm Final Filters, Tank Vent Filter			
For discontinued Model DF.	440076	**09-035-60**	Cs. of 2/478.70
6.0µm Internal Filter/Prefilter			
For discontinued Model DF.	440431	**09-035-49**	Cs. of 2/358.00

Thermo Scientific* Barnstead* E-pure* 3- and 4-Module Deionization Systems

Virgin polypropylene water pathways prevent recontamination

Produce up to 2L/min. of Type I reagent-grade bacteria-free water. Use 3-module system for tap feedwater, the 4-module system for high-quality tap water or pretreated feed.

Key Features

- Solid-state digital purity meter displays output water resistance from 0.01 to 18.3 megohm·cm with automatic temperature compensation to 25°C (77°F)
- One-quarter turn quick-release canisters allow for easy cartridge replacement
- Positive O-ring seal on head-to-canister connection
- Flat-bottom canisters stand on benchtop during cartridge exchange
- High gear ratio recirculation pump supplies ultrapure water without long rinseup
- Inlet temperature range: 4° to 49°C (39° to 120°F)
- Both models have ¼ NPTF inlet connection, built-in pressure regulator

Optional Features

- Optional Organicfree* cartridge (Cat. No. 09-034-175K) lets you use E-pure systems for HPLC and other critical applications
- Can be used with optional remote dispenser accessory

09-050-255

INCLUDES:

Canisters; Digital meter; Pump; 6' (1.8m) of ¼" O.D. flexible tubing for inlet and recirculation connections

REQUIRED ACCESSORIES:

Cartridges and final filter are not included; see 09-050-268, -269, -277, -278.

No. of Modules	Dimensions (L × W × H)	Shipping Weight	Electrical Requirements	Mfr. No.	Cat. No.	Each

LOOKING FOR CARBOYS?

Fisherbrand* Carboys make dispensing and storage of laboratory solutions easy and convenient. They're available in a selection of materials and styles. See the Carboys section.

ACCESSORIES

Thermo Scientific* Barnstead* Accessories/Replacement Parts

Pump Protectors

Low Water

- Recommended when Thermo Scientific Barnstead Nanopure* (Nanopure Quad-style, Nanopure II or older Nanopure), Thermo Scientific Barnstead E-pure*, or older Easypure* UV, UF, LF and UV/UF systems draw pretreated water from a nonpressure tank
- Shuts off power to pump if tank is dry to prevent pump burnout
- Fits a ½" NPTF opening
- Includes everything necessary for installation

Low Pressure

- For installation in a pressurized feedwater line
- Shuts off pump if feedwater pressure falls below 5psi (0.35kg/cm^2)
- Plugs into Thermo Scientific Barnstead Nanopure (Nanopure Quad-style, Nanopure II or older Nanopure), Thermo Scientific Barnstead E-pure, or older Thermo Scientific Easypure UV, UF, UV/UF and LF systems
- Can also be used with select Thermo Scientific Barnstead Nanopure DIamond* systems
- Includes everything necessary for installation

Description	Mfr. No.	Cat. No.	Each
Low-water Pump Protector	D0603	**09-034-164**	452.57
Low-pressure Pump Protector	D2706	**09-034-105**	516.64

Remote Dispenser Device

Delivers up to 3 pt./min. (1.5L/min.) in a continuous stream

Attaches easily to older Quad-style Thermo Scientific Barnstead Nanopure, Thermo Scientific Barnstead E-pure*, or Thermo Scientific Barnstead Nanopure Infinity systems that have a recirculation pump. Easily adaptable to Quad-style Thermo Scientific Barnstead Nanopure, Thermo Scientific Barnstead Nanopure II or older Thermo Scientific Barnstead Nanopure systems.

- Device gives one-handed control
- Purified water is constantly recirculated through dispenser to reduce buildup of contaminants on the 0.2µm hollow fiber filter
- All wetted parts are made of virgin polypropylene or PTFE to eliminate the possibility of water recontamination
- ¼ NPTF connections

INCLUDES:

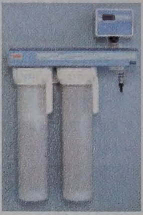
8' (2.4m) of retractable tubing

Max. Inlet Pressure	Operating Temp. Range	Mfr. No.	Cat. No.	Each
50psi (3.5kg/cm^2)	40° to 120°F (4° to 49°C)	D8952	**09-035-34**	604.00

Thermo Scientific* B-pure* Expandable Deionization Systems

Inert-material construction, quick-release canisters and positive O-ring seal on head-to-canister connection

Modular systems produce up to 1 gal./min. (4L/min.), for inline water purification as pretreatment, final polishing or stand-alone systems.[1] Can be connected directly to water line, assembled in many configurations.



09-050-253

Key Features

- ½ NPTF inlet connection
- Flat-bottom canisters stand on benchtop during servicing
- Inlet temperature range: 4° to 49°C (39° to 120°F)

Half-size Module

- Generally used as add-on to other modules
- Ideal for bacteria and particulate removal; prefiltration for RO, distillation or Thermo Scientific Barnstead Nanopure* systems; inline applications; or with faucet assembly for point-of-use applications[2]
- Small size allows for flexibility in mounting locations

Single Module

- Accepts any standard 17 3/16" (44cm) Thermo Scientific Barnstead cartridge
- Use as economical single-cartridge system, or attach to other modules with hardware supplied
- Accepts optional Digital Purity Meter
- For prefiltration, inline, or stand-alone applications

09-050-252

Dual Module

- Similar to Single Module above, but with two canisters, built-in digital temperature-compensated purity meter and polypropylene drawoff faucet
- Ideal for pretreatment or final polishing
- Easily expanded using single or half-size modules

INCLUDES:
Canisters, wall bracket

REQUIRED ACCESSORIES:
Cartridges sold separately.

Module	Dimensions (L × W × H)	Shipping Weight	Electrical Requirements	Mfr. No.	Cat. No.	Each
Half-size	6⅗ × 7 × 15" (16.8 × 18 × 38cm)	5 lb. (2.3kg)	N/A	D4505	**09-050-251**	355.00
Single	7 × 7 × 24" (18 × 18 × 61cm)	8 lb. (3.6kg)	N/A	D4511	**09-050-252**	351.00
Dual	7 × 15 × 27" (18 × 38 × 69cm)	15 lb. (6.8kg)	120V 50/60Hz	D4521	**09-050-253**	1751.00

---

[1] A Thermo Scientific Barnstead W.A.T.E.R. Analysis of available supply water is recommended before selecting either an E-pure or B-pure system.*

[2] Faucet assembly is Cat. No. 09-034-76 (Thermo Scientific Barnstead D2746).

ACCESSORIES

Digital Purity Meter for Thermo Scientific* Barnstead* B-pure* Systems

Measures electrical resistivity from 0 to 18.3 megohm·cm, temperature compensated to 25°C (77°F)

Provides continuous inline monitoring of water purity for Thermo Scientific B-pure (and older PCS) Single-cartridge Holder and Half-size Cartridge Holder; replacement for purity meter supplied with Dual-cartridge Holder.

- Fits any ½ NPT opening
- Screws directly into head of holder; no external plumbing required
- With conductivity cell

Description	Height	Mfr. No.	Cat. No.	Each
Digital Meter for 120VAC	4½" (11cm)	D2770	**09-034-161**	1108.00

Thermo Scientific* Barnstead* Bantam* Deionizer 4

Deionizer indicates when it's time to change cartridges

Portable, nonpressure cartridge system for polishing pretreated water or single-stage purification of tap water. Delivers deionized water at 5 to 10 gal./hr. (19 to 38L/hr.) at atmospheric pressure.

- Shows resistivity of effluent from 25 kilohm·cm to 18 megohm·cm
- Easily replace disposable cartridges by turning a thumbscrew
- Used with 09-034 High-capacity Ion Exchange or 09-034-3 Ultrapure* Cartridge
- Inlet pressure range: 5 to 70psi (0.35 to 4.9kg/cm²)
- Mounts on benchtop or wall

INCLUDES:
3' (91cm) plastic inlet tubing; inlet flow adjustment valve; drain valve; removable pedestal for bench mounting

REQUIRED ACCESSORIES:
Cartridges sold separately

Disposable Cartridges

Cartridge	Characteristics	For Use With	Mfr. No.	Cat. No.	Price
High-capacity Ion Exchange	High-capacity, two-bed anion/cation. 1725 grains as NaCl; endpoint 50 kilohms·cm. Resistance, 175 kilohms·cm (3ppm).	Thermo Scientific Barnstead Nanopure* Quad, Nanopure II and older-style Nanopure, E-pure*, B-pure*, Bantam*, cooling loop systems	D0803	**09-034**	Ea./99.00
Ultrapure* Ion Exchange	Ultrapure anion/cation mixed bed. 760 grains as NaCl; endpoint 1 megohm·cm. Produces water essentially free of silica and CO_2; pH between 6.7 and 7.2.	Thermo Scientific Barnstead Easypure* II.	D50233	**09-050-46**	Ea./92.00
		Thermo Scientific Barnstead Nanopure Quad, Nanopure II and older-style Nanopure, E-pure, B-pure, Bantam, cooling loop systems.	D0809	**09-034-3**	Ea./103.00
ORGANICfree* Organic Removal	Combination of carbon and Ultrapure mixed-bed resin. Used after deionization and colloid pretreatment, can provide water with <10ppb of TOC. The 60μm pore size prevents purifying media from entering product.	Thermo Scientific Barnstead Easypure* II.	D50229	**09-034-16**	Ea./115.44
		Thermo Scientific Barnstead Nanopure Quad, E-pure.	D5021	**09-050-267**	Ea./133.00
		Thermo Scientific Barnstead Thermo Scientific Barnstead Nanopure II and older-style Nanopure.	D0820	**09-034-175K**	Ea./124.00
Organic/Colloid Removal	Consists of ⅔ macroreticular resin (removes colloids and bacteria) and ⅓ granular activated carbon (removes organics and chloride). For pretreating deionized feedwater.	Thermo Scientific Barnstead Easypure* II.	D50230	**09-034-17**	Ea./92.00
		Thermo Scientific Barnstead Nanopure Quad, Nanopure II and older-style Nanopure, E-pure, B-pure.	D0835	**09-034-104**	Ea./97.00
Organic/Ion Exchange	Activated carbon and mixed-bed ion-exchange resin removes organics and chlorine. Use in first position with pretreated distilled or reverse osmosis feed.	Thermo Scientific Barnstead Easypure* II.	D50231	**09-034-18**	Ea./88.00
MACROpure* Pretreatment	Prefilter for systems using 09-034-175K cartridge. Removes colloids, chlorine and organics. Combines macroreticular resin and activated carbon.	Thermo Scientific Barnstead Nanopure Quad, Nanopure II and older-style Nanopure, E-pure, pretreatment.	D0836	**09-034-5C**	Ea./140.00
Sanitization	Sanitizes wetted surfaces, including canisters, connecting tubing and ultrafilter (on Thermo Scientific Barnstead Nanopure Bioresearch Grade Systems only.)	Thermo Scientific Barnstead Nanopure Quad, E-pure.	D50223	**09-034-15**	Pk. of 3/94.00
Cation Removal	Converts mineral salts to acids, resulting in effluent with low pH. For precious metal or isotope recovery, removal of volatile amines from steam condensate. Total exchange capacity, 2500 grains as NaCl.	Thermo Scientific Barnstead B-pure, Bantam, cooling loop.	D0815	**09-034-10**	Ea./78.00
Organic Removal	Activated carbon; removes organics and chlorine from raw water. For retreating deionizer feedwater, high-purity rinse systems to extend deionizer cartridge service. Capacity, 1320 gal. (5000L) average feedwater.	Thermo Scientific Barnstead B-pure, Bantam, cooling loop.	D0813	**09-034-5**	Ea./86.00
Oxygen Removal	Maintains low oxygen content to prevent corrosion in cooling loops. Removes 1ppm dissolved oxygen from 15,000L of water or 11L (15 gal.) S.T.P. of dissolved oxygen.	Thermo Scientific Barnstead B-pure, cooling loop.	D0811	**09-034-8**	Ea./107.00

Disposable Filters

Filter Type	Characteristics	For Use With	Pore Size	Mfr. No.	Cat. No.	Each
Prefilters	Remove suspended particles from feedwater. Cellulose acetate fibers wound in precise patterns on polypropylene core. Overall: 10 × 2½" (25 × 6.3cm). Weight: 1 lb. (0.5kg).	Economy Filter Holders 09-034-155, 09-034-156.	5μm	18017	**09-034-162**	34.21
			10μm	18011	**09-034-153**	34.21
Submicron Postfilters	Remove all particulates and microorganisms larger than rated pore size. 10" (25cm) double open-ended cartridges have 2 Buna-N gaskets for positive seal. Pleated membrane has 4.75 sq. ft. (0.46m²) surface area. Recommended flowrate: 2 gal./min. (7.5L/min.). Autoclavable at 118°C (245°F).	Economy Filter Holders 09-034-155, 09-034-156.	0.2μm	D0749	**09-034-49**	212.79
			0.45μm	D0748	**09-034-48**	212.79
Hollow Fiber 0.2μm Final Filter	Ideal for HPLC and trace metal analysis. Recommended final filter for 09-034-175K ORGANICfree* cartridge. Provides bacteria-free water. Made of mixed cellulose esters. Maximum flowrate: ½ gal./min. (2L/min.). Radiation sterilized. Autoclavable.	Thermo Scientific Barnstead Nanopure*, Dlamond Nanopure II and older-style Nanopure, E-pure*, Easypure* II.	0.2μm	D3750	**09-034-145**	90.00
0.2μm Final Filter with Filling Bell	Hollow fiber. Does not add organics to water. Automatic air venting. Demonstrated log reduction value of 9.38 when challenged with *P. diminuta*. Maximum flowrate: 1 qt./min. (1L/min.). Radiation sterilized. Autoclavable.	Older Thermo Scientific Barnstead Easypure* RF, UV, LF, UF or UV/UF; Remote Dispenser 09-035-34.	0.2μm	FL703X2	**09-050-279**	69.00
Remote Dispenser Filter	Sweeps bacteria and particles from membrane. Keeps particles larger than membrane pores in suspension and reduces buildup. Made of mixed cellulose esters. Radiation sterilized and individually sealed. Maximum flowrate, ½ gal./min. (2L/min.). Autoclavable.	Thermo Scientific Barnstead Nanopure Quad remote dispenser device (09-096-4, discontinued).	0.2μm	D3751	**09-050-229**	261.00

Thermo Scientific* Barnstead* Disposable Hose Nipple Deionization Cartridges

Easy-to-install system only requires wall bracket and cartridge

Nonpressure† cartridges process raw water, polish or repurify treated water. Achieve flowrates up to 38L/hr.

Left to Right: 09-035-22, 09-034-11, 09-035-20, 09-035-25

Key Features

- Cartridges are equipped with hose nipples on both ends for nonpressure connection to ordinary laboratory tubing with ⅜" I.D. (9.5mm)
- Resins in deionization cartridges (except Cat. Nos. 09-035-22 and 09-034-14) contain a special dye that changes color when cartridge is exhausted
- No meter required
- Inlet pressure range: 5 to 70psi (0.35 to 4.5kg/cm^2)

Oxygen Removal Cartridge

- Developed for a cooling water loop application to maintain low oxygen content to prevent corrosion
- Normally used ahead of deionization resin
- Feedwater must have less than 10ppm ionized solids
- Capacity: 11L S.T.P. (15g)

Economy Cartridge

- Produces high-quality water with average specific resistance of 175 kilohm·cm (about 3ppm)
- Total ion-exchange capacity: 1130 grains expressed as NaCl
- Endpoint: 50 kilohm·cm

Pretreatment Cartridge for Still Feedwater

- Prevents boiler scale in still; reduces cleaning problems
- Contains resin to deionize water and carbon to remove volatile chlorine additives
- Produces water >1 megohm·cm
- Capacity: 1450 grains expressed as NaCl

Organic Removal Cartridge

- For removal of organic impurities and chlorine commonly found in tap water
- Activated carbon composition
- Generally used before deionization cartridge
- Processes about 5500L of average-quality feedwater
- No dyes to interfere with organic analyses

Combination Cartridge

- Combines deionization and organic removal in one cartridge
- Removes ionized impurities to 10 megohm·cm or better, when used for polishing distilled water
- Total ion-exchange capacity (when used separately): 600 grains expressed as NaCl
- About ⅔ of processed water volume is >1 megohm·cm pure
- Special absorbent removes chlorine additives commonly found in municipal water supplies
- Economical for production of high-quality reagent-grade water
- Meets CAP specifications for Type II water

Ultrapure* Mixed-Bed Cartridge

- Produces high-resistance demineralized water that is largely free of silica and CO_2 from tap water
- Repurifies rinse water at workstations
- Increases purity of water from central demineralizer
- Total ion-exchange capacity: 760 grains as NaCl to 1 megohm·cm
- pH: typically between 6.8 and 7.2
- Available with or without resin dye to indicate cartridge exhaustion; cartridge without dye is ideal for applications such as organic analyses, where dyes might interfere

High-Capacity Cartridge

- Two-bed demineralizer with selected cation and anion resin beds
- Delivers more gallons per cartridge than mixed-bed types, but at a somewhat lower purity level
- Average resistance of effluent is 175 kilohm·cm
- Total ion-exchange capacity: 1725 grains (as NaCl)

APPLICATIONS:

Useful for raw water operation, polishing, or repurifying.

REQUIRED ACCESSORIES:

Wall bracket (09-035-50)

Description	Mfr. No.	Cat. No.	Each
Oxygen Removal	D8903	**09-034-11**	120.00
Economy	D8950	**09-035-28**	87.00
Pretreatment (still feedwater)	D8921	**09-035-32**	104.00
Organic Removal	D8904	**09-035-22**	81.00
Combination	D8922	**09-035-30**	110.00
Ultrapure Mixed-Bed (with dye)	D8902	**09-035-25**	95.00
Ultrapure Mixed-Bed (without dye)	D8911	**09-034-14**	104.00
High-Capacity	D8901	**09-035-20**	95.00

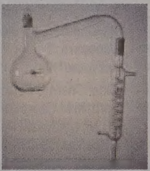
† Cartridges cannot accept back pressure. Output water must be diverted to an atmospherically vented receptacle.

DISTILLATION

Kimble* Kimax* Distilling Apparatus

Complete assembly

Use to distill small amounts of water or in APHA Method 4500-NH_3 for determining nitrogen (ammonia) in purified drinking water, natural water and highly purified wastewaters (concentration, <20µg/L)



Distilling apparatus with ₷ 19/38 joints. Use with tall-form Nessler tubes.

INCLUDES:

500 or 1000mL flat-bottom flask; distillation head with a ₷ 19/38 joint; ₷ stopper; jacketed (200mm) Graham condenser with ₷ 19/38 top joint

Capacity	₷ Stopper No.	Mfr. No.	Cat. No.	Each
500mL	22	21500 500	**13-631-6**	262.06
1000mL	27	21500 1000	**13-631-7**	263.89

ACCESSORIES

Flat-bottom flask only

Capacity	₷ Stopper	Mfr. No.	Cat. No.	Each
500mL	22	21500G 500	**13-631-8**	148.45
1000mL	27	21500G 1000	**13-631-9**	156.46

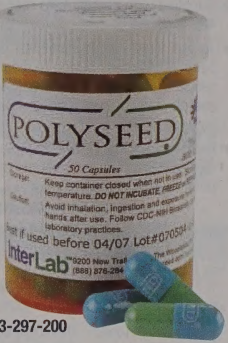
WATER/WASTEWATER

BOD

Polyseed* BOD and Polyseed-NX CBOD Capsules

Produce fast, economical BOD analyses with consistent results

- EPA accepted
- Each capsule contains 100mg of specialized bacterial cultures for use in a broad range of areas involving degradation of industrial and municipal waste
- To use, mix capsule contents with 0.5L of APHA standard dilution water at 20°C (68°F), stir for at least 60 minutes
- Mixture yields seed inoculum for up to 200 BOD tests
- For best results, use within one year of purchase
- Also available as **Polyseed-NX**, which contains an approved chemical additive for the inhibition of ammonia nitrogen (NH_3-N) in wastewater samples (CBOD)



13-297-200

ORDERING INFORMATION:

Supplied as a bottle of 50 capsules.

Type	Cat. No.	Pack of 50
Polyseed	13-297-200	106.75
Polyseed-NX	13-297-201	142.25

CHLORINE

LaMotte* Chlorine TRACER PockeTester*

TRACER PockeTester Total Chlorine Kit, Read Total Chlorine from 0.00 to 9.99ppm to 0.01ppm resolution, Extra bold display includes an analog bar graph feature, uses four LR-44 batteries, Readings are not affected by sample color

- Large ¾L × 15⁄16"W (1.9 × 2.8cm) LCD display with analog bar graph
- Memory saves calibration values and stores up to 15 readings; sample color or turbidity do not affect readings
- Sample temperature can be displayed in chlorine mode; or in pH mode when using optional pH sensor probe
- Automatically self-calibrates and shuts off when not in use; also indicates when batteries are low (uses four LR-44 batteries [included])

TRACER
PockeTester

22-278-617

ORDERING INFORMATION:

Overall dimensions: 7¼ L × 1⅜"W (18.4 × 3.5cm).

INCLUDES:

100 reagent tablets that deliver a precise amount of iodide for a 20mL sample, and four LR-44 batteries; optional accessories include pH, ORP, and Cl_2 sensor probes, and weighted stand with five sample cups; contact your Fisher Scientific Customer Service Representative for more details.

Test	Cat. No.	Each
Total Chlorine	22-278-617	169.95

HF Scientific Chlorine Pocket Photometer

Test Free or Total Chlorine anywhere in the field for sample sizes up to 5mL.

- Easy-to-use microprocessor-controlled photometer provides ±2% accuracy, three-second response time, and 0.01ppm resolution; testing range: 0 to 10ppm, optical path: 25mm
- Step-by-step menu on 16-digit alphanumeric LCD guides user through measuring process; keypad protected by splash-resistant tactile membrane
- PPD-2 DPD Powder Pop* Dispenser provides precise, convenient push-button reagent dispensing to sample
- Unit automatically shuts off after five minutes when not in use; 4 "AAA" batteries provide enough power for up to 1000 tests

15-393-92

ORDERING INFORMATION:

Overall dimensions, 3L × 7W × 10½"H (7.6 × 17.8 × 27cm). Powder Pop Dispenser also available separately—see p. 1988.

INCLUDES:

Unit includes four measuring cuvets with caps, Powder Pop Dispenser with 400 doses of DPD, four "AAA" batteries, and instructions.

COMPLIANCE:

Meets EPA approval for measuring residual chlorine according to Standard Method 4500-Cl G. DPD Colorimetric Method.

Test	Cat. No.	Each
Total Chlorine	15-393-90	394.31
Free Chlorine	15-393-92	394.31

HF Scientific Chlorine Dioxide Pocket Photometer

Test Free Chlorine Dioxide anywhere in the field for sample sizes up to 5mL

- Easy-to-use microprocessor-controlled photometer provides ±2% accuracy, three-second response time, and 0.01ppm resolution; testing range: 0 to 6.0ppm, optical path: 25mm
- Step-by-step menu on 16-digit alphanumeric LCD guides user through measuring process; keypad protected by splash-resistant tactile membrane
- PPD-2 DPD Powder Pop* Dispenser (included) provides precise, convenient push-button reagent dispensing to sample
- Unit automatically shuts off after five minutes when not in use; 4 "AAA" batteries provide enough power for up to 1000 tests

ORDERING INFORMATION:
Overall dimensions, 3L × 7W × 10½"H (7.6 × 17.8 × 27cm).

INCLUDES:
Four measuring cuvets with caps, PPD-2 DPD Powder Pop Dispenser with 100 doses of DPD Free Reagent, 30mL of Glycine Reagent, four "AAA" batteries, and instructions

COMPLIANCE:
Meets EPA approval for measuring residual chlorine dioxide according to Standard Method 4500-ClO_2D. DPD Colorimetric Method.

Test	Cat. No.	Each
Chlorine Dioxide	**15-393-91**	314.66

THERMOSAFE* COLIFORM WATER TEST MAILER

Durable yet lightweight foam mailer protects your water samples in transit. Engineered rib structure holds 100mL sample vials firmly in place. Reusable and recyclable.

Visit www.fishersci.com and search for ThermoSafe Coliform Test Mailer

Orbeco-Hellige Simplex Chlorine and pH Comparator Test Kits

15-398-390 Series

- Low-cost, compact test kits for accurate onsite testing of DPD or ortho-tolidine chlorine and pH in water/wastewater
- Test kit uses eight built-in, guaranteed nonfading color standards mounted in a durable, corrosion-resistant housing
- Test sample color is directly compared to standards, eliminating the need for color discs or slides

INCLUDES:
Comparator, carrying case, all necessary reagents and instructions. Replacement tubes are available. To order, contact your Fisher Scientific Customer Service Representative.

COMPLIANCE:
Chlorine DPD test kits meet U.S. EPA specifications. CE marked.

Range	Method	Cat. No.	Each
DPD Test Kits For Free and Total Chlorine			
0.1-1.0ppm	DPD[1]	**15-398-398**	38.01
0.2-3.0ppm	DPD[1]	**15-398-397**	38.01
Ortho-tolidine Test Kits For Chlorine			
0.2-3.0ppm	Acid Ortho-tolidine	**15-398-399**	42.60
pH Test Kits			
6.8-8.2	Phenol Red	**15-398-394**	41.90
Chlorine/pH Kit			
0.2-3.0ppm Cl_2; 6.8-8.2 pH	DPD[1]/Phenol Red	**15-398-396**	76.98

[1] *Uses DPD reagent tablets. Kit supplied with 50 tablets for Free Chlorine testing and 50 tablets for Total Chlorine Testing.*

PPD-2 DPD Powder Pop* Dispensers for Chlorine Testing

Use with any DPD-based photometer or test kit

Portable dispenser accurately delivers the correct volume of DPD reagent for Free or Total Chlorine—use with any DPD-based photometer or test kit.

- Supplied with enough DPD reagent for 400 tests
- To use, simply invert dispenser over sample and press button to dispense reagent; powder dissolves quickly in sample, leaving no messy residue behind
- Available for 5 and 10mL sample sizes, with formulations for a variety of photometers and test kits

15-393-70 Series

Test	Sample Size	For Manufacturers	Cat. No.	Each
Free Chlorine	5mL	HF Scientific (including Pocket Photometer), Hach*	**15-393-64**	57.58

LaMotte* Test Strips

For iodine, QAC and chlorine testing

Test iodine from 12 to 100ppm, quaternary ammonium compunds from 50 to 400ppm, and chlorine from 10 to 200ppm.

- Chemically treated paper strips produce color changes in 30 seconds
- Simply dip strip into sample; compare strip color to color chart located on plastic vial
- Vials labeled with test instructions

HF Scientific Chlorine Micro Check Test Strips

Detect free or total chlorine concentrations as low as 0.05ppm

Test strips for field testing and quality-control procedures; provide a safe and economical alternative to reagent chlorine testing.

- Strips give readings at 0, 0.05, 0.2, 0.4, 0.6, 0.8, 1.2, 1.5, 2.0, 2.6, 4.0, 6.0, and 10ppm
- Accurate results produced in less than one minute
- Easy to use—simply dip strip into sample or hold under liquid stream to saturate, remove, and match color to the color-comparison scale

INCLUDES:

50 test strips are supplied in bottle labeled with instructions, color-comparison scale, and expiration date

COD

BioScience COD Reactors

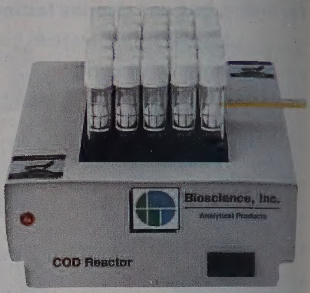
For BioScience U.S. EPA accepted micro-COD method

- Can also be used to determine COD readings in nonreporting purposes for readily oxidized wastes, culture inactivations, melting and boiling determinations, and other related tests or procedures
- Choose from two reactor sizes that hold 15 or 30 reagent vials (16 × 100mm)
- Units are factory preset and calibrated to 150°C (302°F), accuracy of ±2°C, include thermometer, and are compatible with other available 16mm test vials
- Sturdy, compact steel housing with baked enamel finish

Reactor Type	L × W × H	Cat. No.	Each
15-tube	7 × 8 × 4" (17.8 × 20.3 × 10.2cm)	**01-215-23**	761.70
30-tube	9½ × 8 × 4" (24.1 × 20.3 × 10.2cm)	**01-215-24**	970.60

ORDERING INFORMATION:
Electrical requirements: 110V 50/60Hz.

COMPLIANCE:
Designed specifically for BioScience U.S. EPA accepted micro-COD method requiring two-hour digestion of samples at 150°C (302°F).



01-215-23

WARNING
The products indicated contain mercury. Don't put products containing mercury in the trash. Products containing mercury are to be recycled or disposed of as hazardous waste. Products containing mercury may be regulated by Local, State, or Federal Laws. Some products containing mercury are not available for sale in some states.

LOOKING FOR COD VIALS?
Vials for COD testing are available in the Vials section, which begins on p.1905.

CYANIDE

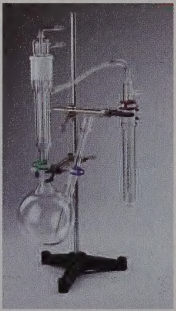
Pyrex* Regular Cyanide Distillation Apparatus

For testing soluble and insoluble cyanides in water

Cyanide as hydrocyanic acid (HCN) is released from cyanide complexes by reflux distillation and absorbed in a scrubber containing sodium hydroxide solution.

- Use for samples of 500mL
- Reaction/distillation section of apparatus connects to absorption/scrubber section by Tygon* tubing, reducing set-up time and eliminating a key source of glass breakage
- Inlet tubes have funnel openings for easier acid addition

COMPLIANCE:
Meets U.S. EPA SW-846 Methods 9010 and 9012 and ASTM* Method D 2036.



05-723-16; clamp and stand not included.

Test	Mfr. No.	Cat. No.	Each
Soluble/insoluble Cyanides in Water	3350 C	**05-723-16**	497.04

LOOKING FOR REPLACEMENT PARTS FOR THE PYREX* REGULAR CYANIDE DISTILLATION APPARATUS?
Fisher Scientific carries replacement parts for the Pyrex Regular Cyanide Distillation Apparatus: inlet tube, condenser, dispersion tube, and trap.
Visit www.fishersci.com and search for Pyrex Cyanide Distillation Apparatus

Wheaton Complete Cyanide Distillation Apparatus

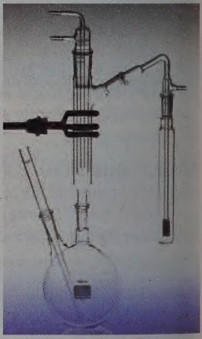
For removing interference substances in cyanide quantitative analyses according to ASTM* D 2036

Sample reacts with H_2SO_4 and $MgCl_2$ to convert any cyanide to hydrocyanic acid (HCN), HCN is distilled and absorbed in NaOH solution, and sample is analyzed for CN.

- With ClearSeal* grease-free joints and medium frit
- Wheaton-33* low extractable borosilicate glass

INCLUDES:
Absorber jacket, absorber top, cold finger condenser, cold finger jacket, 1000mL distilling flask, and inlet tube

COMPLIANCE:
For use according to ASTM D 2036



09-108; clamp not included.

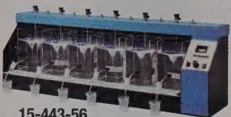
SETTLEABLE SOLIDS

Six-Paddle Stirrer

Provides identical test conditions for all samples



15-443-56

Stainless-steel paddles stir water samples simultaneously at same speed.

- Paddles are 1W × 3"L (2.5 × 7.6cm), and driven by 1/30 hp variable-speed electronic motor from 1 to 300rpm
- Precise, easy-to-read digital display
- Paddle depths adjustable to a maximum of 9" (23cm)
- Rods are 6" (15cm) apart
- Fluorescent-lamp floc illuminator is built into the jar tester base for glare-free observation of samples
- Steel uniframe chassis

ORDERING INFORMATION:

Electrical Requirements: 120V 50/60Hz. For information about optional carrying cases, or beakers, contact your Fisher Scientific Customer Service Representative.

INCLUDES:

Comes complete with six standard 1L round glass beakers and dust cover.

L × W × H	Cat. No.	Each
8 × 40 × 18" (20 × 102 × 46cm)	**15-443-56**	2715.00

Nalgene* Plastic Settlometer Kit

Ideal for wastewater treatment plant operators

- All kit components are chemical resistant to "normal" sludge samples (pH range 3 to 10)
- ½ gal. (2L) lightweight, transparent jar has easy-to-read white graduations and high impact resistance
- Paddle permits agitation of sample without scratching jar
- Centrifuge tubes feature molded-in graduations and friction-fit closures
- For tabletop (clinical) centrifuges; shatterproof tubes will withstand forces up to 6000×G without cushions or adapters, eliminating risk of broken glass

15-443-35 with three centrifuge tubes (10 supplied).

ORDERING INFORMATION:

Approximate jar dimensions, O.D × H: 5 3/16" × 7½ (13.2 × 19.1cm). Tube dimensions, O.D × H: 4 11/16" × 4 11/16 (1.7 × 11.9cm).

INCLUDES:

Polycarbonate jar and cover, polypropylene paddle, ten ½ oz. (15mL) polycarbonate conical centrifuge tubes with friction-fit polypropylene closures, an instruction booklet and data sheet

COMPLIANCE:

Kit has been evaluated by the National Training and Operational Technology Center (NTOTC) of the U.S. EPA and has been determined to yield results equivalent to the equipment NTOTC has used in the past.

Blunt	2180 439	**15-441**	4/1134.15

Nalgene* Polycarbonate Imhoff Settling Cone and Rack

Molded acrylic rack can also hold separatory funnels

Settling Cone

- Graduated from 0 to 1000mL, with 0.1mL increments in the 0 to 1mL range
- 13mm leakproof screw closure at bottom for withdrawing sediments
- Top diameter: 4 3/16" (10.6cm)

Cone Rack

- Holds separatory funnels or three Nalgene Imhoff cones
- Wide base provides stability on benchtop
- Dimensions: 7¾L × 16W × 14½"H (19.6 × 41 × 37cm)

15-438

Description	Mfr. No.	Cat. No.	Each	Case of 4

W990800	**02-927-011**	33.82	115.62

TURBIDITY

Thermo Scientific* Orion* AQ4500 Portable Turbidimeter

Nephelometric and ratiometric measurements; excellent correlation with online instruments

- Autoranging from 0 to 1000 NTU, with choice of units: NTU, FTU, FNU, ASBC, or EBC
- In 0 to 40 NTU range, unit provides a ratiometric range that gives EPA, GLI method two equivalent numbers
- Dual-source LED allows readings that comply with both EPA 180.1 and ISO 7027
- IP67 waterproof to a depth of 3m
- Battery life of over 1000 hours; datalog capacity of 100 data points
- Accepts 24mm cuvets

NEW

13-650-100

INCLUDES:

Turbidity standards kit, carrying case, and replacement cuvets

WARRANTY:

Two years

COMPLIANCE:

Dual source to comply with EPA 180.1 and ISO 7027

Range	Cat. No.	Each
0-1000 NTU	**13-650-100**	1399.00

LaMotte* TC-3000 Tri-Meter

Measures turbidity, chlorine, and color

Compact handheld water analysis instrument with microprocessor-driven optical system and unique optics configuration. Available in EPA- or ISO-compliant versions.

- Provides precise, sensitive, and dependable measurements
- Reads low levels for turbidity (0.05 NTU), chlorine (0.02 ppm), and color (0.2 PCU)
- Expands to higher ranges: 0–4000 for turbidity and 0–10ppm for chlorine
- Response time: <5 seconds
- Features six languages, data logging (4000 points), signal averaging, RS-232 interface
- Uses 9V battery, with auto shut-off and optional AC power

22-278-589

INCLUDES:

Supplied with 0, 1, and 10 NTU standards; sample bottle; four sample vials; DPD tablets; and extra battery

CERTIFICATIONS:

HF Scientific MicroTPW Portable White Light Turbidimeter

Essential tool for monitoring turbidity on the go

15-393-55

- Autorange from 0 to 1100 NTU with accuracy of ±2% of reading or ±0.01 NTU
- Water-resistant, ABS-injection molded housing maintains laboratory performance in field operations
- Other field-friendly features include push-button calibration, four-digit (seven-segment) LCD display, and long life—performs over 1000 tests on a single set of four "AAA" alkaline batteries
- Response time: 14 seconds
- Maximum sample size: 10mL
- Resolution varies with turbidity range: 0.01 NTU for 0-99 NTU range, 0.1 NTU for 100-999.9 NTU range, and 1 NTU for 1000-1100 NTU range
- Light source: tungsten

ORDERING INFORMATION:

Meter dimensions: 6½L × 2¾W × 1¾"H (16.5 × 7.0 × 4.4cm).
Case dimensions: 8½L × 10W × 2½"H (22 × 25 × 6.3cm).

INCLUDES:

Shock-resistant, high-density polyethylene carrying case, one set of calibration standards (0.02, 10, 100, 1000 NTU), index rings, batteries, operator's manual, and measuring cuvets with light-shield caps

REQUIRED ACCESSORIES:

Set of four "AAA" alkaline batteries.

COMPLIANCE:

Conforms to IP67 standards and US EPA Method 180.1

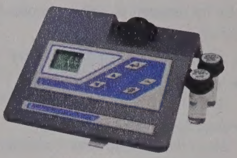
CERTIFICATIONS:

CE marked; NEMA 4X certified.

Description	Cat. No.	Each
Portable Turbidimeter, White Light (conforms to US EPA Method 180.1)	**15-393-55**	729.00

HF Scientific Micro 1000 White Light and Infrared Ratio Turbidimeters

Provides easy nephelometric measurements in less than six seconds from a 30mL sample



15-393-97

- Reads in NTU, EBC, Nephelos, FNU, and FAU
- Autoranges over entire measurement range
- Uses a quick-connect light source and features a full-time ratio mode that automatically compensates for background color
- Auto Alert Calibration Prompt automatically alerts operator to initiate simple, menu-driven calibration, and diagnostic software automatically monitors and detects errors

INCLUDES:

One set of calibration standards (0.2 to 1750 NTU), operator's manual, two measuring cuvets with light shield caps, and plug-in power adapter

COMPLIANCE:

White light model (Micro 1000 WL) exceeds U.S. EPA criteria for Method 180.1; Infrared model (Micro 1000 IR) conforms to ISO 7027 standards

CERTIFICATIONS:

CE marked; UL listed, CSA approved.

Model	Electrical Requirements	Cat. No.	Each
Micro 1000 WL (White Light)	100–240V 50/60Hz	**15-393-95**	1853.79
Micro 1000 IR (Infrared)	100–240V 50/60Hz	**15-393-97**	1884.79

SPECIFICATIONS

Range	0 to 10,000 NTU 0 to 2450 EBC 0 to 10,000 FNU 0 to 10,000 FAU
Accuracy	±2% of reading plus 0.01 NTU (0 to 1000 NTU) ±5% of reading (1000 to 4000 NTU) ±10% of reading (4000 to 10,000 NTU)
Resolution	0.0001 NTU on Lowest Range
Response Time	<6 seconds
Typical Sample Size	30mL
Light Source	Quick-connect Infrared (Model IR) or Tungsten (Model WL)
Operating Temperature	0° to 50°C (32° to 122°F)
Outputs	RS-232-C Serial Port (bidirectional)
Dimensions (L × W × H)	10¾ × 10 × 3¾" (27 × 25 × 9.5cm)
Weight	2⅞ lb. (1.3kg)

HF Scientific Micro 100 Laboratory Turbidimeter

Ideal for municipal water and wastewater facilities, environmental, commercial and industrial laboratories

Use for research as well as routine analytical measurements.

13-393-80

- Autoranging from 0 to 1000 NTU
- Sensitive to changes as small as 0.01 NTU
- Auto Alert Calibration Prompt alerts the operator when calibration is needed
- Reusable calibration standards save time and money over mixing primary standards
- Recordkeeping is simplified by outputting date, time and NTU reading to the RS-232-C serial port each time the READ button is pushed
- Multiline display shows the last reading as well as the current reading
- Quick Connect Lamp Module speeds up lamp replacement and reduces maintenance downtime

INCLUDES:

Three measuring cuvets with light shield cap, three calibration standards (0.02, 10.0, and 1000 NTU) and 120V or 100–240V universal power adapter

COMPLIANCE:

Exceeds US EPA criteria for Method 180.1.

CERTIFICATIONS:

Orbeco-Hellige Model 965-10A, 966, and 966-IR Laboratory and Portable Turbidimeters

Assure compliance with NPDES permits, Clean Water Act and Safe Drinking Water Act regulations

Factory standardized in three ranges: 0 to 20 NTU, 0 to 200 NTU and 0 to 1000 NTU. Supplied 40 NTU primary copolymer standard is US EPA approved to be safe, nontoxic and noncarcinogenic, and has a guaranteed shelf life of one year.

15-375A

15-386

- Direct-reading digital display
- Accuracy ±1% of reading
- Horizontal optical path eliminates false readings due to settling materials obscuring the bottom of the sample cell
- Infrared Model 966-IR (860nm LED light source) is ideal for accurate measurement of colored samples

ORDERING INFORMATION:

Benchtop model dimensions: 9¼L × 11W × 5¼"H (24 × 28 × 13.5cm). Shipping weight: 13 lb. (5.9kg). Switch-adjustable for 110/220V, 50/60Hz operation. Portable models dimensions: 7½L × 4W × 3"H (19 × 10.2 × 7.6cm). Power: four "AA" batteries or AC adapter. Shipping weight: 5 lb. (2.2kg) (including carrying case).

INCLUDES:

Carrying case, package of 0 and 40 NTU standards, six sample cells, and operator's manual

COMPLIANCE:

Models 965-10A and 966 meet US EPA (180.1), ASTM*, AWWA, APHA and WEF specifications. Infrared Model 966-IR (860nm LED light source) meets ISO 7027 specifications.

GFS Chemicals Amco Clear* Individual Primary Turbidity Standards

Highly accurate, stable and reproducible standards for calibrating turbidimeters and nephelometers

Primary turbidity standards for use in 90° nephelometers such as the Hach* 2100A, HF Micro 100, GLI On-line instruments, Hanna Instruments*, HF DRT 100, and Monitek* Model 21.

- Ready to use—no mixing or dilution required
- Consist of patented, polymer microspheres suspended in a pure, aqueous medium
- Uniform in particle size distribution to ensure consistent light scattering and precise enough to permit calibration down to and including 0 NTU
- Nontoxic and won't settle out of suspension
- Guaranteed accuracy within 1%
- Designed for 90° white light turbidimeters (EPA 180.1 design)
- Guaranteed one-year shelf life

ORDERING INFORMATION:

In 1L bottles (additional volumes, values and kits are available; contact your Fisher Scientific Customer Service Representative).

COMPLIANCE:

The only alternative to formazin formally approved as a primary standard by the U.S. EPA.

GFS Chemicals Amco Clear* Linear Calibration Sets

Highly accurate, stable and reproducible standards for calibrating turbidimeters and nephelometers

- Ready to use—no mixing or dilution required
- Consist of patented, polymer microspheres suspended in a pure, aqueous medium
- Uniform in particle size distribution to ensure consistent light scattering and precise enough to permit calibration down to and including 0 NTU
- Nontoxic and won't settle out of suspension
- Guaranteed accuracy within 1%
- Designed for 90° white light turbidimeters (EPA 180.1 design)
- Guaranteed one-year shelf life

ORDERING INFORMATION:

Available in three ranges. Each set consists of six 125mL bottles of primary standards.

COMPLIANCE:

Fulfill U.S. EPA recommendations for linear calibration of each range used to permit instrument-to-instrument correlation

WATER QUALITY—COLORIMETERS

Thermo Scientific* Orion* AQUAfast* IV AQ4000 Colorimeter

Rugged, IP67-waterproof, handheld portable

Perfect for field or laboratory analyses.

Versatile programming

- Comes with over 30 preprogrammed methods; stores up to 190 methods
- Download up to 160 new procedures to keep methodology current, or create and store up to 10 custom methods in memory

Auto-Test cuvets and Auto-ID mode for automated measurements

- Place sample in the Auto-Test cuvet and position cuvet in instrument
- AQ4000 automatically identifies species of interest, selects proper method and wavelength, and sets built-in timer
- Read the result from the display
- Reagent is premeasured, and cuvets are opened only when a measurement is about to be taken, preserving reagent quality
- AQ4000 also uses all AQUAfast II and AQUAfast IV liquid, powder, and tablet chemistries for species from aluminum to zinc, and accepts standard round cuvets with diameters of 13, 16 and 24mm

Easy operation—easy documentation

- Keypad has 12 dual-function buttons with tactile feedback
- Setup, Calibrate, Blank, Zero, Verification, Measure or Standby modes
- Push-button select to display units: concentration (mg/L, µg/L, ppm), absorbance or % transmittance
- Liquid-crystal display shows numeric displays for measurement and program number; alphanumeric display for prompts and messages
- Icons indicate mode and unit of measurement; tell when unit is prompting, timer is active, data is in log, battery is low, print function is active, sample is overrange
- Log up to 100 data points in the field (in nonvolatile memory), complete with a time-and-date tag, then download to printer or computer via RS-232-C bidirectional connection (requires optional cable)

13-642-157

COMPLIANCE:

Waterproof to IP67 standards.

AQUAfast IV Colorimeter	AQ4000	**13-642-157**	999.00

Thermo Scientific* Orion* AQUAfast* II Single Parameter Colorimeter Kits

Ideal for fast, accurate water quality testing in the laboratory and the field

- Compact, microprocessor-controlled, single wavelength colorimeters
- Optics include temperature-compensated LED with photosensor in waterproof sample chamber
- Operate over the temperature range 0 to 40°C (32° to 104°F) and in noncondensing atmospheres from 30 to 90% RH
- Feature large, easy-to-read LCD, three-button interface for error-free measurements, auto shutoff, and splashproof keypad

13-642-688 with cuvets and reagent tablets (included).

ORDERING INFORMATION:

Electrical requirements: 9V battery provides 40 hours of operation or approximately 600 tests, 13-642-688 (international model) requires 210-240V 50/60Hz. Reagents are also available separately.

INCLUDES:

Black carrying case with colorimeter, reagents, cuvets, stir rod, brush, and instructions. Turbidity kit comes in a carrying case with colorimeter, four standards, sample cuvet and instructions.

COMPLIANCE:

Turbidity unit meets ISO 7027 criteria for turbidimetric measurement.

LaMotte* SMART 2 Colorimeter* Water Quality Analyzer

Multitest colorimeter measures numerous water quality parameters with laboratory accuracy and the convenience of a portable, handheld system

Simple menu-driven operation displays results in concentration (ppm) or absorbance.

- More than 75 preprogrammed tests in library and 10 user-entered tests
- Choose any of four wavelengths (see Specifications) to determine absorbance of a sample at a desired wavelength—proper wavelength selection is assured, since all optical filters are included and automatically selected
- Autoblank and auto-off
- Using optional SMARTLink 2 Program and cable (order online), the SMART 2 Colorimeter can interface with any DOS-based computer program to send test data to a database or ASCII delimited file

LaMotte
SMART 2

Orbeco-Hellige Model 611-A Aqua Tester

Provides accurate, reproducible, sensitive results

15-398-400

Measures color of water over five ranges in accordance with APHA Pt-Co Color, ASTM* D 1209 specifications. Also measures low concentrations of 30 water test parameters, including chlorine, copper and fluoride.

To use:

- Place samples in 8" long (200mm) Nessler sample tubes
- Insert glass plungers (supplied) in top of tubes; plungers eliminate meniscus curvature and automatically adjust viewing depth of sample to 200mm to produce high color intensity, making color changes distinct and easy to see
- Match the sample color with the standard color and read the value of the standard printed on the color disc
- Prism and magnifying lens bring colors side-by-side in one field for mistake-proof comparisons
- Built-in color-corrected lamp assures accurate and reproducible results 15 times more sensitive than with conventional comparators

ORDERING INFORMATION:
For 110V AC/DC.

COMPLIANCE:
APHA Pt-Co Color, ASTM D 1209 specifications

INCLUDES:
Two Nessler tubes and two optical glass plungers; built-in magnifying prism eyepiece; color-corrected lamp; and instructions

Cat. No.	Each
15-398-400	462.50

Lamotte* Nickel Test Outfit

For determining nickel in effluents where organic matter is absent and the interfering ions cobalt, iron, copper, manganese, and chromium are each below 15ppm

- Detects nickel concentrations ranging from 0.5 to 10ppm using octet comparator method
- Nickel reacts with dimethylgloximine under acidic conditions to form orange-red complex

22-278-635

INCLUDES:
Sufficient quantities of seven different reagents to perform 20 tests, graduated cylinder, test tubes, pipets, spoon, and nickel comparator (0.5 to 10.0ppm)

No. of Tests	Range	Cat. No.	Each
20	0.5, 1.0, 2.0, 3.0, 4.0, 5.0, 7.5, and 10.0ppm Ni	**22-278-635**	10.55

WARNING
Kit includes 2.5N Hydrochloric Acid, Conc. Ammonium Hydroxide, 1% Dimethylgloximine, Ammonium Persulfate and 0.0141N Silver Nitrate, which are considered to be potential health hazards. To view or print a Material Safety Data Sheet (MSDS) for these reagents, see MSDS CSD or www.lamotte.com.

LaMotte* Series 1200 Single-Parameter Colorimeters

Water-resistant, handheld single-parameter meters provide fast, accurate, direct results in actual ppm concentrations with photometric accuracy to ±0.001 absorbance units

Test for a variety of analytes using colorimetric single test kits or visual colorimetric/titration test kits.

- Microprocessor allows preprogrammed calibrations to optimally match non-linear curves
- Autozero function
- Flip-top lid over sample chamber eliminates problems with stray light and misplaced light caps
- Chlorine colorimeter kits use unit-dose DPD tablets or DPD liquid reagents; all analytes have enough reagent for 100 tests

READ

22-307-838 with two sample vials (six included).

ORDERING INFORMATION:

Dimensions: 6L × 3¼W × 2½"H (15 × 8 × 5.5cm). 110V 60Hz. All kits require a 9-volt DC battery. Optional AC adapter sold separately (contact your Fisher Scientific Customer Service Representative for details).

INCLUDES:

Sturdy carrying case with six screw-cap sample vials, RS-232 port to interface with a datalogger or computer, and an instruction manual.

CERTIFICATIONS:

CE marked.

CHEMetrics* Chemets* Self-Filling Ampules

Provide results in two minutes or less

13-299 Series

Test kits and refills for Chlorine (DPD), Copper, Dissolved Oxygen, Hydrogen Peroxide, Phenols, Phosphate, Silica, Sulfide and more. Designed for maximum simplicity and accuracy, Chemets 7mm diameter ampules feature tapered, prescored tips with reagent vacuum-sealed inside.

- To perform a test, simply immerse Chemets ampule in the sample, snap off tip, and the correct sample volume
  is quickly drawn inside the ampule
- In two minutes or less, the reaction between the sample and reagent yields a color—which can then be compared to appropriate color standard for quantification of results

ORDERING INFORMATION:

Refill packs of 30 ampules are also available.

INCLUDES:

Complete test kits contain 30 ampules of reagent, comparator(s), snap cup (holds water sample), instructions, and MSDS sheets. All components are housed in a sturdy, plastic case.

NOTE:

Comparators have two-year shelf life.

WATER QUALITY—SAMPLERS

Masterflex* E/S* Portable Sampler

Portable and versatile sampler

PORTABLE SAMPLER
PORTABLE SAMPLER

13-310-490

Encased in a high-visibility yellow polyethylene housing for easy recognition and recovery in the field. When closed and latched, sampler can float for 30 minutes if dropped in water.

- Features single-turn potentiometer, ON indicator, and three-position reversible flow/prime/purge switch
- Maximum speed of variable-speed drive is 400rpm, allowing flowrate adjustment for different applications
- Uses AC or 12VDC power supply, or can run up to four hours on rechargeable internal 12VDC battery
- Manufactured using ISO 9001:2000-certified processes

ORDERING INFORMATION:

Net weight: 17 lb. (7.8kg). Dimensions: 10½L × 11⅓W × 16"H (26.7 × 28.8 × 40.6cm).

INCLUDES:

Supplied as a complete system with Masterflex Easy-Load* pumphead, 50' of L/S* 24 Tygon* LFL PVC tubing (sampler can use other tubing sizes), power supply (AC adapter with 12' cord), internal battery (12VDC), and instruction manual.

WARRANTY:

Two years

COMPLIANCE:

CE-marked; IP54 rated.

L/S 15	125 to 650mL/min.
L/S 24 (supplied)	210 to 1100mL/min.

WATER QUALITY—TEST STRIPS

EM* Quant* Test Strips

Easy-to-use test strips for field testing, preliminary semi-quantitative analysis or quality control

Incorporate classical organic and inorganic reaction mechanisms that allow rapid, highly selective ion screening.

M100071

- Ready to use directly or comes as a kit; all necessary detection chemicals, buffers, masking agents and stabilizers are incorporated into the reaction pads or in the kits
- For most applications, pretreatment is unnecessary when other ionic species are present at concentrations less than 1000ppm
- Use appropriate dilution procedures to test solutions with concentrations above the upper range of the test strip
- Test strips are supplied in sturdy aluminum cylinders labeled with instructions, color comparison scale and expiration date

ORDERING INFORMATION:

For additional analytes not featured here, contact your Fisher Scientific Customer Service Representative for ordering information.

INCLUDES:

Any necessary reagents in dispenser bottles

WATER QUALITY—TOXICITY TESTING

Millipore* Microbial Count Samplers

Sterilized, individually packaged, ready-to-use dip testers for Total Count and HPC Total Count

NEW

MHPC10025

- Convenient alternative to Standard Methods MF method for routine monitoring of microbiological organisms
- Consist of plastic paddle with air vent, filter in contact with nutrient-containing pad, and plastic sampling/incubation case
- 0.45μ filter is marked with a grid to aid in counting colonies on its surface
- Incubation time: 48 to 72 hours at 25° to 35°C (77° to 95°F)

NOTE:

Magnification of colonies is recommended.

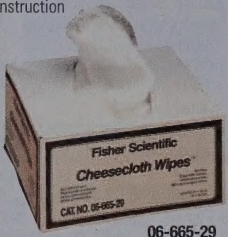
GENERAL-PURPOSE

*Fisherbrand** Certified Cheesecloth Wipes

Reagent-grade quality

- 100% brillant white, pure cotton construction will not scratch sensitive surfaces
- Have a high degree of cleanliness, softness, absorbency and strength
- Can be used to safely clean microscope and camera optical parts, as well as delicate glassware, syringes, pipets, and pH electrodes
- Absorb six times their weight in liquids and are useful for mopping up solvents and aqueous solutions
- Inert to even harsh solvents; ideal as filtering material
- Grade 10 (mesh size)



06-665-29

ORDERING INFORMATION:

Standard wipes folded to 9" square that unfolds to 18 × 36" (46 ×91cm); 60 per dispenser box (two boxes per pack). Mini wipes folded to 4" square that unfolds to 7 × 14" (17.8 " 35.6cm); 200 wipes per dispenser box. Wipes individually dispensed.

COMPLIANCE:

Meet USP and Federal Specification CCC-G-101c.

Offer excellent absorbency and hand-drying performance

- Special drying process produces a softer finished towel
- Reliable quality, softness and absorbency means fewer towels used for better economy
- Available in C-fold and multifold styles

WypAll* X60 Wipers and Towels

Fast absorption and outstanding tear resistance

- Made from Hydroknit*, an advanced wiper material manufactured using jets of water to bond soft, absorbent paper to extra-strong, nonwoven fabric
- Reinforced for extra scrubbing and cleaning power
- No adhesives or binders—soft enough for face and hands
- **WypAll* Teri* Professional Towels** are reinforced, multipurpose wipers for use in health clubs, schools, mining, and manufacturing
- White

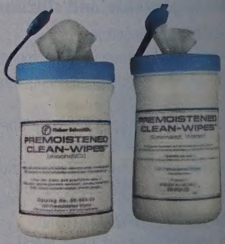
DISINFECTANT

*Fisherbrand** Premoistened Wipes

Ideal for cleaning or wiping optical parts, glassware, electrodes, cuvets and microscopes

Nonwoven cloth wipes available dry, or premoistened with 100% pure deionized water or a blend of pure reagent-grade 70% isopropyl alcohol and 30% deionized water.

- Cellulose and polyester blend cloth is soft and lint-free; will not scratch surfaces or fall apart like paper wipes
- Recloseable container dispenses single wipes, eliminates contamination from dust and dirt



06-665-24 and 06-665-23

ORDERING INFORMATION:
Wipes measure 6 × 9" (15 × 23cm); packed 100 per polyethylene canister.

Premoistened with	Cat. No.	Each
Deionized water	**06-665-23**	11.30
Deionized water and alcohol	**06-665-24**	22.03
Dry	**06-664-14**	7.97

*Fisherbrand** BloodBloc* Biohazard Wipes

Prevent leakage of fluids and chemicals to hands, gloves and work surfaces

06-670-51

- Soft, white absorbent wipe with bright-orange polyethylene backing is impermeable to blood, body fluids, and strong solvents
- Nonwoven cellulose captures and retains fluid; nonlinting for use with delicate instrumentation such as blood counters
- Flexible backing prevents soak-through of pathogens and chemicals to help minimize cross-contamination
- Can also be used as mats and liners
- One time use only

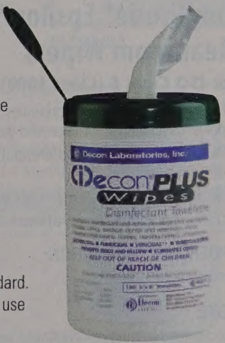
CiDecon* Plus Wipes

Premoistened disinfectant wipes for use on hard surfaces



04-355-87

- Achieve hospital disinfection in three minutes and maintain continual residual bacteriostatic activity for up to six months
- Economical, durable wipes display superior efficacy against a broad range of pathogenic organisms
- Tuberculocidal, virucidal, bactericidal, and fungicidal

ORDERING INFORMATION:
Size: 5 × 8" (12.7 × 20.3cm).

COMPLIANCE:
Meet OSHA Bloodborne Pathogen Standard. EPA registered. FDA 510K clearance for use on medical equipment and instruments.

Packaging	Cat. No.	Each	Case of 12
Pop-up canister (180 wipes)	**04-355-87**	27.38	280.77

CiDecon* Disinfectant Wipes

Hard-surface disinfectant wipes

Provide broad spectrum efficacy against bacteria, viruses, and fungi, including HIV-1 and TB.

CiDeconWipes
Disinfectant Wipes

HYPE-WIPE* Disinfecting Towelettes with Bleach

Approved for new kill claims and contact times

- One-minute kill time for TB, streptococcus, salmonella, pseudomonas, and vegetative cells of *Clostridium difficile*; two-minute kill time for MRSA, VRE, and staphylococcus
- Premoistened with a formulation of 0.525%, 1:10 dilution of sodium hypochlorite towelettes—eliminates daily mixing of bleach
- Safe to use on glass, ceramics, plastic, and stainless steel; not for use on aluminum
- Standard size towelette can disinfect a 40 square-foot area
- Mini HYPE-WIPE towelettes are excellent for disinfecting glucometers, blood coagulation devices, as well as small spill cleanup

HYPE-WIPE®

DuPont* Sontara* Nonpyrogenic Wipers

For ISO Class 5 (Class 100) cleanroom applications

- Ideal for wiping down products and cleaning equipment surfaces in sterile areas
- Sterile, nonpyrogenic nonwoven wiper made of contamination-control DuPont Sontara* fabric
- Unique surface texture provides effective cleaning and particle removal
- Low levels of particles and extractables
- High water and solvent sorbent capacity and rate

19-120-818

ORDERING INFORMATION:

Sterile packaging features peelable outer bag and linear tear inner bag; embossed lot numbers on both bag seals for lot traceability. Basis weight, 65g/m^2.

INCLUDES:

Certificate of Sterility and Certificate of Irradiation with each case.

COMPLIANCE:

Passes LAL test for endotoxins (<20 EU/device). Validated to a 10^{-6} SAL per AAMI/ISO 11137 Method 1 Guidelines for sterilization of medical devices.

Size	Mfr. No.	Cat. No.	Pack of 25	Case of 40 Pk.

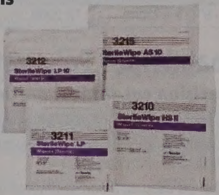
SterileWipe* Sterile Dry Wipers

For applying cleaning, sterilizing and disinfecting solutions in aseptic cleanrooms

Specifically developed for maximum control of particulate contamination in sterile environments.



Clockwise from top left: 18-335D, 19-036-86, 18-335B, 18-335C

SterileWipe LP

- Knitted from 100% continuous filament polyester
- Double-knit, no-run interlock construction ensures maximum abrasion resistance and low particle values
- Unique knit pattern also provides greater surface area for higher sorptive capacity and increased wiping efficiency
- Soft and nonabrasive; ideal for wiping sensitive surfaces
- Basis weight: 155g/m²

SterileWipe LP 10

- Sealed-edge wiper with no-run interlock double-knit construction of 100% continuous filament polyester
- All four edges thermally sealed to prevent release of fibers and particulates
- Designed for use in an ISO Class 4 (Class 10) cleanroom to further ensure ultralow particulate and extractable levels
- Ideal for wiping and spill control in critical, ultraclean environments
- Basis weight: 135g/m²

SterileWipe HS II

- Blend of 55% cellulose and 45% polyester combines the absorbency of natural fiber with the strength of synthetic fiber
- Ideal for applications where bacteriological contamination, particulates and extractables are concerns
- Appropriate for use in aseptic environments of the pharmaceutical, medical device and biomedical industries
- Basis weight: 67g/m²

ORDERING INFORMATION:

LP: 10 wipers/inner bag, 10 inner bags/outer bag, five outer bags/case in solvent-safe bags. Expiration date clearly marked on each package.

LP 10 and HS II: 20 wipers/inner bag, five inner bags/outer bag, five outer bags/case in solvent-safe bags. Expiration date clearly marked on each package.

INCLUDES:

Certificates of Processing and Compliance

COMPLIANCE:

All wipers sterilized by gamma radiation to a 10^{-6} Sterility Assurance Level in accordance with the Association for the Advancement of Medical Instrumentation guidelines.

Description	Size	Mfr. No.	Cat. No.	Case of 500

SterileWipe HS II	12 × 12" (30.5 × 30.5cm)	TX3210	**18-335B**	221.07

AlphaWipe* Polyester Wipers

For ISO Class 5 and 6 (Class 100 and 1000) applications

- Heavyweight, all-purpose wiper for surface cleaning and spill control
- Double-knit, no-run interlock construction of 100% continuous-filament polyester
- High sorptive capacity, good abrasion resistance, low releaseable particles
- Effective as a clean work surface and for packaging sensitive parts
- Lot-to-lot traceability

Nylon MiracleWipe* Wipers

For ISO Class 5 to 6 (Class 100 to 1000) cleanroom applications

- Ultraclean, highly adsorbent wiper is static safe, abrasion safe, and run resistant
- Lint-free—exhibit extremely low particle levels
- Double-knit nylon construction creates large surface area that grips and holds contamination, preventing its transfer
- Cleaned and processed in an ISO Class 3 (Class 1) cleanroom environment in accordance with Fed. Spec. 209E

18-336B

TechniCloth* Blended Wipers

For ISO Class 6 and 7 (Class 1000 and 10,000) applications

18-315A

- Economical all-purpose nonwoven wipers made from a blend of 55% cellulose and 45% polyester—combine the absorbency of natural fiber with the cleanliness and strength of synthetic fiber
- Hydroentanglement process uses jets of water to blend fibers, eliminating need for chemical binders
- Provide excellent bidirectional strength and very low solvent extractables levels
- Offer superior wet and dry strength, solvent-compatibility, and acid resistance
- Will not scratch or abrade delicate precision components—ideal for cleaning computer and other electronic equipment

ORDERING INFORMATION:

Available as dry wipers or in CleanPak* presaturated with 70% isopropyl alcohol. Basis weight: 67g/m².

TechniCloth* II Blended Wipers

For ISO Class 6 and 7 (Class 1000 and 10,000) applications

18-330A, 18-330C

- Made of a hydroentangled blend of 55% cellulose and 45% polyester and treated with ITW Texwipe* proprietary ultralow particulate (ULP) finish
- Significantly reduces the wiper's particulate generation
- ULP finish formulated to resist extraction in commonly used solvents

ORDERING INFORMATION:

Basis weight: 68g/m².

Size	Mfr. No.	Cat. No.	Pack of	Case of 10 Pk.

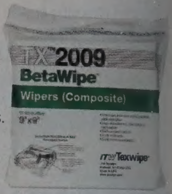
BetaWipe* Composite Cotton Wipers

For ISO Class 7 (Class 10,000) cleanroom applications



18-331B

- Made of thermally bonded polypropylene/cellulose for high absorption and strong acid resistance
- Very soft texture
- Ideal for polishing and cleaning delicate instruments, especially scratch-sensitive surfaces.
- Excellent for removing acids, etchants, and chemical spills

ORDERING INFORMATION:

Basis weight: 112g/m².

Size	Mfr. No.	Cat. No.	Pack of 100	Case of 10 Pk.

Versawipe* Wipers

Lowest NVR in a nonwoven blended wiper

19-120-2433

Highly absorbent, durable wipers made of a nonwoven blend of 55% cellulose and 45% polyester.

- Ideal general wiping and spill control in controlled environments
- Low extractable levels and particle count
- Compatible with solvents
- Contain no chemical binders
- Excellent wet and dry strength
- Autoclavable

ORDERING INFORMATION:

4 × 4" wipers available 1200 wipers/case. 9 × 9" wipers available in packs of 300 and case of 10/pack. 12 × 12" wipers available 10 bags/case (150 wipers/bag).

Kimtech Pure* W3 Wipers

For ISO Class 3 (Class 1) cleanroom applications

19-150-0297

- 100% continuous filament double-knit polyester construction absorbs liquid on contact
- Solvent- and abrasion-resistant
- Laser-sealed edges minimize particle generation
- Cleanroom laundered in water filtered to 0.2μm to minimize the potential for ion contamination

ORDERING INFORMATION:

Packaged flat and double-bagged with case liner. Certificates of Conformance and Irradiation (for sterile wipers) available.

COMPLIANCE:

Gamma irradiated wipers sterilized to 10^{-6} Sterility Assurance Level and compliant with AAMI guidelines.

WRAPPING FILM

*Fisherbrand** Polyvinyl Wrapping Film

Pure food-grade polyvinyl chloride film in its own dispenser

- Gas permeable, making it especially good for covering culture trays
- Also useful for wrapping or covering any perishable material for refrigerator or freezer storage

15-610

Roll W × L	Cat. No.	Each
18" × 1000' (45cm × 305m)	**15-610**	47.85

*Fisherbrand** Clear Plastic Lab Wrap

Designed specifically for the laboratory

- Made of 100% ultraclean polyethylene—ensures sample purity and eliminates contamination
- High-cling properties make it ideal for wrapping of beakers, flasks, or Petri dishes with an extraordinarily tight seal that stays in place
- Low-tangle properties ensure wrap won't ball up when being handled
- Carton has convenient metal tear-off bar

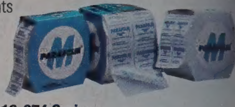
22-305-654

Roll W × L	Cat. No.	Each
12" × 100' (30.5cm × 30.5m)	**22-305-654**	10.08

Parafilm M* Laboratory Wrapping Film

Quickly, effectively seals labware

- Waterproof, moisture-proof film prevents sample evaporation, contamination; protects anhydrous materials
- Can be folded repeatedly and twisted around sharp surface without rupturing
- Increases approximately 200% when stretched lengthwise at 21°C (70°F)
- Partially returns to original length when tension is removed
- Becomes more flexible and softer as temperature increases
- Rolls are interlined with paper to prevent adhering



13-374 Series

ORDERING INFORMATION:

13-374-10, 13-374-12, and 13-374-16 rolls are packaged in cardboard dispensing cartons.

Roll W x L	Cat. No.	Each	Case of
2" × 250' (5cm × 76m)	**13-374-16**	33.75	24/675.03

FISHER CHEMICAL PACKAGING

Leading the way in Safer, Greener, and Smarter Packaging.

Products in the Fisher Chemical line come in a wide variety of innovative packaging designed for safety, environmental protection, convenient handling and storage, and preservation of product integrity. Our packaging is compliant with all government regulations.

OUR RECENT INNOVATIONS INCLUDE:

ECOSAFPAK

- 100% recyclable and Styrofoam®-free to protect the environment
- Only package to pass the ISTA (International Safe Transport Association) "3A" test that ensures safety and handling

PRESSURE SENSITIVE SAFETY LABELS

- 23% larger label to provide more visible chemical name and attributes for safe handling and storage
- Color coded for appropriate storage handling
- Complete lot analysis on most solvents for purity and consistency assurance

NEW AND IMPROVED FISHERPAK® SOLVENT DELIVERY SYSTEM

- Available in color quick connects for safe handling and identification
- Bigger label for safe handling and storage
- Pressurized for high purity and consistency

FISHERLOCK™ TAMPER EVIDENT CAPS

- Provide a tight, tamper-evident, secure seal to assure chemical contents arrive fresh and unopened
- Caps are designed to resist back-off during transport, reducing risk of leakage

Visit www.fishersci.com/smartpack to learn more about our other innovative packaging including Safe-Cote® PVC, square poly bottles and specialized acid containers.

Through excellence in packaging, the Fisher Chemical line has provided a smarter, greener, safer way to conduct research and help prevent costly accidents.

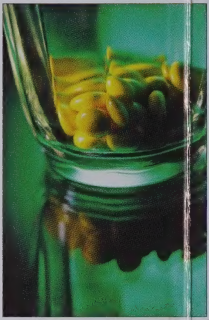
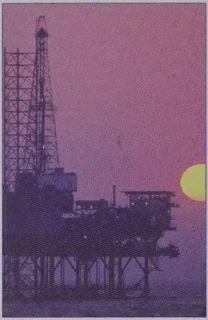
Your chemical solutions partner with Fisher Scientific

MULTIPLE NATIONWIDE MANUFACTURING LOCATIONS—ENSURES DELIVERY ANYTIME AND ANYWHERE





- Rapid nationwide delivery
- Tightest specifications in the industry with minimal lot-to-lot variation
- Three manufacturing sites—products arrive on time and to your specifications
- Packaged to your specific requirements
- Quality products made under cGMP compliant and ISO-9000 quality system
- Custom products manufactured to your specifications and schedule
- Contract packaging, blending and filling services
- Excellent environmental record

FLAMMABILITY
HEALTH
INSTABILITY

Warning! Flammable liquid and vapor. Harmful if swallowed or absorbed through the skin. Causes eye irritation. May cause skin and respiratory tract irritation. Metabolized to cyanide in the body, which may cause headache, dizziness, weakness, unconsciousness, convulsions, coma and possible death. May be harmful if inhaled. May cause central nervous system depression. May cause liver and kidney damage. Hygroscopic (absorbs moisture from the air). TARGET ORGANS AFFECTED: Central nervous system, liver, kidneys, eyes, respiratory system, cardiovascular system. FIRST AID: EYES: Gently lift eyelids and flush continuously with water. SKIN: Rinse area with large amounts of water for at least 15 minutes. INGESTION: Do not induce vomiting. INHALATION: Support breathing as needed. Do NOT use mouth-to-mouth resuscitation. Get medical aid immediately.

IMPORTANT! Do not use this product until Material Safety Data Sheet has been read and understood.

MISE EN GARDE! Liquide inflammable. Nocif en cas d'ingestion ou d'absorption percutanée. Cause une irritation oculaire. Peut provoquer des irritations de la peau et des voies respiratoires. Se métabolise sous forme de cyanure dans l'organisme, ce qui peut causer des maux de tête, une sensation de vertige, un état de faiblesse, une perte de conscience, des convulsions, un coma, voire la mort. Peut être nocif en cas d'inhalation. Risque de causer une dépression du système nerveux central. Risque de causer une lésion du foie et des reins. Hygroscopique. ORGANES CIBLES: Système nerveux central, foie, reins, yeux, système respiratoire, système cardiovasculaire. PREMIERS SECOURS: YEUX: Soulever délicatement les paupières et rincer sans arrêt avec de l'eau. PEAU: Rincer les lieux avec de grandes quantités d'eau pendant au moins 15 minutes. INGESTION: NE PAS faire vomir. INHALATION: Si nécessaire, entretenir la respiration. Ne pas pratiquer la respiration artificielle par bouche à bouche. Obtenir immédiatement des soins médicaux.

IMPORTANT! Ne pas utiliser le produit avant d'avoir lu et compris la fiche signalétique.

1 The bar code is an alphanumeric code widely used by industry for inventory and tracking control. This "three-of-nine" code meets the Health Industry Bar Code (HIBC) Supplier Labeling Standard as prepared by the Health Industry Business Communication Council (HIBCC).

2 This area contains the appropriate precautionary signal word, i.e., DANGER, WARNING, CAUTION, and highlights the potential health hazards, both acute and chronic, of the product.

3 In this area, the molecular formula and formula weight are indicated along with the product Chemical Abstract Service (CAS) Registry Number.

4 The Maximum Limits of Impurities are indicated.

5 The full Product Name and Purity Grade are listed.

6 **FisherChemical* ChemAlert Guide:** A three-part guide provides instant personal-protection information: the Safety Code, the NFPA Code and a Storage Code guide. The Date Received is blank so that the customer can write in the date the bottle was received to assist in inventory control.

7 **NFPA Code:** The National Fire Protection Association (NFPA) ratings provide information relating to the severity of health, flammability, reactivity, and related hazards that may be presented by short-term, acute exposure to material during handling under emergency conditions such as spills, leaks, and fires. Each section displays a numerical severity rating from four (most severe) to zero (least severe). The fourth section, as stipulated by NFPA, is left blank and is reserved for indicating any unusual reactivity with water or oxidizing properties. (For more information, see the Technical References section.)

8 **Storage Code:** This color-coded bar provides an instant guide to storage. The storage code is also spelled out for additional clarification. The five storage colors and their descriptions are listed on p. 2013.

9 The U.S. Department of Transportation (DOT) shipping information includes the DOT Proper Shipping Name and the UN/NA Number identifies the United Nations/North American numerical designation for transportation hazards.

10 The catalog number is shown for identification and reference.

11 The address and telephone number of the manufacturer, Fisher Chemical, is listed.

12 **Package Size:** The amount of material per unit or case.

13 Lot Number

NOTE: *ChemAlert is an instant guide only. It should be supplemented by reading the rest of the label (which provides detailed instructions in the event of accidental exposure, spill, or fire, and applicable OSHA, DOT, and ANSI* data) and also by the appropriate Material Safety Data Sheet (MSDS) and standard references.*

FINDING CHEMICALS IN THE LISTINGS

Analytical reagents can be found in the red-coded pages starting on p. 2016. Within the analytical reagents pages, there are several subsections for certain specialized chemicals such as deuterated solvents, ion exchange resins, and Karl Fischer reagents.

Fisher BioReagents* are in a separate section (color-coded purple) at the end of the analytical reagents listings. There are no subsections within the bioreagents pages; all bioreagents are listed strictly alphabetically.

Standards are in a separate section (color-coded gold) following bioreagents. There are several subsections within the standards pages, outlined in a Quick Index on p. 2278.

ACCEPTED NOMENCLATURE

- Chemical salts and compounds are listed under element name: "Sodium Benzoate," not "Benzoate of Sodium."
- Prefixes for organic compounds—such as alpha, iso, meta, secondary, and abbreviations thereof—do not affect alphabetical order. *(Exceptions: Cases where prefix is considered part of the name.)*
- Numerical prefixes, such as tri and tetra, are treated as an integral part of the name. The prefix mono is not used.

PACKAGING FOR SAFETY, CONVENIENCE, AND PRODUCT QUALITY

FisherChemical* analytical reagents come in a wide variety of innovative packaging designed for safety, environmental protection, convenient handling and storage, and preservation of product integrity. Packaging also meets current government regulations. Shipping cartons covered by the U.S. Department of Transportation (DOT) regulations also meet international hazardous materials regulations and standards. The primary container is included in the product description of most chemicals in this catalog. Primary containers include:

- Plastic and glass bottles, jars
- Specialized acid containers
- SafeCote* PVC-coated bottles
- SafeTin* cans
- Aluminum cans
- Square poly bottles
- Poly pails
- PolyPac* containers
- Poison Pack

CHEMALERT STORAGE CODES PROVIDE GUIDELINES

ChemAlert® STORAGE red	**RED (R):** Flammable. Store in an area segregated for flammable reagents.
ChemAlert® STORAGE blue	**BLUE (B):** Health hazard. Toxic if inhaled, ingested, or absorbed through skin. Store in secure area.
ChemAlert® STORAGE yellow	**YELLOW (Y):** Reactive and oxidizing reagents. May react violently with air, water, or other substances. *Store away from flammable and combustible materials.*
ChemAlert® STORAGE white	**WHITE (W):** Corrosive. May harm skin, eyes, mucous membranes. *Store away from red-, yellow-, and blue-coded reagents.*
ChemAlert® STORAGE gray	**GRAY (G):** Presents no more than moderate hazard in any of the categories above. For general chemical storage.

EXCEPTION: Reagent incompatible with other reagents of the same color bar. Store separately.

SPILL CLEANUP KIT SYMBOLS

To simplify ordering the appropriate spill cleanup kits, the following symbols have been used to identify chemicals that require special cleanup materials and the type of cleanup kit required. These are one-time-use kits containing everything necessary for spill cleanup.

Hg	**Mercury Warning.** This product contains Mercury.
ACID	**Acid Spill Emergency Cleanup Kit** for neutralizing and absorbing up to 1 liter of acid. **Cat. No. 18-061A**.
CAUSTIC	**Caustic Spill Emergency Cleanup Kit** for neutralizing and absorbing up to 1 liter of caustic. **Cat. No. 18-061C**.
SOLVENT	**Solvent Spill Emergency Cleanup Kit** for absorbing up to 4 liters of solvent. **Cat. No. 18-061B**.

FisherChemical*: Purity Grades for Every Application

GRADE	DEFINITION	APPLICATION	CERTIFICATE OF ANALYSIS
OPTIMA*	Acids and solvents of extremely high purity. Acids are analyzed for 65 metals by ICP/MS; impurity levels in ppt. Solvent impurity levels in ppm. UV absorbance curves and sample chromatograms available on request. For OPTIMA acids, a typical lot analysis is given in the catalog. Impurity levels in an actual lot received may vary from the amount listed.	HPLC, GC, plasma/ICP, spectrophotometry, and pesticide residue analysis	Provided with each shipment
GC *Resolv**	Solvents with the highest purity and lot-to-lot consistency. Free of contaminants to the ppb level, including those listed in Contract Laboratory Program Target Compound List. Meet ACS specifications. Chromatogram available on request.	Gas Chromatography (GC)	Provided with each shipment
HPLC	Solvents manufactured specifically for use with HPLC instruments. Meet all ACS specifications. Submicron filtered.	HPLC and spectrophotometry procedures	Available on request
Certified ACS	Reagent chemicals that meet or exceed the latest ACS Specifications. Actual lot analysis on label.	Analytical applications requiring tight specifications	Available on request
Certified ACS Plus	Acids that, in addition to meeting or exceeding the latest specifications of the ACS, are analyzed for more than 16 metals. Actual lot analysis on label.	Analytical applications with tighter metal specifications	Available on request
Certified	Reagent chemicals for which the purity standard is established by Fisher Scientific. Purity is guaranteed to meet published maximum limits of impurities.	General analytical procedures	Available on request
Plasma Grade	Solvents manufactured for use with plasma/ICP instruments. Impurity levels in ppt. Packaged in acid-cleaned polyethylene bottles.	Plasma/ICP, environmental testing, trace-metal analysis	Available on request
Environmental Grade	Solvents for use in HPLC analysis, trace-organic analysis, and environmental testing. Packaged in precleaned glass bottles in M3.5 (Class 100) cleanroom. Shipped with Certificate of Analysis.	HPLC, trace-organic analysis, environmental testing.	Provided with each shipment
Pesticide	Solvents for use in analysis of pesticide residue. Meet or exceed ACS standards of purity for pesticide residue analysis.	GC with electron capture detector (ECD), pesticide residue analysis	Available on request
USP/NF/FCC/ EP/BP/JP	Reagent chemicals that meet or surpass specifications of the United States Pharmacopeia (USP), the National Formulary (NF), the Food Chemicals Codex (FCC), the European Pharmacopeia (EP), the British Pharmacopeia (BP), and/or the Japanese Pharmacopeia (JP).	Food and drug laboratories, biological testing	20L or greater; 10kg or greater
Spectranalyzed*	Solvents for use in spectrophotometry. Also meet ACS specifications. Actual lot analysis on label.	Ultraviolet and visible wavelength detectors (UV-Vis)	Available on request
Biotechnology	Solvents and reagents that have been specially purified and assayed for biotechnology applications.	Electrophoresis, molecular biology, sequencing, and peptide and oligonucleotide synthesis	Available on request
Scintanalyzed*	Solvents, fluors, and prepared cocktails for liquid scintillation counting. Includes nonflammable, nontoxic, biodegradable ScintiSafe* cocktails.	Liquid scintillation counting	Available on request
Electronic	Solvents manufactured to ensure low levels of metal contamination. Meet Semiconductor Equipment and Materials Institute (SEMI) requirements. Actual lot analysis on label.	Electronics and circuit board manufacturing	Available on request
TraceMetal	Acids manufactured to achieve low metal contamination measurable in ppm to ppb range. Each lot is analyzed for more than 55 metals by ICP/MS. For TraceMetal acids, a typical lot analysis is given in the catalog. Impurity levels in an actual lot received may vary from amounts listed.	Primarily used in digestion of samples prior to instrument (ICP) analysis	Provided with each shipment
Histology	Solvents and products that are specially prepared for use in the histology laboratory setting. Solvents are filtered for tissue processing applications.	Tissue processing, clinical or histology procedures	Available on request
Laboratory and Technical	Chemicals of reasonable purity for situations where no official standard for quality or impurity levels exist.	Manufacturing and general laboratory use	Available on request

CONVENIENT ONSITE REPLENISHMENT

Fisher Scientific

CHEMICAL MANAGEMENT SERVICES

Minimizing the costs, risks and environmental impact of chemical operations

Chemical Management Services (CMS) provide a modular solution to manage, track, minimize and dispose of chemicals, solvents and reagents. CMS also provides services for Environmental Health and Safety (EH&S) groups to improve regulatory compliance and reporting.

Fisher Scientific has assembled a unique team of industry-leading chemical management service providers to develop a customizable, modular approach to supporting your chemical management needs across the entire life cycle. The services allow for cost-effective control of:

- Chemical life cycle process from beginning to end
- Chemical supplies from identification through disposal
- Chemical management data collection from initial request to waste removal, including chemical tracking activities

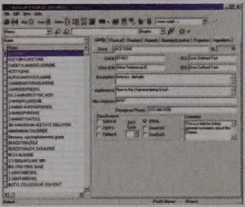
The Chemical Management Services portfolio includes:

- Sourcing/Purchasing Support
- Chemical Receiving Management
- Chemical Information Management
- Inventory Management
- Onsite Waste Management
- Waste Disposal Management
- EH&S Services

ChemSW* CIS Chemical Inventory System*—CISPro Desktop

High-performance, relational database system for tracking chemicals and laboratory supplies

Streamlines procurement, meets regulatory reporting requirements, and minimizes disposal costs.



CSW-1222015

- Tracks and monitors chemical amount and usage
- Generates reports, some of which list chemicals by location, vendor, name, CAS number, and formula
- Available populated with current information from Fisher Scientific, simplifying chemical look-up and ordering
- Provides quick access to hazard information during an emergency
- Includes structure and sub-structure searching capabilities
- Contains online help and a complete 11-part tutorial
- Features automatic e-mail notifications, easy-to-use inline filtering for loading and saving SQL queries, and secure customizable password support
- For use with Windows* 98, ME, NT, 2000, or XP

ORDERING INFORMATION:

Integrated remote inventory bar coding module and infrared communications interface to a handheld scanner, LaserLite Pro, (CSW-90051 sold separately). Contact your Fisher Scientific Customer Service Representative for details.

REQUIRED ACCESSORIES:

- Minimum requirements for operation:
- Pentium* class PC, 64MB RAM, CD-ROM drive, and hard drive with 50MB free space.

Alkacid* Wide Range pH Tester
pH 2 to 10

Quantity	Packaging	Cat. No.	Each	Case of
Three 15' (4.6m) rolls	Dispensers	**A979**	24.93	12/236.99

The tester consists of a disposable transparent plastic container with a color chart and a 15" long (4.6cm) roll of ¼" wide (0.6cm) Alkacid Ribbon. It has a specific color for each of five pH values, and the intermediate steps can be judged to approximately ± 1 pH.

Alkacid* Wide Range pH Test Paper

Quantity	Packaging	Cat. No.	Each	Case of
12 × 100	Strips/Vials	**A980**	52.68	12/494.29

This is the same test paper supplied with the Alkacid Wide Range pH Tester, but in strips 1⅞" long by ¼" wide (4.8 × 0.6cm). A color chart is attached to each vial. 100 strips/vial.

*Trademark. See Trademark Reference.

Alkacid* Short Range pH Test Ribbons

pH Range	Color	Cat. No.	Pack	Case of
0.0-3.0	Blue	**A981**	29.87	12/283.40
3.5-5.5	Green	**A982**	33.72	12/316.45
6.0-8.5	Yellow	**A983**	35.54	12/333.51
9.0-11.0	White	**A984**	29.15	12/275.23
10.5-12.5	Yellow	**A985**	29.15	12/275.17
12.0-14.0	Blue	**A986**	33.74	12/316.54

These dispensers are the same as the Short Range Test Ribbons included in the Full Range pH Test Kit. They can be used to determine the approximate pH value to within ±0.5 unit.

Alkacid* Full Range pH Test Kit

Quantity	Packaging	Cat. No.	Each	Case of
Seven 15' (4.6m) rolls	Dispensers	**A988**	67.94	12/637.52

This kit provides test papers giving speedy and accurate pH readings over the entire pH range from 0 to 14. The Alkacid Full Range Test Kit consists of a pocket-size pack containing one dispenser with Alkacid Wide Range Test Ribbon and six dispensers with Short Range Test Ribbons. Each of the seven dispensers fits in a separate compartment, with the range designated in a selection table in the top of the pack. The Wide Range paper is used to locate the approximate pH, and the appropriate Short Range paper is then used to determine the approximate pH value within ±0.5 unit.

Alkaline Iodide–Sodium Azide Solution

Fisher Scientific FL-70* Biodegradable Detergent is a concentrated cleaning compound. The low-foaming, low-alkalinity, all-purpose detergent works on hard-to-clean glassware, ceramics, etc. Also good for cleanup of radioactive spills, dried and precipitated blood, stopcock grease, glass-marking crayons, lipstick, etc. Contains no chromates or phosphates. pH of a 2% solution is 10.5.
